2016 IEEE 14th International Workshop on Advanced Motion Control (AMC 2016)

Auckland, New Zealand
22-24 April 2016
Advanced Motion Control

Motion control in Environmental Biomechanics using Inductance signal processing
John Ronczka (SCOTTYNCC Independent Research Scientists & Professional Memberships: IEEE CILTA AITPM IIA AIM PIA., Australia) ................................................................. 1

Electromagnetic damper control strategies for light weight electric vehicles
Alista Fow (University of Waikato, New Zealand), Mike Duke (University of Waikato, New Zealand) ................................................................. 9

Maximum Torque Generation of SEA under Velocity Control
Chan Lee (Daegu Gyeongbuk Institute of Science and Technology, Korea), WIha Choi (Daegu Gyeongbuk Institute of Science and Technology, Korea), Sehoon Oh (Daegu Gyeongbuk Institute of Science and Technology, Korea) ................................................................. 16

Trajectory Tracking Control Method and Experiment of AGV
Dongdong Chen (Beihang University, P.R. China), Zhenyun Shi (Beihang University, P.R. China), Peijiang Yuan (Beihang University, P.R. China), Tianmiao Wang (Beihang University, P.R. China), Yuanwei Liu (Beihang University, P.R. China), Mingqing Lin (Beihang University, P.R. China), Zhijun Li (South China University of Technology, P.R. China) ................................................................. 24

Motion Control for assistive and Rehabilitation Robots and Systems A

A Shoulder-Mounted Robotic Exoskeleton for Rehabilitation of Temporomandibular Disorder via Assisted Motion of the Jaw
Matthew Evans (The University of Auckland, New Zealand), Jordan Forrest (The University of Auckland, New Zealand), Wayne Tse (The University of Auckland, New Zealand), Reuben Finch (The University of Auckland, New Zealand), Peter Xu (The University of Auckland, New Zealand) ................................................................. 30

Novel Walking Assist Device Based on Generic Human Motion Tracking Criteria
Kamal Mohy El Dine (Keio University, France), Chuan Yang (Keio University, Japan), Takahiro Nozaki (Keio University, Japan), Toshiyuki Murakami (Keio University, Japan) ................................................................. 38

Active Modeling for Pneumatic Artificial Muscle
Daohui Zhang (Shenyang Institute of Automation Chinese Academy of Sciences, P.R. China), Xingang Zhao (Shenyang Institute of Automation, Chinese Academy of Sciences, P.R. China), Jianda Han (Shenyang Institute of Automation, Chinese Academy Sciences, P.R. China) ................................................................. 44

Design and Control of a Wearable Active Knee Orthosis for Walking Assistance
Hui Shan (Southeast University, P.R. China), Chong Jiang (Southeast University, P.R. China), Yuliang Mao (Southeast University, P.R. China), Xingsong Wang (Southeast University, P.R. China) ................................................................. 51

Motion Control of Aerial Robots

Coordinating a Heterogeneous Robot Swarm Using Robot Utility-based Task Assignment (RUTA)
Tamer AbuKhalil (University of Bridgeport, USA), Madhav Patil (University of Bridgeport, USA), Sarosh Patel (University of Bridgeport, USA), Tarek Sobh (University of Bridgeport, USA) ................................................................. 57

Separated Adaptive Control Scheme of a Rotor-Flying Manipulator
Bin Yang (State key Laboratory of Robotics, Shenyang Institute of Automation, P.R. China), Yuqing He (State key Laboratory of Robotics, Shenyang Institute of Automation, P.R. China), Jianda Han (Shenyang Institute of Automation, Chinese Academy Sciences, P.R. China), Guangjun Liu (Ryerson University, Canada) ................................................................. 63
Special Session: Real World Haptics Based on Control Technology

Model Predictive Path Following Control with Acceleration Constraints for Front Steering Vehicles
Manabu Shinohara (Tokyo City University, Japan), Oda Takatsugu (Tokyo City University, Japan), Kenichiro Nonaka (Tokyo City University, Japan), Kazuma Sekiguchi (Tokyo City University, Japan) 71

Special Session: Synaptic Integration Technologies for Future Mechatronics

High-Order Disturbance Estimation Using Kalman Filter for Precise Reaction-Torque Control
Yuki Nagatsu (Keio University, Japan), Seiichiro Katsura (Keio University, Japan) 79

Control Design Based on Reachability Matrix for Realization of Independent Operation in Multilateral System
Tomoki Kono (Keio University, Japan), Seiichiro Katsura (Keio University, Japan) 85

Design Method of I-PD Force Control System Based on Instantaneous State Observer for Industrial Robot
Akinori Yabuki (Nagaoka University of Technology & Nagaoka University of Technology, Japan), Kiyoshi Ohishi (Nagaoka University of Technology, Japan), Toshimasa Miyazaki (Nagaoka University of Technology, Japan), Yuki Yokokura (Nagaoka University of Technology, Japan) 91

Calibration of iRobot Create using UMBmark
Yu Dang (the University of Auckland, New Zealand), Hong Wang (Northeastern University, P.R. China), Peter Xu (The University of Auckland, New Zealand) 97

Special Session: Network-Based Control-Systems and its Applications

Robust Control of Active Suspension to Improve Ride Comfort with Structural Constraints
Fumiaki Yamada (Nanzan University Faculty of Science and Engineering, Japan), Kohei Suzuki (Nanzan University, Japan), Tatsuo Toda (Nanzan University, Japan), Gan Chen (Nanzan University, Japan), Isao Takami (Nanzan University, Japan) 103

Research on Rescue Robots Climbing up Stairs based on the Estimation of Slope Angles with LRF
Masatoshi Hatano (Nihon University & College of Science and Technology, Nihon University, Japan), Yuki Kitahara (Graduate School of Science and Technology, Nihon University, Japan) 109

Development of Space-saving Mechanism in Shaking Table Systems for Earthquake Simulators
Sota Kaida (Nagoya Institute of Technology, Japan), Kenta Seki (Nagoya Institute of Technology, Japan), Makoto Iwasaki (Nagoya Institute of Technology, Japan) 115

Autonomously Achieving Bipedal Locomotion Skill via Hierarchical Motion Modelling
Dingsheng Luo (Peking University, P.R. China), Yi Wang (Peking University, P.R. China), Xihong Wu (Peking University, P.R. China) 121

Real-Time Extension of ROS based on a Network of Modular Blocks for Highly Precise Motion Generation
Christian Scheifele (University of Stuttgart, Germany), Armin Lechler (University of Stuttgart, Germany), Christian Daniel (ISG Industrielle Steuerungstechnik GmbH, Germany), Peter Xu (The University of Auckland, New Zealand) 129

Design of H∞ controller for networked predictive control system with prediction error observer
Yutaka Uchimura (Shibaura Institute of Technology, Japan), Takuya Takahashi (Shibaura Institute of Technology, Japan) 135

Influence of Time-Varying Communication Delay in Adaptive Controller Based Bilateral Control System
Daisuke Yashiro (Mie University, Japan) 141
Transparency-Optimized Bilateral Teleoperation Based on Acceleration Control in the Presence of Time delay
Hayata Sakai (Keio University, Japan), Kouhei Ohnishi (Keio University, Japan) ................................. 147

Special Session: Smart Precision Control in Mechatronics Systems A

Position Control System Based on Inertia Measurement Unit Sensor Fusion with Kalman Filter
Takahiro Ishikawa (Keio University, Japan), Takahiro Nozaki (Keio University, Japan), Toshiiyuki Murakami (Keio University, Japan) ............................................................... 153

Bilateral Control Using Functional Electrical Stimulation with Reaction Torque Observer
Tomoya Kitamura (Saitama University, Japan), Naoto Mizukami (Saitama University, Japan), Sho Sakaino (Saitama University, Japan), Toshiaki Tsuji (Saitama University, Japan) .......... 160

High Back-drivable Pseudo I-PD Torque Control Using Load-side Torque Observer With Torsion Torque Sensor
Yusuke Kawai (Nagaoka University of Technology, Japan), Yuki Yokokura (Nagaoka University of Technology, Japan), Kiyoshi Ohishi (Nagaoka University of Technology, Japan), Kotaro Saito (Unipulse Corporation, Japan), Atsushi Shimamoto (Unipulse Corporation, Japan) .......... 167

Bilateral Control Using Two-Stage Series-Elastic Actuator
Masaru Saito (Tokyo Denki University, Japan), Jun Ishikawa (Tokyo Denki University, Japan) ............ 173

Actuator and Manipulator Control Systems

Realization of Bilateral Control by Compact Solenoid Actuators without Position and Force Sensors
Sakahisa Nagai (Yokohama National University, Japan), Atsuo Kawamura (Yokohama National University, Japan) ................................................................. 180

Verification of a Developed Testing Machine for Suture Threads through Measurement of Tension and Elongation
Kensuke Oda (Keio University, Japan), Kouhei Ohnishi (Keio University, Japan), Eiji Kobayashi (Keio University, Japan) ................................................................. 186

A Study on a Linear Vibratory Feeding System Based on Servo Motor Technology
Liang Han (Southeast University, P.R. China), YE Zhi (Southeast University, P.R. China) ............. 192

Path-tracking Control of Bevel-Tip Needles Using Model Predictive Control
Benyan Huo (the University of Chinese Academy of Science, P.R. China), Xingang Zhao (Shenyang Institute of Automation, Chinese Academy of Sciences, P.R. China), Jianda Han (Shenyang Institute of Automation, Chinese Academy Sciences, P.R. China), Peter Xu (The University of Auckland, New Zealand) .................................................................................. 197

Special Session: Emerging Human Machine Interface Technologies for Advanced Control of Robot Motion

Rotation Vector Sensor-based Remote Control of a Humanoid Robot through a Google Glass
Xi Wen (School of Electrical Engineering and Automation Tianjin University Tianjin, P.R. China), Yu Song (School of Electrical Engineering and Automation Tianjin University Tianjin, P.R. China), Wei Li (California State University, Bakersfield, USA), Genshe Chen (Intelligent Fusion Technology, Inc, USA), Bin Xian (Tianjin University, P.R. China) ................................................................. 203

Kinect-based Control of a DaNI Robot via Body Gesture
Xiaoqian Mao (School of Electrical Engineering and Automation Tianjin University, Tianjin, P.R. China), Wei Li (California State University, Bakersfield, USA), Robert Swanson (California State University, Bakersfield, USA), Micheal Grishaber (California State University, Bakersfield, USA), Genshe Chen (Intelligent Fusion Technology, Inc, USA) ................................................................. 208
Control of Humanoid Robot via High-Frequency phase-tagged SSVEPs
Hong Hu (Tianjin University, P.R. China), Jin Zhao (Tianjin University, P.R. China), Wei Li (California State University, Bakersfield, USA), Hongbo Li (Tsinghua University, P.R. China), Genshe Chen (Intelligent Fusion Technology, Inc, USA) ................................................................. 214

Efficient People Search and Gesture Recognition using a Kinect Interfaced Mobile Robot
Robert Tubman (Massey University, New Zealand), Khalid M Arif (Massey University, New Zealand) .................................................................................................................. 220

Composite Filter Design and Application to Piezo-driven Stage Systems
Daisuke Noda (Nagoya Institute of Technology, Japan), Kenta Seki (Nagoya Institute of Technology, Japan), Makoto Iwasaki (Nagoya Institute of Technology, Japan) ................................................... 227

Estimation of Load-side Position of Two Mass Resonant Systems using MEMS Accelerometers
Koji Watanabe (Nagoya Institute of Technology, Japan), Kazuaki Ito (National Institute of Technology, Toyota College, Japan), Makoto Iwasaki (Nagoya Institute of Technology, Japan), Riccardo Antonello (University of Padova, Italy), Roberto Oboe (University of Padova, Italy) ........ 233

Design of Feedforward Filling Control for Joining Thick Materials Using Robotic Welding Systems
Suibo Xia (National University of Singapore, Singapore), Yan Zhi Tan (National University of Singapore, Singapore), Chee Khiang Pang (National University of Singapore, Singapore), Chee Meng Chew (National University of Singapore, Singapore) .................................................. 239

Adaptive Vibration Suppression Perfect Tracking Control for Linear Time-Varying Systems with Application to Ball-Screw Feed Drives
Thomas Beauduin (The University of Tokyo, Japan), Hiroshi Fujimoto (The University of Tokyo, Japan), Yuki Terada (DMG MORI SEIKI, Japan) ........................................................................................................... 245

Self-Learning Robotic Systems

Gaussian Process based Model Predictive Control for Linear Time Varying Systems
Gang Cao (Massey University, New Zealand), Edmund Lai (Auckland University of Technology, New Zealand), Fakhrul Alam (Massey University, New Zealand) ................................................................. 251

Evolving a Lookup Table Based Motion Controller for a Ball-Plate System with Fault Tolerant Capabilities
Mark Beckerleg (Auckland University of Technology, New Zealand), Russell Hogg (AUT University, New Zealand) ........................................................................................................... 257

Evolving Individual and Collective Behaviours for the Kilobot Robot
Mark Beckerleg (Auckland University of Technology, New Zealand), Chun Zhang (AUT University, New Zealand) ........................................................................................................... 263

Multi-level Motor Drives to Eliminate Torque Ripple with Adaptive Dead-Time Compensation
Shuhei Shimmyo (Keio University & Toshiba Corporation, Japan), Kazuaki Yuuki (Toshiba Corporation, Japan), Kouhei Ohnishi (Keio University, Japan) ................................................................. 269

Robust Control for Robotic Systems

Sampled-data Robust Feedback Linearization Using Estimator
Asim Zaheer (National University of Sciences and Technology, Pakistan), Yasar Ayaz (National University of Science and Technology, Pakistan), Momena Hasan (University of Engineering & Technology, Taxila, Pakistan), Muhammad Salman (College of EME National University of Science and Technology Islamabad Pakistan, Pakistan) ................................................................. 276
Observer-based Control for Robotic Manipulations with Uncertain Kinematics and Dynamics
Bing Xiao (Bohai University, P.R. China), Shen Yin (Harbin Institute of Technology, P.R. China), Okyay Kaynak (Bogazici University, Turkey), Huijun Gao (Harbin Institute of Technology, P.R. China) 282

A Design Method of A Robust Controller for Hydraulic Actuation with Disturbance Observers
Hiroaki Kuwahara (TOSHIBA Corporation, Japan), Fujio Terai (TOSHIBA Corporation, Japan), Michele Focchi (Istituto Italiano di Tecnologia, Italy), Gustavo A Medrano-Cerda (Istituto Italiano di Tecnologia, Italy), Darwin Caldwell (Istituto Italiano di Tecnologia, Italy), Claudio Semini (Istituto Italiano di Tecnologia, Italy) 289

Robust H∞ Control for Active Magnetic Bearing System with Imbalance of the Rotor
Masaki Goto (Nanzan University, Japan), Isao Takami (Nanzan University, Japan), Gan Chen (Nanzan University, Japan) 297

Special Session: Advanced Control Technologies for Electric Vehicles.

Implementation of a Leader-Follower Controller for a Skid-Steering Wheel-Legged Robot
Blake Beckman (Defence R&D Canada -- Suffield, Canada), Luc Phung (McGill University, Canada), Inna Sharf (McGill University, Canada) 304

Advanced Control Functions Of Decoupled Electro-Hydraulic Brake System
Dzmitry Savitski (Technische Universität Ilmenau, Germany), Valentin Ivanov (Technische Universität Ilmenau, Germany), Dmitrij Schleinin (Technische Universität Ilmenau, Germany), Klaus Augsburg (Technische Universität Ilmenau, Germany), Thomas Pütz (Lucas Varity GmbH, ZF TRW, Germany), Chih Feng Lee (Linköping University, Sweden) 310

A Design of All Wheel Coordinated Steering for Electric Mobility Scooter
Ziming (Tom) Qi (Otago Polytechnic, New Zealand), Kuang Ma (Otago Polytechnic, New Zealand), Kun-Hsien Lee (National Taiwan University of Science and Technology, Taiwan), Nicholas Sargeant (Otago Polytechnic, New Zealand) 318

A Design of In-Car Multi-Layer Communication Network with Bluetooth and CAN Bus
Ziming (Tom) Qi (Otago Polytechnic, New Zealand), Ping Dong (Otago Polytechnic, New Zealand), Kuang Ma (Otago Polytechnic, New Zealand), Nicholas Sargeant (Otago Polytechnic, New Zealand) 323

Humanoid Robotics and Intelligence

Learning Basic Unit Movements for Humanoid Arm Motion Control
Fan Hu (Peking University, P.R. China), Xihong Wu (Peking University, P.R. China), Dingsheng Luo (Peking University, P.R. China) 327

Bipedal Robot Push Recovery Control Mimicking Human Reaction
Ren C. Luo (National Taiwan University, Taiwan), Chao-Wen Huang (National Taiwan University, Taiwan), Wen-Chien Hung (National Taiwan University, Taiwan) 334

Hazard Detection and Cognition for an Active Driving Assistance
Baptiste Michel Rouzier (Keio University, Japan), Toshiyuki Murakami (Keio University, Japan) 340

A study on real time integrated lane detection and vehicle tracking method with side-mirror cameras
Quang Nguyen (Inje University, Korea), Moonyoung Yoon (Graduate School of Mechanical Engineering, Inje University, Korea), Duksun Yun (Korea Automotive Technology Institute, Korea), Woosung Che (Kyungsung University, Korea), Heungseob Kim (High Safety Vehicle Core Technology Research Center, Inje University, Korea), Kwangsook Boo (High Safety Vehicle Core Technology Research Center, Inje University, Korea) 346
Motion Control for Soft Robots

PneuNet Based Control System for Soft Robotic Tongue
Xuanming Lu (Nanjing University of Science & Technology, P.R. China), Peter Xu (The University of Auckland, New Zealand), Xiaoning Li (Nanjing University of Science & Technology, P.R. China) ................................................................. 353

Control of a Soft-Bodied XY Peristaltic Table for Delicate Sorting
Ryman Hashem (The University of Auckland, New Zealand), David Browne (University of Auckland, New Zealand), Brierley Smith (The University of Auckland, New Zealand), Martin Stommel (AUT University, New Zealand), Peter Xu (The University of Auckland, New Zealand) ........................................................................................................... 358

Pneumatic System and Low-level Control of a Soft Machine Table Inspired by Caterpillar Locomotion
Zhicong Deng (The University of Auckland, New Zealand), Martin Stommel (AUT University, New Zealand), Peter Xu (The University of Auckland, New Zealand) ................................................................. 364

Medically-Inspired Approaches for the Analysis of Soft-Robotic Motion Control
Steven Dirven (Massey University, New Zealand), Martin Stommel (AUT University, New Zealand), Ryman Hashem (The University of Auckland, New Zealand), Peter Xu (The University of Auckland, New Zealand) ................................................................. 370

Special Session: Motion Control for Rehabilitation Robotics

Energy-Efficient Power Assist Control with Periodic Disturbance Observer and Frequency Estimator
Kazuyoshi Hatada (Fukuoka University, Japan), Kentaro Hirata (Okayama University, Japan), T. Sato (Nara Institute of Science and Technology, Japan) ........................................................................................................... 376

Estimation of Lower-Extremity Muscle Forces by Using Task-Space Information
Masashi Sekiya (Saitama University, Japan), Shota Itoh (Saitama University, Japan), Kunihiro Ogata (Saitama University, Japan), Toshiaki Tsuji (Saitama University, Japan) ................................................................. 382

Development of Meal Assistance Device for Patients with Spinal Cord Injury
Takahiro Nozaki (Keio University, Japan), Toshiyuki Murakami (Keio University, Japan), Tomoyuki Shimono (Yokohama National University, Japan), Kouhei Ohnishi (Keio University, Japan), Roberto Oboe (University of Padova, Italy) ........................................................................................................... 388

Consideration of Force Visualization for Hemiplegia Based on a Force Direction Teaching System
Yuto Hirabayashi (Saitama University, Japan), Kunihiro Ogata (Saitama University, Japan), Yuri Hasegawa (Kaze-no-tani Project, Japan), Toshiaki Tsuji (Saitama University, Japan) ................................................................. 394

Mobile Robotic Control

A Computer Vision-Aided Motion Sensing Algorithm for Mobile Robot’s Indoor Navigation
Mamadou Diop (Multimedia University, Malaysia), Lee-Yeng Ong (Multimedia University, Malaysia), Tien Sze Lim (Multimedia University, Malaysia), Chot Hun Lim (Multimedia University, Malaysia) ........................................................................................................... 400

Application of Optimal Algorithm in Vacuum Path Planning of Robot
Qinghua Su (Beijing University of Aeronautics and Astronautics, P.R. China), Shusheng Bi (Beihang, P.R. China) ........................................................................................................... 406

An Approach for Coverage Path Planning for UAVs
Huu Le Nam (Auckland University of Technology, New Zealand), Loulin Huang (Auckland University of Technology, New Zealand), Xuejun Li (Auckland University of Technology, New Zealand), Jianfeng Xu (Huazhong University of Science and Technology, P.R. China) ........................................................................................................... 411

Transformer-Gyrator-Mixed Bilateral Control for Mobile Robot
So Tanaka (Yokohama National University, Japan), Tomoyuki Shimono (Yokohama National University, Japan), Takahiro Mizoguchi (Kanagawa Academy of Science and Technology, Japan), Yosuke Asano (National Institute of Technology, Kisarazu College, Japan) ........................................................................................................... 417
Double-segment Sliding Mode Control for Permanent Magnet Synchronous Motor Servo Drives
Yongan Li (Beijing Institute of Technology, P.R. China), Xiwei Peng (Beijing Institute of Technology, P.R. China) ................................................................. 423

Multi-objective Parameter Optimization Design of a Magnetically Actuated Intravitreal Injection Device
Hui Zhou (National University of Singapore, Singapore), Jinji Sun (National University of Singapore, Singapore), Bok Seng Yeow (National University of Singapore, Singapore), Hongliang Ren (NUS, Singapore) ................................................................. 430

Shape Reconstruction within an Optical Diffusion Model
Yangjie Wei (Northeastern University, P.R. China), Yuqing He (State key Laboratory of Robotics, Shenyang Institute of Automation, P.R. China) ................................................................. 436

On Explicit Implementation of Multiple Disturbance Observers Derived from Three-Degree-of-Freedom Control
Akihiro Suzumura (Yokohama National University, Japan), Yasutaka Fujimoto (Yokohama National University, Japan) ................................................................. 442

Tip Force Tracking Control Based on the Tendon-Sheath Transmission Model and 3D Reconstruction of a Long Slender Rescue Robot
Jia Li (Southeast University, P.R. China), Xingsong Wang (Southeast University, P.R. China), Ruru Xi (Southeast University, P.R. China), Chong Jiang (Southeast University, P.R. China) .......... 448

Equilibrium State Control for Climbing Robot
Akira Shimada (Shibaura Institute of Technology, Japan), Dung Nguyen (Hanoi University of Science and Technology, Vietnam) ........................................................................ 455

A visual positioning and measurement system for robotic drilling
Yuanwei Liu (Beihang University, P.R. China), Zhenyun Shi (Beihang University, P.R. China), Peijiang Yuan (Beihang University, P.R. China), Dongdong Chen (Beihang University, P.R. China), Mingning Lin (Beihang University, P.R. China), Zhijun Li (South China University of Technology, P.R. China) ........................................................................ 461

Exact Kinematics for Pitch Motion and Yaw Motion of Five Degrees of Freedom Surgical Robot
Takuya Matsunaga (Keio University, Japan), Kouhei Ohnishi (Keio University, Japan) .......... 467

Motion Control for assistive and Rehabilitation Robots and Systems B

Motion Control for a Multiple Input Rehabilitation Wearable Exoskeleton using Fuzzy Logic and PID
Momen Kamal Tageldeen (Universiti Teknologi PETRONAS, Malaysia), Iraivan Elamvazuthi (Universiti Teknologi PETRONAS, Malaysia), Perumal Nallagownden (Universiti Teknologi PETRONAS, Malaysia) ........................................................................ 473

Control Implementation for an Integrated Robotic and Virtual Mirror Therapy System for Stroke Rehabilitation
Iain Emerson (Massey University, New Zealand), Peter Xu (The University of Auckland, New Zealand), Johan Potgieter (Massey University, New Zealand) ................. 479

Standing Assistance considering a Voluntary Movement and a Postural Adjustment
Daisuke Chugo (Kwansei Gakuin University, Japan), Satoshi Muramatsu (Tokai University, Japan), Sho Yokota (Toyo University, Japan), Hiroshi Hashimoto (Advanced Institute of Industrial Technology, Japan) ........................................................................ 486
Medical Applications of Robotic Control

A Step Passage Strategy using Environment Recognition for an Electric Two-wheel Wheelchair
Florent Hoareau (Keio University, Japan), Toshiyuki Murakami (Keio University, Japan) ........................................ 492

Estimation of Mechanical Impedance at End Effector of Arm Based on Frequency Analysis
Ippei Toyomasu (Yokohama National University, Japan), Tomoyuki Shimono (Yokohama National University, Japan), Naoya Tojo (Yokohama National University, Japan), Takahiro Mizoguchi (Kanagawa Academy of Science and Technology, Japan) ......................................................... 498

An Approach to Balance and Posture Estimation using Image Feature Points for Biped Walking Robot
Naoki Oda (Chitose Institute of Science and Technology, Japan), Mina Yamazaki (Chitose Institute of Science and Technology, Japan) ........................................................................................................ 504

Development of Magnetorheological Fluid Clutch for Robotic Arm Applications
Manuel Fernández (National Tsing Hua University, Taiwan), Jen-Yuan (James) Chang (National Tsing Hua University, Taiwan) ........................................................................................................ 510

Special Session: Advanced Technologies for Nanoscale Servo-Systems

Fine Tracking Control System Based on Double Feedforward Tracking Control Considering Time Delay for Optical Disc
Keisuke Yoshida (Nagaoka University of Technology & Nagaoka University of Technology, Japan), Kiyoshi Ohishi (Nagaoka University of Technology, Japan), Toshimasa Miyazaki (Nagaoka University of Technology, Japan), Junichi Fukui (Nagaoka University of Technology & Nagaoka University of Technology, Japan) ........................................................................................................ 516

Disturbance Observer-Based Multirate Control for Rejecting Periodic Disturbances Beyond the Nyquist Frequency
Weili Yan (National University of Singapore, Singapore), Chee Khiang Pang (National University of Singapore, Singapore), Chunling Du (A*STAR Data Storage Institute, Singapore) ........................................................................................................ 522

Decoupling Control by the Center of Rotation and Gravity Hybrid-Driven Method for High-Precision Scan Stage with Multiple Actuators
Wataru Ohnishi (The University of Tokyo, Japan), Hiroshi Fujimoto (The University of Tokyo, Japan), Koichi Sakata (Nikon Corporation, Japan), Kazuhiro Suzuki (Nikon Corporation, Japan), Kazuaki Saiki (Nikon Corporation, Japan) ........................................................................................................ 528

Fundamental Study for a Fractional Order Repetitive Control Using Generalized Repetitive Control for High Precision Motor Control
Masato Kanematsu (the University of Tokyo, Japan), Hiroshi Fujimoto (The University of Tokyo, Japan) ........................................................................................................ 533

Industrial Control Systems

Reverse Engineering with Trajectory Generation Based on Bezier Curve at Dual Drive Machine
Ren Luo (National Chung Cheng University, Taiwan), Yi Wen Perng (National Taiwan University, Taiwan), Pang-Fu Cheng (National Taiwan University, Taiwan) ................................................................. 539

Mobile Robot Floor Classification using Motor Current and Accelerometer Measurements
Yanming Pei (Monash University, Australia), Lindsay Kleeman (Monash University, Australia) ........................................... 545

Automation of Plant Inspection in Primary Industry
Bernard Huggins (Massey University & GIPENZ, New Zealand) .......................................................................................... 553

3D Modeling and Nonlinear Control using Algorithmic Differentiation for Mono-Wheel robot
Dinh Van Bui (Yokohama National University, Japan), Yasutaka Fujimoto (Yokohama National University, Japan) ........................................................................................................ 558
Selective Topics in Motion Control

Experimental Validation of Energy Consumption Model for the Four-Wheeled Omnidirectional Mecanum Robots for Energy-Optimal Motion Control
Li Xie (The University of Auckland, New Zealand), Wolfgang Herberger (University of Stuttgart, Germany), Peter Xu (The University of Auckland, New Zealand), Karl Stol (University of Auckland, New Zealand) .................................................. 565

An Intuitive and Comprehensive Two-Load Model for Series Elastic Actuators
Steffen Schuetz (University of Kaiserslautern & Robotics Research Lab, Germany), Atabak Nejadfard (University of Kaiserslautern, Germany), Christian Koetting (University of Kaiserslautern, Germany), Karsten Berns (University of Kaiserslautern, Germany) ........................................ 573

Concept of a Computerized Numerical Control Kernel for Execution on Multi-core Processors
Matthias Keinert (University of Stuttgart, Germany), Armin Lechler (University of Stuttgart, Germany), Alexander Verl (Stuttgart University, Institute for Control Engineering of Machine Tools, Germany) .............................................................. 581

Optimal and Adaptive Control Systems

Robust Vibration Control of Two-Mass Resonant Systems in State Space
Emre Sariyildiz (National University of Singapore, Singapore), Takahiro Nozaki (Keio University, Japan), Toshiyuki Murakami (Keio University, Japan), Haoyong Yu (National University of Singapore, Singapore) ................................................................. 587

Recurrent Interval Type-2 Neuro-Fuzzy Control of an Electro Hydraulic Servo System
Mojtaba Ahmadieh Khanesar (Semnan University, Iran), Okyay Kaynak (Bogazici University, Turkey) ................................................................. 593
