# 2016 IEEE International Conference on Software Testing, Verification and Validation

**ICST 2016**

## Table of Contents

- **Message from the Chairs** ................................................................. ix
- **Conference Organization** ................................................................. xi
- **Sponsors** ....................................................................................... xv

### Session 1: Test Generation

- **A Controlled Experiment in Testing of Safety-Critical Embedded Software** ................................................................. 1  
  *Eduard P. Enoiu, Adnan Ćaušević, Daniel Sundmark, and Paul Pettersson*

- **Repeated Combinatorial Test Design — Unleashing the Potential in Multiple Testing Iterations** ................................................................. 12  
  *Itai Segall*

- **A Framework to Evaluate the Effectiveness of Different Load Testing Analysis Techniques** ................................................................. 22  
  *Ruoyu Gao, Zhen Ming (Jack) Jiang, Cornel Barna, and Marin Litoiu*

- **Automatically Discovering, Reporting and Reproducing Android Application Crashes** ................................................................. 33  
  *Kevin Moran, Mario Linares-Vásquez, Carlos Bernal-Cárdenas, Christopher Vendome, and Denys Poshyvanyk*

### Session 2: Constraint Solving and Search

- **Symbooglix: A Symbolic Execution Engine for Boogie Programs** ................................................................. 45  
  *Daniel Liew, Cristian Cadar, and Alastair F. Donaldson*

- **Nonconformity Resolving Recommendations for Product Line Configuration** ................................................................. 57  
  *Hong Lu, Tao Yue, Shaukat Ali, and Li Zhang*

- **Using Exploration Focused Techniques to Augment Search-Based Software Testing: An Experimental Evaluation** ................................................................. 69  
  *Bogdan Marculescu, Robert Feldt, and Richard Torkar*
Detecting Assumptions on Deterministic Implementations of Non-deterministic Specifications

August Shi, Alex Gyori, Owolabi Legunsen, and Darko Marinov

Session 3: Debugging

An Empirical Study on Detecting and Fixing Buffer Overflow Bugs

Tao Ye, Lingming Zhang, Linzhang Wang, and Xuandong Li

Automatic Detection and Removal of Conformance Faults in Feature Models

Paolo Arcaini, Angelo Gargantini, and Paolo Vavassori

Debugging without Testing

Wided Ghardallou, Nafi Diallo, Ali Mili, and Marcelo F. Frias

Properties of Effective Metrics for Coverage-Based Statistical Fault Localization

Shih-Feng Sun and Andy Podgurski

Session 4: Concurrency and Performance

Mysteries of DropBox: Property-Based Testing of a Distributed Synchronization Service

John Hughes, Benjamin C. Pierce, Thomas Arts, and Ulf Norell

Effective Partial Order Reduction in Model Checking Database Applications

Maryam Abdul Ghafoor, Muhammad Suleman Mahmood, and Junaid Haroon Siddiqui

Canopus: A Domain-Specific Language for Modeling Performance Testing

Maicon Bernardino, Avelino F. Zorzo, and Elder M. Rodrigues

Predicting Testability of Concurrent Programs

Tingting Yu, Wei Wen, Xue Han, and Jane Huffman Hayes

Session 5: Web Applications

Why do Record/Replay Tests of Web Applications Break?

Mouna Hammoudi, Gregg Rothermel, and Paolo Tonella

Using Visual Symptoms for Debugging Presentation Failures in Web Applications

Sonal Mahajan, Bailan Li, Pooyan Behnamghader, and William G. J. Halfond

Detecting and Localizing Internationalization Presentation Failures in Web Applications

Abdulmajeed Alameer, Sonal Mahajan, and William G. J. Halfond

Vahid Garousi and Kadir Herkiloğlu
Session 6: Test Analysis
Test Set Diameter: Quantifying the Diversity of Sets of Test Cases ..........................................................223
   Robert Feldt, Simon Poulding, David Clark, and Shin Yoo
Interpreting Coverage Information Using Direct and Indirect Coverage ...................................................234
   Chen Huo and James Clause
How Well are Your Requirements Tested? ........................................................................................................244
   Thomas Arts and John Hughes
Empirical Evaluation of Test Coverage for Functional Programs ............................................................255
   Yufeng Cheng, Meng Wang, Yingfei Xiong, Dan Hao, and Lu Zhang

Session 7: Regression Testing
Test Case Prioritization for Compilers: A Text-Vector Based Approach ..................................................266
   Junjie Chen, Yanwei Bai, Dan Hao, Yingfei Xiong, Hongyu Zhang, Lu Zhang, and Bing Xie
Tedsuto: A General Framework for Testing Dynamic Software Updates .....................................................278
   Luís Pina and Michael Hicks
Model-Based Regression Test Selection for Validating Runtime Adaptation of Software Systems ..................288
   Mohammed Al-Refai, Sudipto Ghosh, and Walter Cazzola

Session 8: Mutation
A Theoretical Framework for Understanding Mutation-Based Testing Methods ...........................................299
   Donghwan Shin and Doo-Hwan Bae
Generating Evil Test Strings for Regular Expressions ..................................................................................309
   Eric Larson and Anna Kirk
MuVM: Higher Order Mutation Analysis Virtual Machine for C .................................................................320
   Susumu Tokumoto, Hiroaki Yoshida, Kazunori Sakamoto, and Shinichi Honiden

Session 9: Unit Testing
Atrina: Inferring Unit Oracles from GUI Test Cases ....................................................................................330
   Shabnam Mirshokraie, Ali Mesbah, and Karthik Pattabiraman
Automatically Documenting Unit Test Cases ..............................................................................................341
   Boyang Li, Christopher Vendome, Mario Linares-Vásquez, Denys Poshvyvanyk, and Nicholas A. Kraft
Profiting from Unit Tests for Integration Testing ...........................................................................................353
   Dominik Holling, Andreas Hofbauer, Alexander Pretschner, and Matthias Gemmar
Coordinated Collaborative Testing of Shared Software Components ..........................................................364
   Teng Long, Ilchul Yoon, Adam Porter, Atif Memon, and Alan Sussman
Ph.D. Symposium

Testing Concurrent Software Systems .................................................................375
  Francesco A. Bianchi
Semantic-Based Test Case Generation ...............................................................377
  Mahboubeh Dadkhah
Making System User Interactive Tests Repeatable: When and What Should we Control? .................................................................379
  Zebao Gao
Verification Methodology for Fully Autonomous Heavy Vehicles ..................381
  Joakim Gustavsson
Automated Scenario-Based Testing of Distributed and Heterogeneous Systems .............................................................383
  Bruno Lima
Modeling App Behavior from Multiple Artifacts ..............................................385
  Emily Kowalczyk
Symbolic Characterisation of Commonalities in Testing Software Product Lines .................................................................387
  Sebastian Kunze
Self-Healing Cloud Applications ......................................................................389
  Rui Xin
Semantic Testing of Interactive Applications ..................................................391
  Daniele Zuddas

Testing Tool Papers

Skyfire: Model-Based Testing with Cucumber ..................................................393
  Nan Li, Anthony Escalona, and Tariq Kamal
Unit Test Generation During Software Development: EvoSuite Plugins for Maven, IntelliJ and Jenkins ..........................................................401
  Andrea Arcuri, José Campos, and Gordon Fraser
Large Scale Generation of Complex and Faulty PHP Test Cases ....................409
  Bertrand Stivalet and Elizabeth Fong
A Framework for Monkey GUI Testing ..........................................................416
  Thomas Wetzlmaier, Rudolf Ramler, and Werner Putschöggl

Author Index ......................................................................................................424
