2016 23rd International Conference on Telecommunications (ICT 2016)

Thessaloniki, Greece
16 – 18 May 2016
2016 23rd International Conference on Telecommunications (ICT)

Small Cells and Heterogeneous Networks

User Association to Small Cells in the Presence of Nakagami-m Fading and Co-Channel Interference
George Efthymoglou (University of Piraeus, Greece), Constantine Mukasa (Florida Atlantic University, USA), Valentine Aalo (Florida Atlantic University, USA) ................................................................. 1

Capacity Model for Network Density Scheduling in Small Cell Networks
Georgios P. Koudouridis (Huawei Technologies Sweden R&D Center & Royal Institute of Technology, Sweden), Pablo Soldati (Huawei Technologies Sweden AB, Sweden) ............................................................. 6

Global Optimization of Weighted Sumrate for Downlink Heterogeneous Cellular Networks
Obinna Oguejiofor (University of Leeds, United Kingdom), Li Zhang (University of Leeds, United Kingdom) ................................................................. 12

Dynamic On/Off Control of Wireless Small Cells with Heterogeneous Backhauls
Xiangxiang Xu (Tsinghua University, P.R. China), Walid Saad (Virginia Tech, USA), Xiujun Zhang (Tsinghua University, P.R. China), Limin Xiao (Tsinghua University, P.R. China), Shidong Zhou (Tsinghua University, P.R. China) .... 18

Delay and Stability Analysis of Caching in Heterogeneous Cellular Networks
Fatemeh Rezaei (Sharif University of Technology, Iran), Babak Hossein Khalaj (Sharif University of Technology, Iran), Ming Xiao (Royal Institute of Technology, Sweden), Mikael Skoglund (KTH Royal Institute of Technology, Sweden) ......................................................... 24

A College Admissions Game for Content Caching in Heterogeneous Delay Tolerant Networks
Omar Ait oualhaj (ENSIAS, Mohammed V University of Rabat, Morocco), Essaid Sabir (ENSEM/UH2C, Morocco), Abdellatif Kobbane (ENSIAS, Mohammed V University of Rabat, Morocco), Jalel Ben-Othman (University of Paris 13, France), Mohammed El Koutbi (ENSIAS, Morocco) ............................................................. 29

Cognitive Networks and Systems

LTCC Passive Components for Matching Circuits of Cognitive Radio Antennas
Christos Oikonomopoulos-Zachos (IMST GmbH, Germany), Matthias Arnold (IMST GmbH, Germany) ................................................................. 34

Dynamic Threshold Hard Decision Cooperative Spectrum Sensing Using Two-Stage Censoring
Hossam Farag (Aswan University, Egypt), Ehab Mahmoud Mohamed (Osaka University, Japan) ................................................................. 38

Time Allocation Mechanism with QoS Constraints in a Spectrum Leasing Environment
Anargyros J. Roumeliotis (National Technical University of Athens, Greece), Stavroura Vassaki (National Technical University of Athens, Greece), Athanasios D. Panagopoulos (National Technical University of Athens, Greece) ................................................................. 43
Device-to-Device Communications

**On Precoding Diversity in Cognitive Networks**
Abdullah Yaqot (University of Kiel, Germany), Peter A. Hoeher (University of Kiel, Germany) ........................ 48

**Partial Discharge Detection Using Low Cost RTL-SDR Model for Wideband Spectrum Sensing**
Hamd Mohamed (University of Huddersfield, United Kingdom), Pavlos Lazaridis (University of Huddersfield, United Kingdom), David Upton (University of Huddersfield, United Kingdom), Umar Khan (University of Huddersfield, United Kingdom), Bahghtar Saeed (University of Huddersfield, United Kingdom), Adel Jaber (University of Huddersfield, United Kingdom), Yong Zhang (University of Huddersfield, United Kingdom), Peter Mather (University of Huddersfield, United Kingdom), Maria Vieira (Federal University of Campina Grande & CEEI, Brazil), Kenneth Barlee (University of Strathclyde, United Kingdom), Dale Atkinson (University of Strathclyde, Glasgow, United Kingdom), Albena Mihovska (Aalborg Universitet, Denmark), Liljana Gavrilovska (Ss Cyril and Methodius University - Skopje, Macedonia, the former Yugoslav Republic of), Ian A Glover (University of Huddersfield, United Kingdom) .......................................................... 53

**On Spectrum and Infrastructure Sharing in Multi-Operator Cellular Networks**
Shanshan Wang (CNRS, France), Konstantinos Samdanis (NEC Europe Ltd., Germany), Xavier Costa Pérez (NEC Europe Ltd, Germany), Marco Di Renzo (Paris-Saclay University / CNRS, France) .......................................................... 58

**IoT-D2D Task Allocation: an Award-Driven Game Theory Approach**
Emad Abd-Elrahman (Telecom SudParis (ex. INT), France), Hossam Afifi (Télécom SudParis, Institut Telecom & Paris Saclay, France), Luigi Atzori (University of Cagliari, Italy), Makhlouf Hadji (IRT System X, France), Virginia Pilloni (University of Cagliari, Italy) .......................................................... 62

**A Novel Multi-hop Secure LTE-D2D Communication Protocol for IoT Scenarios**
Gary Steri (European Commission JRC, Italy), Gianmarco Baldini (Joint Research Centre - European Commission, Italy), Igor Fovino (Joint Research Centre - European Commission, European Union), Riccardo Nisse (European Commission Joint Research Centre, Italy), Leonardo Goratti (Create-net, Italy) .......................................................... 68

**Heterogeneous Statistical QoS-Driven Power Control for D2D Communications Underlaying Cellular Networks**
Xiang Mi (Tsinghua University, P.R. China), Limin Xiao (Tsinghua University, P.R. China), Ming Zhao (Tsinghua University, P.R. China), Xibin Xu (Tsinghua University, P.R. China), Shidong Zhou (Tsinghua University, P.R. China), Jing Wang (EE. Tsinghua University, P.R. China) .......................................................... 74

**On the Capacity Optimization of D2D Underlying Cellular Communications**
Alaa Kachouh (American University of Beirut, Lebanon), Youssef Nasser (American University of Beirut, Lebanon), Hassan A. Artail (American University of Beirut, Lebanon) .......................................................... 79
Blind Repetitions for Cellular-IoT: Performance Analysis of Combination Mechanisms
Louis-Adrien Dufrene (INSA de Rennes, France), Ming Liu (Beijing Jiaotong University & Beijing Key Lab of Transportation Data Analysis and Mining, P.R. China), Matthieu Crussière (IETR - Electronics and Telecommunications Research Institute of Rennes (IETR) & INSA - National Institute of Applied Sciences, France), Jean-François Hélard (IETR, France), Jean Schwoerer (France Telecom & Orange Labs, Japan) ................................................................. 84

Towards Ultra-Reliable M2M Communication: Scheduling Policies in Fading Channels
Bakhtiyar Farayev (Koc University, Turkey), Sinem Coleri Ergen (Koc University & University of California Berkeley, Turkey) ................................................................. 90

QoS and QoE in Next-Generation Networks

Software-Defined Inter-networking: Enabling Coordinated QoS Control Across the Internet
George Petropoulos (Intracom SA Telecom Solutions, Greece), Fragkiskos Sardis (King's College London, United Kingdom), Spiros Spirou (Intracom Telecom, Greece), Toktam Mahmoodi (King's College London, United Kingdom) ........................................................................................................ 96

MeFoRE: QoE based Resource Estimation at Fog to Enhance QoS in IoT
Mohammad Aazam (Carleton University, Canada), Marc St-Hilaire (Carleton University, Canada), Chung-Horng Lung (Carleton University, Canada), Ioannis Lambadaris (Carleton University, Canada) ................................................................................................. 101

A Roadmap on QoE Metrics and Models
Eirini Liotou (University of Athens, Greece), Dimitris Tsolkas (University of Athens, Greece), Nikos Passas (University of Athens, Greece) ................................................................. 106

Statistical Evaluation for Quality of Experience Prediction based on Quality of Service Parameters
Aroussi Sana (University of Saad Dahlab - Blida 1 & Higher National School of Computer Science (ESI), Algeria), Abdelhamid Mellouk (UPEC, University Paris-Est Creteil Val de Marne, France) ................................................................. 111

User QoE Assessment on Mobile Devices for Natural and Non-natural Multimedia Clips
Arghir-Nicolae Moldovan (National College of Ireland, Ireland), Cristina Muntean (National College of Ireland, Ireland) ................................................................. 116

Dan Liu (Beijing University of Posts and Telecommunications, Beijing, China, P.R. China), Yan Sun (Queen Mary University of London, United Kingdom), Yuanyuan Yao (Beijing University of Posts and Telecommunications, P.R. China), Changchuan Yin (Beijing University of Posts and Telecommunications, P.R. China) ........................................................................................................ 121
Routing and Scheduling

A Practical Multi-Plane Routing-based Traffic Engineering Scheme in Evolutionary Convergent All-IP Access Networks
Mohammad Farhoudi (King's College London, United Kingdom), Benyamin Abrishamchi (King's College London, United Kingdom), Andrej Mihailovic (King's College London, United Kingdom), Hamid Aghvami (King's College London, United Kingdom) ........................................................................................................ 128

Equilibrium Routing: from Theory to Practice
Duy Nguyen (UPMC, France), Stefano Secci (University Pierre et Marie Curie - Paris 6, France) ................................................................................................................................................ 134

Synchronization Protocol for Dynamic Environment: Design and Prototype Experiments
Bizagwira Honoré (Université Blaise Pascal & France, France), Joël Toussaint (LIMOS - CNRS, France), Michel J. Misson (Clermont Université / LIMOS CNRS, France) ........................................................................................................... 141

Load-aware Channel Selection for 802.11 WLANs with Limited Measurement
Mehmet Karaca (Lund University, Sweden), Bjorn Landfeldt (Lund University, Sweden) ................................................................................................................................................ 148

Hyperbolic Traffic Load Centrality for Large-Scale Complex Communications Networks
Eleni G Stai (National Technical University of Athens, Greece), Konstantinos Sotiropoulos (National Technical University of Athens, Greece), Vasilieos A Karyotis (Institute of Communication and Computer Systems (ICCS) & National Technical University of Athens, Greece), Symeon Papavassiliou (National Technical University of Athens, Greece) ................................................................................ 153

N3: Addressing and Routing in 3D Nanonetworks
Angeliki Tsioliaridou (Foundation for Research and Technology, Greece), Christos Liaskos (Institute of Computer Science, Foundation of Research and Technology, Hellas, Greece), Lefteris Pachis (Foundation for Research and Technology - Hellas, Greece), Sotiris Ioannidis (Foundation for Research and Technology - Hellas, Greece), Andreas Pitsillides (University of Cyprus, Cyprus) ................................................................................................................................................ 158

Cooperative (Relay) Communications

Adaptive Relay Selection Method for Asynchronous Amplify and Forward Cooperative Communications
Yasin Çelik (Aksaray University, Turkey), Niyazi Odabasioglu (Istanbul University, Turkey), Murat Uysal (Ozyegin University, Turkey) .............................................................. 164

A Delay-Aware Hybrid Relay Selection Policy
Dimitrios Poulimeneas (Royal Institute of Technology (KTH), Sweden), Themistoklis Charalambous (Chalmers University of Technology, Sweden), Nikolaos Nomikos (University of the Aegean, Greece), Ioannis Krikidis (University of Cyprus, Cyprus), Demosthenes Vouyioukas (University of the Aegean - Research Unit & University Hill - Administrative Building, Greece), Mikael Johansson (Royal Institute of Technology, Sweden) .............................................................. 168
Evaluation of SNR Estimation Errors on Amplify-and-Forward Relaying Performance
Rui Shi (Tsinghua University, P.R. China), Yunfei Chen (University of Warwick, United Kingdom), Min Long (Changsha University of Science and Technology, P.R. China), Wei Feng (Tsinghua University, P.R. China), Jianhua Lu (Tsinghua University, P.R. China) ........................................ 173
Outage Performance of Opportunistic AF OFDM Relaying over Rician Fading Channel
Sudhan Majhi (Indian Institute of Technology, India), Piyush Kumar (Indian Institute of Technology Patna, India), Youssef Nasser (American University of Beirut, Lebanon) .................................................................................. 178
Optimal Relay Selection Strategies in Heterogeneous Cooperative Relaying Networks
Yinshan Liu (Tsinghua University, P.R. China), Xiaofeng Zhong (Tsinghua University, P.R. China), Jing Wang (EE. Tsinghua University, P.R. China) ........................................ 183
On the Energy Efficiency in Multi-user Multi-relay Coded Network
Nan Qi (Northwestern Polytechnical University & KTH Royal Institute of Technology, P.R. China), Ming Xiao (Royal Institute of Technology, Sweden), Theodoros Tsiftsis (Nazarbayev University & Technological Educational Institute of Central Greece, Kazakhstan), Phuong L. Cao (KTH Royal Institute of Technology, Sweden), Mikael Skoglund (KTH Royal Institute of Technology, Sweden), Lixin Li (Northwestern Polytechnical University, P.R. China) ........................................ 189

Applications and Services

Twitter Data Clustering and Visualization
Andrei Sechelea (Vrije Universiteit Brussel, Belgium), Tien Do Huu (Vrije Universiteit Brussel, Belgium), Evangelos Zimos (Vrije Universiteit Brussel, Belgium), Nikos Deligiannis (Vrije Universiteit Brussel, Belgium) ........................................ 195

Video Conference Based on Enterprise Desktop Grid
Roman Sorokin (ALE International & Telecom ParisTech, France), Jean-Louis Rougier (TELECOM ParisTech / LTIC, France) ................................................................. 200

Pushing the Role of Information in ICN
Simona Colucci (Politecnico di Bari, Italy), Marina Mongiello (Politecnico di Bari, Italy) ................................................................. 206

Modeling of Managed Resources in a Location Aware Smart Building
Yun Wang (NC State University, USA), Megan Becvarik (North Carolina State University, USA), Michael Devetsikiotis (North Carolina State University, USA) ................................................................. 211

Pricing of Wireless Sensor Data on a Centralized Bundling Platform
Luis Guijarro (Universitat Politecnica de Valencia, Spain), Maurizio Naldi (University of Rome "Tor Vergata", Italy), Vicent Pla (Universitat Politecnica de Valencia, Spain), Jose Ramon Vidal Catala (Universidad Politecnica de Valencia, Spain) ................................................................. 216

Design of an Energy Decision Framework for an Autonomous RES-enabled Smart-Grid Network
Chrysovalantou Ziogou (Centre for Research and Technology Hellas, Greece), Spyros Voutetakis (Centre for Research and Technology Hellas, Greece), Simira Papadopoulou (Alexander Technological Educational Institute of Thessaloniki, Greece) ................................................................. 221
Software-Defined Networking & Network Virtualization Function

In-service Video Quality Assessment based on SDN/NFV techniques
Harilaos Koumaras (NCSR Demokritos, Greece), Michail Alexandros Kourtis (NCSR Demokritos, Greece), Christos Sakkas (NCSR Demokritos, Greece), George K Xilouris (NCSR Demokritos, Greece), Stavros Kolometsos (NCSR Demokritos, Greece) ........................................ 226

A Centralized Framework for Smart Access Point Selection based on the Fittingness Factor
Alessandro Raschellà (Liverpool John Moores University, United Kingdom), Faycal Bouhafs (Liverpool John Moores University, United Kingdom), Mirghiasaldin Seyedebrahimi (Liverpool John Moores University, United Kingdom), Michael Mackay (Liverpool John Moores University, United Kingdom), Qi Shi (Liverpool John Moores University, United Kingdom) ........................................ 231

DPDK Open vSwitch Performance Validation with Mirroring Feature
Sivasothy Shanmugalingam (BCOM, France), Adlen Ksentini (Eurecom, France), Philippe Bertin (Orange Labs & Bcom, France) .................................................. 236

NO Stack: A Software-defined Framework for 5G Mobile Network
Jie Zeng (Tsinghua University, P.R. China), Liping Rong (Tsinghua University, P.R. China), Xin Su (Tsinghua University, P.R. China) ............................................................. 242

User-centric Traffic Optimization in Residential Software Defined Networks
Taimur Bakhshi (Plymouth University, United Kingdom), Bogdan Ghita (Plymouth University, United Kingdom) ................................................................. 247

OMAC: Optimal Migration Algorithm for virtual CDN
Hatem Ibn-khedher (Telecom SudParis, France), Emad Abd-Elrahman (Telecom SudParis (ex. INT), France), Hossam Afifi (Télécom SudParis, Institut Telecom & Paris Saclay, France) .............................................. 253

Cloud and IoT Enabling Services

HomeCloud: An Edge Cloud Framework and Testbed for New Application Delivery
Jianli Pan (University of Missouri, St. Louis, USA), Lin Ma (Huawei America Research Center, USA), Ravishankar Ravindran (Huawei & Huawei, USA), Peyman TalebiFard (The University of British Columbia, Canada) ........................................... 259

Towards Mobile Cloud Security Performance: A Cross-Border Approach
Theodoros Mavroeidakos (National Technical University of Athens, Greece), Dimitrios Kallergis (University of Piraeus, Greece), Dimitrios D. Vergados (University of Piraeus, Greece), Christos Douligeris (University of Piraeus, Greece) ................................................................. 265

Performance Analysis in Heterogeneous Cloud Radio Access Networks with Non-Uniform Device-to-Device Deployment
Munzali Ahmed Abana (Beijing University of Posts and Telecommunications, P.R. China), Mugen Peng (Beijing University of posts & Telecommunications, P.R. China), Zhongyuan Zhao (Beijing University of Posts and Telecommunications, P.R. China) ................................................................. 270

Dynamic Virtualized Network Function Allocation in a Multi-Cloud Environment
Aris Leivadeas (Carleton University, Canada), Matthias Falkner (Cisco, Germany), Ioannis Lambadaris (Carleton University, Canada), George Kesidis (Pennsylvania State University, USA) ................................................................. 276
Adaptive Sequential Offloading Game for Multi-Cell Mobile Edge Computing
Maofei Deng (Beijing University of Posts and Telecommunications, P.R. China), Hui Tian (Beijing University of Posts and Telecommunications, P.R. China), Xinchen Lyu (Beijing University of Posts and Telecommunications, P.R. China) ................................................................. 281

Performance over Fading Channels

Diversity Interleaving Techniques in Binary and Chaos-Based CDMA Systems with Wide-Band Channels
Stevan Mirko Berber (University of Auckland, New Zealand) .................................................. 286

SER of M–QAM Decode-and-Forward Multi-Relay Systems under Generalized Fading Conditions
Mulugeta K Fikadu (Tampere University of Technology, Finland), Paschalis C. Sofotasios (Tampere University of Technology & Aristotle University of Thessaloniki, Finland), Sami Muhaidat (Khalifa University, United Arab Emirates (UAE)), Qimei Cui (Beijing University of Posts and Telecommunications, P.R. China), Mikko Valkama (Tampere University of Technology, Finland) ................................................................. 291

Outage Probability under I/Q Imbalance and Cascaded Fading Effects
Alexandros-Apostolos A Boulogeorgos (Aristotle University of Thessaloniki, Greece), Paschalis C. Sofotasios (Tampere University of Technology & Aristotle University of Thessaloniki, Finland), Bassant Selim (Khalifa University, United Arab Emirates (UAE)), Sami Muhaidat (Khalifa University, United Arab Emirates (UAE)), George K. Karagiannidis (Aristotle University of Thessaloniki, Greece), Mikko Valkama (Tampere University of Technology, Finland) ................................................................. 296

Performance of High Rate 802.15.4 UWB PHY over Multipath Fading Channels
Athanasios Vasileiadis (Lund University, Sweden), Athanasios C. Iossifides (Alexander Technological Educational Institute of Thessaloniki, Greece) .................................................. 301

Outage and average BER Analysis of multiband OFDM UWB System with MRC/EGC Receiver in Log-normal Fading Channels
Sai Krishna Kondoju (National Institute of Technology Warangal, India), Venkata Mani Vakamulla (National Institute of Technology Warangal, India) .................................................. 307

Modulation and Detection

Error Analysis of Differentially Modulated Cooperative Systems Under Generalized Fading
Sara Al Maeeni (Khalifa University, United Arab Emirates (UAE)), Paschalis C. Sofotasios (Tampere University of Technology & Aristotle University of Thessaloniki, Finland), Sami Muhaidat (Khalifa University, United Arab Emirates (UAE)), Mikko Valkama (Tampere University of Technology, Finland) ................................................................. 312

OFDM-IM vs FQAM: A Comparative Analysis
Stavros Domouchtsidis (Aristotle University of Thessaloniki, Greece), Georgia D. Ntouni (Aristotle University of Thessaloniki, Greece), Vasileios M. Kapinas (Aristotle University of Thessaloniki, Greece), George K. Karagiannidis (Aristotle University of Thessaloniki, Greece) ................................................................. 317
GLRT-optimal Blind MSK Detection with Log-linear Complexity
Yannis Fountzoulas (Technical University of Crete, Greece), Dimitris Chachlakis (Technical University of Crete, Greece), George N. Karystrinos (Technical University of Crete, Greece), Aggelos Bletsas (Technical University of Crete, Greece) .............................................................. 322

Outage Probability Analysis of Cooperative Spatial Modulation Systems
Gökhan Altun (Istanbul Technical University, Turkey), Umit Aygölü (Istanbul Technical University, Turkey), Ertugrul Basar (Istanbul Technical University, Turkey), Mehmet E. Çelebi (Istanbul Technical University, Turkey) ........................................ 327

A Blind Signal Detection Scheme for Co-Channel Interference Cooperative Systems
Han Xi (Beijing University of Posts and telecommunications, P.R.China, P.R. China), Zhang Yan (Beijing University of Posts and telecommunications, P.R.China, P.R. China), Munzali Ahmed Abana (Beijing University of Posts and telecommunications, P.R.China, P.R. China), Peng Mugen (Beijing University of Posts and telecommunications, P.R.China, P.R. China) ........................................ 332

Model for Sharing the Information of Cyber Security Situation Awareness between Organizations
Tero Kokkonen (JAMK University of Applied Sciences, Finland), Jari Hautamäki (JAMK University of Applied Sciences, Finland), Jarmo Siltanen (JAMK University of Applied Sciences, Finland), Timo Hämäläinen (University of Jyväskylä, Finland) ........................................................................................................... 337

Reducing the Impact of Targeted Attacks in Interdependent Telecommunication Networks
Diego F. Rueda (University of Girona, Spain), Eusebi Calle (University of Girona, Spain), Ferney Maldonado-Lopez (Universidad de los Andes & Universidad de Girona, Colombia), Yezid E. Donoso (Universidad de los Andes, Colombia) .................................................................................................................. 342

Increasing Web Service Availability by Detecting Application-layer DDoS Attacks in Encrypted Traffic
Mikhail Zolotukhin (University of Jyväskylä, Finland), Timo Hämäläinen (University of Jyväskylä, Finland), Tero Kokkonen (JAMK University of Applied Sciences, Finland), Jarmo Siltanen (University of Applied Sciences, Finland) .................................................. 347

Correcting Rotational Errors in Three Stage QKD
Abhishek Parakh (University of Nebraska at Omaha, USA), Jacob vanBrandwijk (University of Nebraska at Omaha & Mutual of Omaha, USA) ........................................................................................................ 353

A Multi-Level Approach to Resilience of Critical Infrastructures and Services
Antonios Gouglidis (Lancaster University, United Kingdom), Syed Noor ul Hassan Shirazi (Lancaster University & InfoLab21, United Kingdom), Steven Simpson (Lancaster University, United Kingdom), Paul Smith (AIT Austrian Institute of Technology GmbH, Austria), David Hutchison (Lancaster University, United Kingdom) ................................................................................................................ 358
Special Session - Recent Advances in REM-facilitated Technologies for Future 5G Networks

REM: Revisiting a Cognitive Tool for Virtualized 5G Networks
Adrian Kliks (Poznan University of Technology, Poland), Leonardo Goratti (Create-net, Italy), Tao Chen (VTT Technical Research Centre of Finland LTD, Finland) 363

Exploring Radio Environment Map Architectures for Spectrum Sharing in the Radar Bands
Francisco Paisana (Trinity College, Ireland), Zaheer Khan (University of Oulu, Finland), Janne Lehtomäki (University of Oulu, Finland), Luiz DaSilva (Trinity College & Trinity College Dublin, Ireland), Risto Vuohtoniemi (University of Oulu, Finland) 368

Transmitter Localization for 5G mmWave REMs by Stochastic Generalized Triangulation
Anders Landström (Luleå University of Technology, Sweden), Jaap van de Beek (Luleå University of Technology, Sweden) 374

Radio Resource Management based on Radio Environmental Maps: Case of Smart-WiFi
Valentin Rakovic (Ss. Cyril and Methodius University in Skopje, Macedonia, the former Yugoslav Republic of), Daniel Denkovski (Ss. Cyril and Methodius University in Skopje, Macedonia, the former Yugoslav Republic of), Vladimir Atanasovski (Ss Cyril and Methodius University in Skopje, Macedonia, the former Yugoslav Republic of), Liljana Gavrilovska (Ss Cyril and Methodius University - Skopje, Macedonia, the former Yugoslav Republic of) 379

Range and Coexistence Analysis of Long Range Unlicensed Communication
Brecht Reynders (KU Leuven, Belgium), Wannes Meert (KU Leuven, Belgium), Sofie Pollin (KU Leuven, Belgium) 384

Special Session - Big data analytics driven by Internet-of-Things technologies: Big things have small beginnings

Energy Harvesting For The Internet-of-Things: Measurements And Probability Models
George Smart (University College London, United Kingdom), John Stewart Atkinson (University College London, United Kingdom), John Mitchell (University College London, United Kingdom), Miguel Rodrigues (University College London, United Kingdom), Yiannis Andreopoulos (University College London, United Kingdom) 390

Multichannel Cross-Layer Routing for Sensor Networks
Noradila Nordin (University College London, United Kingdom), Richard G Clegg (University College London, United Kingdom), Miguel Rio (UCL, United Kingdom) 396

Internet-of-Things Data Aggregation Using Compressed Sensing with Side Information
Evangelos Zimos (Vrije Universiteit Brussel, Belgium), Joao Mota (University College London, United Kingdom), Miguel Rodrigues (University College London, United Kingdom), Nikos Deligiannis (Vrije Universiteit Brussel, Belgium) 402
Proposal for "Individual specialized life management service" to support super aging society and "Life management platform"

Hideyuki Shimizu (NEC Solution Innovators, Ltd., Japan), Hisashi Sakamoto (NEC Solution Innovators, Ltd., Japan), Tohru Miyazaki (NEC Solution Innovators, Ltd., Japan), Masayoshi Kai (NEC Solution Innovators, Ltd., Japan) ........................................................................................................... 407

Workshop - Advances on Network Virtualization for 5G Systems (NetViS'2016)

Building Softwarized Mobile Infrastructures with ForCES

Evangelos Haleplidis (University of Patras, Greece), Damascene Joachimpillai (Verizon, USA), Jamal Hadi Salim (Mojatatu Networks, Canada), Kostas Pentikousis (EICT, Germany), Spyros Denazis (University of Patras, Greece), Odysseas Koufopavlou (University of Patras, Greece) ........................................................................................................... 412

Scenarios for 5G Networks: The COHERENT Approach

Alexandros Kostopoulos (OTE, Greece), George Agapiou (Hellenic Telecommunications Organization, Greece), Fang-Chun Kuo (NEC Europe, Germany), Kostas Pentikousis (EICT, Germany), Antonio M. Cipriano (Thales Communications and Security, France), Dorin Panaitopol (Thales Communications & Security (TCS), France), Dimitri Marandin (mimoOn GmbH, Germany), Karol Kowalik (INEA, Poland), Konstantinos Alexandris (EURECOM, France), Chia-Yu Chang (EURECOM, France), Navid Nikaein (Eurecom, France), Mariana Goldhamer (4GC, Israel), Adrian Kliks (Poznan University of Technology, Poland), Rebecca Steinert (SICS Swedish ICT, Sweden), Aarne O Mämmelä (VTT, Finland), Tao Chen (VTT Technical Research Centre of Finland LTD, Finland) ........................................................................................................... 417

Mobile and Cellular Networks I

User-Plane Multi-Connectivity Aspects in 5G

Diomidis S. Michalopoulos (Nokia Bell Labs, Germany), Ingo Viering (Nomor Research GmbH, Germany), Lei Du (Nokia Siemens Networks, P.R. China) .......... 423

User-centric Scheduled Ultra-Dense Radio Access Networks

Georgios P. Koudouridis (Huawei Technologies Sweden R&D Center & Royal Institute of Technology, Sweden), Pablo Soldati (Huawei Technologies Sweden AB, Sweden), Henrik Lundqvist (Huawei Technologies, Sweden), Christer Qvarfordt (Huawei Technologies Sweden AB, Sweden) .................................................. 428

The Effect of Group Mobility on the Efficacy of Routing in Next Generation Mobile Networks

Thomas Lagkas (The University of Sheffield International Faculty, CITY College, Greece), Argyro Lamproudi (Chalmers University of Technology, Greece), Panagiotis Sarigiannidis (University of Western Macedonia, Greece) ...... 435

Pilot Allocation Trade-off for Low Latency and High Reliability Transmission

Mohamed Ibrahim (Huawei Technologies, Germany), Wen Xu (Huawei Technologies Duesseldorf GmbH - European Research Center (ERC), Germany) ........................................................................................................... 440
Application of Opposition-Based Learning Concepts in Reducing the Power Consumption in Wireless Access Networks
Sotirios Goudos (Aristotle University of Thessaloniki, Greece), Margot Deruyck (Ghent University / IBBT, Belgium), David Plets (Ghent University - iMinds, Belgium), Luc Martens (Ghent University, Belgium), Wout Joseph (Ghent University/iMinds, Belgium) ......................................................... 445

Flow-Level Performance Analysis of Random Wireless Network using Stochastic Petri Nets
Huijian Wang (Beijing University of Posts and Telecommunications, P.R. China), Lei Lei (Beijing Jiaotong University, P.R. China), Kan Zheng (Beijing University of Posts&Telecommunications, P.R. China) ......................................................... 450

Signal Processing and Source Coding

Achievability of the rate-distortion function in binary uniform source coding with side information
Andrei Sechelea (Vrije Universiteit Brussel, Belgium), Adrian Munteanu (Vrije Universiteit Brussel, Belgium), Aleksandra Pižurica (Ghent University, Belgium), Nikos Deligiannis (Vrije Universiteit Brussel, Belgium) ......................................................... 455

Greedy Local-set Based Sampling and Reconstruction for Band-limited Graph Signals
Yang Lishan (Beijing University of Posts and Telecommunications, P.R. China), Guo Wenbin (Beijing University of Posts and Telecommunications, P.R. China) ........................................................................................................ 460

Entropy based Image Segmentation with Wavelet Compression for Energy Efficient LTE Systems
Anshu Mittal (IIT Bombay, India), Chinmoy Kundu (Memorial University, Canada), Ranjan Bose (Indian Institute of Technology, India), R K Shevgaonkar (IIT Mumbai, India) ................................................................. 465

Clustering Based Downsampling and Reconstruction for Band-limited Graph Signal
Yang Lishan (Beijing University of Posts and Telecommunications, P.R. China), Guo Wenbin (Beijing University of Posts and Telecommunications, P.R. China) ........................................................................................................ 471

A Novel Quality-Aware 3D Video Adaptive Scheme
Yi Han (University College Dublin, Ireland), Liam Murphy (University College Dublin, Ireland), Gabriel-Miro Muntean (Dublin City University, Ireland) ......................................................... 476

Special Session - Exploiting Interference towards Energy Efficient and Secure Wireless Communications

Confidential and Energy-Efficient Multiple-antenna Communications with Artificial Noise
Alessio Zappone (TU Dresden, Germany), Pin-Hsun Lin (TU Dresden, Germany), Eduard Jorswieck (TU Dresden, Germany) ................................................................. 481
Artificial Noise Design For Secure Multi-Relay Networks Over Generalized Fading Channels
Ying Liu (Technische Universität Darmstadt, Germany), George C. Alexandropoulos (France Research Center, Huawei Technologies Co. Ltd., France), Liang Li (Technische Universität Darmstadt, Germany), Marius Pesavento (Technische Universität Darmstadt & Merckstr. 25, Germany) 486

Robust Low-Complexity Arbitrary User- and Symbol-Level Multi-Cell Precoding with Single-Fed Load-Controlled Parasitic Antenna Arrays
Konstantinos Ntougias (Athens Information Technology, Greece), Dimitrios Ntaikos (Athens Information Technology, Greece), Constantinos B. Papadias (Athens Information Technology, Greece) 491

Symbol-level precoding in MISO broadcast channels for SWIPT systems
Stelios Timotheou (University of Cyprus, Cyprus), Gan Zheng (Loughborough University & University of Luxembourg, United Kingdom), Christos Masouros (University College London, United Kingdom), Ioannis Krikidis (University of Cyprus, Cyprus) 496

Fundamental Limits of Simultaneous Energy and Information Transmission
Selma Belhadj Amor (Inria, France), Samir M. Perlaza (INRIA, France) 501

Vehicular and Transportation Systems

V2I Applications in Highways: How RSU dimensioning can improve service delivery
Georgios Charalampopoulos (Hellenic Open University, Greece), Tasos Dagiuklas (Hellenic Open University & University of Patras, Greece), Theofilos Chrysikos (University of Patras, Greece) 506

Ioakeim Samaras (Industrial Systems Institute & Intracom-Telecom, Greece), John Gialelis (University of Patras & Industrial Systems Institute, Greece), Stavros Koubias (University of Patras, Greece) 512

Stochastic Modeling of Device-to-Device Communications for Intelligent Transportation Systems
Lei Lei (Beijing Jiaotong University, P.R. China) 517

A Novel Direction-based Clustering Algorithm for VANETs
Irina Tal (Dublin City University, Ireland), Phelim Kelly (Dublin City University, Ireland), Gabriel-Miro Muntean (Dublin City University, Ireland) 522

Workshop - Advances on Network Virtualization for 5G Systems (NetViS'2016)

Virtualized Sub-GHz Transmission Paired with Mobile Access for the Tactile Internet
Oliver Holland (King's College London, United Kingdom), Stan Wong (King's College London, United Kingdom), Vasilis Friderikos (King's College London, United Kingdom), Zhijin Qin (Queen Mary University of London, United Kingdom), Yue Gao (Queen Mary University of London, United Kingdom) 527
Green and Wireless Powered Communication Systems

5G Mobile Challenges: A Feasibility Study on Achieving Carbon Neutrality
Luis Carlos BS Goncalves (ISCTE-IUL/Instituto de Telecomunicações & Instituto de Telecomunicações, Portugal), Pedro Sebastião (ISCTE, Instituto de Telecomunicações, Portugal), Nuno Souto (ISCTE/Instituto de Telecomunicações & Instituto de Telecomunicações, Portugal), Américo Correia (Instituto de Telecomunicações, Portugal) .......................................................... 532

Proportional Fair Scheduling in Wireless Powered Communication Networks
Hristina Chingoska (Faculty of Electrical Engineering and Information Technologies, Macedonia, the former Yugoslav Republic of), Ivana Nikoloska (Faculty of Electrical Engineering and Information Technologies, Macedonia, the former Yugoslav Republic of), Zoran Hadzi-Velkov (Ss. Cyril and Methodius University in Skopje, Macedonia, the former Yugoslav Republic of), Nikola Zlatanov (Monash University, Australia) .......................................................... 537

Simultaneous Transmission of Information and RF Energy in Multicarrier Systems
Sumit Gautam (International Institute of Information Technology-Hyderabad, India), P Ubaidulla (International Institute of Information Technology, India) .......................... 542

User Cooperation for Enhanced Throughput Fairness in Wireless Powered Communication Networks
Mingquan Zhong (Shenzhen University, P.R. China), Suzhi Bi (Shenzhen University, P.R. China), Xiaohui Lin (Shenzhen University, P.R. China) ........................................... 547

Security II

Secret Key Generation using Entropy-Constrained-like Quantization Scheme
Xuanxuan Wang (Institute of Information Engineering Chinese Academy of Sciences, P.R. China), Lars Thiele (Fraunhofer Heinrich Hertz Institute, Germany), Thomas Haustein (Fraunhofer Institute for Telecommunications, Heinrich-Hertz-Institut, Germany), Yongming Wang (Institute of Information Engineering, Chinese Academy of Sciences, P.R. China) .................................................. 553

WSN Operability during Persistent Attack Execution
Eliana Stavrou (UCLan Cyprus, Cyprus), Andreas Pitsillides (University of Cyprus, Cyprus) .......................................................... 559

Polar-code-based Security on the BSC-modeled HARQ in Fading
Yannis Fountzoulas (Technical University of Crete, Greece), Angela Kosta (Technical University of Crete, Greece), George N. Karystinos (Technical University of Crete, Greece) ........................................................................................................ 564

Epidemic Model for Malware Targeting Telephony Networks
Ioif Androulidakis (University of Ioannina, Slovenia), Sergio Huerta (University of Deusto, Spain), Vasileios Vlachos (Technological Educational Institute of Thessaly, Greece), Igor Santos (DeustoTech, University of Deusto, Spain) ........................................................................................................ 564

MISO TAS Wiretap Channels with Jamming and Noise at the Eavesdropper
Yosbel Ortega (Federal University of Ceará, Brazil), Nuwan S. Ferdinand (University of Oulu, Finland), Daniel Benevides da Costa (Federal University of Ceara (UFC) & Area: Telecommunications, Brazil), Ugo Dias (University of Brasilia, Brazil), Rafael Timoteo de Sousa Junior (University of Brasilia, Brazil) ........................................................................................................ 574
Massive MIMO

**Massive MIMO with Multi-Antenna Users: When are Additional User Antennas Beneficial?**
Xueru Li (Tsinghua University, P.R. China), Emil Björnson (Linköping University, Sweden), Shidong Zhou (Tsinghua University, P.R. China), Jing Wang (EE. Tsinghua University, P.R. China) .................................................. 579

**Adaptive Split Bregman for Sparse and Low Rank Massive MIMO Channel Estimation**
Ahmed Nasser Ahmed (Egypt-Japan University of Science and Technology (E-JUST) & Suez Canal University, Egypt), Maha Elsabrouty (Egypt Japan University for Science and Technology, Egypt) .................................................. 585

**Evaluating Realistic Performance Gains of Massive Multi-User MIMO System in Urban City Deployments**
Siming Zhang (University of Bristol, United Kingdom), Angela Doufexi (University of Bristol, United Kingdom), Andrew Nix (University of Bristol, United Kingdom) .................................................. 590

**An Enhanced Whitening Rotation Semi-Blind Channel Estimation for Massive MIMO-OFDM**
Hayder Al-Salih (King's College London, United Kingdom), Mohammad Reza Nakhai (King's College London, United Kingdom) .................................................. 596

**Dealing With Large Overhead in FDD massive MIMO Systems: A One-Bit Feedback Scheme**
Yingjie Zhang (Tsinghua University, P.R. China), Wei Feng (Tsinghua University, P.R. China), Ning Ge (Tsinghua University, P.R. China) .................................................. 602

Mobile and Cellular Networks II

**On the Dependence Between Base Stations Deployment and Traffic Spatial Distribution in Cellular Networks**
Meng Li (Zhejiang University, P.R. China), Zhifeng Zhao (Zhejiang University, P.R. China), Yifan Zhou (Zhejiang University, P.R. China), Xianfu Chen (VTT Technical Research Centre of Finland, Finland), Honggang Zhang (Zhejiang University & Université Européenne de Bretagne (UEB) and Supelec, P.R. China) .................................................. 607

**Analysis of Vertical and Horizontal Sectorization in Suburban Environment using 3D Ray Tracing**
Muhammad Usman Sheikh (Tampere University of Technology, Finland), Jukka Lempiäinen (Tampere University of Technology, Finland) .................................................. 612

**Simple Semi-Analytical Expression for the Max-SIR Outage Probability in Cellular Networks**
Maher Arar (University of Ottawa, Canada), Elham Kalantari (University of Ottawa, Canada), Abbas Yongacoglu (University of Ottawa, Canada) .................................................. 618

**Migration to 28 GHz Frequency with Higher order Sectorization in Urban Macro Cellular Environment**
Muhammad Usman Sheikh (Tampere University of Technology, Finland), Jukka Lempiäinen (Tampere University of Technology, Finland) .................................................. 623

**Received Signal Strength Based Localization in Sectorized Cellular Networks**
Saliha Büyükço rak (Istanbul Technical University, Electrical and Electronics Engineering Faculty, Turkey), Gunes Karabulut Kurt (Istanbul Technical University, Turkey), Abbas Yongacoglu (University of Ottawa, Canada) .................................................. 628
OFDM and more

Modeling Interference Between OFDM/OQAM and CP-OFDM: Limitations of the PSD-Based Model
Quentin Bodinier (CentraleSupélec/IETR, France), Faouzi Bader (CentraleSupélec, France), Jacques Palicot (CentraleSupélec/IETR, France) 633

OQAM implementation of GFDM
Shravan Kumar Bandari (National Institute of Technology Warangal, India), Venkata Mani Vakamulla (National Institute of Technology Warangal, India), Anastasios Drosopoulos (TEI of Western Greece, Greece) 640

Low-Complexity Approximations for LMMSE Channel Estimation in OFDM/OQAM
Vincent Savaux (B-COM, France), Yves Louet (CentraleSupélec, France), Faouzi Bader (CentraleSupélec, France) 645

Wavelet-OFDM vs. OFDM: Performance Comparison
Marwa Chafii (CentraleSupélec & IETR, France), Yahya Jasim Harbi (University of York, United Kingdom), Alister G. Burr (University of York, United Kingdom) 650

CMA-Based Blind Equalization and Phase Recovery in OFDM/OQAM Systems
Vincent Savaux (B-COM, France), Faouzi Bader (CentraleSupélec, France), Jacques Palicot (CentraleSupélec/IETR, France) 655

Access Systems and Networks

Adaptive Probabilistic Flooding for Nanonetworks Employing Molecular Communication
Taqwa Saeed (Frederick University, Cyprus), Marios Lestas (Frederick University, Cyprus), Andreas Pitsillides (University of Cyprus, Cyprus) 660

Packet Reordering Response for MPTCP under Wireless Heterogeneous Environment
Amani Alheid (University of Bristol & Public Authority for Applied Education and Training (PAAET) - Kuwait, United Kingdom), Angela Doufexi (University of Bristol, United Kingdom), Dritan Kaleshi (University of Bristol, United Kingdom) 665

LUPMAC: A Cross-layer MAC Technique to Improve the Age of Information over Dense WLANs
Antonio Franco (Lunds Tekniska Högskola, Sweden), Emma Fitzgerald (Lund University, Sweden), Bjorn Landfeldt (Lund University, Sweden), Nikolaos Pappas (Linköping University, Sweden), Vangelis Angelakis (Linköping University, Sweden) 671

Comparison of Spatial Aloha and CSMA using Simple Stochastic Geometry Models for 1D and 2D Networks
Nadjib Achir (INRIA EVA, France), Younes Bouchaala (Versailles Saint-Quentin-en-Yvelines University & Institut VEDECOM, France), Paul Muhlethaler (INRIA, France), Oyunchimeg Shagdar (INRIA, France) 677
Optical Communications and Systems

**Pulse Shape Pre-distortion for Improving the Power Efficiency of SOA-based IR-UWB over Fiber Systems**
Haidar Taki (Faculty of Sciences I, Lebanese University, Lebanon), Stéphane Azou (CNRS/Lab-STICC & Ecole Nationale d'Ingénieurs de Brest (ENIB), France), Ali Hamie (Arts Sciences & Technology University in Lebanon (AUL), Lebanon), Ali Al Housseini (Lebanese University-Liban, Lebanon), Ali Alaeddine (Lebanese University - Hadath - Lebanon, Lebanon), Ammar Sharaiha (ENIB, France)

**Channel Modeling and Performance Evaluation of FSO Communication Systems in Fog**
Maged Abdullah Esmail (King Saud University, Saudi Arabia), Habib Fathallah (King Saud University, Saudi Arabia), Mohamed-Slim Alouini (King Abdullah University of Science and Technology (KAUST), Saudi Arabia)

**Design Criterion of Space-Time Codes for SDM Optical Fiber Systems**
El Mehdi Amhoud (TELECOM PARISTECH, France), Ghaya Rekaya-Ben Othman (TELECOM ParisTech, France), Yves Jaouën (Telecom ParisTech, France)

**Optimized Constellation Design for P-LDPC Coded Multi-Color Visible Light Communications**
Chengjun Tang (National Mobile Communications Research Laboratory, P.R. China), Ming Jiang (Southeast University, P.R. China), Hong Shen (Southeast University, P.R. China), Chunming Zhao (National Mobile Communications Research Laboratory, Southeast University, P.R. China)

**Improving Carrier Ethernet Recovery Time Using a Fast Reroute Mechanism**
Marcelo Santos (Instutut National de la Recherche Scientifique INRS, Canada), Jean-Charles Grégoire (University of Quebec, INRS, Canada)

Multi-Antenna and Beamforming Systems

**Semi-Exhaustive Reduced-complexity Recursive Block Decoding for MIMO Systems**
Mohamed Achraf Khsiba (Telecom ParisTech, France), Ghaya Rekaya-Ben Othman (TELECOM ParisTech, France)

**Superimposed Training based Estimation of Sparse MIMO Channels for Emerging Wireless Networks**
Babar Mansoor (COMSATS Institute of Information Technology, Islamabad, Pakistan), Junaid Nawaz Syed (COMSATS Institute of Information Technology, Islamabad, Pakistan), Bilal Amin (COMSATS Institute of Information Technology, Lahore, Pakistan), Shree Krishna Sharma (University of Luxembourg, Luxembourg), Mohammad N Patwary (Staffordshire University, Stafford, United Kingdom)

**Towards Efficient Design of Fixed-point Iterative Receiver for Coded MIMO-OFDM Systems**
Rida El Chall (INSA de Rennes & IETR, France), Fabienne Nouvel (INSA IETR RENNES, France), Maryline Hélard (INSA Rennes & IETR Institute of Electronics and Telecommunications of Rennes, France), Yvan Kokar (IETR-INSA Rennes, France), Ming Liu (Beijing Jiaotong University & Beijing Key Lab of Transportation Data Analysis and Mining, P.R. China)
Source Precoder Design for Non-Regenerative MIMO Relay Networks with Antenna Selection
Lina Bariah (KUSTAR, United Arab Emirates (UAE)), Sami Muhaidat (Khalifa University, United Arab Emirates (UAE)), Arafat Al-Dweik (Khalifa University, United Arab Emirates (UAE)) 729

Special Session - IoT Emerging Technologies: Design and Security

Informed Consent in Internet of Things: The Case Study of Cooperative Intelligent Transport Systems
Ricardo Neisse (European Commission Joint Research Centre, Italy), Gianmarco Baldini (Joint Research Centre - European Commission, Italy), Gary Steri (European Commission JRC, Italy), Vincent Mahieu (Joint Research Centre, European Union) 734

Smartphones as M2M Gateways in Smart Cities IoT Applications
Carlos Pereira (Instituto de Telecomunicações & University of Porto, Portugal), Joao G. P. Rodrigues (Instituto de Telecomunicações, Portugal), António Pinto (Instituto de Telecomunicações, Portugal), Pedro Rocha (PT Inovação e Sistemas, Portugal), Fernando Santiago (PT Inovação e Sistemas, Portugal), Jorge Sousa (PT Inovação e Sistemas, Portugal), Ana C Aguiar (Instituto de Telecomunicações & University of Porto, Portugal) 739

Affine Linear Transformation based Sphere Decoder for 1-bit ADC MIMO-Constant Envelope Modulation
Doaa Abdelhameed (Aswan University, Egypt), Hany S. Hussein (Aswan University, Egypt), Ehab Mahmoud Mohamed (Osaka University, Japan) 746

Flow-based Features for a Robust Intrusion Detection System Targeting Mobile Traffic
Mohammed Faisal Elrawy (MUST University, Egypt & IPA, Asir, KSA, Egypt), Ali Ismail Awad (Luleå University of Technology & Faculty of Engineering, Al Azhar University, Qena, Sweden), Hesham Hamed (EIMinia University, Egypt) 752

Special Session - Inter-Cloud, Fog and Mobile Edge Computing

Consumption Considered Optimal Scheme for Task Offloading in Mobile Edge Computing
Li Tianze (Beijing University of Posts and Telecommunications, P.R. China), Wu Muqing (Beijing University of Posts and Telecommunications, P.R. China), Min Zhao (Beijing University of Posts and Telecommunications, P.R. China) 758

Extending NS3 To Simulate Visible Light Communication at Network-Level
Adel Aldalbahi (New Jersey Institute Of Technology, USA), Michael Rahaim (Boston University & NSF Smart Lighting ERC, USA), Abdallah A Khreishah (New Jersey Institute of Technology, USA), Moussa Ayyash (CSU, USA), Ryan Ackerman (New Jersey Institute Of Technology, USA), James Basuino (New Jersey Institute Of Technology, USA), Walter Berreta (New Jersey Institute Of Technology, USA), Thomas DC Little (Boston University & NSF Smart Lighting ERC, USA) 764
Special Session - Industrial Internet of Things: Constraints, Guarantees and Resiliency

ICN Based Distributed IoT Resource Discovery and Routing
Lijun Dong (Huawei, USA), Ravi Ravindran (Huawei, USA), Guoqiang Wang (Huawei, USA) 779

Random Unslotted Time-Frequency ALOHA: Theory and Application to IoT UNB Networks
Claire Goursaud (INSA-Lyon, France), Yuqi Mo (CITI of INSA-Lyon & SIGFOX, France) 786

OpenWiNo: An Open Hardware and Software Framework for Fast-Prototyping in the IoT
Adrien van den Bossche (IRIT, Université Fédérale de Toulouse, France), Rejane Dalce (Institut de Recherche en Informatique de Toulouse UMR 5505 - CNRS, France), Thierry Val (University of TOULOUSE - UT2J - CNRS - IRIT - IRT team, France) 791

PEAM: A Polymorphic, Energy-Aware MAC Protocol for WBAN
Ons Bouachir (Canadian University Dubai, United Arab Emirates (UAE)), Adel Ben Mnaouer (Canadian University of Dubai & School of Engineering, Applied Sciences and Technology, United Arab Emirates (UAE)), Farid Touati (Qatar University, Qatar) 797

Coding and Coded Modulation

Non-Binary LDPC Codes over Finite Division Near Rings
Matthias Korb (ETH Zurich, Switzerland), Andrew Blanksby (Broadcom Corporation, USA) 803

Joint Signal Alignment and Physical Network Coding for Heterogeneous Networks
Syed Saqlain Ali (University of Aveiro & Instituto de Telecomunicacoes, Portugal), Daniel Castanheira (Instituto de Telecomunicacoes (IT)/University of Aveiro, Portugal), Adão Silva (Instituto de Telecomunicacoes (IT)/University of Aveiro, Portugal), Atilio Gameiro (Telecommunications Institute/Aveiro University, Portugal) 810

On Signal Space Diversity for Non Binary Coded Modulation schemes
Ahmed Abdouleuh (University of South Brittany, France), Emmanuel Boutillon (Université de Bretagne Sud, France), Laura Conde-Canencia (Université de Bretagne Sud, France), Charbel Abdel Nour (Institut Telecom - Telecom Bretagne, France), Catherine Douillard (Institut Mines Telecom - Telecom Bretagne, France) 815
Random Linear Network Coding for Streams with Unequally Sized Packets: Overhead Reduction Without Zero-padded Schemes
Maroua Taghouti (Tunisia Polytechnic School, University of Carthage, Tunisia), Daniel E. Lucani (Aalborg University, Denmark), Morten V. Pedersen (Aalborg University, Denmark), Ammar Bouallegue (National School of Engineers of Tunis, Tunisia)
