2016 11th ACM/IEEE
International Conference on
Human-Robot Interaction
(HRI 2016)

Christchurch, New Zealand
7 – 10 March 2016
Table of Contents

HRI 2016 Organization .......................................................................................................................... xvi
HRI 2016 Reviewers List .......................................................................................................................... xix
HRI 2016 Sponsors & Supporters ........................................................................................................... xxii

Keynote Address
- Making Simulated Faces Come Alive ............................................................................................... 1
  Mark Sagar (University of Auckland)

Session A: Assistive HRI
Session Chair: Elizabeth Broadbent (University of Auckland)
- Enabling Building Service Robots to Guide Blind People:
  A Participatory Design Approach ........................................................................................................ 3
  Shiri Azenkot (Cornell Tech), Catherine Feng, Maya Cakmak (University of Washington)
- Seeing Is Comforting: Effects of Teleoperator Visibility in Robot-Mediated Health Care .......... 11
  Kory Kraft, William D. Smart (Oregon State University)
- Emotional Robot to Examine Different Play Patterns and Affective Response of Children with and without ASD ................................................................. 19
  Laura Boccanfuso, Erin Barney, Claire Foster, Yeojin Amy Ahn, Katarzyna Chawarska, Brian Scassellati, Frederick Shic (Yale University)
- Lessons Learned from the Deployment of A Long-Term Autonomous Robot as Companion in Physical Therapy for Older Adults with Dementia:
  A Mixed Methods Study ...................................................................................................................... 27
  Denise Hebesberger (Academy for Research on Ageing), Christian Dondrup (University of Lincoln), Tobias Koertner (Academy for Research on Ageing), Christoph Gisinger (Academy for Research on Ageing, Donau-Universität Krems), Juergen Pripfl (Academy for Research on Ageing)
- Assistive Teleoperation of Robot Arms via Automatic Time-Optimal Mode Switching ............ 35
  Laura V. Herlant, Rachel M. Holladay, Siddhartha S. Srinivasa (Carnegie Mellon University)

Session B: Human-Robot Collaboration
Session Chair: Severin Lemaignan (Plymouth University)
- Using Human Knowledge Awareness to Adapt Collaborative Plan Generation,
  Explanation and Monitoring .................................................................................................................. 43
  Grégoire Milliez, Raphaël Lallement, Michelangelo Fiore, Rachid Alami (University of Toulouse)
- Robot Nonverbal Behavior Improves Task Performance in Difficult Collaborations ............ 51
  Henny Admoni (Yale University), Thomas Weng (Microsoft Corporation), Bradley Hayes, Brian Scassellati (Yale University)
- Learning from Demonstration Facilitates Human-Robot Collaborative Task Execution .... 59
  Maria Koskinopoulou, Stylianos Piperakis, Panos Trathanias (University of Crete)
- Initiative in Robot Assistance During Collaborative Task Execution ......................................... 67
  Jimmy Baraglia (Osaka University), Maya Cakmak (University of Washington), Yukie Nagai (Osaka University), Rajesh Rao (University of Washington), Minoru Asada (Osaka University)
- Formalizing Human-Robot Mutual Adaptation: A Bounded Memory Model ...................... 75
  Stefanos Nikolaidis, Anton Kuznetsov (Carnegie Mellon University), David Hsu (National University of Singapore), Siddhartha Srinivasa (Carnegie Mellon University)
- Anticipatory Robot Control for Efficient Human-Robot Collaboration ......................................... 83
  Chien-Ming Huang, Bilge Mutlu (University of Wisconsin–Madison)
• Exploring Shared Control in Automated Driving .......................................................... 91
  Mishel Johns, Brian Mok, David Sirkin, Nikhil Gowda, Catherine Smith (Stanford University),
  Walter Talamonti Jr. (Ford Motor Company), Wendy Ju (Stanford University)

Keynote Address
• Towards Reproducing Humans’ Exquisite Dexterity and Reactivity .................................. 99
  Aude Gemma Billard (Ecole Polytechnique Fédérale de Lausanne)

Session C: Morality and Trust in HRI
Session Chair: Kerstin Fischer (University of Southern Denmark)
• Overtrust of Robots in Emergency Evacuation Scenarios .................................................. 101
  Paul Robinette (Georgia Institute of Technology & Georgia Tech Research Institute),
  Wenchen Li, Robert Allen (Georgia Tech Research Institute),
  Ayanna M. Howard (Georgia Institute of Technology),
  Alan R. Wagner (Georgia Tech Research Institute)
• Trust Calibration Within A Human-Robot Team: Comparing Automatically Generated Explanations .......................................................... 109
  Ning Wang, David V. Pynadath (University of Southern California),
  Susan G. Hill (U.S. Army Research Laboratory)
• Can a Robot Bribe a Human? The Measurement of the Negative Side of Reciprocity in Human Robot Interaction .................................................. 117
  Eduardo Benitez Sandoval, Jürgen Brandstetter, Christoph Bartneck (University of Canterbury)
• Which Robot Am I Thinking About?: The Impact of Action and Appearance on People’s Evaluations of a Moral Robot .................................................. 125
  Bertram F. Malle (Brown University), Matthias Scheutz (Tufts University),
  Jodi Forlizzi (Carnegie Mellon University), John Voiklis (Brown University)

Session D: Teleoperation in HRI
Session Chair: Jenay Beer (University of South Carolina)
• Teleoperated or Autonomous?: How to Produce a Robot Operator’s Pseudo Presence in HRI .................................................. 133
  Kazuaki Tanaka (Osaka University), Naomi Yamashita (NTT Communication Science Laboratories),
  Hideyuki Nakanishi, Hiroshi Ishiguro (Osaka University)
• Personality Perception of Robot Avatar Tele-Operators .................................................. 141
  Paul Bremner (University of the West of England), Oya Celiktutan, Haticce Gunes (University of Cambridge)
• Semi-Autonomous Telerobotic Assembly over High-Latency Networks ..................................... 149
  Jonathan Bohlten, Chris Paxton, Ryan Howarth, Gregory D. Hager,
  Louis L. Whitcomb (The Johns Hopkins University),

Session E: Companionship & Engagement with Robots
Session Chair: Fumihide Tanaka (University of Tsukuba)
• From Real-Time Attention Assessment to “With-Me-Ness” in Human-Robot Interaction .................................................. 157
  Séverin Lemaignan, Fernando Garcia, Alexis Jacq,
  Pierre Dillenbourg (École Polytechnique Fédérale de Lausanne (EPFL))
• Machines as A Source of Consolation: Robot Responsiveness Increases Human Approach Behavior and Desire for Companionship .................................................. 165
  Gurit E. Birnbaum, Moran Mizrahi, Guy Hoffman (IDC Herzliya), Harry T. Reis (University of Rochester),
  Eli J. Finkel (Northwestern University), Omri Sass (Cornell Tech)
• Human Creativity Can be Facilitated Through Interacting with a Social Robot .................................................. 173
  Peter H. Kahn Jr. (University of Washington), Takayuki Kanda, Hiroshi Ishiguro (ATR & Osaka University),
  Brian T. Gill (Seattle Pacific University), Solace Shen, Jolina H. Ruckert,
  Heather E. Gary (University of Washington)
• Tell Me More: Designing HRI to Encourage More Trust, Disclosure, and Companionship .................................................. 181
  Nikolas Martelaro (Stanford University), Victoria C. Nneji (Duke University),
  Wendy Ju, Pamela Hinds (Stanford University)
• Psychological Importance of Human Agency: How Self-Assembly Affects User Experience of Robots.................................................................189
  Yuan Sun, S. Shyam Sundar (Penn State University)

Session F: Robots that Learn
Session Chair: William Smart (Oregon State University)

• Discovering Social Interaction Strategies for Robots from Restricted-Perception Wizard-of-Oz Studies ..........................................................197
  Pedro Sequeira (Universidade de Lisboa), Patricia Alves-Oliveira (Universitário de Lisboa (ISCTE-IUL), CIS-IUL), Tiago Ribeiro, Eugenio Di Tullio, Sofia Petiska, Francisco S. Melo (Universidade de Lisboa), Ginevra Castellano (Upsala University), Ana Paiva (Universidade de Lisboa)

• Incrementally Assisted Kinesthetic Teaching for Programming by Demonstration .................................................................205
  Martin Tykal (Aalto University), Alberto Montebelli (University of Skövde), Ville Kyrki (Aalto University)

• A Comparison of Types of Robot Control for Programming by Demonstration .........................................................................................213
  Kerstin Fischer (University of Southern Denmark), Franziska Kirstein (Blue Ocean Robotics), Lars Christian Jensen, Norbert Krüger (University of Southern Denmark), Kamil Kukliński (Bialystok University of Technology), Maria Vanessa aus der Wiesen, Thiussius Rajee Savaramuthu (University of Southern Denmark)

• Learning Object Affordances by Leveraging the Combination of Human-Guidance and Self-Exploration .........................................................221
  Vivian Chu, Tesca Fitzgerald, Andrea L. Thomaz (Georgia Institute of Technology)

Keynote Address

• Kicking a Robot Dog ..................................................................................................................................229
  Robert Sparrow (Monash University)

Session G: Learning with Robots
Session Chair: Cindy Bethel (Mississippi State University)

• Social Robot Tutoring for Child Second Language Learning ............................................................................231
  James Kennedy, Paul Baxter, Emmanuel Senft, Tony Belpaeme (Plymouth University)

• Building Successful Long Child-Robot Interactions in Learning Context .........................................................................................239
  Alexis Jacq, Séverin Lemaigman, Fernando Garcia, Pierre Dillenbourg (École Polytechnique Fédérale de Lausanne), Ana Paiva (University of Lisbon)

• Shaping Productive Help-Seeking Behavior During Robot-Child Tutoring Interactions .........................................................247
  Aditi Ramachandran, Alexandru Litoiu, Brian Scassellati (Yale University)

• Effects of Voice-Adaptation and Social Dialogue on Perceptions of a Robotic Learning Companion ........................................................................255
  Nichola Lubold, Erin Walker (Arizona State University), Heather Pon-Barry (Mount Holyoke College)

Session H: Movement in HRI
Session Chair: Dylan Glas (ATR)

• Emotion Encoding in Human-Drone Interaction .......................................................................263
  Jessica Cauchard, Kevin Y. Zhai (Stanford University), Marco Spadafora (Politecnico di Milano & Stanford University), James A. Landay (Stanford University)

• Viewpoint-Based Legibility Optimization ......................................................................................271
  Stefanos Nikolaidis (Carnegie Mellon University), Anca Dragan (University of California, Berkeley), Siddhartha Srinivasa (Carnegie Mellon University)

• Homotopy-Aware RRT*: Toward Human-Robot Topological Path-Planning .........................................................279
  Daqing Yi, Michael A. Goodrich, Kevin D. Seppi (Brigham Young University)

Session I: Tools & Techniques for Social Robots
Session Chair: Candace Sidner (Worcester Polytechnic Institute)

• An Open Platform for the Design of Social Robot Embodiments for Face-To-Face Communication ........................................................287
  Cesar Vandevelde, Jelle Saldien (Ghent University)
• Design and Evaluation of Rapid Programming System for Service Robots .............................................295
  Justin Huang (University of Washington), Tessa Lau (Savioke, Inc.), Maya Cakmak (University of Washington)

• Human-Robot Interaction Design Using Interaction Composer:
  Eight Years of Lessons Learned..........................................................303
  Dylan F. Glas, Takayuki Kanda (ATR), Hiroshi Ishiguro (Osaka University)

• Situated Open World Reference Resolution for Human-Robot Dialogue........................................311
  Tom Williams, Saurav Acharya (Tufts University), Stephanie Schreitter (Austrian Research Institute for Artificial Intelligence), Matthias Scheutz (Tufts University)

• An Implemented Theory of Mind to Improve Human-Robot Shared Plans Execution ..................319
  Sandra Devin, Rachid Alami (University de Toulouse)

Session J: Attitudes and Responses to Social Robots

Session Chair: Mark Neerincx (TU Delft)

• Human-Robots Implicit Communication based on Dialogue between Robots using Automatic Generation of Funny Scenarios from Web ..................................................327
  Ryo Mashimo, Tomohiro Umetani, Tatsuya Kitamura, Akiyo Nadamoto (Konan University)

• Do People Spontaneously Take Robot Visual Perspective? ............................................................335
  Xuan Zhao (Brown University), Corey Cusimano (University of Pennsylvania), Bertram F. Malle (Brown University)

• The Hollywood Robot Syndrome: Media Effects on Older Adults’ Attitudes toward Robots and Adoption Intentions ........................................................343
  S. Shyam Sundar, T. Franklin Waddell, Eun Hwa Jung (Penn State University)

• Are We Ready for Sex Robots? ..................................................................................351
  Matthias Scheutz, Thomas Arnold (Tufts University)

• Overcoming the Uncanny Valley: Displays of Emotions Reduce the Uncanniness of Humanlike Robots ........................................................359
  Miriam Koschate, Richard Potter (University of Exeter), Paul Bremner (University of the West of England), Mark Levine (University of Exeter)

Session: alt.HRI

Session Chair: James Young (University of Manitoba)

• The Ethical Risk of Attachment: How to Identify, Investigate and Predict Potential Ethical Risks in the Development of Social Companion Robots ..........................367
  Andreas Huber, Astrid Weiss, Marjo Rauhala (Vienna University of Technology)

• Integrating Roboticist Values into a Value Sensitive Design Framework for Humanoid Robots ..................................................................................................................375
  EunJeong Cheon, Norman Makoto Su (Indiana University Bloomington)

• Lessons From Teachers on Performing HRI Studies with Young Children in Schools ..................383
  Jacqueline Kory Westlund (MIT Media Lab), Goren Gordon (MIT Media Lab & Tel-Aviv University), Samuel Spaulding, Jin Joo Lee, Luke Plummer, Marayna Martinez, Madhurima Das, Cynthia Breazeal (MIT Media Lab)

• From Characterising Three Years of HRI to Methodology and Reporting Recommendations ....391
  Paul Baxter, James Kennedy, Emmanuel Senft, Séverin Lemaignan, Tony Belpaeme (Plymouth University)

• Investigating the Impact of Gender Segregation within Observational Pretend Play Interaction ....399
  Anara Sandygulova (Nazarbayev University), Gregory M.P. O'Hare (University College Dublin)

Late Breaking Reports

• Applying Adaptive Social Mobile Agent to Facilitate Learning ..................................................407
  Muneeb Imtiaz Ahmad, Omar Mubin (Western Sydney University)

• Are You Messing with Me? Querying about the Sincerity of Interactions in the Open World ........409
  Sean Andrist (University of Wisconsin - Madison & Microsoft Research), Dan Bohus (Microsoft Research), Zhou Yu (Carnegie Mellon University & Microsoft Research), Eric Horvitz (Microsoft Research)
• On the Eeriness of Service Robots with Emotional Capabilities ..............................................411
  Markus Appel, Silvana Weber, Stefan Krause (University of Koblenz-Landau),
  Martina Mara (Ars Electronica Futurelab)

• Emoibe™: A Robot Companion for Children with Anxiety .......................................................413
  Lindsey Arnold (University of Washington)

• Modeling of Honest Signals for Human Robot Interaction .......................................................415
  Muhammad Attamimi, Yusuke Katakami, Kasumi Abe, Takayuki Nagai,
  Tomoaki Nakamura (The University of Electro-Communications)

• Integrating Animation Artists into the Animation Design of Social Robots: An Open-Source Robot Animation Software .................................................................417
  Etienne Balit, Dominique Vaufreydz, Patrick Reignier (Université Grenoble-Alpes)

• Robot Assisted Music Therapy: A Case Study with Children Diagnosed with Autism ..................419
  Jenay M. Beer, Michelle Boren, Karina R. Liles (University of South Carolina)

• Interactive Robotic Framework for Multi-Sensory Therapy for Children with Autism Spectrum Disorder ........................................................................................................421
  Rachael Bevill, Chung Hyuk Park (George Washington University), Hyung Jung Kim (Centscere, LLC),
  JongWon Lee (Samsung Electronics), Ariana Rennie (New York Institute of Technology),
  Myounghoon Jeon (Michigan Technological University), Ayanna M. Howard (Georgia Institute of Technology)

• How Expressiveness of a Robotic Tutor Is Perceived by Children in a Learning Environment .................................................................423
  Amol Deshmukh, Srinivasan Janarthanam, Helen Hastie, Mei Yi Lim, Ruth Aylett (Heriot-Watt University),
  Ginevra Castellano (Uppsala University)

• Evaluating Peer Versus Teacher Robot within Educational Scenario of Programming Learning .................................................................425
  Yerassyl Diyas, Dmitry Brakk, Yernar Aimambetov, Anara Sandygulova (Nazarbayev University)

• A Large Scale Tactile Sensor for Safe Mobile Robot Manipulation ........................................427
  Markus Fritzschke, Jose Saenz, Felix Penzlzin (Fraunhofer Institute for Factory Operation and Automation IFF)

• Haptic Communication Robot for Urgent Notification of Hearing-Impaired People ..............429
  Michihiko Furuhashi, Tsuyoshi Nakamura (Nagoya Institute of Technology),
  Masayoshi Kanoh (Chukyo University), Koji Yamada (Institute of Advanced Media and Sciences)

• Study on Transition of Elderly People’s Reactions in Robot Therapy .........................................431
  Toshimitsu Hamada (Tokusho Gakuen University), Yoshihito Kagawa (Takushoku University),
  Hisashi Onari (Waseda University), Mitsuru Naganuma (Teikyo University of Science),
  Tomomi Hashimoto (Tsukuba Gakuin University), Yoshiyuki Hatano (Takushoku University),
  Toshihiko Yoneoka, Akihito Toh (Teikyo University of Science)

• Expectations Towards Two Robots with Different Interactive Abilities .....................................433
  Kerstin Katsami Sophie Haring Watanabe (Waseda University),
  David Mari Silvera-Tawil Velonaki (University of New South Wales)

• Lingodroids: Investigating Grounded Color Relations Using a Social Robot for Children ...............435
  Scott Heath, Kristyn Hensby, Marie Boden, Jonathon Taufatofua, Jason Weigel,
  Janet Wiles (University of Queensland)

• Hand in Hand: Tools and Techniques for Understanding Children’s Touch with a Social Robot .................................................................437
  Kristyn Hensby, Janet Wiles, Marie Boden, Scott Heath, Mark Nielsen, Paul Pounds, Joshua Riddell,
  Kristopher Rogers, Nikodem Rybak, Virginia Slaughter, Michael Smith, Jonathon Taufatofua, Peter Worthy,
  Jason Weigel (University of Queensland)

• Action Elements of Emotional Body Expressions for Flying Robots ..........................................439
  Chie Hieida, Hiroyuki Matuda, Shunsuke Kudoh, Takashi Suehiro
  (The University of Electro-Communications)

• Analysis of Android Robot Lip-Sync Factors Affecting Communication ...................................441
  Hyun-Jun Hyung (Korea University of Science & Technology & Korea Institute of Industrial Technology),
  Byeong-Kyu Ahn (Korea Institute of Industrial Technology), Brian Cruz, Dong-Wook Lee
  (Korea University of Science & Technology & Korea Institute of Industrial Technology)

• Maintaining Trust while Fixated to a Rehabilitative Robot ..........................................................443
  Laura U. Jensen (Mærsk Mc-Kinney Moller Institute), Trine S. Winter, Rasmus, Didde M. Hellestrup,
  Lars C. Jensen (University of Southern Denmark)
• Making Live Theatre with Multiple Robots as Actors: Bringing Robots to Rural Schools to Promote STEAM Education for Underserved Students................................................................. 445
  Myounghoon Jeon, Maryam Fakhrhosseini, Jaclyn Barnes, Zackery Duford, Ruimin Zhang, Joseph Ryan, Eric Vasey (Michigan Tech)

• Generating Iconic Gestures Based on Graphic Data Analysis and Clustering .................................................. 447
  Yuki Kadono, Yutaka Takase, Yukiko I. Nakano (Seikei University)

• NAMIDA: How to Reduce the Cognitive Workload of Driver ........................................................................... 449
  Nihan Karatas, Soshi Yoshikawa, P. Ravindra De Silva, Michio Okada (Toyohashi University of Technology)

• Heart vs Hard Drive: Children Learn More from a Human Tutor than a Social Robot .................................. 451
  James Kennedy, Paul Baxter, Emmanuel Senft, Tony Belpaeme (Plymouth University)

• Social Robots in Educational Institutions: They Came to Stay: Introducing, Evaluating, and Securing Social Robots in Daily Education................................................................. 453
  Franziska Kirstein, Rikke Voldsgaard Risager (Blue Ocean Robotics)

• How Robot’s Animacy Affects Human Tolerance for Their Malfunctions? ...................................................... 455
  Tomoko Koda, Yuta Nishimura, Tomofumi Nishijima (Osaka Institute of Technology)

• Japanese Students Apply Same Moral Norms to Humans and Robot Agents: Considering a Moral HRI in Terms of Different Cultural and Academic Backgrounds .................................. 457
  Takanori Komatsu (Meiji University)

• A Study to Measure the Effect of Framing a Robot as a Social Agent or as a Machine on Children’s Social Behavior .......................................................................................................................... 459
  Jacqueline M. Kory Westlund, Marayna Martinez, Maryam Archie, Madhurima Das, Cynthia Breazeal (MIT Media Lab)

• Robotic Assistance in Indoor Navigation for People Who Are Blind .............................................................. 461
  Aditi Kulkarni, Allan Wang (Carnegie Mellon University), Lynn Urbina (University of Pittsburgh), Aaron Steinfeld, Bernardine Dias (Carnegie Mellon University)

• Human Expectations of Social Robots .................................................................................................................. 463
  Minae Kwon, Malte F. Jung, Ross A. Knepper (Cornell University)

• Discrimination of Humanoid Robots from Real Human in a Perception Sensor Network ....................................... 465
  Vu Anh Le, Minh Hoang Do, Sang-Seok Yun, JongSuk Choi (Korea Institute of Science and Technology)

• Soft Systems Methodology as a Tool to Aid a Pilot Study in Robot-Assisted Therapy .................................... 467
  Lundy Lewis, Nancy Charron, Christina Clamp (Southern New Hampshire University), Michael Craig (Sunset Heights Elementary School)

• Employing User-Generated Content to Enhance Human-Robot Interaction in a Human-Robot Trust Game ................................................................................................................................. 469
  Yuhua (Jake) Liang (Chapman University), Seungcheol Austin Lee (Northern Kentucky University)

• Social Interaction Moderates Human-Robot Trust-Reliance Relationship and Improves Stress Coping ............... 471
  Monika Lohani (Yale University), Charlene Stokes (Yale University & Air Force Research Laboratory), Marissa McCoy, Christopher A. Bailey, Susan E. Rivers (Yale University)

• Influence of a Humanoid Robot in Human Decision-Making When Using Direct & Indirect Requests .............. 473
  Alexander López (Pontificia Universidad Católica del Perú), Christian Peñaloza (ART Institute), Francisco Cuéllar (Pontificia Universidad Católica del Perú)

• “You Win, I Lose”: Towards Adapting Robot’s Teaching Strategy ........................................................................ 475
  Serik Meiirbekov, Kairat Balkibekov, Zhantarbek Jalankuzov, Anara Sandygulova (Nazarbayev University)

• Improving Robot Reactivity to Passers-By with a Faster People Detector ........................................................ 477
  Alhayat Ali Mekonnen (CNRS-LAAS), Frédéric Lerasle, Ariane Herboulé (CNRS-LAAS & University de Toulouse)

• Identifying Reusable Primitives in Narrated Demonstrations .............................................................................. 479
  Anahita Mohseni-Kabir (Worcester Polytechnic Institute), Sonia Chernova (Georgia Institute of Technology), Charles Rich (Worcester Polytechnic Institute)
• A Multi-Modal Perception based Architecture for a Non-Intrusive Domestic Assistant Robot ........................................... 481
Christopher Möllaret (University of Toulouse & CNRS), Alhayat Ali Mekonnen (CNRS), Julien Pinquier (University of Toulouse), Frédéric Lerasle (CNRS & University de Toulouse), Isabelle Ferrané (University of Toulouse),
• Who Should Robots Adapt to Within a Multi-Party Interaction in a Public Space? ....................... 483
Saida Mussakhjojayaeva, Madi Zhanbyrtyayev, Yerlik Agzhanov, Anara Sandygulova (Nazarbayev University)
• Child’s Culture-Related Experiences with a Social Robot at Diabetes Camps ........................................ 485
Anouk Neerincx (Leiden University), Francesca Sacchitelli (Ospedale San Raffaele), Rianne Kaptein, Sylvia van der Pal (TNO), Eletra Oleare (Fondazione Centro San Raffaele), Mark A. Neerincx (Delft University of Technology),
• New Design of a Manipulator Control Interface that Employs Voice and Multi-Touch Command ............................................................................. 487
Tetsushi Oka, Keisuke Matsushima (Niho University)
• A Pilot Study about Remote Teaching by Elderly People to Children over a Two-Way Telepresence Robot System ............................................................................ 489
Eri Onokura, Fumihide Tanaka (University of Tsukuba)
• A Novel Concept of Human-Robot Competition for Evaluating a Robot’s Reasoning Capabilities in HRI .............. 491
Amit Kumar Pandey (Aldebaran Robotics), Lavindra de Silva (University of Nottingham), Rachid Alami (LAAS-CNRS)
• Robot Social Skills for Enhancing Social Interaction in Physical Training ............................................. 493
Chenoshu Park, Jae Young Kim (ETRI), Ji-Hoon Kang (Chungnam National University)
• What Untrained People Do When Asked “Make the Robot Come to You” ....................................................... 495
Shokoofeh Pourmehr, Jack Thomas, Richard Vaughan (Simon Fraser University)
• Results of a Real World Trial with a Mobile Social Service Robot for Older Adults .................. 497
Jürgen Pripli, Tobias Körtner, Daliah Batko-Klein, Denise Hebesberger, Markus Willinger (Akademie für Altersforschung am Haus der Barmherzigkeit), Christoph Gisinger (Akademie für Altersforschung am Haus der Barmherzigkeit & Zentrum für Geriatrische Medizin und Geriatrische Pflege Donau Universität Krems), Susanne Fernert, Hakan Eftring (Lund University), Margarita Antonia, Ilia Adami (Foundation for Research and Technology - Hellas (FORTH)), Astrid Weiss, Markus Bajones, Markus Vincze (Vienna University of Technology)
• Discovering Patterns of Touch: A Case Study for Visualization-Driven Analysis in Human-Robot Interaction ................................................................................. 499
Kris Rogers, Janet Wiles, Scott Heath, Kristyn Hensby, Jonathon Taufatofoia (University of Queensland)
• Studying the Opposing Effects of Robot Presence on Human Corruption .................................................. 501
Michal Rotzman, Guy Hoffman, Shahar Ayal, Guy Hochman, Michal Reifen Tagar, Yossi Maaravi (Interdisciplinary Center (IDC) Herzlia)
• Natural Human-Robot Interaction Using Social Cues .................................................................................. 503
Hugo Romat, Mary-Anne Williams, Xun Wang, Benjamin Johnston, Henry Bard (University of Technology of Sydney)
• Vocal Interaction with a 7-DOF Robotic Arm for Object Detection, Learning and Grasping ........................................................................................................ 505
S. Rosa, A. Russo, A. Saglinbien, G. Toscana (Politecnico di Torino)
• User Feedback on Physical Marker Interfaces for Protecting Visual Privacy From Mobile Robots ................................................................................................................. 507
Matthew Rueben, Frank J. Bernieri, Cindy M. Grimm, William D. Smart (Oregon State University)
• Smart Topic Detection for Robot Conversation ......................................................................................... 509
Elise Russell, Richard J. Povinelli, Andrew B. Williams (Marquette University)
• The Birth of New Discipline: Robotology. A First Robotologist Study over a Robot Maori Haka ........................................................................................................ 511
Eduardo Benitez Sandoval, Omprakash Rudhru, Qi Min Ser (University of Canterbury)
• Providing a Robot with Learning Abilities Improves its Perception by Users .............................................. 513
  Emmanuel Senft, Paul Baxter, James Kennedy, Séverin Lemaignan, Tony Belpaeme (Plymouth University)

• Adverb Palette: GUI-Based Support for Human Interaction in Multi-Objective Path-Planning .......................................................... 515
  Meher T. Shaikh, Michael A. Goodrich, Daqing Yi (Brigham Young University)

• Impact of Affective Appraisal on Collaborative Goal Management:
  My Robot Shares My Worries .................................................................................................................. 517
  Mahni Shayganfar, Charles Rich, Candace L. Sidner (Worcester Polytechnic Institute)

• How Would Store Managers Employ Social Robots? .......................................................... 519
  Chao Shi (ATR IRC Laboratories & Osaka University), Satoru Satake, Takayuki Kanda (ATR IRC Laboratories),
  Hiroshi Ishiguro (ATR IRC Laboratories & Osaka University)

• Children’s Perceptions of and Interactions with a Telepresence Robot .............................................. 521
  Kyoung Wan Cathy Shin (Indiana University), Jeonghey Han (Cheongju National University of Education)

• Intent Communication in Navigation through the Use of Light and Screen Indicators ......................... 523
  Moondeep C. Shrestha, Ayano Kobayashi, Tomoya Onishi, Erika Uno, Hayato Yanagawa,
  Yuta Yokoyama, Mitsuhiko Kamezaki, Alexander Schmitz, Shigeki Sugano (Waseda University)

• Analysis of Long-Term and Large-Scale Experiments on Robot Dialogues
  Using a Cloud Robotics Platform .............................................................................................................. 525
  Komei Sugiura, Koji Zettsu (National Institute of Information and Communications Technology)

• Crowdsourced Coordination Through Online Games .............................................................................. 527
  Arash Tavakoli, Haig Nalbandian, Nora Ayanian (University of Southern California)

• Safe Human-Robot Cooperation with High-Payload Robots in Industrial Applications .................... 529
  Christian Vogel, Markus Fritzsche, Norbert Elkmann (Fraunhofer Institute for Factory Operation and Automation IFF),

• Social Cardboard: Prototyping a Social Ethnodroid in the Wild .......................................................... 531
  Janet Wiles, Peter Worthy, Kristyn Hensby, Marie Boden, Scott Heath, Paul Pounds, Nikodem Rybak,
  Michael Smith, Jonathon Taufotofua, Jason Weigel (University of Queensland)

• Socially Contingent Humanoid Robot Head Behaviour Results in Increased Charity Donations ........ 533
  Paul Wills, Paul Baxter, James Kennedy, Emmanuel Senft, Tony Belpaeme (Plymouth University)

• Human-Robot Partnership: A Study on Collaborative Storytelling .......................................................... 535
  Clarice Jiaying Wong, Yong Ling Tay (Raffles Girls School (Secondary)),
  Ruohan Wang, Yan Wu (A*STAR Institute of Infocomm Research),

• Improving Social Skills of Robot for Triggering Distant Informal Communication in the Office ........ 537
  Jianfeng Xu (KDDI R&D Laboratories, Inc.), Inge Becht (Utrecht University),
  Shigeyuki Sakazawa (KDDI R&D Laboratories, Inc.),

• Assessing the Communication Attitude of the Elderly Using Prosodic Information and Head Motions .......................................................... 539
  Toshiki Yamanaka, Yutaka Takase, Yukiko I. Nakano (Seikei University)

• Help-Giving Robot Behaviors in Child-Robot Games:
  Exploring Semantic Free Utterances ....................................................................................................... 541
  Cristina Zaga, Roelof A.J. De Vries, Sem J. Spenkelink, Khiet P. Truong, Vanessa Evers (University of Twente)

• Priming Anthropomorphism: Can the Credibility of Humanlike Robots be Transferred to Non-Humanlike Robots? .......................................................... 543
  Debora Zanatto, Massimiliano Patacchiola, Jeremy Goslin, Angelo Cangelosi (Plymouth University)

• Designing an Interactive Device for Sensory Therapy .............................................................................. 545
  Igor Zubrycki, Grzegorz Granosik (Lodz University of Technology)
Demos

- Educational Robots as Promotors of Cultural Development .......................................................... 547
  Francisco Cuellar (Pontificia Universidad Católica del Perú), Christian Peñaloza (ART Institute),
  Alexander López (Pontificia Universidad Católica del Perú)

- Robot Maori Haka .............................................................................................................................. 549
  Qi Min Ser, Omprakash Rudhru, Eduardo Benitez Sandoval (University of Canterbury)

- Paperson: The Intelligent Paper Toy ................................................................................................. 551
  Sonya S. Kwak, Hyeme Kang, Hyewon Lee, Chenghuan Wu (Ewha Womans University)

- Compliant and Compact Joint Mechanism for a Child Android Robot ............................................... 553
  Hisashi Ishihara (Osaka University)

- Demonstration of Opsoro – An Open Platform for Social Robots ..................................................... 555
  Cesar Vandevelde, Jelle Saldien (Ghent University)

Videos

Session Chair: Cindy Bethel (Mississippi State University)

- Smart Personal Mobility (SPM) for Service and Entertainment .......................................................... 557
  Daesung Jeon (Advanced Institutes of Convergence Technology (AICT)),
  Woo Taek Hong (Hanyang University),
  Hoimyung Choi (Advanced Institutes of Convergence Technology (AICT))

- NavCue: Context Immersive Navigation Assistance for Blind Travelers ........................................ 559
  Kangwei Chen (Carnegie Mellon University),
  Victoria Plaza-Leiva (Carnegie Mellon University & Universidad de Malaga),
  Byung-Cheol Min (Purdue University), Aaron Steinfeld, Mary Bernardine Dias (Carnegie Mellon University)

- Tega: A Social Robot .......................................................................................................................... 561
  Jesse Gray, Matt Berlin (IF Robots), Harald Quintus-Bosz, Robert Hartmann, Mike Hess (Cooper Perkins),
  Stacy Dyer (Dyer Design), Cristopher dos Santos, Sigurður Órn Adalgeirsson (MIT Media Lab),
  Goren Gordon (Tel-Aviv University), Samuel Spaulding, Marayna Martinez, Madhurima Das,
  Maryam Archie, Sooyeon Jeong, Cynthia Breazeal (MIT Media Lab)

- Building a Social Robot as a Game Companion in a Card Game .................................................... 563
  Filipa Correia, Tiago Ribeiro, Patricia Alves-Oliveira, Francisco S. Melo, Ana Paiva (Universidade de Lisboa)

- Augmented Reality Eyeglasses for Promoting Home-Based Rehabilitation for Children with Cerebral Palsy ................................................................. 565
  Christopher Munroe, Yuanliang Meng, Holly Yanco, Momotaz Begum (University of Massachusetts)

- Map Reading with an Empathic Robot Tutor ...................................................................................... 567
  Lynne Hall, Colette Hume, Sarah Tazzyman (University of Sunderland),
  Anmol Deshmukh, Srinivasan Janarthanam, Helen Hastie, Ruth Aylett (Heriot-Watt University),
  Ginevra Castellano, Fotis Papadopoulos, Aidan Jones, Lee J. Corrigan (University of Birmingham),
  Ana Paiva, Patricia Alves Oliveira, Tiago Ribeiro (Universidade de Lisboa),
  Wolmet Barendregt, Sofia Serholt (University of Gothenburg), Arvid Kappas (Jacobs University)

- Robot Maori Haka: Robots as Cultural Preservationists ................................................................. 569
  Omprakash Rudhru, Qi Min Ser, Eduardo Sandoval (University of Canterbury)

- Multisensory Robotic Therapy to Promote Natural Emotional Interaction for Children with ASD ................................................................. 571
  Rachael Bevill, Paul Azzi, Matthew Spadafora, Chung Hyuk Park (George Washington University),
  Hyung Jung Kim (Centscere, LLC), JongWon Lee (Samsung Electronics),
  Kazi Rahian (New York Institute of Technology), Myounghoon Jeon (Michigan Technological University),
  Ayanna M. Howard (Georgia Institute of Technology)

- Autonomous Human-Robot Proxemics: A Robot-Centered Approach ............................................ 573
  Ross Mead, Maja J. Matarić (University of Southern California)

- Social Robots for Automated Remote Instruction ............................................................................. 575
  Jamy Li, Wendy Ju (Stanford University)

- Tell Me More: Designing HRI to Encourage More Trust, Disclosure, and Companionship ............ 577
  Nikolas Martelaro (Stanford University), Victoria C. Nneji (Duke University), Wendy Ju,
  Pamela Hinds (Stanford University),
Tutorial & Workshop Summaries
Session Chair: Bruce MacDonald (University of Auckland)

- **Cognitive Architectures for Social Human-Robot Interaction** ............................................................. 579
  Paul Baxter, Séverin Lemaigre (Plymouth University), J. Gregory Trafton (Naval Research Laboratory)

- **Design Skills for HRI** .......................................................................................................................... 581
  David Sirkin, Nik Martelaro, Hamish Tennent, Mishel Johns, Brian Mok, Wendy Ju (Stanford University), Guy Hoffman (Cornell University), Heather Knight (Carnegie Mellon University), Bilge Mutlu (University of Wisconsin - Madison), Leila Takayama (Google)

- **The Challenge (Not) to Go Wild! Challenges and Best Practices to Study HRI in Natural Interaction Settings** ........................................................................................................... 583
  Astrid Rosenthal-von der Pütten (University of Duisburg-Essen), Astrid Weiss (Vienna University of Technology), Selma Šabanović (Indiana University Bloomington)

- **Workshop on Intention Recognition in HRI** ........................................................................................... 585
  Serge Thill, Alberto Montebelli (University of Skövde), Tom Ziemke (University of Skövde & Linköping University)

- **2nd Workshop on Evaluating Child Robot Interaction** ......................................................................... 587
  Cristina Zaga, Manja Lohse, Vicky Charisi, Vanessa Evers (University of Twente), Marc Neerincx (Delft University of Technology / TNO Soesterberg), Takayuki Kanda (ATR), Iolanda Leite (Disney Research)

Pioneers Workshop Abstracts

- **Developing a Healthcare Robot with Personalized Behaviors and Social Skills for the Elderly** ........... 589
  Roxana M. Agrigoroaei, Adriana Tapus (Université Paris-Saclay)

- **Boosting Children’s Creativity through Creative Interactions with Social Robots** .............................. 591
  Patrícia Alves-Oliveira (Universidade de Lisboa & Instituto Universitário de Lisboa (ISCTE-IUL)), Patrícia Arriaga (Instituto Universitário de Lisboa (ISCTE-IUL)), Guy Hoffman (Cornell University), Ana Paiva (Universidade de Lisboa)

- **Interaction with the Paro Robot May Reduce Psychophysiological Stress Responses** ....................... 593
  Raihah Aminuddin (University of Sheffield & MARA University of Technology), Amanda Sharkey, Liat Levita (University of Sheffield)

- **Ontological Reasoning for Human-Robot Teaming in Search and Rescue Missions** ......................... 595
  Bagosi Timea, Koen V. Hindriks, Mark A. Neerincx (Delft University of Technology)

- **Enabling Long-Term Human-Robot Interaction through Adaptive Behavior Coordination** ............... 597
  Markus Bajones (Vienna University of Technology)

- **Embodied Queries for Robot Task Learning** .......................................................................................... 599
  Kalesha Bullard (Georgia Institute of Technology)

- **Nonverbal Signaling for Non-Humanoid Robots During Human-Robot Collaboration** ....................... 601
  Elizabeth Cha, Maja Matarić (University of Southern California), Terrence Fong (NASA Ames Research Center)

- **Integrating Roboticist Values into a Design Framework for Humanoid Robots** ................................. 603
  EunJeong Cheon, Norman Makoto Su (Indiana University Bloomington)

- **Learning and Grounding Haptic Affordances Using Demonstration and Human-Guided Exploration** ................................................................................................................................. 605
  Vivian Chu, Andrea L. Thomaz (Georgia Institute of Technology)

- **Child, Robot and Educational Material: A Triadic Interaction** ............................................................... 607
  Daniel Davison (University of Twente)

- **Evolutionary Method for Robot Morphology: Case Study of Social Robot Probo** .............................. 609
  Albert De Beir, Bram Vanderborght (Vrije Universiteit Brussel)

- **Learning Complex Sequential Tasks from Demonstration: A Pizza Dough Rolling Case Study** .......... 611
