AERODYNAMICS

Numerical Investigation of Perpendicular Blade-Vortex-Interaction on a Pitching Airfoil in Light Dynamic Stall ................................. 346
Droandi, Giovanni ; Gibertini, Giuseppe ; Zagaglia, Daniele ; Zanotti, Alex

Rotor-Obstacle Aerodynamic Interaction in Hovering Flight: An Experimental Survey ................................................................. 356
Zagaglia, Daniele ; Giuni, Michele ; Green, Richard B.

Wind Tunnel Assessment of the Computational Framework for Helicopter Fuselage Drag Reduction Using Vortex Generators ................................................................. 365
Zanotti, Alex ; Droandi, Giovanni ; Gibertini, Giuseppe ; Aueri, Franco ; Bonface, Jean-Christophe ; Gaveraux, Robert ; Le Pape, Arnaud

Experiment Demonstrating Reduction of Dynamic Stall by a Back-flow Flap .................................................................................. 374
Gardner, A. D. ; Optiz, S. ; Wolf, C. C. ; Merz, C. B.

Rotor Loads Prediction on the ONERA 7A Rotor using Loose Fluid/Structure Coupling ................................................................. 386
Ortan, Biel ; Putsdam, Mark ; Yeo, Hyeonsoo ; Truong, Khien Van

High-resolution CFD Predictions for Static and Dynamic Stall of a Finite-span OA209 Wing ................................................................. 407
Jain, Rohit ; Le Pape, Arnaud ; Costes, Michel ; Richez, Francois ; Smith, Marilyn

Computations of Combustion-Powered Actuation for Dynamic Stall Suppression ................................................................. 441
Jee, Solkeun ; Bowles, Patrick O. ; Matalanis, Claude G. ; Min, Byung-Young ; Wake, Brian E. ; Crittenden, Tom ; Glezer, Ari

Periodic Free Wake Simulation Using a Numerical Optimization Method .................................................................................. 471
Radler, Simon ; Hajek, Manfred

Boundary Layer Transition Characteristics of a Full-Scale Helicopter Rotor in Hover ................................................................. 482
Richter, Kai ; Schlelbl, Erich ; Ewers, Benjamin ; Raddatz, Jochen ; Klein, Alexander

Approximate Transition Prediction for the ONERA 7AD Rotor in Forward Flight using a Structured and Unstructured U/RANS solver ................................................................. 497
Heister, C. C.

Compressible Dynamic Stall Alleviation Through High Momentum Blowing .................................................................................. 508
Lorber, Peter P. ; Bowles, Patrick O. ; Berezin, Charles R. ; Scott, Mark W. ; Hird, Kyle ; Frankhouser, Matthew ; Bons, Jeffrey P. ; Gregory, James W.

Aerodynamic Performance Analysis for Iced Rotor based on New Three-Dimensional Rotor Icing Model ................................................................. 528
Xi, Chen ; Zhao, Qi-Jun

Influence Of The Diffuser Geometry Of Shrouded Rotors On The Aerodynamic Footprint Of MAVs ................................................................. 540
Ariza, David Gomez ; Jardin, Thierry ; Pothin, Sebastien

Numerical and Experimental Study of Centrifugally-Driven Flow inside a Rotating Duct for Rotorcraft Application ................................................................. 546
Min, Byung-Young ; Karpuzov, Anand ; Sargent, D. Caleb ; Shannon, Daniel ; Sirio, Jayant ; Wake, Brian E.

Experimental Investigation of Passive and Active Flow Control for X2 Technology Hub and Fuselage Drag Reduction ................................. 560
Bowles, Patrick O. ; Thomas, Mathew ; Min, Byung-Young ; Geiger, Derek ; Botros, Barbara B. ; Matalanis, Claude G. ; Wake, Brian E.

Effects of Time-Varying Flow Velocity on Steady Blowing Flow Control for a Pitching Airfoil ................................................................. 575
Naigle, Shawn C. ; Frankhouser, Matthew W. ; Gregory, James W. ; Bons, Jeffrey P.

A Space-Time Accurate Finite-State Inflow Model for Aeroelastic Applications .................................................................................. 587
Gennaretti, Massimo ; Gori, Riccardo ; Cardito, Felice ; Serafini, Jacopo ; Bernardini, Giovanni

Numerical Investigation of the Effect of Shock-Induced Flow Separation on Dynamic Stall in Time-Varying Freestream Conditions ................................................................. 595
Gosselin, Daniel ; Festy, Daniel

### AVIONICS AND SYSTEMS

**BLUECOPTER DEMONSTRATOR – An Approach to Eco-Efficient Helicopter Design**

Bebesel, Marius ; D’Alascio, Alessandro ; Schneider, Sascha ; Guenther, Sebastian ; Vogel, Florian ; Wehle, Christian ; Schimke, Dieter

---

**Bell 525 Airspeed Calibration Prior to First Flight**

Mitchell, Jonathan ; Brand, Albert ; Hill, Matthew ; Singh, Ajay ; Wu, Nathan

---

**What are the Real Benefits of Applying Open Systems Architecture to Rotorcraft Mission Systems?**

Koontz, Ronald

---

**UH-60V: Modernization for Continued Operations**

Shaddix, Jonathan ; Oden, Miranda ; Perry, Wes

---

**Airborne Integrated Voice, Data, and ADS-B in Compliance with the FAA and FCC**

Stanzione, Kaydon A.

---

**A Rapid and Affordable Approach to Insert the Future Airborne Capability Environment (FACE™) into Fielded Open System Architecture (OSA) Systems**

Johnson, Tony ; Burns, Stephanie ; Dusio, Joe ; Gómez, Patrick M.

### CRASH SAFETY

**Assessment of Memory Cushions in Aircraft Seating for Injury Mitigation through Dynamic Impact Test**

Wang, John ; Dal Nevo, Ross

---

**Transport Aircraft Seating in Rotorcraft Crash Testing**

Pellettiere, Joseph ; Taylor, Amanda

---

**Evaluation of Aerospace Seat Belt Webbing Material Under Dynamic Test Conditions**

Pellettiere, Joseph ; Deweese, Richard ; Huculak, Robert

---

**Flight Critical Components: Response to Impact Load**

Fletcher, Timothy ; Tho, Cheng-Ho ; Smith, Michael R.

---

**Next Generation Smart Crashworthy Crew Seats**

Bolukbasi, Akif

---

**Development of an Active Spinal Support System for Reducing Lumbar Loading from Body Borne Equipment**

Sztein, Pablo J. ; Kothera, Curt S. ; Hiemenz, Gregory J. ; Richards, Marv

---

**Testing Mobile Aircrew Restraint Systems in a Full-Scale CH-46 Airframe Crash Test – Exploring the Limits**

Bark, Lindley W.

### CREW STATIONS AND HUMAN FACTORS

**Evaluation of Aircrew Whole-Body Vibration Exposure Levels on a Canadian CH-147F Chinook Helicopter**

Chen, Yong ; Ghinet, Sebastien ; Price, Andrew ; Wickramasinghe, Viresh ; Grewal, Anant

---

**Evaluation of Visual Augmentation Methods for Rotorcraft Pilots in Degraded Visual Environments**

Viertler, Franz ; Hajek, Manfred

---

**Narrowing of Attention and Functional Field of View for Helicopter Pilots in a Degraded Visual Environment**

Geeseman, Joseph W.

---

**Helmet Mounted Digital Imaging Systems; Cockpit Compatibility Implications**

Robinson, Timothy ; Green, John

---

**Evaluation of Aircrew Noise Exposure Levels on a Canadian CH-147F Chinook Helicopter**

Price, Andrew ; Ghinet, Sebastien ; Chen, Yong ; Wickramasinghe, Viresh ; Grewal, Anant

---

**Terrain and Obstacle Avoidance Displays for Low-Level Helicopter Operations in Degraded Visual environments**

Godfroy-Cooper, M. ; Szoszolay, Zoltan ; Kahana, Allon ; Rotten-Hoyer, M.
DYNAMICS

Application Issues for In-Flight Tracking Control Using Trailing Edge Flaps .................................................. 1135
King, Frank A.; Steinwandel, Alexander; Fichter, Walter

Floquet-SSI Methods for Real-Time Stability Monitoring and Correlation ....................................................... 1147
Hull, Jason; Andrews, Joseph J.

Performance and Loads of a Model Coaxial Rotor Part I: Wind Tunnel Measurements .................................. 1154

From EC145 to H145: Validation Program of Major Dynamic Changes ............................................................ 1169
Hoog, Wouter; Dreher, Stefan; Heiger, Rainer; Dieterich, Oliver; Priems, Martijn

Emulation of Whirl Flutter on a Stable Helicopter Using Trailing Edge Flaps .................................................... 1183
Roth, Tobias; Richter, Tobias; Steinwandel, Alexander; Fichter, Walter

Assessment of Comprehensive Analysis Predictions of Helicopter Rotor Blade Loads in Forward Flight .................. 1195
Ho, Jimmy C.; Yeo, Hyeonsoo

The Bell 525’s Smooth Ride .................................................................................................................................. 1229
Hendricks, Matt

Investigation of UH-60A Rotor Structural Loads From Flight and Wind Tunnel Tests ....................................... 1237
Yeo, Hyeonsoo; Potsdam, Mark; Norman, Thomas R.

Investigation Of The Structural Blade Dynamics And Aeroelastic Behavior Of The 7A Rotor ............................ 1258
Surrey, Stefan; Ortun, Biel; Truong, Khien-Van; Wienke, Felix

Validation Of Comprehensive Modeling Of The Wing And Rotor Aeroelastic Test System ............................. 1271
Kreshock, Andrew R.; Thornburgh, Robert P.; Kang, Hao; Yeo, Hyeonsoo

Top Causes for Fatal and Non-Fatal Accidents in Helicopter Operations ......................................................... 1288
Rao, Arjun H.; Marais, Karen

Improvements to Tandem-Rotor H-47 Helicopter Coupled CFD-CSD Full Aircraft Model ............................... 1297
Meadowcroft, Edward T.; Jain, Rohit

Contactless Rotor Flapping Sensor Design, Implementation and Testing .............................................................. 1315
Cigada, Alfredo; Colombo, Attilio; Cordisco, Pusio; Ferrari, Andrea; Grassetti, Riccardo; Liu, Rui; Manzoni, Stefano; Redaelli, Matteo; Rolando, Alberto; Terraneo, Mauro; Trainelli, Lorenzo; Vigoni, Edoardo; Zappa, Emanuele

Measurement and Validation of a Mach-Scale Rotor Performance and Loads at High Advance Ratios .............. 1326
Wang, Xing; Saxena, Anand; Chopra, Inderjit

A Convergence Study for a Longitudinal Maneuver by Using Various Tools .................................................... 1335
Gil, Seyhan; Bilen, M. Emre; Sahin, Murat; Gurak, Derya; Yaman, Yavuz

RPM Driven Extension-Torsion Coupled Self-Twisting Rotor Blades ................................................................. 1345
Ward, Elizabeth; Chopra, Inderjit; Datta, Anubhav

Performance and Loads of a Model Coaxial Rotor Part II: Prediction Validations with Measurements .................. 1361
Schmaus, Joseph; Chopra, Inderjit

Multidisciplinary Design and Optimization for High Speed, High Efficiency Tiltrotors with Wing Extensions and Winglets ........................................................................................................................................... 1379
Khambampati, Sundhaya; Hoover, Taylor; Smith, Edward C.; Maughmer, Mark D.

Influence of Dynamic Inflow States on Coupled Rotor Fuselage Modes ............................................................ 1394
Nair, Salini S.; Mohan, Ranjith; Gaonkar, Gopal

Adverse Aeroelastic Roll/Lateral Rotorcraft-Pilot Couplings Analysis ............................................................... 1405
Masarat, Pierangelo; Muscarello, Vincenzo; Quaranta, Giuseppe; Pavel, Marilena; Tod, Georges; Malburet, François

Ground Resonance Mitigation of Rotorcraft with Articulated Robotic Landing Gear: A Preliminary Investigation ................................................................................................................................................. 1418
Langley, Jared; Costello, Mark

Optimal Active Twist Deployment Schedule of a Rotor for Performance Improvement and Vibration Reduction ............................................................................................................................................. 1433
You, Young H.; Jung, Sung N.

Parametric Study of Tiltrotor Whirl Flutter Using Two Rotorcraft Comprehensive Analyses ............................. 1445
Kang, Hao; Shen, Jinwei; Kreshock, Andrew

Investigation of Performance, Loads, and Vibration of a Coaxial Helicopter in High-Speed Flight ................. 1454
Jacobelli, George; Gandhi, Farhan

Flutter Assessment of a Rotor Blade with Innovative Layout in Hover using Indicial Aerodynamics ..................... 1470
Arnold, Jürgen

Rotor Blade Shed Ice Length Prediction ................................................................. 2693
Soltis, Jared ; Palacios, Jose

Implementation of the Product Equipment List to Further Enhance Safety on Commercial Rotorcraft .......................... 2712
Hepner, Stephen ; Bifort, Jessica

Icing of Ducted Tail Rotor Based on Design of ILX-27 Unmanned Helicopter ................................................................. 2718
Gula, Pavel ; Dziubinski, Adam ; Nieczarz, Piotr

Standardization of Rotorcraft Guidelines for Quantitative Risk Assessment ................................................................. 2724
Braman, Gary ; Hewitt, John

Integrated Tools for Rotorcraft Icing Analysis ................................................................. 2729
Sankar, Lakshmi N. ; Kim, Jeewoong ; Bain, Jeremy ; Wissink, Andrew ; Keeger, Richard E.

Cockpit Alarm Detection and Identification Algorithm for Helicopters ................................................................. 2739
Shin, Sanghyun ; Ding, Ying ; Hwang, Inseok

Future Vertical Lift Airworthiness Certification - Should it be based on A Civil Aviation Functional Safety Certification Standard? ................................................................. 2747
Schrage, Daniel P. ; Arterburn, David

STRUCTURES AND MODELS

Probabilistic Rotorcraft Usage Spectrum Development Using Recognized Maneuvers ................................................................. 2759
Moon, Suresh ; Phan, Nam ; Stull, Mike ; Leonard, Mark

Alternate Characterizations of Fatigue Load Spectra ................................................................................................. 2777
Benton Jr., Robert E. ; Howell, Stephen

Analysis Methods Improving Confidence in Material Qualification for Laminated Composites ................................................................. 2819
Makeev, Andrew ; Seon, Guillaume ; Nikishkov, Yuri ; Nguyen, Dean ; Mathews, Peter ; Robeson, Mark

Comparative Study of Finite Element Analysis and Geometrically Exact Beam Analysis of a Composite Helicopter Blade ................................................................. 2834
Atal, Meryem Nisa ; Kayvan, Alan

Tribological Testing of PEEK for Aerospace Applications ................................................................................................. 2844
Allison, Bryan

Enhancement of Reliability-Based Probabilistic Solutions for Rotorcraft Structural Analysis and Optimization ................................................................. 2849
Frewen, Thomas A. ; Labarre, Bob ; Gurvich, Mark R. ; Shishkin, Sergey

Numerical Simulation Of The Load Carrying Capability Of Composite Rotorcraft Airframe Structures, Taking Into Account The Effect Of Disbonds In The Damage Tolerance And Fatigue Evaluation ................................................................. 2868
Markmiller, Johannes ; Reichensperger, Christian ; Engleder, Alexander

Isogeometric Analysis based Finite Element Approach for Ductile Failure Prediction of the Second Sandia Fracture Challenge Problem ................................................................. 2874
Fang, Eugene ; Lua, Jim ; Lai, Yicong ; Zhang, Yongjie Jessica ; Phan, Nam D.

A Combined Discrete and Continuum Fatigue Damage Characterization of a Hybrid Composite Flexbeam ................................................................. 2883
Lua, Jim ; Fang, Eugene ; Phan, Nam D. ; Rahman, Anisur

Results Of A Parametric Design Study To Adapt The Structural Properties And Strain Distribution Of Active Twist Blades ................................................................. 2897
Kalow, S. ; Opitz, S. ; Riemenschneider, J. ; Hoffmann, F.

Very-High Cycle Fatigue Testing Under Spectrum Loading for Endurance Limit Structural Design ................................................................. 2906
Rusk, David T. ; Taylor, Robert E. ; Pregger, Bruce A. ; Sanchez, Luis J.

Probabilistic Lifing Method for Fatigue Management of Life-Limited Propulsion Components ................................................................. 2914
Shiao, Michael ; Chen, Tsikang John ; Ghoshal, Anindya
Damage Assessment of Rotary Wing Aircraft Cabin Door using Continuum Damage Mechanics
Model.................................................................................................................................. 2923
Boyina, Gangadhar Rao T. ; Vijayakumar, R. ; Sabha Rao, V. Y.

Analysis of Shockwave Tolerant Features for Small-Volume Composite Rotorcraft Structure...... 2932
Hunziker, Kenneth ; Chiu, Lisa ; Andrews, Clark ; Robeson, Mark E.

Supportability of Advanced Composite Structures: Considerations for the Joint Multi-Role
Technology Demonstration.................................................................................................... 2938
Mellena, Greg M. ; Cockrell, Kimberly ; Featherston, W. Daniel

Blending Modern Multifunctional Materials with Traditional Structures: An Approach for a Greener
and Cleaner Future ................................................................................................................ 2958
Harsrasamupath, Dineshkumar ; Gupta, Mohit ; Agrawal, Shashank ; Sathiskumar, Ap ; Dhamaotharan, Veeru ; Sangheeta, Ap

US Army Composite Repair Standardization ........................................................................ 2969
Stone, David L. ; Marshall, Kristina N.

Generalized Multield Variational Sectional Analysis of Composite Blades Considering Nonuniform
Torsion .................................................................................................................................. 2975
Dhadwal, Manoj Kumar ; Jung, Sung Nam

Use of Global and Local Finite Element Analyses to Investigate Peak Stress in Fastened Joints,
Validate Structural Repairs, and Design Preventative Structural Modifications ....................... 2989
Solem, Courtney ; Pilkington, Larry ; Royce, Anna

Dual-Use Structures: Composite Wing with Structural Antenna Aperture .................................. 3001
Tyrrell, Stacey ; Robeson, Mark ; Kube, Courtney ; McCarthy, Dennis ; Lavin, Ronald

SYSTEM ENGINEERING TOOLS/PROCESSES

Safety Enhancement thanks to Real Time Performance Indication ............................................ 3009
Boesleree, Mitchell T. ; Germanetti, Serge ; Guillantion, Erwan

Process Improvement for Rotorcraft Tradespace Exploration incorporating Reliability and
Availability .............................................................................................................................. 3018
Bhattacharya, Saikath ; Nagaraju, Vidyasree ; Fiondella, Lance ; Spero, Eric ; Ghoshal, Antindya

Quantitative Methods Improve Rotorcraft Safety Risk Management ........................................ 3034
Hewitt, John ; Pham, Loan (Joan)

Reconfigurable Discrete Event Simulation of Rotorcraft Maintenance and Operations for Technology
Assessment and Tradeoff ........................................................................................................ 3041
Armstrong, Ryan D. ; Ernst, Zachary J. ; Collins, Kyle B. ; Mavris, Dimitri ; Spero, Eric

Closing the Gap between Capability and Affordability for System Upgrades and Major-Modifications ..................................................................................................................... 3049
Ashok, Sylvester ; Siriojvjith, Apinut ; Smith, Andrew

Next-Generation Model-Based Systems Engineering Processes and Tools supporting the
Airworthiness efforts of Cyber Physical Systems (CPS) ........................................................... 3068
Simi, Stephen M. ; Mulholland, Sean P. ; Merritt, Layne B.

TEST AND EVALUATION

Designing the Bell 525 Pylon Bipod Mount Test Fixture .......................................................... 3076
Mukherjee, Siddhartha ; Barbarin, Alejandro

Design and Flight Test of an Adaptive Vehicle Management System on an AH-64 Helicopter
Demonstrator .......................................................................................................................... 3085
Klein, Gary ; Kashawlic, Bryan ; Eons, Russell

The 525 Transmission Development Test Stand ........................................................................ 3097
Elliott, David

From ERATO Basic Research to the Blue Edge Rotor Blade ...................................................... 3103
Van Der Wall, Berend G. ; Kessler, Christoph ; Delrueux, Yves ; Beauvrier, Philippe ; Gervais, Marc ; Hirsch, Jean-François ; Pengel, Kurt ; Crozier, Pascal

The First Wind Tunnel Test of the DLR’s Multiple Swashplate System: Test Procedure and
Preliminary Results ............................................................................................................... 3122
Küfmann, Philip ; Bartels, Rainer ; Van Der Wall, Berend G. ; Schneider, Oliver ; Holthusen, Hermann ; Gomes, Jorge ; Postma, Jos

A Computational and Experimental Study of Flexible Insect-based Flapping Wing Aerodynamics and
Structural Deformation ......................................................................................................... 3143
Lankford, James L. ; Chopra, Inderjit
Overview of S-97 RAIDER™ Scale Model Tests .......................................................... 3160

Lorber, Peter F. ; Law, Gary K. ; O'Neill, John J. ; Matalanis, Claude ; Bowles, Patrick

High-Speed Experiments on Combustion-Powered Actuation for Dynamic Stall Suppression .......................................................... 3177

Matalanis, Claude ; Bowles, Patrick ; Lorber, Peter ; Crittenden, Tom ; Glezier, Ari ; Schaeffler, Norman ; Min, Byung-Young ; Joe, Solkeun ; Kuczek, Andrezej ; Wake, Brian

Certification Flight Testing of the Bell 412EPJ Increased Gross Weight Helicopter .......................................................... 3198

Grogan, Jason ; Ruge, Hans ; Lindauer, Pat ; Newman, Jeff

Bell Model 505 Fatigue Test Loads Derivation using Flight Test Data Reduction and Convex Envelopes ........................................................................ 3217

Lapalme, Maxime ; Biron, Guillaume ; Ouelt, Marc

Generalized Approach for Slung-Load Aerodynamics ........................................................................ 3224

Hiremath, Nandeesh ; Motabari, Nicholas ; Komarath, Narayanan

Characterization and Analysis of H-53E Lag Damper ........................................................................ 3236

Choi, Young ; Werely, Norman ; Parekar, Ashish ; Semidy, Roberto ; Phan, Nam

Experimental Model Validation of a Passive Balancing Device for Supercritical Helicopter Driveshafts ........................................................................ 3244

Haidar, Ahman M. ; Palacios, Jose L.

UNMANNED VTOL AIRCRAFT AND ROTORCRAFT

Autonomous Rotorcraft Flight Control with Multi-Level Pilot Interaction in Hover and Forward Flight ........................................................................ 3258

Takahashi, Marc D. ; Whalley, Matthew S. ; Mansur, Hossein ; Ott, Carl R. ; Minor, Joseph S. ; Morford, Zachariah ; Goerzen, Chad L. ; Schulein, Gregory J.

Flight Test Results for a New Mission-Adaptive Autonomy System on the RASCAL JUH-60A Black Hawk ........................................................................ 3279

Whalley, Matthew S. ; Takahashi, Marc D. ; Mansur, M. Hossein ; Ott, Carl R. ; Minor, Joseph S. ; Morford, Zachariah G. ; Goerzen, Chad L. ; Schulein, Gregory J.

Effects Of Vehicle- And Task-Related Motion Feedback On Operator Performance In Teleoperation ........................................................................ 3310

Lächele, Johannes ; Venrooij, Joost ; Pretto, Paolo ; Bülthoff, Heinrich H.

Rotor Blade Optimization and Flight Testing of a Small UAV Rotorcraft ........................................................................ 3317

Herniczeck, Mark Kotwicz ; Lee, Dustin ; Sanders, Brian ; Fezzy, Daniel

Vision Based Optimal Landing On a Moving Platform ........................................................................ 3331

Nakamura, Takuma ; Haviland, Stephen ; Bershadsky, Dmitry ; Johnson, Eric N.

Perception for Safe Autonomous Helicopter Flight and Landing ........................................................................ 3342

Singh, Sanjiv ; Cover, Hugh ; Stambler, Adam ; Grocholsky, Ben ; Mishler, Jeffrey ; Hannier, Bradley ; Strahala, Kyle ; Sherwin, Gary ; Kaess, Michael ; Hemann, Garrett ; Bergerman, Marcel ; Spiker, Spencer

An Efficient Approach for the Simulation and On-Blade Control of Helicopter Noise and Vibration ........................................................................ 3350

Chia, Miang H. ; Padtke, Ashwani K. ; Duraisamy, Karthik ; Friedmann, Peretz P.

A Vectoring Thrust Coaxial Rotor for Micro Air Vehicle: Modeling and Control ........................................................................ 3366

Prothin, Sebastien ; Defay, Francois ; Lambert, Luc ; Guillaume, Raynaud

Deck Motion Interface for MQ-8C Fire Scout Embarked Aviation ........................................................................ 3376

Ferrier, Bernard ; Ernst, Robert ; Sehgal, Ajay ; Kim, Isaiah H.

Autonomous Ship-board Landing using Monocular Vision ........................................................................ 3391

Holms, William K. ; Langelaan, Jack W.

Robust Autonomous Ship Deck Landing for Rotorcraft ........................................................................ 3406

Grocholsky, Benjamin ; Defranco, Patrick ; Cover, Hugh ; Singh, Ayman ; Singh, Sanjiv

Detection of Forward Flight Limitations of Unmanned Helicopters ........................................................................ 3410

Voigt, Andreas E. ; Dauer, Johann C. ; Kreunik, Alex ; Dittrich, Jörg S.

Information-Based Analysis of Visual Cues in Human Guidance ........................................................................ 3422

Feit, Andrew ; Mettler, Berenice

Effects of Inflow Model on Simulated Aeromechanics of a Quadrotor Helicopter ........................................................................ 3435

Niemiec, Robert ; Gandhi, Farhan

Wind Tunnel and Hover Performance Test Results for Multicopter UAS Vehicles ........................................................................ 3448

Russell, Carl ; Jung, Jae woo ; Willink, Gina ; Glassner, Brett

Flight Control System of a Tiltwing UV ........................................................................ 3468

Osternann, Tobias
WIND ENERGY TECHNOLOGY

Numerical Simulation of Multiple Interacting Wind Turbines on a Complex Terrain ........................................... 3477
Murali, Avinaash ; Rajagopalan, R. Ganesh

Wind Farm Performance Improvement by Using Wake Transport ................................................................. 3498
Su, Keye ; Bliss, Donald

Rigid Actuation Of The Wind Turbine .................................................................................................................. 3510
Leble, Vladimir ; Barakos, George

A Study of Individual Pitch Control of a Horizontal Axis Wind Turbine in Atmospheric Boundary Layer .................................................................................................................................................. 3522
Tanabe, Yasutada ; Aoyama, Takashi ; Sugiura, Masahiko ; Oe, Harutaka ; Yamamoto, Makoto

An Overset Adaptive High-Order Approach for Blade-Resolved Wind Energy Applications ............................ 3530
Kirby, Andrew ; Brazell, Michael ; Sitaraman, Jay ; Mavriplis, Dimitri
