
Bengaluru, India
21 – 23 January 2016
CONTENTS

Optimization of Renewable Energy Sources for Hybrid Power Generation
Radharaman Shaha, Dr. D.P. Kothari, Dr. V.S. Chandrakar ................................................................. 1

A Novel AC-AC Converter Using Bridgeless Flyback Rectifier And Flyback CCM Inverter
Anaghakrishnan M. R., Shankar S., Lekshmi S. .................................................................................. 6

Performance Prediction of a Grid Interfaced PV System through Matlab Modelling -Part -II
Ritesh Dash, S.C Swain ....................................................................................................................... 12

SVPWM Based Control of Matrix Converter for Gearless Operation of Wind Energy Power Conversion System
Athulya M. T. I., Shankar Subramanian ............................................................................................... 18

Design and Control of a Soft Switching Grid Connecting Inverter Using PI Controller
Meenu Soman, Manitha P.V., Ilango K ................................................................................................ 24

Estimation and Controlling the State of Charge in Battery Augmented Photovoltaic System
Bhavya, M. Prabhakar, J.Ramprabhakar, V.shilaja ........................................................................ 30

Topologies of Single Phase Z Source Inverters for Photovoltaic Systems
M. Aravindan, V. Balaji, V. Saravanan, M. Arumugam .................................................................... 36

Comparative Study of Different Control Algorithms on Brushless DC Motors
B. Pavan Kumar, Krishnan C.M.C ....................................................................................................... 42

System Level Parameter Tuning of an Islanded Microgrid with Improved Computational Efficiency
K.Manjunath, V.Sarkar ......................................................................................................................... 47

Analysis and Development of Weinberg Converter with Fault Tolerant Feature
Gaurav Yadav, Gowrishankara C.K, Dr. Hariharan V.K. .................................................................... 54

Implementation of Transformerless Step – Up Converter and H6 Inverter for Single Phase AC Applications
Aparna Das, Sheeja G .......................................................................................................................... 60

Performance Analysis of a Three Phase Self Excited Induction Generator Operating with Short Shunt and Long Shunt Connections
Mohd. Faisal Khan, Mohd. Rizwan Khan ........................................................................................... 65

Comparative Study of Compensation Techniques of DVR with Composite Observer
Vishal, E. Puranik and Anjana jain ....................................................................................................... 71

Very-Short Term Wind Power Forecasting through Adaptive Wavelet Neural Network
M. Nandana Jyothi, Dr. P.V. Ramana Rao ........................................................................................ 78

Selection of Optimum Excitation Capacitance for a High (Six) Phase Self Excited Induction Generator
Mohd. Faisal Khan, Mohd. Rizwan Khan ............................................................................................ 84

Emerging Trends in Uninterrupted Power Supplies: Patents view
Rajani GN ............................................................................................................................................ 89

A Novel Approach of Coordinating Wind and Hydro Power Stations for the Secured Power–A Case Study
Shravankumar Nayak, Diwakar Joshi ................................................................................................... 94

Design of a Subsynchronous Damping Controller Using a Dynamic Phasor-Based Model of TCSC
Shashidhara Mecha Kotian, K. N. Shubhanga ................................................................................. 98

Modified Gamma Source Inverter for Fuel Cell –Battery Hybrid Electric Vehicles
ReddyPrasad Reddivari, Pruthviraj B G, Manish Bharat, Arjun Kumar G B .................................... 104

Closed Loop System of a Flying Capacitor Multilevel Inverter using POD-PWM
S. Devaraj, Anitha G. S ....................................................................................................................... 110
Case Studies on Protection Performance and Event Analysis in Southern Regional Grid
T.Muthu Kumar, P.R.Raghuram, Anbunesan G., S.P.Kumar .......................................................... 117

Dual Tree Complex Wavelet Transform Based Approach for Power Quality Monitoring and Data Compression
Prathibha E., A.Manjunatha, Sunil Basavaraj ............................................................................. 123

Power Flow Stability Improvement in Renewable Hybrid Power System using SVPWM Technique
R.Gunasekari, Dr. R. Dhanalakshmi, Dr. P.C Kishore Raja .......................................................... 128

Influence of Stator Teeth Shaping on Cogging Torque of Radial Flux Permanent Magnet Brushless DC Motor
Amit N. Patel ......................................................................................................................... 133

Pyramid Type Solar Still Coupled with Evacuated Tubes
Ganesh A., Vinod M Kotebavi .................................................................................................. 137

Equivalent Network of Large Wind Power Plant for Harmonic Analysis
Mrutyunjay Mohanty, Shekhar Kelapure, H. P. Khincha ............................................................... 142

Studying the Impact of AC-Microgrid on the Main Grid and It’s Fault Analysis
Prasanth Korada, Aryadevi Ramanidevi Devidas ....................................................................... 149

Plug in Electric Solar Vehicle
Chaitanya Kamumilli, Amit Singh, Akshatha Ganesh, Madhurya Srinivas .................................... 155

Performance Analysis of Multiphase Buck Converter for VRMs Using Phase Shedding Technique
Mini P. Varghese, A. Manjunatha, Sunil Kumar ......................................................................... 159

Evaluation of Different Strategies for Frequency Quality Control
Martin Nilsson, Lennart Soder, Göran N. Ericsson .................................................................. 164

Linear Extrapolated MPPT – An Alternative to Fractional Open Circuit Voltage Technique
Sivaramakrishnan S. ................................................................................................................. 170

Real Power Flow Control in Transmission System using TCSC
K. Manjusha S., Balamurugan, N. Kirthika .............................................................................. 174

Design of Active Series Compensator for Real Power Flow Rerouting in Transmission System
Sai Shibu N.B, S. Balamurugan ................................................................................................. 179

Wireless Transmission of Solar Power using Inductive Resonant Principle
T. Rohith, V.S. Samhitha, Mamatha I. ...................................................................................... 183

Maximum Power Point Tracking System for Stand Alone Solar PV Power System using Adaptive Neuro-Fuzzy Inference System
S. Sheik Mohammed, D. Devaraj, T. P. Imthias Ahamed ............................................................. 189

A New VcosΦ Control Scheme of Capacitor Supported DVR for Power Quality Improvement
V. Rajagopal, J. Bangaraju, D. Rosila Jебarani and Ch. Lakshmi Madhuri ................................ 193

Radial Electro-magnetic Field Analysis of Induction Motor Under Faulty Condition Using FEM
Praveen Kumar N., Isha T B, Balakrishnan P. ............................................................................ 200

Reliability Assessment of Distribution System with Renewable Distributed Generation
Mehetaj Makandar, Chandra Shekhar Reddy Atla, Prof. Sankar Velamuri ................................ 206

Improving Transient Stability of Power System by using Distributed Static Series Compensator
S. I. Barde, G. R. Walke ........................................................................................................... 211

Dynamic Stability Enhancement by Selecting Optimal Location of STATCOM and Tuned of Power System Stabilizer (PSS) using Firefly Algorithm
K. Karthikeyan, P.K.Dhal ....................................................................................................... 216

Relevance of Power From Small Wind Turbines: A Case Study For Torque – Speed Characteristics of Small Vertical Axis Wind Turbine For Kota Region of Rajasthan
Shahid Ali Khan, K. V. S. Rao ................................................................................................. 222
Cost Effective Distributed Generation Placement and Sizing Using Water Flow-Like Algorithm
K Dhananjaya Babu, A Lakshmi Devi ................................................................. 227

A Novel Single Stage High Step Up AC-DC Converter with Switched Capacitor Technique
Revathi V T, Muhammedali Shafeeqe K.............................................................. 233

Fuzzy Based Controller for Solar Photovoltaic Powered Butter Extraction System
Kinattingal Sundareswaran, Kevin Ark Kumar, Venkateswaran PR, Baiju Naina, Sarang Sharan, Sunit Gopal.. 238

Analysis of Harmonics in a Five Phase PWM Inverter with LR Load and Mitigation of Harmonics by π Filter
Ananda A S, Dr.Manjesh .................................................................................. 243

Modeling of Partial Discharge (PD) for Solid Insulation with Void and Building a Hardware setup to Measure Partial Discharge
Devendra Gowdal, Anandraj ........................................................................... 247

Enhancement of Power Quality with ANFIS Controlled DSTATCOM in Four Wire Three Phase Distribution System
M.R.V.Murali, I.Srinu, L.V. Narasimha Rao ....................................................... 254

VFT-STATCOM Coordinated System for Improved Power Transfer Between Asynchronous Grids
Sreelakshmi C S, Prof K. Pramelakumari .......................................................... 262

Harmonic Suppression in a Non-Linear Load using Three Phase Shunt Active Power Filter
Priyashree S, Pooja A.B, Mahesh E & Vidya H.A ............................................. 267

Congestion Management Based on Virtual Real Power Flows
Adhip, D. Thukaram ....................................................................................... 273

Phase Wise Voltage Stability Analysis of EHV System
A Santosh Kumar D, Thukaram,....................................................................... 278

Optimizing System Elements for Hybrid Wind - Solar PV Power Plant
N. Pradeep Kumar, D.K Balaram, Chandrasekhar Reddy Adla .................................. 284

Artificial Neural Network based Day Ahead Load Forecasting using Smart Meter Data
S.M. Sulaiman, P.Aruna Jeyanth and D.Devaraj .................................................. 290

Comparative Study of Wind Speed Forecasting Techniques
K Kiranvishnu, K.Sireesha, Ramprabhatkar.J ...................................................... 295

Strategy to Optimize the Load Shedding Amount Based on Static Voltage Stability using SFLA
Pushpendra Singh, S C Choub, L.D Arya, L Titare ............................................ 302

Transformerless Dynamic Voltage Restorer for Voltage Sag Mitigation
V. Ansal, K. Ravikumar, P.Parthiban ................................................................... 308

Surge Impedance Loading Level Enhancement of 765 kV Long EHV AC line Through Bundle Configurations
Dr. Jitendra Jamnani, Varun Patel ................................................................ 312

Demand Response Scheme with Electricity Market Prices for Residential Sector using Stochastic Dynamic Optimization
S. Sofana Reka, V.Ramesh .................................................................................. 317

Variable Reluctance Axial Flux Alternator Incorporating Air Gap Variation
Bobby George, Joseph P.C.Thomas.................................................................. 323

Comparison of SC-STFCL and SMES-STFCL with Flux Tracking Control to Improve LVRT Capability
Divya S, Krishnakumari T.M ......................................................................... 331

Design of Grading Material for Electric Stress Control in a Polymeric Disc Insulator
R.Bose, P.Bala and S.Chatterjee ....................................................................... 337
Low Source Current Ripple Soft-switching Boost Converter
M. Veerachary, Jyoti Prakash ................................................................. 341

Drooping Gain Buck Converter
Mummadi Veerachary, Shrikanth Mohan Misal ..................................... 348

Design, Simulation and Implementation of Solar PV Based Micro Inverter
Jayesh Priolkar, Anitha Anvekar ........................................................... 353

Genetic Algorithm based Service Restoration in Distribution Systems with Multiple DGs for Time Varying loads
R.Chidanandappa, Dr.T. Ananthapadmanab, Ranjith H.C .......................... 358

Isolated DC-DC Zero Voltage Switching Converter for Battery Charging Applications
K.Likhitha, S Sathish Kumar, G. Kanimozhi .......................................... 365

Design and Implementation of Sliding Mode Voltage Controller for DC to DC Buck Converter by using Hysteresis Modulation and Pulse Width Modulation
B.Kiran, P.Parthiban, Debashisha.Jena, P.S.Prakash ............................. 370

An Adaptive Hybrid Optimization Algorithm for Multi Objective OPF with FACTS Device
A.Immanuel, Ch.Chengaiah ................................................................. 376

Speed Control of Electric Drives using Active Disturbance Rejection Control
Sravya K, Behara V R S Bhanu Seshu, Srikanth Malladi ............................ 383

Generalized Cascaded Multi Level Inverter Using Reduced Number of Components with PV Systems
A.Sireesha, Swaroop KP, Durga Prasad G .............................................. 389

Lead-acid Battery for HEV using Fuzzy Controller and Ultracapacitor
Anupama Singh, Dr. P.B.Karandikar ...................................................... 396

Electrode Area Based Modeling of Supercapacitor using Artificial Neural Network
Seema Mathew, Gaurav Shekhar, P. B. Karandikar, N.R.Kulkarni ............... 401

Configurations of Modular Push-Pull Buck DC-DC Converters for 12KW Telecom SMPS and Its Design
Saravana Prakash P, R Kalpana .............................................................. 405

Active Power Control in Grid Connected Wind driven PMSG
Ms. Srinidhi Varadarajan, Dr. Sasi.K.Kottayil ......................................... 412

Optimal Generation Evaluation by TOPSIS method

Comparative Analysis of Robust PSS and Robust Supplementary Modulation Controller for SSSC
Javeed Kittur, Saikumar H.V, Sharath Raj S.V ........................................ 422

Deterministic LQR Controller for DC-DC Buck Converter
S.Augusti Lindiya, K.Vijayarekha, S.Palani ............................................ 428

A Single Phase Nine Level PWM Inverter
Chippy Venugopal, Shinosh Mathew ..................................................... 434

A Critical Analysis of Power Quality Issues in Data Center
P. Harinath, K Kamaleswaran, M. Venkateshwaran, C. Sreenath, S. Prabhakaran, V. Kirubakaran ......................................................... 441

ISCPWM Strategy for a Series Parallel Switched CMLI with Induction Motor Load
R.Geetha, M.Ramaswamy ................................................................. 447

Model Predictive Control of TRMS
K.Harshath, P.S.Manoharan, M.Varatharajan ....................................... 453

Solar Pasteurization
S. Prabhat Bhuddha Dev1, G. Naveen, S. Parthasarathy, S. Saiyath Mohaiyuddin Samdani, Dr.V. Kirubakaran ........................................ 458
Analysis of Aqueous Supercapacitor with Various Current Collectors, Binders and Adhesives  
Bisvajita Panda, Indu Dwivedi, Krishna Priya, P.B.Karandikar, P. S. Mandake ................................................. 461

Application of Artificial Neural Network for Short Term Wind Speed Forecasting  
Tarlochan Kaur, Sanjay Kumar, Ravi Segal ............................................................................................................ 466

Load Disturbance Rejection Based PID Controller for Frequency Regulation of a Microgrid  
Badal Kumar, Dr. Sandeep Bhongade .................................................................................................................. 471

Improvements on Spacecraft Power Regulators  
Govrishankara C K, Abhishek J Gowda, S G Srivani ............................................................................................. 477

Jayasankar V. N, Vinatha U .................................................................................................................................. 483

Performance Assessment of PV Energy Conversion System with Buck-Boost and Cuk Converter for Cascaded H-Bridge Inverter  
V.S.Kirthika Devi, S.G.Srivani .............................................................................................................................. 488

Social Acceptance Of A Biomass Plant In India  
Sagar Patel, K.V.S. Rao ......................................................................................................................................... 494

Speed Control of an Inverter Driven Induction Motor by Bus-Clamping SVPWM  
Praveen M, K Uma Rao .......................................................................................................................................... 500

Dynamic Droop Based Inverter Control for Autonomous Microgrid  
M. Mukherjee, D. Pullaguram and S. Mishra ......................................................................................................... 506

Pre-determination of System Design Adequacy in PV Installation  
S. Sajeesh, S. Nithin, M. Jisma, Sasi K. Kottayil .................................................................................................... 512

Design of GPI Controller for Current Feedback Multilevel Cascaded Inverter  
Bhogeswara Rao Angara, M. M.Tripathi ............................................................................................................... 517

The Effect of Solar PV Module Price and Capital Cost on the Levelized Electricity cost of The Solar PV Power Plant in The Context of India  
Tahira Bano, K.V.S. Rao ....................................................................................................................................... 522

Effect of a Non-Ideal Inductor on the Performance of a Laboratory TCSC and Implementation of a Current Controller  
Ritty Raju and K. N. Shubhanga ............................................................................................................................ 528

Space Vector Model of a Five-phase Current Source Inverter  
S. Motnoddin, A. Iqbal ............................................................................................................................................ 534

Self-Configurable Intelligent Power Adapter to Suit Wide Range of Low Power Gadget/Appliances  
Rakesh Babu Panguloori, Priya Ranjan Mishra, M.S. Sachin Kumar, Girish Makarabbi and Sreenivasa Chary ... 540

Particle Swarm Optimization Based Optimal Power Flow Management of Power Grid with Renewable Energy Sources and Storage  
M. J. Laly, Elizabeth P Cherian, Abraham T. Mathew .......................................................................................... 544

Integration of Solar PV/BatteryHybrid System Using Dual Input DC-DC Converter  
Sivaprasad A, Kumaravel S, Ashok S. .................................................................................................................... 550

Stateflow based Incremental Conductance MPPT of a Photovoltaic System using Z – Source DC – DC Converter  
U. Shajith Ali, D.V. Veeraraghavulu, M. Niveditha, N. Priyadharshini, P. Sandhiya ........................................... 555

Utilization of Unified Power Quality Conditioner for Voltage Sag/Swell Mitigation in Microgrid  
M.T.L.Gayatri, Dr. Alivelu M. Parimi, A.V. Pavan Kumar .................................................................................... 561

Laboratory Implementation of Automatic Voltage Regulator  
Challapuram Vaswanth Reddy, Valluri Krishnakanth, Ramadugu Sanjay, Velaga Naga Vijay Krishna,  
R Jayabarathi .................................................................................................................................................. 567
An Optimal Solution for Combined Economic and Emission Dispatch problem using Artificial Bee Colony Algorithm
S. Bhongade, Sourabh Agarwal ................................................................. 573
PSO Based Controller Design For Fifth-Order Boost Converter
M. Veerachary, Kanav Rampal, Harman Preet Singh ............................... 580
Environmental Effects on Performance of Solar Photovoltaic Module
Anu Singla, Kanwardeep Singh, Vinod Kumar Yadav ............................. 585
Determination of Optimal Distributed Generation Size for Losses, Protection Co-Ordination and Reliability Evaluation Using ETAP
Ch.V.S.S. Sailaja, Dr. P.V.N. Prasad .......................................................... 591
Electric Stress Analysis of a 11kV RTV Silicone Rubber Coated Porcelain Insulator
P. Bala, R. Bose, S. Chatterjee .................................................................. 597
Performance Analysis of DVR, DSTATCOM and UPQC For Improving The Power Quality With Various Control Strategies
Mohammed Abdul Ahad Yahiya, Mohammed Abdul Rahman Uzair .......... 603
Levelized Electricity Cost of Two Grid Connected Biomass Power Plants
Sonali Singh Chundawat, K. V. S. Rao ...................................................... 607
Fabrication of Do It Yourself Solar Kit: Democratizing Solar Energy Applications
Abhay Kumar Pandey, Athul Raj, Nawal Singh, R. B. Gurav, Anand Arjun Ramgude, Manisha Nilkanth ........ 613
Cost Effective Design of Bidirectional Energy Management Topology
Aftab Alam, Ambuj Sharma, Nirbhar Neogi ............................................. 619
Multiple Output Forward DC-DC Converter with Regenerative Snubber for Space Application
Aravind Bhat, K. Uma Rao, Praveen P K, Bhoopendra Kumar Singh, Vinod Chippalkatti .................................................. 625
Multiple Output Forward DC-DC Converter with Mag-amp Post Regulators and Voltage Feedforward Control for Space Application
Aravind Bhat, K. Uma Rao, Praveen P K, Bhoopendra Kumar Singh ........ 630
Analysis of Voltage Flickers using Laboratory Test Set Up
Athul Raj, Datta S Chavan, Rishabh Katoch, Nawal Singh, Sanjeev Kumar Pandit, P. B. Karandikar .................. 636
Aberrant Analysis of Three Phase Induction Machine with Stator Interturn Faults on Windings
AVJS Praneeth, K. S. Sindhu, Nagendra Bhaskar, Kishore Naik Mude ....... 640
Implementation of Energy Conservation and Management Activities and its Economics in GRI Boy’s Hostel – A Case Study
Mr. S. Siva Sakthi Velan, Dr. V. Kirubakaran ........................................... 646
A Comparative Analysis of Single-phase Self-excited Induction Generator Variants under Resonating Condition
M. Faisal Khan, M. Rizwan Khan ............................................................ 656
Average Current Mode Controlled DC - DC Converter using Digital Controllers
 Krishna Gopinathan, Mamatha I ............................................................. 662
The Effect of Sampling Rates on the Performance of a Three Phase PWM Inverter and Choice of Appropriate Sampling Rates
Anusha K. V, A. Vijayakumari ................................................................. 668
Design and Development of a High Step-up DC-DC Converter for Non-Conventional Energy Applications
Ramji Tiwari, Saravanan S, Ramesh Babu N, Gaurav Kumar, Vivek Siwach ........................................ 673
Common Mode Voltage Reduction PWM Techniques for Four-Level Open End Winding Induction Motor Drive with Superior Quality of Output Voltage
M. Harsha Vardhan Reddy and T. Bramhananda Reddy, B. Ravindranath Reddy and M Suryakalavathi ........ 677
