# 2016 30th International Conference on Advanced Information Networking and Applications Workshops

**WAINA 2016**

**Table of Contents**

| Message from IEEE AINA 2016 Steering Committee Co-Chairs | xx |
| Message from IEEE AINA 2016 General Co-Chairs | xxi |
| Message from IEEE AINA 2016 Program Committee Co-Chairs | xxii |
| Message from IEEE AINA 2016 Workshops Co-Chairs | xxiii |
| Message from the BICom 2016 Workshop Co-Chairs | xxiv |
| BICom 2016 Organizing Committee and Reviewers | xxv |
| Message from the BOSON 2016 Workshop Chair | xxvii |
| BOSON 2016 Organizing Committee and Reviewers | xxviii |
| Message from the CCPI 2016 Workshop Chair | xxxi |
| CCPI 2016 Organizing Committee and Reviewers | xxxii |
| Message from the COLLABES 2016 Workshop Organizers | xxxiv |
| COLLABES 2016 Organizing Committee and Reviewers | xxxv |
| Message from the DC2 2016 Workshop Co-Chairs | xxxvi |
| DC2 2016 Organizing Committee and Reviewers | xxxvii |
| Message from the EASyCoSe 2016 Workshop Co-Chairs | xxxix |
| EASyCoSe 2016 Organizing Committee and Reviewers | xl |
| Message from the EEEWSN 2016 Symposium Chairs | xli |
| EEEWSN 2016 Organizing Committee and Reviewers | xlii |
| Message from the FINA 2016 Symposium Co-Chairs | xlv |
| FINA 2016 Organizing Committee and Reviewers | xlv |
| Message from the HWISE 2016 Workshop Co-Chairs | xlvii |
| HWISE 2016 Organizing Committee and Reviewers | xlvix |
| Message from the INTRICATE-SEC 2016 Workshop Chairs | l |
| INTRICATE-SEC 2016 Organizing Committee and Reviewers | l |
| Message from the IOTCP 2016 Symposium Chair | li |
Ninth International Workshop on Bio and Intelligent Computing (BICom 2016)

Session 1: Intelligent Algorithms and Systems

A Fuzzy Search Based Joint Dual Mobile Service Discovery and Exposure Model .................................................................1
Walid El Ayeb and Zied Choukair

A Neural Network Based User Identification for Tor Networks: Data Analysis Using Friedman Test .................................................................7
Taro Ishitaki, Tetsuya Oda, and Leonard Barolli

Effect of Angle Incidence on the Accuracy of Indoor Prediction Model Based on Neural Network .................................................................14
M. Ayadi

Comparison between Classifier’s Accuracies Based on Different Outlier Methods Generated by Frequent and Infrequent Categorical Data .................................................................18
B. Raveendra Babu and Lakshmi Sreenivasa Reddy D.

Cost and Load Reduction Using Heuristic Algorithms in Smart Grid .................................................................24
Zafar Iqbal, Nadeem Javaid, Mobushir Riaz Khan, Imran Ahmed, Zahoor Ali Khan, and Umar Qasim

A Novel Approach to Geocaching Event Prognosis Using Spatiotemporal Data .................................................................31
Tomasz Hachaj, Pawel S. Hachaj, and Marek R. Ogiela
First International Workshop on Big Data Processing in Online Social Network (BOSON 2016)

Session 1: Big Data Processing
A GPU-Parallel Algorithm for ECG Signal Denoising Based on the NLM Method .................................................................35
   Salvatore Cuomo, Pasquale De Michele, Ardelio Galletti, and Livia Marcellino
Automatic Design Space Exploration of Approximate Algorithms for Big Data Applications .................................................40
   Mario Barbareschi, Federico Iannucci, and Antonino Mazzeo
Automatic Cloud Services Composition for Big Data Management ..................................................................................46
   Flora Amato and Francesco Moscato
A Logic Framework for C2C Network Management ..................................................................................................52
   Walter Balzano, Maria Rosaria Del Sorbo, and Silvia Stranieri
M-DGPS: An Algorithm for the Post-Processing of Geodetic Tracks Based on Multiple DGPS ................................................58
   Walter Balzano, Maria Rosaria Del Sorbo, and Aniello Murano

Session 2: Distributed Computing Methods and Applications
Unsupervised SPITters Detection Scheme for Unbalanced Callers ..................................................................................64
   Kentaroh Toyoda, Mirang Park, and Okazaki Naonobu
Challenges in Detecting Epidemic Outbreaks from Social Networks ..............................................................................69
   Sara Romano, Sergio Di Martino, Nattiya Kanhabua, Antonino Mazzeo, and Wolfgang Nejdl
WiFACT — Wireless Fingerprinting Automated Continuous Training ............................................................................75
   Walter Balzano, Aniello Murano, and Fabio Vitale
Modelling Multimedia Social Network for Topic Ranking ........................................................................................81
   Flora Amato, Vincenzo Moscato, Antonio Picariello, and Giancarlo Sperlí
Implementing Hardware Decision Tree Prediction: A Scalable Approach ...........................................................................87
   Mario Barbareschi

Fifth International Workshop on Cloud Computing Projects and Initiatives (CCPI 2016)

Session 1: Cloud Interoperability and Federation
Characterizing Cloud Federation in IoT ................................................................................................................93
   Antonio Celesti, Maria Fazio, Maurizio Giacobbe, Antonio Puliafito, and Massimo Villari
An Architecture for Service Deployed in the Cloud Environment ..................................................................................99
   Amel Haji, Asma Ben Letaifa, and Sami Tabbane
CoSSMic Smart Grid Migration in Federated Clouds ..........................................................................................103
   Alba Amato, Rocco Aversa, Massimo Ficco, and Salvatore Venticinque
Towards Data Interoperability: Turning Domain Specific Knowledge to Agnostic across the Data Lifecycle ...............109
   Athanasios Kiourtis, Argyro Mavrogiorgou, Dimosthenis Kyriazis, Ilias Maglogiannis, and Marinos Themistocleous
Design of an Agent Based Monitoring Framework for Federated Clouds .......................................................... 115

Rocco Aversa and Luca Tasquier

Session 2: Cloud Semantics and Cloud Applications

From Business Process Models to Cloud Deployment: A Semantic Approach .......................................................... 121

Beniamino Di Martino, Antonio Esposito, and Giuseppina Cretella

Information Modelling and Semantic Linking for a Software Workbench for Interactive, Time
Critical and Self-Adaptive Cloud Applications ........................................................................................................ 127

Paul Martin, Arie Taal, Francisco Quevedo, David Rogers, Kieran Evans, Andrew Jones,
Vlado Stankovski, Salman Taherizadeh, Jernej Trnkoczy, George Suciu, and Zhiming Zhao

A Semantic System for Diagnoses Suggestion and Clinical Record Management .................................................... 133

Flora Amato, Giovanni Cozzolino, Antonino Mazzeo, and Sara Romano

A Comparison of Private Cloud Systems .................................................................................................................. 139

Cristian Chilipirea, Ghita Laurentiu, Mirona Popescu, Sorin Radoveneanu, Vladimir Cernov,
and Ciprian Dobre

Unattended Deployment of Enabling Platforms for Cloud-Based Applications .......................................................... 144

Silviu Panica and Dana Petcu

Session 3: Cloud Technologies

Transactional Processing for Polyglot Persistence ...................................................................................................... 150

Ricardo Jiménez-Peris, Marta Patiño-Martínez, Iván Brondino, and Valerio Vianello

Cloud for Europe: The Experience of a Tenderer ....................................................................................................... 153

Antonella Longo, Marco Zappatore, Mario A. Bochicchio, Barbara Livieri, Nicola Guarino,
and Daniele Napoleone

Cloudifier: An Ecosystem for the Migration of Distributed Applications to the Cloud .............................................. 159

Umberto Villano, Stefano Cagnoni, Maria Carla Calzarossa, Antonella di Stefano,
and Beniamino di Martino

Flexible Federation of Cloud Providers: The EUBrazil Cloud Connect Approach .................................................. 165

Francisco Brasileiro, José Luis Vivas, Giovanni Farias da Silva, Daniele Lezzi, Carlos Diaz,
Rosa M. Badia, Miguel Caballer, and Ignacio Blanquer

Fourth International Workshop on Collaborative Enterprise Systems
(COLLABES 2016)

Session 1: Collaborative Systems and Social Networks

Socio-Cultural Adaptation Approach to Enhance Intercultural Collaboration and Learning ........................................ 171

Fadoua Ouamani, Narjès Bellamine Ben Saoud, and Henda Haijami Ben Ghezala

Towards the Effective Software Development of an eLearning Platform Featuring Learning
Analytics and Gamification ........................................................................................................................................ 177

David Gañán Jiménez, Santi Caballé, Robert Clarisó, and Jordi Conesa

Scenario Based Dynamic Content Management System for e-Learning Environment ............................................ 183

Keonsoo Lee, Seungmin Rho, and Eenjun Hwang
Collect, Scope, and Verify Big Data — A Framework for Institution Accreditation .............................................................. Mohammed Hussain, Mohamed Basel Al-Mourad, and Sujith Samuel Mathew

A Generalized Framework for Multi-party Data Exchange for IoT Systems ........................................................................... Jan Sliwa

Investigation of Effects of Spoofing Attacks in P2P Online Social Networks ................................................................. Francisco de Asís López-Fuentes and Salvador Balleza-Gallegos

Session 2: Cloud Computing, Network Services and Security

Real-Time User Experience Evaluation for Cloud-Based Mobile Video .................................................................................. Nouha Samet, Asma Ben Letaïfa, Mohamed Hamdi, and Sami Tabbane

Collaborative Cloud Computing Based on P2P Networks ............................................................................................... Francisco de Asís López-Fuentes and Gerardo García-Rodríguez

An Empirical Study on Optimal Correlation between Market Share and Concerns on Companies Measured through Search Engine Suggests ............................................................................................................................ Takakazu Imada, Yusuke Inoue, Lei Chen, Syunya Doi, Takehito Utsuro, and Yasuhide Kawada

Keep It Simple, Fast and Scalable: A Multi-model NoSQL DBMS as an (eb) XML-over-SOAP Service ................................................................. Antonio Messina, Pietro Storniolo, and Alfonso Urso

Protection of Secrets by File Access Control with Common Key Cipher and Message Digests of Program Files ........................................................................................................................................ Minoru Ichikawa and Ryuya Uda

Effective CAPTCHA with Amodal Completion and Aftereffects by Complementary Colors and Difference of Luminance .................................................................................................................. Ryuya Uda and Tomoka Azakami

Third International Workshop on Device Centric Cloud (DC2 2016)

Session 1: IoT, Cloud and Vehicular Networks

Data Pipeline for Generation and Recommendation of the IoT Rules Based on Open Text Data ........................................ Inchul Hwang, Munjo Kim, and Hyoung Joo Ahn

Detecting False Emergency Requests Using Callers’ Reporting Behaviors and Locations ................................................... Mahdi Daghmehchi Firoozjaei, Jaewoo Park, and Hyoungshick Kim

CASD: A Framework of Context-Awareness Safety Driving in Vehicular Networks ............................................................. Yiwen (Chris) Shen, Jaehoon (Paul) Jeong, Tae (Tom) Oh, and Sang Hyuk Son

DCMAC: Data-Oriented Cluster-Based Media Access Control Protocol for Vehicular Networks ........................................... Jinho Lee, Jaehoon (Paul) Jeong, Tae (Tom) Oh, Junghyun Jun, and Sang Hyuk Son

RPA: Road-Side Units Placement Algorithm for Multihop Data Delivery in Vehicular Networks ................................................. Younghwa Jo and Jaehoon (Paul) Jeong

Session 1: Energy-Aware Systems and Protocols
Balancing Delays and Energy Consumption in IPS-Enabled Networks .................................................................267
   Alessio Merlo, Mauro Migliardi, and Elena Spadacini

AHP and Soft Computing for Energy-Aware Decision-Making .................................................................273
   Luigi Benedicenti

Identifying Energy-Deprivation in Wireless Sensor Networks .................................................................276
   Sherenaz W. Al-Haj Baddar

Interoperable Access Control by Means of a Semantic Approach .................................................................280
   Christian Esposito, Aniello Castiglione, and Francesco Palmieri

Protocols for Energy-Efficiently Broadcasting Messages in Wireless Networks ..................................................286
   Miyu Sugino, Shigenari Nakamura, Tomoya Enokido, and Makoto Takizawa

A Scalable Group Communication Protocol in Heterogeneous Networks .........................................................294
   Hiroaki Honda, Shigenari Nakamura, Hiroki Nakayama, Dilawaer Duolikun, Tomoya Enokido,
   and Makoto Takizawa

Third International Symposium on Engineering Energy Efficient WSNs (EEEWSN 2016)

Session 1: Modelling and Performance Evaluation
Analytical Modelling and Performability Evaluation of LTE as Dominant Connectivity Technology for Internet of Things .................................................................300
   Yonal Kiral and Yoney Kirsal Ever

Algorithms for Services with Multiple Levels of Quality .................................................................................306
   Alfredo Navarra, Pietro Palazzo, Cristina M. Pinotti, and Leonardo Mostarda

A Data Acquisition and Document Oriented Storage Methodology for ANT+ Protocol Sensors in Real-Time Web .................................................................312
   Nadeem Qaisar Mehmood and Rosario Culmone

Towards a Uniform Ontology-Driven Approach for Modeling, Checking and Executing WSANs .................................................................319
   Claudia Vannucchi, Diletta Romana Cacciagrano, Rosario Culmone, and Leonardo Mostarda

12th International Symposium on Frontiers of Information Systems and Network Applications (FINA 2016)

Session 1: Scalable Networks and Systems
OverUDP: Tunneling Transport Layer Protocols in UDP for P2P Application of IPv4 .................................................................325
   Maziar Janbeglou and Nevil Brownlee
Distributed Computation and Maintenance of a Spanning Tree in Dynamic Networks by Mobile Agents .................................................................331

Mouna Ktari, Mohamed Amine Haddar, Mohamed Mosbah, and Ahmed Hadj Kacem

Latency and Routing Efficiency Based Metric for Performance Comparison of DHT Overlay Networks .............................................................................................................337

Nitin Varyani, Nikhil S., and Virendra S. Shekhawat

Enhanced Single Chain-Based Scheme in Cylindrical Underwater Wireless Sensor Networks .................................................................343

Muhammad Zain-Ul-Abidin, Muhammad Awais Khan, Nadeem Javaid, Malik Khizar, Zahoor Ali Khan, and Umar Qasim

Relay Assisted Adaptive MIMO Communication Using STBC, VBLAST, MLSTBC and HYBRID-STBC-VBLAST for MAC ..........................................................349

M. M. Kamruzzaman, Meng Wang, Wenqi He, and Xiang Peng

Session 2: Security and Privacy

A Combining Classifiers Approach for Detecting Email Spams .................................................................................................................................355

Shrawan Kumar Trivedi and Shubhamoy Dey

State Recovering Attack Against Quavium .................................................................................................................................361

Shiyong Zhang, Gongliang Chen, and Jianhua Li

K-Word Proximity Search on Encrypted Data ........................................................................................................................................365

Mark Gall and Gerd Brost

Security and Privacy for Real Time Video Streaming Using Hierarchical Inner Product Encryption Based Publish-Subscribe Architecture ........................................373

M. A. Rajan, Ashley Varghese, N. Narendra, Meena Singh, V. L. Shivraj, Girish Chandra, and Balamuralidhar P.

Integrate Hacking Technique into Information Assurance Education .............................................................................................................................381

Jianhua Yang, Yien Wang, and Thomas Reddington

Session 3: IoT and Cloud Computing

Neighbor Discovery Schedule for 6LoWPAN Smart Grid Applications ................................................................................................................388

Ines Hosni and Noureddine Hamdi

Maintaining Coverage of Multiple Interest Points for Wireless Sensor Networks on Water Surface ..........................................................................................394

Ryo Katsuma and Hirotaka Ueno

Regional Indexing Approach for Mobile Objects ........................................................................................................................................400

Sultan Alamri

Migration Method for Seamless Service in Cloud Computing: Survey and Research Challenges ..............................................................................404

A-Young Son and Eui-Nam Huh

Edge Data Processing .................................................................................................................................................................................................410

Ichiro Satoh

Automatic Migration and Deployment of Cloud Services for Healthcare Application Development in FIWARE ..................................................................................416

Stelios Sotiriadis, Lenos Vakanas, Euripides Petrakis, Paolo Zampognaro, and Nik Bessis
Session 4: Cognitive Radio and Communication Systems

Large-Sample Comparison of TCP Congestion Control Mechanisms over Wireless Networks .......................... 420
   Kevin Ong, David Murray, and Tanya McGill

The Effect of the Nonlinear Distortion on OFDM Based Cognitive Radio Systems over Rayleigh Fading Channel ............................................................................................................................................... 427
   Hanen Lajnef, Maha Cherif Dakhli, Moez Hizem, and Ridha Bouallegue

QCN Performance Evaluation for Nicast Traffic Transmission ................................................................. 431
   Hela Mliki, Lamia Chaari, and Lotfi Kamoun

A Quick Convergence Active Constellation Extension Projection onto Convex Sets Algorithm for Reducing the PAPR of OFDM System ......................................................................................................................... 439
   Mounira Laabidi, Rafik Zayani, and Ridha Bouallegue

Downlink Beamforming and Power Allocation in Cognitive Radio Network with Outdated and Limited Feedback of Channel Estimates ........................................................................................................ 444
   Inmen Turki, Ines Kammoun, and Mohamed Siala

Session 5: Distributed Algorithms and Applications

Path Loss Characteristics for Wireless Communication System in Rotating Electrical Machine .......................... 450
   S. Ben Brahim, R. Bouallegue, J. David, and T. H. Vuong

Selecting Web Search Results of Diverse Contents with Search Engine Suggests and a Topic Model ........................................................................................................................................................................ 455
   Yusuke Inoue, Takakazu Imada, Syunya Doi, Lei Chen, Takehito Utsuro, and Yasuhide Kawada

PseudoHandWriting: New Approach for Oral Presentation to have Both Advantages of Slide and Handwriting ................................................................................................................................. 461
   Takenobu Kazuma, Erika Yoshida, Yan Yu, and Aiguo He

A Novel Context-Based Risk Assessment Approach in Vehicular Networks ............................................. 466
   Farhan Ahmad and Asma Adnane

A Fault-Tolerant Handshake Algorithm for Local Computations .............................................................. 475
   Allyx Fontaine, Mohamed Mosbah, Mohamed Touassi, and Akka Zemmari

12th International Workshop on Heterogeneous Wireless Networks (HWISE 2016)

Session 1: Mobile and Wireless Communication Systems

SOCP Approximation Based Resource Allocation in Shared Spectrum Access Communications .......................... 481
   Mirza Golam Kibria, Kentaro Ishizu, Fumihide Kojima, and Hiroyuki Yano

An Efficient of Secure Mobile Phone Application for Multiple Bill Payments ............................................... 487
   Pensri Pukkasenunk and Suphat Sukkasem

Modification of Dijkstra Proximity Matrix for Diffraction and Reflection Rays ............................................. 493
   Kazunori Uchida and Leonard Barolli

A QoS-Aware Admission Control System for WLAN Using Fuzzy Logic .................................................. 499
   Takaaki Inaba, Shinji Sakamoto, Tetsuya Oda, Makoto Ikeda, and Leonard Barolli
Voice over LTE Standards: Solutions and QoS Control Parameters in High Mobile Environments

Aida Zaier, Emna Hajlaoui, and Ridha Bouallague

Interference Analysis of Asynchronous OFDM/FBMC Based Cognitive Radio Transceivers

Sonia Ben Aissa, Moez Hizem, and Ridha Bouallegue

Session 2: VANETs and Wireless Network Protocols

A Framework for Disseminating Trusted Safety Message in V2V Communication

Hanaa S. Basheer, Carole Bassil, and Bilal Chebaro

An Energy Efficient Hybrid Clustering Routing Protocol for Underwater WSNs

Mudassir Ejaz, Nadeem Javaid, Hammad Maqsood, Usman Shakeel, Zahoor Ali Khan, and Umar Qasim

A Variable Speed Limit (VSL) Based Model for Advanced Traffic Management through VANETs

Ajay Vikram Singh and Jas Singh Bhasin

Efficient “MultiKG” Routing Protocol Based on Multi-Hop Transmission

Elkamel Rabiaa, Baccar Noura, Cherif Adnane, and Ridha Bouallague

DASITS: Driver Assistance System in Intelligent Transport System

Jetendra Joshi, Anshumali Singh, Lakshya Gourav Moitra, and Manash Jyoti Deka

Session 3: Wireless Sensor and Ad-hoc Networks

Dual Sink Efficient Balanced Energy Technique for Underwater Acoustic Sensor Networks

Muhammad Awais Khan, Nadeem Javaid, Abdul Majid, Muhammad Imran, and Mohammed Alnuem

Greedy Zone Routing: Robust and Scalable Routing in Wireless Ad-hoc Networks

Kasun Samarasinghe, Ricardo Wehbe, and Pierre Leone

Hassel Aurora Alcalá Garrido, Mario E. Rivero-Angeles, and Izlian Yolanda Orea Flores

Increased Throughput DB-EBH Protocol in Underwater Wireless Sensor Networks

Syed Zarar, Nadeem Javaid, Syed Muhammad Zaki, Mudassir Ejaz, Zahoor Ali Khan, Umar Qasim, and Sheraz Hussain

Improving Reliability of Cluster Nodes in MANETs: A Fuzzy-Based Approach

Mirjeta Alinci, Takaaki Inaba, Donald Elmazi, Eviola Spaho, Vladi Kolici, and Leonard Barolli

Session 1: Key Management and Encryption

Key Management for Secure Demand Data Communication in Constrained Micro-Grids

Anne V. D. M. Kayem, Heinrich Strauss, Stephen D. Wolthusen, and Christoph Meinel

Conceptual Model for Security in Next Generation Network

Masoud Hayeri Khyavi and Mina Rahimi
Graphical Passwords — A Discussion

Anne V. D. M. Kayem

Privacy Violations in Constrained Micro-Grids: Adversarial Cases

Pacome L. Ambassa, Anne V. D. M. Kayem, Stephen D. Wolthusen, and Christoph Meinel

First International Symposium on Internet of Things, Crowdsourcing and Privacy (IOTCP 2016)

Session 1: IoT Privacy, Crowdsourcing and Technology Insight

Bringing Your Data Everywhere in the Internet of (Every) Thing: A Legal Reading of the New Right to Portability

Camilla Bistolfi and Lucio Scudiero

Internet of Things, Crowdsourcing and Systemic Risk Management for Smart Cities and Nations: Initial insight from IoT Lab European Research project

Sébastien Ziegler, Jose Rolim, and Sotiris Nikoletsea

Consent, Risk and Compliance: Technologies and Processes

David Lund, George Mourikas, Bassem Ammar, Abubakr Magzoub, and Noel Catterall

Towards a Global IPv6 Addressing Model for the Internet of Things

Sébastien Ziegler and Latif Ladid

Ninth International Workshop on Information Technology for Innovative Services (ITIS 2016)

Session 1: Innovative Systems

Cloudlet Softwarization for Pervasive Healthcare

Aymen El Amraoui and Kaouthar Sethom

An Implementation of Visualization System for Vehicles and Pedestrians

Akio Koyama, Daisuke Inoue, and Shuji Shoji

Performance Evaluations of LXC Based Educational Cloud in Amazon EC2

Minoru Uehara

Small-World Architecture for Parallel Processors

Hideki Mori and Minoru Uehara

Eighth International Workshop on Disaster and Emergency Information Network Systems (IWDENS 2016)

Session 1: Disaster Information Systems and Applications

Proposal of Vehicle-to-Vehicle Based Delay Tolerant Networks with Adaptive Array Antenna

Noriki Uchida, Kazuo Takahata, Yoshitaka Shibata, and Norio Shiratori

A Resilient Network and Information Management System for Large Scale Disaster

Yoshitaka Shibata, Noriki Uchida, and Norio Shiratori
Mobile Cloud Computing by In-vehicle Servers Based on Delay Tolerant Network Protocol .................................................. 661
Masaki Otomo, Noriki Uchida, and Yoshitaka Shibata

Improvement of Autonomous Anti-disaster Base Station by Combination of Satellite and Wireless Networks .................................................. 667
Hiroaki Yuze, Shinichi Nabeta, Yuji Ito, Hiroshi Kosaka, and Yoshitaka Shibata

Session 2: Disaster Information Networks and Services
Proposal of a Common Infrastructure System for Real-Time Disaster Information Transmission .................................................. 673
Kazuhiro Takahagi, Tomoyuki Ishida, Noriki Uchida, and Yoshitaka Shibata

Optimizing Media Quality Parameters to Reduce Energy Consumption for Emergency Communication Services .................................................. 677
Ken Nishimura, Kaoru Sugita, and Tomoyuki Ishida

Extending Network Coverage by Using Static and Mobile Relays during Natural Disasters .................................................. 681
Michał Król, Yusheng Ji, Shigeki Yamada, Cristian Borcea, Lei Zhong, and Kiyoshi Takano

Big Data Based Service Area Estimation for Mobile Communications during Natural Disasters .................................................. 687
Lei Zhong, Kiyoshi Takano, Yusheng Ji, and Shigeki Yamada

2016 International Symposium on Mining and Web (MAW 2016)
Session 1: Web and Internet Applications
Toward a Forensic Analysis of Voting Systems .................................................. 693
Suzanne Mello-Stark and Edmund A. Lamagna

Analysis of Software Developer Activity on a Distributed Version Control System .................................................. 701
Shu Li, Hayato Tsukiji, and Kosuke Takano

Big Data Analytics for Classification of Network Enabled Devices .................................................. 708
Deepali Arora, Kin Fun Li, and Alex Loffler

Design of an Ambient Intelligence Testbed for Improving Quality of Life .................................................. 714
Ryoichiro Obukata, Tetsuya Oda, and Leonard Barolli

Design of an IoT-Based E-learning Testbed .................................................. 720
Masafumi Yamada, Tetsuya Oda, Keita Matsuo, and Leonard Barolli

Session 1: Network Monitoring and Management
QoE-Driven Service Optimization Aware of the Business Model .................................................. 725
Diego Rivera and Ana Cavalli

Traffic Profiling: Evaluating Stability in Multi-device User Environments .................................................. 731
Taimur Bakhshi and Bogdan Ghita

Ads Network Monitoring Integrating Realistic Urban Mobility Patterns .................................................. 737
Thi Hien Le and Stephane Maag
11th International Workshop on Performance Analysis and Enhancement of Wireless Networks (PAEWN 2016)

Session 1: Network Modelling and Performance Evaluation

Yosra Mallat, Mohamed Ayadi, Aymen Ayari, and Sami Tabaane

Troubleshooting Wireless Home Networks Using a Portable Testbed

Enri Dalipi, Vincent Secu, Pieter Becue, Bart Jooris, Ingrid Moerman, and Jeroen Hoebeke

From Modeling with SysML to Simulation with Contiki Cooja Simulator of Wireless Sensor Networks

Nesrine Ammar, Hela Chaieb, and Ridha Bouallegue

Evaluation of Power Control Mechanism on OLSR Routing Protocol

C. Bouras, V. Kapoulas, K. Stamos, and N. Stathopoulos

Evaluation of the Energy Consumption and the Packet Loss in WSNs Using Deterministic Stochastic Petri Nets

Amel Berrachedi and Malika Boukala-Ioualalen

International Workshop on International Workshop on Pervasive Internet of Things and Smart Cities (PITSaC 2016)

Session 1: Internet of Things

Distributed Query Results and IoT Data in a Publish-Subscribe Network Implementing User Notifications

Diego Sánchez de Rivera, Ramón Alcarria, Diego Martín, Álvaro Sánchez-Picot, Borja Bordel, and Tomás Robles

Modeling and Simulation of Interactions Among People and Devices in Ambient Intelligence Environments

Álvaro Sánchez-Picot, Diego Martín, Diego Sánchez de Rivera, Borja Bordel, and Tomás Robles

Smart Spaces for On-line Tailor-Made Production of Clothes

Petra Perner

Connected Smart Cities: Interoperability with SEG 3.0 for the Internet of Things

Amelie Gyrard and Martin Serrano

SOFT-IoT: Self-Organizing FOG of Things

Cássio Prazeres and Martin Serrano

Session 2: Smart Cities and Mobility

Mobility Support for the Routing Protocol in Low Power and Lossy Networks

Hanane Lamaazi, Nabil Benamar, Muhammad I. Imaduddin, Adib Habbal, and Antonio J. Jara
Off-the-Shelf Embedded Middleware Solution for UAVs HW-SW Platform Development .........................................................815

Heating and Hot Water Industrial Prediction System for Residential District ..............................................................821

Luc Dufour, Dominique Genoud, Bruno Ladevie, and Jean-Jacques Bezian

Economic Interest of Heating and Hot Water Prediction System for Residential District .........................................................827

Luc Dufour, Dominique Genoud, Bruno Ladevie, Jean-Jacques Bezian, Francesco Cimmino, and Stephane Genoud

Improving the Locating Precision of an Active WIFI RFID System to Obtain Traceability of Patients in a Hospital ........................................................................................................................................833

Maria Martínez Pérez, Guillermo Vázquez González, José Ramón Vizoso Hermida, Isabel Martín Herranz, and Carlos Dafonte

First International Workshop on Security, Trust, Privacy and Analytics (STPA 2016)

Session 1: Security, Intrusion Detection and Access Control

Security Identifier Randomization: A Method to Prevent Kernel Privilege-Escalation Attacks ....................................................838

Lifeng Wei, Yudan Zuo, Yan Ding, Pan Dong, Chenlin Huang, and Yuanming Gao

IaaS Platforms: How Secure are They? ........................................................................................................................................843

Irina Astrova, Arne Koschel, and Mats Lennart Henke

A Host and Network Based Intrusion Detection for Android Smartphones ................................................................................849

Kanishka Ariyapala, Hoang Giang Do, Huynh Ngoc Anh, Wee Keong Ng, and Mauro Conti

Analysis of Intrusion Detection and Prevention Systems as Queueing Services ........................................................................855

Sergey Zapechnikov, Natalia Miloslavskaya, and Alexander Tolstoy

10th International Workshop on Telecommunication Networking, Applications and Systems (TeNAS 2016)

Session 1: Network Technology and Applications

L2OVX: An On-demand VPLS Service with Software-Defined Networks ......................................................................................861

Jen-Wei Hu, Chu-Sing Yang, and Te-Lung Liu

A Quality Assurance Approach and Case Study in BSS ................................................................................................................867

Teh-Sheng Huang, Chia-Yen Chan, and Jeu-Yih Jeng

A Cache Management Method for Simultaneous Downloading from Multiple Receivers for Content Centric Networking ................................................................................................................872

Kyouhei Sasano, Masaki Bandai, and Miki Yamamoto

A Visible Light Communication Positioning Mechanism in Industrial Logistics Management .........................................................878

Shih-Hao Chang and Chi-Yi Lin
Session 2: Mobile Networks

Contextual Source Selection for Federated Search in Mobile Environment ................................................................. 883
  Benachour Hamid and Kechid Samir

Detect DoS Attack Using MrDR Method in Merging Two MANETs ................................................................. 889
  Albandari Alsumayt, John Haggerty, and Ahmad Lotfi

The Application of Web Services for Real Time Charging in Mobile Networks ........................................ 896
  Farouk Gaffoor and Bobby L. Tait

First International Workshop on Innovative Technologies in Informatics and Networking (WITIN 2016)

Session 1: Image Processing I

Adaptable Dense Representation with Collaborative Representation Classification for Face Recognition Using Low-Rank Matrices Recovery .......................................................... 902
  Deng-Yuan Huang, Ching-Ning Huang, and Wu-Chih Hu

Lightweight Topological-Based Map Matching for Indoor Navigation .......................................................... 908
  Ji-Han Jiang, Hoang-Long Le, and Shih-Chieh Shie

Human Action Recognition Based on Action Forests Model Using Kinect Camera ........................................ 914
  Chi-Hung Chuan, Ying-Nong Chen, and Kuo-Chin Fan

A Computer-Aided Grading System of Breast Carcinoma: Scoring of Tubule Formation ........................................ 918
  Chien-Chuan Ko, Chi-Yang Cheng, and Chun-Hung Lin

Selecting the Universal Features for Breast Lumps with Different Acquisition Parameter Settings ........................................ 924
  Chuan-Yu Chang, Mao-Cheng Chen, and Shao-Jer Chen

Session 2: Image Processing II

Geological Segmentation on UAV Aerial Image Using Shape-Based LSM with Dominant Color ........................................ 928
  Chieh-Ling Huang, Jwu-Jenq Chen, Ching-Ju Chen, and Yang-Gi Wu

The Development and Implementation of a Real-Time Depth Image Capturing System Using SoC FPGA ........................................ 934
  Chien-Chung Wu and Kai-Wen Weng

An Efficient Quadrature-Based Block Truncation Coding for Digital Image Compression ........................................ 939
  Fu-Jhong Yang, Chih-Yuan Lien, Pei-Yin Chen, and Chih-Ling Hsu

A Fast Linear-Prediction Fractional-Pixel Search Algorithm .......................................................... 943
  Lung-Jen Wang and Wen-Ming Tai

Adaptive Carrier Frequency Offset and Channel Estimation for MIMO-OFDM Systems ........................................ 949
  Chang-Yi Yang, Yu-Li Chen, and Hai-Yan Song
Session 3: Data Processing and Knowledge Management

Using Prefix Tree to Improve the Performance of Chinese Sentiment Analysis ................................................................. 955
  Yi-Jen Su, Rung-Ching Chen, Chin-Min Hsiung, Yue-Qun Chen, Shuo-Wen Yu,
  and Huang-Wei Huang

Analysis of the Queue Service Probability for the EDF Scheduling Algorithm ............................................................. 960
  Mu-Song Chen, Chi-Pan Hwang, and Hsuan-Fu Wang

Performance Evaluation of Call Center Agents by Neural Networks .............................................................................. 964
  Hui-Huang Hsu, Te-Chan Chen, Wei-Tsung Chan, and Jung-Kuei Chang

A PTC Scheme for Internet of Things: Private-Trust-Confidentiality ............................................................................ 969
