Third EAGE Workshop on Iraq

Unlocking the Potential of the Giant Oil Field in Southern Iraq

Dubai, United Arab Emirates
16-18 November 2015

# TABLE OF CONTENTS

Sequence Stratigraphy and Reservoir Heterogeneity Related to the Mishrif Formation, Rumaila Field, Southern Iraq ................................................. 1  

Impact of Reservoir Heterogeneity on Field Development and Reservoir Management of the Mishrif Reservoir, West Qurna 1, Southern Iraq .......................... 3  

Sequence Stratigraphy of the Mishrif Formation West Qurna-2 Field ........................................... 5  
Q. Davies, D. Green, N. Belyaeva, A. Chistyakov, T. Ershov, S. Yakubovskyi  

Preliminary Sequence-Stratigraphic Framework and Reservoir Characteristics of the Mauddud Reservoir, West Qurna 1 Field, Iraq ........................................... 7  
S. Van Simeys, S. Fullmer, L. Yose, N. Stephens  

Using Multiple Seismic Attributes to Improve Characteristics of the Complex Mishrif Carbonate Reservoir, Rumaila Field, South East Iraq ........................................... 9  
O.J. Olatoke, K. Tough, C. Lehmann, J. Gardner  

Review of Lost Circulation Mechanisms in a Southern Iraq Oil Field ............................................. 11  
U. Bhan Rai, A. Adwani, H. Mishra, E. Follows, F. Abbas, M.A. Mohammed  

A Seismic Case Study in Southern Iraq: From 3D Acquisition to Seismic Characterization of Mishrif Reservoir ................................................................. 16  
F. Luoni, A. Amato del Monte, C. Chinga, A. Corrao, M. Ferrari, S. Miragliotta, J. Rodrigues, E. Sanguinetti  

Karst Heterogeneities Captured Through Integration of Static & Dynamic Data .................................. 19  
G. Sprega, F. Bigoni, R. Marino, S. Banosir  

Early Cretaceous Deltaic Deposits of the Zubair Formation, SE Iraq: Depositional Controls on Reservoir Performance ......................................................... 23  
M. Wells, R. Brown, A. Bowman, D. Kitching, D. Finucane, B. Kostic  

Sequence Stratigraphy and Sedimentary Environment of the Upper Part of Main Pay Member in Rumaila Oil Field ......................................................... 25  
G.Y. Gao, Y.X. Zhu, W.M. Zhang, S.S. Liu  

The Upper Shale Reservoir, Zubair Formation, Rumaila Field, Southeast Iraq: Integrated Subsurface Description in Support of Field Production & Development ........................................... 29  
A.P. Bowman, E. Jude, M. Wells, C. Bishop, M. Pointing, A. Bullimore, C. Santos, B. Kostic  

Design Challenges of Full Field Waterflooding Project in a Southern Iraq Oilfield .............................. 31  
V. Vinayagam, A.H. Faisal, M.F. Azman, K. Theseira  

Challenges for a Successful Water Injection in Mishrif Carbonate, Rumaila Oilfield ............................ 36  
C.W. Wei, Y. Li, Q. Zhang, C. Tian, B. Song  

Through-casing Reservoir Monitoring: Method of Water Investigation in Very Low Water-Cut Wells in Southern Iraq ......................................................... 41  
S. Kundu, K. Hindawi, A. Turki  

Improving Quality of Simulation Modeling Using Assisted History Matching Workflows: A Case Study of Zubair Formation ................................................. 44  
L. Cocco, I. Sarpily  

Improved Multi-Scale Fracture Models Based on Quantitative Analysis of Outcrop Analogue Pressures ................................. 47  

The Utilization of Borehole Images for Sampling Optimization in Heterogeneous Carbonate Reservoirs of South Iraq ......................................................... 52  
I. Al-Saeedi, W. M. Alward, F. Ali, M. Sarili, C. Shrivastava  

Characterization of Mineralization Related Flow Heterogeneity within the Zubair Reservoir Sandstones in Rumaila Oilfield ................................................. 56  
H. Al Ziaiyir, D. Hodgeston  

Wellpad Development - Onshore Gathering Facilities (OGF) for Garraf Oilfield in Iraq ................................. 61  

Application of Multipor Flow Selector (MPFS) - Onshore Gathering Facilities (OGF) for Garraf Oilfield in Iraq ......................................................... 63  
M.S.I. Mohd Saeil Ismail, M.Z.S. Mohd Zamri Salim, S.M.R. Shahrudin Mohammad Rejub  

Deployment of Advanced Sidewall Coring Technology in South Iraq as Efficient and Cost-effective Alternative for Coring ......................................................... 65  
Carbonate Integrated Reservoir Characterisation: A Unique Case Study .......................................................... 69
A.F. Zakeria

Biomarkers Techniques for Petroleum System Types Assessments of Iraqi Oil Fields ............................................. 73
T. Al-Ameri

Petroleum System Modeling and Risk Assessments of Ad'daimah Oil Field in Mesan Governorate ...................... 77
H. Al-Minar, T. Al-Ameri, J. Zumberge

Tectonic Controls on Development of the Zagros: Implications for Hydrocarbon Systems .............................. 81
R.R. Jones, J.J. Long

The Influence of Kaolinite and pH on Permeability in the Zubair Reservoir in the North Rumaila Oilfield, Southern Iraq .................................................................................................................. 86
S.M. Awadh, A. Al-Yaseri

Stratigraphic Analysis of the Cretaceous Petroleum System, Sulaimani Area, Kurdistan, Iraq ...................... 88

Crude Oil Characterization, Source Affinities and Risk Assessments of Mesan Governorate Fields, Wetlands of South Iraq ................................................................................................................ 91
T. Al-Ameri, F. Al-Musawi, J. Zumberge

Application of Rate-Transient Analysis for Well Performance ............................................................................. 96
T. Helail, A. Khatib

Causes of Hydrodynamic Pressure Distribution A Case of the 4th Pay in Zubair Formation in Rumaila Oilfield ........................................................................................................................................ 100
Z. Liu, C.B. Tian, W.M. Zhang, J. Ma, H. Luo

Addressing The Formation Evaluation Challenges in South Iraq: Re-Writing The Recipe With Advanced Analysis ........................................................................................................................................ 105

Hydrocarbon Volume Uncertainty of Mishrif Reservoir in Rumaila Field; Implications from Surveillance Data ........................................................................................................................................ 110
B.B. Song, Y.X. Zhu, X.P. Fu, C.J. Wei

Optimizing Matrix Stimulation in Southern Iraq Oil Field ......................................................................................... 115
Sulaiman Sidek, K.N. Idris, Z. Hassan

Treatment of Missing and Corrupted Data in Waterfloods using the Reservoir Simple Models ....................... 118
A.A. Attar

Low Salinity Water Injection with Sidr Surfactant to Recover Crude Oil from Sandstone/Carbonate Reservoir (EOR) ........................................................................................................................................ 123
H.A.G. Ahmed

Yamama Formation Oil Source Assessments Using Biomarkers & Carbon Isotope Analysis, Ratawi Oil Field, Southern Iraq ................................................................................................................. 125
A.J. Al-Khafaji, T.K. Al-Ameri, S.Y. Jasim
