EmQM15: Emergent Quantum Mechanics 2015

Journal of Physics: Conference Series Volume 701

Vienna, Austria
23 – 25 October 2015

Editors:

Gerhard Grossing  Johannes Mesa Pascasio
Hans-Thomas Elze    Jan Walleczek

ISSN: 1742-6588
Table of contents

**Volume 701**

EmQM15: Emergent Quantum Mechanics 2015
23–25 October 2015, Vienna, Austria

Accepted papers received: 2 March 2016
Published online: 30 March 2016

**Invited lectures**

012001
OPEN ACCESS
*Is the World Local or Nonlocal? Towards an Emergent Quantum Mechanics in the 21st Century*

Jan Walleczech and Gerhard Grössing  pg. 1

012002
OPEN ACCESS
*Bell's theorem and the measurement problem: reducing two mysteries to one?*

Eric G. Cavalcanti  pg. 7
Bohmian Conditional Wave Functions (and the status of the quantum state)
Travis Norsen  pg. 15

Can decoherence make quantum theories unfalsifiable? Understanding the quantum-to-classical transition without it
X. Oriols  pg. 26

The super-indeterminism in orthodox quantum mechanics does not implicate the reality of experimenter free will
J Walleczek  pg. 42

Conditions for Lorentz-invariant superluminal information transfer without signaling
G Grössing, S Fussy, J Mesa Pascasio and H Schwabl  pg. 51

Momentum exchange in the electron double-slit experiment
Herman Batelaan, Eric Jones, Wayne Cheng-Wei Huang and Roger Bach  pg. 63

Electron system correlated by the zero-point field: physical explanation for the spin-statistics connection
A M Cetto and L de la Peña  pg. 77
Trading drift and fluctuations in entropic dynamics: quantum dynamics as an emergent universality class

Daniel Bartolomeo and Ariel Caticha  pg. 88

Structure Process, Weak Values and Local Momentum

B. J. Hiley  pg. 98

Weak Values, the Reconstruction Problem, and the Uncertainty Principle

Charlyne de Gosson and Maurice de Gosson  pg. 111

Models of spontaneous wave function collapse: what they are, and how they can be tested

Angelo Bassi  pg. 119

Exploring the propagation of relativistic quantum wavepackets in the trajectory-based formulation

Hung-Ming Tsai and Bill Poirier  pg. 126

How quantization of gravity leads to a discrete space-time

Gerard 't Hooft  pg. 141

Probing a gravitational cat state: Experimental Possibilities

M. Derakhshani, C. Anastopoulos and B. L. Hu  pg. 155
012016
OPEN ACCESS
Uncertainty relations and precession of perihelion

Fabio Scardigli and Roberto Casadio  pg. 165

012017
OPEN ACCESS
Quantum features of natural cellular automata

Hans-Thomas Elze  pg. 173

012018
OPEN ACCESS
Atoms of Spacetime and the Nature of Gravity

Thanu Padmanabhan  pg. 182

012019
OPEN ACCESS
Nonlinear Schrödinger equation in foundations: summary of 4 catches

Lajos Diósi  pg. 202

012020
OPEN ACCESS
All is Ψ

Lev Vaidman  pg. 207

012021
OPEN ACCESS
EPR paradox, quantum nonlocality and physical reality

M Kupczynski  pg. 216
Dirac neutrino mass from a neutrino dark matter model for the galaxy cluster Abell 1689

Theodorus Maria Nieuwenhuizen  pg. 233

Posters

Can a sub-quantum medium be provided by General Relativity?

Thomas C Andersen  pg. 245

Local ontology for a dual-rail qubit

Pawel Blasiak  pg. 247

On Undecidability and the Laws of Physics

Erik F G van Heusden  pg. 249

Contextually in a Peres—Mermin square using arbitrary operators

A Laversanne-Finot, A Ketterer, M R Barros, S P Walborn, T Coudreau, A Keller and P Milman  pg. 251

Extending Bell's Theorem: Ruling out Parameter Independent Hidden Variable Theories

G J Leegwater  pg. 253
The weak value of spin for atomic systems
V Monachello and R Flack   pg. 255

About what can be witnessed by a Leggett—Garg inequality test: modeling its violation
Saulo V Moreira, Arne Keller, Thomas Coudreau and Pérola Milman   pg. 258

Measuring the weak value of momentum in a double slit atom interferometer
J Morley, P D Edmunds and P F Barker   pg. 260

Regularization of derivatives on non-differentiable points
Dimiter Prodanov   pg. 262

A process algebra model of QED
William Sulis   pg. 264

Classical gravity from certain models of emergent quantum mechanics
Ricardo Gallego Torromé   pg. 266

Quantum mechanics emerging from stochastic dynamics of virtual particles
Roumen Tsekov   pg. 268
Gravity-matter entanglement in Regge quantum gravity

Nikola Paunković and Marko Vojinović  pg. 271

Emergent quantum mechanics without wavefunctions

J Mesa Pascasio, S Fussy, H Schwabl and G Grössing  pg. 274
