Message from the General Chairs of BigDataSecurity
2016..................................................................................................................................................xii

Message from the Program Chairs
of BigDataSecurity 2016.................................................................................................................xiii

Committee Members of BigDataSecurity 2016..................................................................................xiv

Message from the Program Chairs of HPSC 2016.............................................................................xvi

Committee Members of HPSC 2016..................................................................................................xvii

Message from the Program Chairs of IDS 2016................................................................................xix

Committee Members of IDS 2016.....................................................................................................xx

The Second IEEE International Conference on Big Data Security on Cloud

BDS 1
Computing Large Connected Components Using Map Reduce in Logarithmic Rounds
..........................................................................................................................................................1

Amar Sharma and Rajiv Misra

Differential Privacy of Big Data: An Overview .................................................................................7

Xiaoming Yao, Xiaoyi Zhou, and Jixin Ma

Authentication and Access Control in e-Health Systems in the Cloud ............................................13

Nafiseh Kahani, Khalid Elgazzar, and James R. Cordy

Trust Issues for Big Data about High-Value Manufactured Parts ..................................................24

Anku Adhikari, Avesta Hojjati, Juanli Shen, Jui-Ting Hsu, William P. King,
and Marianne Winslett

v
**BDS 2**

Privacy Preserving Rack-Based Dynamic Workload Balancing for Hadoop MapReduce ..................................................................................................................................................30  
_Xiaofei Hou, Doyel Pal, Ashwin Kumar T. K., Johnson P. Thomas, and Hong Liu_

A Big Data Architecture for Security Data and Its Application to Phishing Characterization ..................................................................................................................................................36  
_Pedro H. B. Las-Casas, Vinicius Santos Dias, Wagner Meira Jr., and Dorgival Guedes_

Assessing Vulnerabilities in Bluetooth Low Energy (BLE) Wireless Network Based IoT Systems ..................................................................................................................................................42  
_Yanzhen Qu and Philip Chan_

AI\(^2\): Training a Big Data Machine to Defend ........................................................................................................49  
_Kalyan Veeramachaneni, Ignacio Arnaldo, Uday Veeramachaneni, Vamsi Korrapati, Constantinos Bassias, and Ke Li_

**BDS 3**

A Scalable Meta-Model for Big Data Security Analyses ........................................................................................................55  
_Baijian Yang and Tonglin Zhang_

OwlSight: Platform for Real-Time Detection and Visualization of Cyber Threats ........................................................................61  
_Vasco Samuel Carvalho, Maria João Polidoro, and João Paulo Magalhães_

Clouds for Hit-and-Run Wireless Attacks .................................................................................................................................67  
_J. Jenny Li, Fenando Neto, and Jingchio Liou_

Secure Data Outsourcing with Adversarial Data Dependency Constraints ..................................................................................73  
_Boxiang Dong, Wendy Wang, and Jie Yang_

**BDS 4**

An Ultra Lightweight Encryption Design for Security in Pervasive Computing ..................................................................................79  
_Gaurav Bansod, Abhijit Patil, Swapnil Sutar, and N. Pisharoty_

A Secure Framework for Ensuring EHR’s Integrity Using Fine-Grained Auditing and CP-ABE ..................................................................................................................................................85  
_B. Eswara Reedy and Gandikota Ramu_

Reverse TCP and Social Engineering Attacks in the Era of Big Data .................................................................................................90  
_Christine Atwell, Thomas Blasi, and Thaier Hayajneh_

Towards Secure Tag-MapReduce Framework in Cloud .........................................................................................................................96  
_Cherif A. A. Bissiriou and Mostapha Zbakh_
BDS 5

Arithmetic Correlation Used in Mobile Cloud ID-Based Multiple Authentication ......................................................... 105
Wang Hui-Juan, Jiang Yong, Zhan Gao-Feng, and Shi Rui-Sheng

Securing Big Data Environments from Attacks ............................................................................................................. 109
Udaya Tupakula and Vijay Varadharajan

Towards Performance Evaluation of Oblivious Data Processing Emulated with Partially Homomorphic Encryption Schemes .......................................................................................................................... 113
Vasily Sidorov and Wee Keong Ng

Embedding Model-Based Security Policies in Software Development ..................................................................................... 116
Javier Navarro-Machuca and Li-Chiou Chen

BDS 6

A Novel Approach to Predictive Graphs Using Big Data ........................................................................................................ 123
Srinivasan Shanmugam and Harish Ragavan

Improve the Prediction Accuracy of Naïve Bayes Classifier with Association Rule Mining .......................................................................................................................... 129
Tianda Yang, Kai Qian, Dan Chia-Tien Lo, Ying Xie, Yong Shi, and Lixin Tao

Aspects of Data Cataloguing for Enterprise Data Platforms ............................................................................................. 134
Srinivasan Shanmugam and Gokul Seshadri

Security-Aware Efficient Mass Distributed Storage Approach for Cloud Systems in Big Data ................................................. 140
Keke Gai, Meikang Qiu, and Hui Zhao

BDS 7

Towards Efficient Authentication Scheme with Biometric Key Management in Cloud Environment .................................................. 146
Zaid Ameen Abduljabbar, Hai Jin, Zaid Alaa Hussien, Ali A. Yassin, Mohammed Abdulridha Hussain, Salah H. Abbdal, and Deqing Zou

Homomorphic Encryption Scheme Based on Elliptic Curve Cryptography for Privacy Protection of Cloud Computing .......................................................................................................................... 152
Ming-Quan Hong, Peng-Yu Wang, and Wen-Bo Zhao

A Secure Management Scheme Designed in Cloud ............................................................................................................. 158
Peng-Yu Wang and Ming-Quan Hong

Cooperative Monitoring Mechanism for Cluster Based on Message Routing Queue ........................................................................ 163
Guan Yang and Xiaolong Xu
BDS 8
A Novel Secure Big Data Cyber Incident Analytics Framework for Cloud-Based Cybersecurity Insurance ...........................................................171
Keke Gai, Meikang Qiu, and Sam Adam Elnagdy
Privacy in the Cloud: Anonymous Tax Preparation ..........................................................177
Emmanuel S. Peters and Nicholas Maxemchuk
Impact of Cyber-Attacks on Critical Infrastructure ................................................................183
Kutub Thakur, Md Liakat Ali, Ning Jiang, and Meikang Qiu
Information Security Policy for E-Commerce in Saudi Arabia ................................................187
Kutub Thakur, Md Liakat Ali, Keke Gai, and Meikang Qiu

BDS 9
Quantitative Analysis of Graph Algorithms: Models and Optimization Methods ......................191
Xu Wang, Yongxin Zhu, and Yufeng Chen
Security-Aware Information Classifications Using Supervised Learning for Cloud-Based Cyber Risk Management in Financial Big Data ........................................................................197
Keke Gai, Meikang Qiu, and Sam Adam Elnagdy

The Second IEEE International Conference on High Performance and Smart Computing

HPSC 1
Parallelization of Error Weighted Hashing for Approximate k-Nearest Neighbour Search on GPU-CPU Hybrid .................................................................................203
Siddharth Bhatia and Mohan Pavan Kumar Badarla
Using Diversity to Harden Multithreaded Programs Against Exploitation .............................208
David M. Tagatac, Michalis Polychronakis, and Salvatore J. Stolfo
Exploiting Redundant Computation in Communication-Avoiding Algorithms for Algorithm-Based Fault Tolerance ........................................................214
Camille Coti
Parallel Simulation of Full-Field Polymer Flooding ...............................................................220
Kun Wang, Hui Liu, Jia Luo, Song Yu, Zhangxin Chen, and Peng Zhang

HPSC 2
Investigation of Reconfigurable FPGA Design for Processing Big Data Streams ..........................................................226
Usamah Algemili
LA-Credit: A Load-Awareness Scheduling Algorithm for Xen Virtualized Platforms ...................................................................................................................................................234
   Jun Wu, Chen-Yuan Wang, and Jian-Fu Li

An Energy Efficient VM Allocation Approach for Data Centers ................................................................................................................240
   İksen Çağlar and Deniz Turgay Altilar

A Classification Algorithm Based on Ensemble Feature Selections for Imbalanced-Class Dataset ................................................................................................................245
   Hua Yin, Keke Gai, and Zhijian Wang

**HPSC 3**

Performance of Partitioned Homogeneous Multiprocessor Real-Time Scheduling Algorithms in Heterogeneous Environments ........................................................................................................250
   Andrew Burke

Traffic Aware Virtual Machine Packing in Cloud Data Centers ........................................................................................................................256
   Jun Liu, Jinhua Guo, and Di Ma

A New Replica Placement Policy for Hadoop Distributed File System ................................................................................................................262
   Wei Dai, Ibrahim Ibrahim, and Mostafa Bassiouni

Energy Efficient Traffic-Aware Virtual Machine Migration in Green Cloud Data Centers ........................................................................................................................268
   Veena Reddy Reguri, Swetha Kogatam, and Melody Moh

**HPSC 4**

Multiscale Modeling of Mechanotransduction Processes in Flow-Induced Platelet Activation ..................................................................................................................................274
   Chao Gao, Peng Zhang, and Danny Bluestein

GPU-Accelerated Preconditioned GMRES Solver ........................................................................................................................280
   Bo Yang, Hui Liu, Zhangxin Chen, and Xuhong Tian

Coupled Geomechanics and Reservoir Flow Modeling on Distributed Memory Parallel Computers ..........................................................................................................................286
   Jia Luo, Kun Wang, Hui Liu, and Zhangxin Chen

Large-Scale Reservoir Simulations on Parallel Computers ..........................................................................................................................292
   Yan Chen, Hui Liu, Kun Wang, Zhangxin Chen, Yanfeng He, Bo Yang, and Peng Zhang

**HPSC 5**

A Component Based Graphical Parallel Programming Approach for Numerical Simulation Development ....................................................................................................................298
   Liao Li, Mo Zeyao, and Zhang Aiqing
Algorithms in ParAFEMImp: A Parallel and Wideband Impedance Extraction Program for Complicated 3-D Geometries

Tao Cui, Junqing Chen, Hengliang Zhu, and Xuan Zeng

A Programming Framework for Large Scale Numerical Simulations on Unstructured Mesh

Qingkai Liu, Weibo Zhao, Jie Cheng, Zeyao Mo, Aiqing Zhang, and Jianjun Liu

A Scalable, Parallel Module for Overlapping Grids and Its Applications

Hong Guo, Aiqing Zhang, Zeyao Mo, and Ye Pu

HPSC Poster

Evaluation Model of the Artist Based on Fuzzy Membership to Improve the Principal Component Analysis of Robust Kernel

Jian Yao and Zhang Kaifeng

IEEE International Conference on Intelligent Data and Security

IDS 1

A Security-Aware Data Placement Mechanism for Big Data Cloud Storage Systems

Seungmin Kang, Bharadwaj Veeravalli, and Khin Mi Mi Aung

Secure Mobile Payments Based on Cloud Services: Concepts and Experiments

Pascal Urien and Xavier Aghina

Towards Extracting Drug-Effect Relation from Twitter: A Supervised Learning Approach

Fan Yu, Melody Moh, and Teng-Sheng Moh

A Secure Biometric Identification Technique Using Spread Spectrum Audio Watermarking

Yekta Said Can and Fatih Alagoz

IDS 2

Self-Healing Intrusion Detection System Concept

Viktoriya Degeler, Richard French, and Kevin Jones

Automate Cybersecurity Data Triage by Leveraging Human Analysts’ Cognitive Process

Chen Zhong, John Yen, Peng Liu, and Robert F. Erbacher

Compressing Large Amounts of NetFlow Data Using a Pattern Classification Scheme

Rémon Cornelisse, Mortaza S. Bargh, Sunil Choenni, Debora E. G. Moolenaar, and Luc V. De Zeeuw
Adaptive Combinatorial Key Scheme for Mobile Heterogeneous Wireless Sensor Networks .................................................................371
  Wael Hosny Fouad Aly

IDS 3
Vulnerability Evaluation Accelerator for Lightweight Ciphers .................................................................377
  Masaya Yoshikawa, Yusuke Nozaki, and Kensaku Asahi
TRAS: A Trust-Based Routing Protocol for Ad Hoc and Sensor Networks ..................................................382
  Imad Jawhar, Farhan Mohammed, Jameela Al Jaroodi, and Nader Mohamed
Towards Trusted and Efficient UAV-Based Communication ........................................................................388
  Farhan Mohammed, Imad Jawhar, Nader Mohamed, and Ahmed Idries
Intelligent Data Mining for Translator Correctness Prediction ........................................................................394
  Yulia Rossikova, J. Jenny Li, and Patricia Morreale

IDS 4
Contextual-Aware Hybrid Recommender System for Mixed Cold-Start Problems in Privacy Protection ........................................................................................................400
  Vicky Na Zhao, Melody Moh, and Teng-Sheng Moh
Spectral Clustering Technique for Classifying Network Attacks ........................................................................406
  Anna Little, Xenia Mountrouidou, and Daniel Moseley
An Efficient Public Verifiability and Data Integrity Using Multiple TPAs in Cloud Data Storage .....................................................................................................................412
  Salah H. Abbdal, Hai Jin, Ali A. Yassin, Zaid Ameen Abduljabbar, Mohammed Abdulridha Hussain, Zaid Alaa Hussien, and Deqing Zou
RuleSN: Research and Application of Social Network Access Control Model ..............................................418
  Li Ma, Lixin Tao, Yong Zhong, and Keke Gai

Additional Paper:
Using UAVs to Secure Linear Wireless Sensor Networks ...........................................................................424
  Nader Mohamed, Haya AlDhaheri, Khadeijah Almurshidi, Mahra Al-Hammoudi
  Salama Al-Yalyali, Imad Jawhar, and Jameela Al-Jaroodi

Author Index ...............................................................................................................................................430
