SmartCity 2015: 2015 IEEE International Conference on Smart City

Application Scenarios and Real-World Deployments for Smart Cities

Detecting Pedestrians Behavior in Building Based on Wi-Fi Signals ........................................................... 1
  Wenyuan Ma, Xinning Zhu, Junfei Huang, and Guochu Shou

E-Health Services for Elderly Care Based on Google Cloud Messaging ........................................................... 9
  Ching-Nung Yang, Fu-Heng Wu, Sin-Yen Tsai, and Wen-Chun Kuo

On Interesting Place Finding in Social Sensing: An Emerging Smart City Application Paradigm ........................................................... 13
  Chao Huang and Dong Wang
Collaborative Representation-Based Robust Face Recognition
by Discriminative Low-Rank Representation .................................................................21
Wen Zhao, Xiao-Jun Wu, and He-Feng Yin

A Self-Adaptive Video Dual Watermarking Based on the Motion Characteristic
and Geometric Invariant for Ubiquitous Multimedia ..................................................28
Zhi Li, Ling-Feng Liu, and Chuan-Xian Jiang

Big Data for Urban Informatics
The Role of Big Data on Smart Grid Transition ............................................................33
The-Hien Dang-Ha, Roland Olsson, and Hao Wang

Sensing Information Modelling for Smart City ..............................................................40
Hongxia Wang

Benchmarking RDF Stores for Smart City Services ..................................................46
Pierfrancesco Bellini, Paolo Nesi, and Gianni Pantaleo

OPC: A Distributed Computing and Memory Computing-Based Effective
Solution of Big Data ....................................................................................................50
Zhi Yang, Chunping Zhang, Mu Hu, and Feng Lin

Exploration of Collective Pattern to Improve Location Prediction of Mobile
Phone Users ............................................................................................................54
Chen Zhou and Benxiong Huang

Cloud Computing and Network Infrastructure for Smart Cities
Performance Modelling of Preemption-Based Packet Scheduling for Data
Plane in Software Defined Networks ..........................................................................60
Wang Miao, Geyong Min, Yulei Wu, and Haozhe Wang

A Performance Evaluation Model for Virtual Servers in KVM-Based Virtualized
System .......................................................................................................................66
Jing Yang and Yuqing Lan

Toward Vulnerability Assessment for 5G Mobile Communication Networks ..................72
Shibo Luo, Jun Wu, Jianhua Li, Longhua Guo, and Bei Pei

Nutshell: Cloud Simulation and Current Trends .......................................................77
Ubaid ur Rahman, Owais Hakeem, Muhammad Raheem, Kashif Bilal,
Samee U. Khan, and Laurence T. Yang
Embedded Computing and Networks for Smart Cities

   Yusuke Harada, Kazuki Abe, Myungryun Yoo, and Takanori Yokoyama

A Distributed Scheduling Algorithm for IEEE 802.15.4e Networks ..................................................95
   Wu-Ping Wang and Ren-Hung Hwang

Environment and Urban Monitoring

Duplicate Report Detection in Urban Crowdsensing Applications for Smart City .................................101
   Jize Zhang and Dong Wang

Aerosol Retrieval over Urban Area by Synergistic Use of Feng Yun-3C MERSI and Terra MODIS Data ..................................................................................................................108
   Weihong Han, Ling Tong, and Yunping Chen

Air Pollution Sources Identification Precisely Based on Remotely Sensed Aerosol and Glowworm Swarm Optimization ........................................................................................................112
   Yunping Chen, Weihong Han, Wenhuan Wang, Yaju Xiong, and Ling Tong

A Smart Decision Support System for Smart City ..................................................................................117
   Marco Bartolozzi, Pierfrancesco Bellini, Paolo Nesi, Gianni Pantaleo, and Luca Santi

Crowd Energy Information Security Culture - Security Guidelines for Smart Environments ..................123
   Stephanie Teufel and Bernd Teufel

Internet of Things for Smart Cities

A Study on the Reliability of Software Defined Wireless Sensor Network .............................................129
   Yulin Lu, Xin Huang, Baichuan Huang, Weiwen Xu, Qian Zhang, Ruiyang Xu, and Dawei Liu

Optimal Sink Placement in M2M over LTE Networks ........................................................................135
   Yen-Hsiung Tseng, Ren-Hung Hwang, Chin-Feng Lai, and Cheng-Yu Hou

A Business and Solution Architecture of the Smart City Operating System i-stack ..............................141
   Hua Yao, Chong Gao, Huangjun Shi, Chao Liu, and Gary Yang
Smart Transportation

Feasibility Analysis on Collaborative Platform for Delivery Fulfillment in Smart City .................................................................147

*Lindawati, Chen Wang, Wei Cui, and Niveditha Hari*

Predicting Short-Term Traffic Flow by Long Short-Term Memory Recurrent Neural Network ..................................................................................153

*Yongxue Tian and Li Pan*

Path Determination under Stochastic Travel Times Using Target-Oriented Robust Optimization ........................................................................................................159

*Chen Wang and Bingshui Da*

Intelligent Traffic Alert System for Smart Cities .................................................................................................................................165

*Assil Ksiksi, Saeed Al Shehhi, and Rashad Ramzan*

Enabling Technology for Smart City Transportation in Developing Countries .................................................................................................170

*Thaw Tar Thein Zan, Lounell Bahoy Gueta, and Toshio Okochi*

A Predictive Taxi Dispatching System for Improved User Satisfaction and Taxi Utilization ..................................................................................175

*Satish Kumar Verma and Hoang Tam Vo*

SocialCom 2015: The 8th IEEE International Conference on Social Computing and Networking

Fundamentals of Social Computing

A Low-Cost Sparse Recovery Framework for Weighted Networks under Compressive Sensing ..................................................................................183

*Hamidreza Mahyar, Hamid R. Rabiee, Ali Movaghar, Rouzbeh Hasheminezhad, Elaheh Ghalebi, and Ali Nazemian*

Fast Inter-mode Decision Based on Motion Estimation and Texture Feature for HEVC .................................................................................................191

*Binfei Shao, Xingang Liu, and Deyuan Liu*

Overlapping Community Detection Using NVPA ..............................................................................................................................................197

*Keke Gu, Junhua Tang, Li Pan, and Jianhua Li*

Collaboration Prediction in Heterogeneous Information Networks .................................................................................................................203

*Shuhong Zhang, Feng Xia, Jun Zhang, Xiaomei Bai, and Zhaolong Ning*

Web Cache Replacement Strategy Based on Reference Degree ..................................................................................................................209

*Xiaozhou Wu, Hongzhe Xu, Xiaoguang Zhu, and Wen Li*

Percolation Models of Information Dissemination in Social Networks ........................................................................................................213

*S.A. Lesko and D.O. Zhukov*
A Fast CU Decision Algorithm for MV-HEVC .......................................................... 217
   Peicheng Wang, Xingang Liu, and Binfei Shao

Modelling of Social Behavior
Intent Classification of Short-Text on Social Media .................................................. 222
   Hemant Purohit, Guozhu Dong, Valerie Shalin, Krishnaprasad Thirunarayan,
   and Amit Sheth
What Automaton Model Captures Decision Making? The Necessity
of Behavioral Complexity ...................................................................................... 229
   Stephan Schosser and Bodo Vogt
Principal Component Analysis Aware BP Neural Network for Personal
Information Prediction in Internet Based Services ................................................. 236
   Yue Qu, Wenge Rong, Yuanxin Ouyang, Hui Chen, and Zhang Xiong

Social Network Analysis and Mining
TAPRank: A Time-Aware Author Ranking Method in Heterogeneous Networks ................. 242
   Xiangjie Kong, Jinmeng Zhou, Jun Zhang, Wei Wang, and Feng Xia
Community Influence Analysis Based on Social Network Structures .......................... 247
   Yi Li, Xindong Wu, and Lei Li
Credit Distribution for Influence Maximization in Online Social Networks
with Time Constraint ............................................................................................. 255
   Yan Pan, Xiaoheng Deng, and Hailan Shen
Identifying Highly Potential Enterprises with Social Computing on Supply
Chain Networks ................................................................................................... 261
   Te-Min Chang, Chiao-Hsien Sung, Guo-Hsin Hu, Ming-Fu Hsu, and Keng-Pei Lin
Link Prediction Using Social Network Analysis over Heterogeneous Terrorist
Network .............................................................................................................. 267
   Akash Anil, Durgesh Kumar, Shubhanshu Sharma, Rakesh Singha,
   Ranjan Sarmah, Nitesh Bhattacharya, and Sanasam Ranbir Singh
Using Crowd-Source Based Features from Social Media and Conventional
Features to Predict the Movies Popularity .......................................................... 273
   Mehreen Ahmed, Maham Jahangir, Hammad Afzal, Awais Majeed,
   and Imran Siddiqi
Social Media Story Telling ..................................................................................... 279
   Patrick Hennig, Philipp Berger, Christian Dullweber, Moritz Finke,
   Fabian Maschler, Julian Risch, and Christoph Meinel
Mining Social Groups in Campus Based on Wireless Detection ................................. 285
   Shan Jiang, Xinning Zhu, Junfei Huang, and Guochu Shou

D3-MapReduce: Towards MapReduce for Distributed and Dynamic Data Sets ..........................................................................................................................................................................................................................................................637
  Haiwu He, Anthony Simonet, Julio Anjos Jose-Francisco Saray, Gilles Fedak, Bing Tang, Lu Lu, Xuanhua Shi, Hai Jin, Mircea Moca, Gheorghe Cosmin Silaghi, Asma Ben Cheikh, and Heithem Abbes

Parallel Discrete Event Simulation of Stochastic Reaction and Diffusion Using Reverse Computation ..........................................................................................................................................................................................................................................................643
  Zhongwei Lin and Yiping Yao

FlexCloud: A Flexible and Extendible Simulator for Performance Evaluation of Virtual Machine Allocation ..........................................................................................................................................................................................................................................................649
  Minxian Xu, Guozhong Li, Wutong Yang, and Wenhong Tian

An Elastic Data Persisting Solution with High Performance for Spark ..........................................................................................................................................................................................................................................................656
  Zhipeng Jiang, Haopeng Chen, Huan Zhou, and Jenny Wu
Towards an Environment for Doing Data Science That Runs in Browsers ..............................................................662
Leila Abidi, Christophe Cérin, Gilles Fedak, and Haiwu He

Data Partition Optimization for Column-Family NoSQL Databases ........................................................................668
Li-Yung Ho, Meng-Ju Hsieh, Jan-Jan Wu, and Pangfeng Liu

TiQ: A Timeline Query Processing System over Road Traffic Data ........................................................................676
Ardi Imawan, Fadhilah Putri, and Joonho Kwon

An Optimized Cache Replacement Algorithm for Information-centric Networks ......................................................683
Xiaocui Sun and Zhijun Wang

Analytics, Algorithms, and Methodologies

An Improved Fast Search Clustering Algorithm Based on Kernel Density .................................................................689
Ruisheng Zhang, Huiyi Ma, Qidong Liu, and Zhili Zhao

Visualizing Big Hierarchical Datasets on Concentric Rings ......................................................................................694
Chao Wen, Kang Zhang, Jie Li, and Fanrui Sun

Towards Bridging the Gap between Machine Learning Researchers and Practitioners ............................................702
Haytham Assem and Declan O’Sullivan

Graph Code Based Isomorphism Query on Graph Data ..............................................................................................709
Yu Wai Hlaing and Kyaw May Oo

BiFennel: Fast Bipartite Graph Partitioning Algorithm for Big Data ........................................................................715
Lyu-Wei Wang, Shih-Chang Chen, Wenguang Chen, Hung-Chang Hsiao, and Yeh-Ching Chung

MapReduce Implementation of XML Keyword Search Algorithm ..............................................................................721
Yong Zhang, Quanlin Li, and Bo Liu

Incremental Localization Algorithm Based on Regularized Iteratively Reweighted Least Square ................................729
Xiaoyong Yan, Aiguo Song, Yu Liu, Jian He, and Ronghui Zhu

Applications and Intelligence

Extracting Baseline Electricity Usage Using Gradient Tree Boosting .........................................................................734
Taehoon Kim, Dongeun Lee, Jaesik Choi, Anna Spurlock, Alex Sim, Annika Todd, and Kesheng Wu

Fasting Blood Glucose Change Prediction Model Based on Medical Examination Data and Data Mining Techniques .................................................................................................................742
Wenxiang Xiao, Fengjing Shao, Jun Ji, Rencheng Sun, and Chunxiao Xing

Pre-processing Boosting Twitter Sentiment Analysis? .................................................................................................748
Zhao Jianqiang

Performance Evaluation of Statistical Functions ........................................................................................................754
André Rodrigues, Carla Silva, Paulo Borges, Sérgio Silva, and Inês Dutra
BEMD-Based Event Analysis for Crude Oil Market: Evidence Using Google Search Data ..........................................................761
   Lanyi Hu, Jue Wang, and Chen Qi
Volatility Analysis of Chinese Stock Market Using High-Frequency Financial Big Data ..........................................................769
   Tongtong Dong, Bowei Yang, and Tianhai Tian

Privacy, Security, and Trustworthy
Access Control for Privacy Protection for Dynamic and Correlated Databases ..................................................775
   Nafei Zhu, Min Zhang, Dengguo Feng, and Jingsha He
Preserving the Privacy of Social Recommendation with a Differentially Private Approach ..................................................780
   Liang Chen and Peidong Zhu

Systems and Architectures II
A Workload-Driven Approach to Dynamic Data Balancing in MongoDB .....................................................786
   Shan Lin, Haopeng Chen, and Fei Hu
SoTree: An Automated Phylogeny Assembly Tool for Ecologists from Big Tree ..................................................792
   Zhen Meng, Jianhui Li, Tuo Yang, Li Lin, and Zhiduan Chen
Transforming UML Class Diagram into Cassandra Data Model with Annotations ..................................................798
   Wenduo Feng, Ping Gu, Chao Zhang, and Kai Zhou
An Empirical Comparison between Kelly Criterion and Vince’s Optimal F .....................................................806
   Mu-En Wu, Chia-Hung Wang, Wei-Ho Chung, Raylin Tso, and I-Hsuan Yang
Opportunistic Spectrum Access of Sparse Wideband in Stand-Alone and Cooperative Cognitive Radio Networks .....................................................811
   Sk. Shariful Alam, M. Lucio, and C.S. Regazzoni

Analytics, Algorithms, and Methodologies II
Variants of Graph Matching for Tree-like Graphs ..........................................................814
   Takayuki Nagoya
A Big Data Based Intelligent Decision Support System for Sustainable Regional Development .....................................................822
   Hong Zhou, Christopher Noble, and Julie Cotter
A Data Generation Algorithm for Internet of Things Based on Complex Event Processing .....................................................827
   Huiqun Zhao and Yankun Yang
# Applications and Intelligence II

Combining Semantic and Prior Polarity for Boosting Twitter Sentiment Analysis .....................................................832

*Zhao Jianqiang and Cao Xueliang*

Wavelet Enhanced Image Preprocessing and Neural Networks for Hand Gesture Recognition ...........................................838

A Discrete DP-Wrap Scheduling Algorithm for Multiprocessor Systems

Jingwei Yang, Xiaojian Luo, and Xiang Long
A Dynamic Network Bandwidth Allocation Mechanism under Network QoS Constraints

Hung-Lin Huang, Min-Huang Ho, Shao-Jui Chen, Yi-Feng Chen, and Wei-Jen Wang

Service Computing and Applications
Service Response Time Measurement Model of Service Level Agreements in Cloud Environment

Clayton Maciel Costa, Cicília Raquel Maia Leite, and António Luís Sousa

Efficient Common Prefix Search on Encrypted Data as an Additional Service on the Top of the Storage Providers

Amir Rezapour, Shiuan-Tung Chen, and Hung-Min Sun

Specification and Composition of Student-Oriented Services

Naseem Ibrahim

A Public Cloud Based SOA Workflow for Machine Learning Based Recommendation Algorithms

Ram G. Athreya and Srinivasan Thanukrishnan

An Oriented-Group Supporting Multi-user Public Auditing for Data Sharing

Jianhong Zhang, Pengyan Li, and Jian Mao

Accelerating Raptor Code Decoding Using Group Parameters for IPTV Service Delivery

Shiuan-Tung Chen, Hsin-Ta Chiao, Shih-Ying Chang, and Hung-Min Sun

Containerized SQL Query Evaluation in a Cloud

Weining Zhang and David Holland

XML Languages for Student-Oriented Services

Naseem Ibrahim

Security, Privacy, and Trustworthy
Hierarchical ID-Based Searchable Encryption with Constant Size Ciphertext in Cloud

Xiaofen Wang, Xiaosong Zhang, and Yi Mu

A Privacy Enhanced Search Approach for Cloud-Based Medical Data Sharing

Lu Liu, Jingchao Sun, Jianqiang Li, Rong Li, Juan Li, Xi Meng, Huifang Li, and Jiijiang Yang

Automatically Generating Payload-Based Models for Botnet Detection

Chung-Nan Lee, Fred Chou, and C.M. Chen

A Distributed Android Security Framework

Benjamin Andow and Haodong Wang
Cloud Computing Systems and Architectures II

Energy-Efficient Statistical Live Virtual Machine Placement for Big Data
Information Systems in Cloud Computing Environments .................................................1053
Xinying Zheng and Yu Cai

Auto-scaling Strategy for Amazon Web Services in Cloud Computing .......................................1059
Wen-Hwa Liao, Ssu-Chi Kuai, and Yu-Ren Leau

A Queueing-Theory-Based Bandwidth Allocation Algorithm for Live Virtual Machine Migration .................................................................................................................1065
Changpeng Zhu, Bo Han, Yinliang Zhao, and Bin Liu

Distributed Virtual Network Embedding with Bloom Filter .........................................................1073
Sude Qing, Min Feng, and Hua Jin

Efficient Hybriding Auto-scaling for OpenStack Platforms ....................................................1079
Chia-Ching Chen, Shao-Jui Chen, Fan Yin, and Wei-Jen Wang

A Cost-Driven Multi-objective Optimization Algorithm for SaaS Applications Placement .................................................................................................................................1086
Bin Qian, Fanchao Meng, and Dianhui Chu

An Energy-Aware Random Multi-path Routing Protocol for MANETs .............................................1092
Sheng-Lung Peng, Yan-Hao Chen, Ruay-Shiung Chang, and Jou-Ming Chang

Design and Implementation of Private Cloud Storage Platform Based on OpenStack ......................................................................................................................1098
Jiuyuan Huo, Hong Qu, and Ling Wu

Service Computing and Applications II

A Comparison Framework for SOA Maturity Models ............................................................1102
Supriya Pulparambil and Youcef Baghdadi

eHealth Recommendation Service System Using Ontology and Case-Based Reasoning ..........................................................1108
Hyun Jung Lee and Hee Sun Kim

Parallelizing R in Hadoop (A Work-in-Progress Study) ..........................................................1114
Yen-Zhou Huang, Yu-Ling Chen, Chia-Ping Tsai, and Hung-Chang Hsiao

A Calculation Model for the Serviceable Evaluation of User Online Comment ..............................................1117
Jing Yang, Taiming Wang, and Jun Wang

A Framework of Analyzing Border Crossing Transportation Data ..............................................1122
Haibo Wang, Da Huo, and Yaquan Xu
Security, Privacy, and Trustworthy II

BYOD Security: A New Business Challenge ................................................................. 1128
  Kathleen Downer and Maumita Bhattacharya

Research on Behavior Trust Based on Bayesian Inference in Trusted Computing Networks ........................................................................................................................................... 1134
  Wei Liu, Linlin Ci, and Liping Liu

Short Papers

A Topic-Level Privacy Preserving Search in the Medical Field ........................................ 1139
  Meng Tian, Jianqiang Li, Xi Meng, Rong Li, Jing Bi, Juan Li, Yu Zhao, and Bo Liu

Cloud Storage Access Gateway ....................................................................................... 1143
  Ze-Yan Yang, Che-Pin Chang, and Shyan-Ming Yuan

Energy Efficient Mobile Computation Offloading through Workload Migration ............. 1147
  Chengxi Gao and Victor C.S. Lee

FLAX: A Flexible Architecture for Large Scale Cloud Fabric ......................................... 1151
  Yiyang Shao, Yihang Luo, Xiaohe Hu, Yibo Xue, Yang Xiang, and Kevin Yin

Some Experimental Issues in Financial Fraud Detection: An Investigation ..................... 1155
  Jarrod West and Maumita Bhattacharya

High Performance Computation Based on Semantic P2P Network ............................... 1159
  Lican Huang

A Resource Mapping Method in Cloud-Based Satellite Ground System ........................ 1163
  Cunqun Fan, Xiangang Zhao, Lizi Xie, You Ma, Yunpeng Zhang, and Xiaohu Feng

File System Allocation in Cloud Storage Services with GlusterFS and Lustre ................ 1167
  Wei-Chih Huang, Chuan-Chi Lai, Chun-An Lin, and Chuan-Ming Liu

Hadoop-Based System Design for Website Intrusion Detection and Analysis .................. 1171
  Xiaoming Zhang and Guang Wang
