21st International Shock Interaction Symposium 2014 (ISIS-21)

Riga, Latvia
3-8 August 2014

Editors:

I. Krassovskaya  A. Podlaskin

CONTENTS

1. Shock reflections and related phenomena

G. Ben-Dor

Hysteresis phenomena in the reflection of shock waves — 1

O. Ram, M. Geva, O. Sadot, G. Ben-Dor

High spatial and temporal resolutions experimental shock-tube system for studying transient shock reflections — 7

M. Geva, O. Ram, O. Sadot, G. Ben-Dor

Examination of parameters influencing the non-stationary hysteresis reflection phenomenon — 11

R. T. Paton, M. Whalley, B. W. Skews

Mutual reflection of conical shock waves in a supersonic flow — 16

B. W. Skews, J. J. Bentley

Flows from two perpendicular shock tubes with a common exit edge. — 21

S. Kobayashi, T. Adachi

Experiment on the stability of oblique shock reflection in the dual-solution regime — 26

A. Sasoh, T. Tamba, N. M. Nguyen, K. Takeuchi, K. Nagata, Y. Sakai

Shock wave interaction experiments using double-driver shock tube — 30

M. G. Omang, J. K. Trulsen

Shock interactions with reacting and non-reacting particles — 34

M. Onofri, R. Paciorri, L. Campioli, A. Bonfiglioli

An unsteady Shock-fitting technique for unstructured grids — 38

E. I. Vasilev

Detailed investigation of Guderley shock wave reflections in steady flow — 42

E. A. Pushkar, A. S. Korolev

Impact of the interplanetary magnetic field on collision of solar wind and Earth’s bow shocks — 46

E. Koroteeva, I. Znamenskaya, F. Glazyrin, N. Sysoev

Numerical and experimental study of shock waves emanating from an open-ended rectangular tube — 52

V. N. Uskov, P. S. Mostovykh

The flow gradients in the vicinity of triple points — 57

V. N. Uskov, P. S. Mostovykh

The gas flow in the vicinity of the center of a centered expansion wave — 63

S. Bobashev, B. Zhukov, R. Kurakin, S. Ponyaev, B. Reznikov, K. Tverdokhlebov

Specific features of shock-compressed gas flows in railgun channels — 69

L. Gvozdeva, S. Gavrenkov, A. Nesterov

Dependence of parameters across slip stream in triple shock wave configuration on adiabatic index — 72

2. Vortices, boundary layers

H. Oertel sen., J. Srulijes, R. Hruschka, F. Seiler

Mach waves of supersonic jets produced by shock/vortex interaction — 76
A. Sakurai, M. Tsukamoto
*Generation of wave from a wall surface by changing wall temperature* — 82

J. Ryu, D. Livescu
*Turbulent vortex dynamics across a normal shock wave* — 85

L.A. Oliveira, L. R. Cancino, A. A. M. Oliveira.
*Shock wave - boundary layer interaction: a CFD analysis of shock wave propagation in shock tube experiments* — 91

**3. Blasts and blast wave protection**

D. Igra, O. Igra
*Various options for achieving significant shock/blast wave mitigation* — 97

S. Wiri, C. Needham
*Reconstruction of IED Blast Loading to Personnel in the Open* — 101

V. Eliasson, Q. Wan
*Shock mitigation in ducts using obstacles placed along a logarithmic spiral* — 106

S. Qiu, V. Eliasson
*Numerical simulations of shock wave amplification using multiple munitions* — 111

S. Berger, O. Sadot, G. Ben-Dor
*Investigation of shock wave attenuation by dynamic barriers* — 115

M. Liverts, O. Ram, O. Sadot, G. Ben-Dor
*Mitigation of blast waves by aqueous foam barriers – implementation of the exploding wire technique* — 120

A. Gerasimov, S. Pashkov
*Modelling of shock and explosive destruction of constructional element: three-dimensional statement and probabilistic approach* — 125

R. Tosello, H. Jobbé-Duval, D. Leriche, E. Léone, I. Sochet, L. Blanc, L. Biamino, C. Mariani, G. Jourdan, L. Houas
*Numerical and experimental investigation of reflected and refracted blast waves* — 129

R. Cayzac, E. Carette, T. Alziary de Roquefort
*Gun muzzle blast waves: computations and experimental validations* — 135

M. Silnikov, M. Chernyshov, A. Mikhaylin
*Incident and reflected blast wave parameters at the diminished ambient pressure according to ICAO regulations* — 141

**4. Shocks in liquids**

R. Patwardhan, V. Eliasson
*Numerical simulations of shock wave propagation and fluid-structure coupling in water-filled convergent thin shells* — 145

N. Apazidis
*Numerical investigation of shock induced bubble collapse in water* — 149

S. Sembian, M. Liverts, N. Tillmark, N. Apazidis
*Shock Generation and Propagation in Water by Exploding Wire Technique* — 152
Z.A. Walenta, A.M. Slowicka
Structure of shock waves in molecular liquids – influence of moments of inertia of molecules — 156

H. Yamamoto, K. Takayama, H. Shimokawa
Micro underwater shock waves generated by irradiations of Q-switched Ho:YAG laser beams — 159

N. Petrov, A. Schmidt
Effect of a bubble nucleation model on cavitating flow structure in rarefaction wave — 163

Y. Kai, B. Meyerer, W. Garen, U. Teubner
Experimental investigation of laser generated shock waves and the onset of evaporation in a mini-shock glass tube filled with water — 168

5. Kinetics
H. Otsu, T. Abe
Thermochemical non-equilibrium phenomenon behind the strong bow shock for reentry vehicles — 171
S.N. Martyushov
Numerical simulation of reactive gas mixes flows in the detonation engine — 175

O. Kunova, E. Nagnibeda, I. Sharafutdinov
Vibrational-chemical coupling in air flows behind shock waves — 179

6. Nozzles and jets
H. Yoshioka, H. Otsu
Hypersonic wind tunnel testing for investigation of the attitude of the ballute — 185
R. Buttay, P.J. Martinez Ferrer, G. Lehnasch, A. Mura
Simulations of highly underexpanded jets — 189
M. Silnikov, M. Chernyshov, V. Uskov
Overexpanded jet flow analysis in the vicinity of the nozzle lip — 195

7. Complex media
T. Ukai, K. Ohtani, S. Obayashi
Experimental investigation of weak shock wave propagating through turbulent medium in controlled humidity field — 200
I. Basargin, S. Bobashev, M. Chistyakova, N. Monakhov, P. Popov, V. Sakharov
Peculiarity of interactions of shock wave with decaying plasma of gas discharge — 206
D.I. Zavershinskii, N.E. Molevich
The formation of a magnetoacoustic self-sustained shock pulses in a thermally unstable medium — 209
N. Fomin, N. Bazylev, O. Penyazkov
Turbulence diagnostics with shocks by speckle tomography — 214

8. Flows with bodies and obstacles
F. Gnani, H. Zare-Behtash, K. Kontis
Diffracted shock wave and supersonic co-flow interaction phenomena — 220
