CONTENTS

INVITED SPEAKERS

KEYNOTE SPEAKERS

Cloud Computing - State-of-the-Art and Future Research Trends
Eleni Karatza

Connecting Services to the Web of Data
John Domingue

What Do We Know and How Well Do We Know It? Current Knowledge about Software Engineering Practices
David Budgen

ENTERPRISE SOFTWARE TECHNOLOGIES

FULL PAPERS

Towards Outsource-ability Enabled BPMN
Mouna Rekik, Khouloud Boukadi and Hanene Ben-Abdallah 5

A Review of Detecting and Correcting Deviations on Software Processes
Manel Smatti, Mourad Oussalah and Mohamed Ahmed Nacer 15

Cloud Description Ontology for Service Discovery and Selection
Molka Rekik, Khouloud Boukadi and Hanêne Ben-abdallah 26

SHORT PAPERS

How does Oracle Database In-Memory Scale out?
Niloy Mukherjee, Kartik Kulkarni, Hui Jin, Jesse Kamp and Tirthankar Lahiri 39

ROCL: New Extensions to OCL for Useful Verification of Flexible Software Systems
Hanen Grichi, Olfa Mosbahi and Mohamed Khalgui 45

Design and Implementation of Multiple Fiber Online Monitoring of and Fault Automatic Detecting System
Wanchang Jiang, Liang Zhao and Shengda Wang

Towards a Unified Platform for Agent-based Cloud Robotics
Francisca Rosique, Pedro Sánchez, Diego Alonso and Juan Antonio López 59

QS Mapper: A Transparent Data Aggregator for the Quantified Self - Freedom from Particularity Using Two-way Mappings
Rasmus Rosenqvist Petersen, Adriana Lukas and Uffe Kock Wiil 65

Analyzing Taiwan Bridge Management System for Decision Making in Bridge Maintenance - A Big Data Approach
Nie-Jia Yau and Yu-Han Chuang 73

Semantic and Structural Performer Clustering in BPMN Models Transformed into Social Network Models
Wiem Khelif and Hanène Ben-abdallah 79
How Trajectory Data Modeling Improves Decision Making?
*Noura Azaiez and Jalel Akaichi*

Formalization of Secure Service Oriented Product Line
*Ines Achour, Lamia Labed and Henda Ben Ghezala*

**SOFTWARE PROJECT MANAGEMENT**

**FULL PAPER**

Defining and Evaluating Software Project Success Indicators - A GQM-based Case Study
*Luigi Lavazza, Enrico Frumento and Riccardo Mazza*

**SHORT PAPERS**

Using Property Rights Theory to Overcome Success Barriers to Software Development Project: Protection of Contractors’ Knowledge
*Cornelia Gaebert*

Who Are the Rational Actors in Software Development Projects?
*Cornelia Gaebert and Jörg Friedrich*

Establishing Construction Scheduling Progress Curve based on Buidling Information Modeling Quantity Takeoffs
*Kun-Chi Wang, Wei-Hao Wu, Pei-Yuan Hsu, Abdoul-Aziz Gansonre, Wei-Chih Wang and Cheng-Ju Kung*

Optimizing Construction Sequences for Secant Pile Walls
*Rong-Yau Huang, Ping-Fu Chen and Jieh-Haur Chen*

Critical Success Factors and Barriers for Lightweight Software Process Improvement in Agile Development - A Literature Review
*Elia Kouzari, Vassilis C. Gerogiannis, Ioannis Stamelos and George Kakarontzas*

A Framework to Evaluate Software Developer’s Productivity - The VALORTIA Project

Understanding Approval Rating of Agile Project Management Tools using Twitter
*Martina Matta and Michele Marchesi*

Certification and Legislation - An Italian Experience of Fiscal Software Certification
*Isabella Biscoglio, Giuseppe Lami, Eda Marchetti and Gianluca Trentanni*

**SOFTWARE ENGINEERING METHODS AND TECHNIQUES**

**FULL PAPERS**

Multi-dimensional Goal Refinement in Goal-Oriented Requirements Engineering
*Wataru Inoue, Shinpei Hayashi, Haruhiko Kaiya and Motoshi Saeki*

Design for Excellence in the Context of Very Large-Scale Requirements Engineering
*Sanja Aaramaa, Samuli Sankkonen, Jarkko Hyysalo, Jouni Similä, Pasi Kuvaja and Markku Oivo*

Integrating and Applying Architectural Design Patterns in Space Flight Software Product Lines
*Julie Street Faut, Hassan Gomaa and Robert G. Pettit***
A Method for Model Checking Feature Interactions
*Thomas Pedersen, Thibaut Le Guilly, Anders P. Ravn and Arne Skou*

An Approach for the Semi-automated Derivation of UML Interaction Models from Scenario-based Runtime Tests
*Thorsten Haendler, Stefan Sobernig and Mark Strembeck*

An Approach for Automated Scenario-based Testing of Distributed and Heterogeneous Systems
*Bruno Lima and João Pascoal Faria*

**SHORT PAPERS**

Reactivity and Social Cooperation in a Multi-Robot System
*Atef Gharbi, Nadhir Ben Halima and Hamza Gharrellaoui*

Reverse Engineering an IPhone Applications using Dynamic Analysis
*Philippe Dugerdil and Roland Sako*

Business Modeling of a Measurement-based Context: A Methodological Process
*Giulio D’Emilia, Gaetanino Paolone, Emanuela Natalé, Antonella Gaspari and Denis Del Villano*

Automatic Generation of Test Data for XML Schema-based Testing of Web Services
*Dessislava Petrova-Antonova, Kanka Kancheva and Sylvia Ilieva*

Towards Knowledge-intensive Software Engineering
*Samuel R. Cauvin, Derek Sleeman and Wamberto W. Vasconcelos*

A Visualization Tool for Scenario-based Software Development
*Eiji Shiota and Atsushi Ohnishi*

Change Effort Estimation based on UML Diagrams Application in UCP and COCOMOII
*Dhikra Kchaou, Nadia Bouassida and Hanene Ben-Abdallah*

A Domain Specific Platform for Engineering Well Founded Measurement Applications
*Florent Bourgeois, Philippe Studer, Bernard Thirion and Jean-Marc Perronne*

A Path-based Equivalence Checking Method for Petri Net based Models of Programs
*Soumyadip Bandyopadhyay, Dipankar Sarkar, Kunal Banerjee and Chittaranjan Mandal*

New Schedulability Analysis for Real-Time Systems based on MDE and Petri Nets Model at Early Design Stages
*Mohamed Naija, Samir Ben Ahmed and Jean-Michel Bruel*

Extending Causal Semantics of UML2.0 Sequence Diagram for Distributed Systems
*Fatima Dhaou, Ines Mouakher, Christian Attigbé and Khaled Bsaies*

Analysing the Reliability of Open Source Software Projects
*Lerina Aversano and Maria Tortorella*

Modeling Traceability for Heterogeneous Systems
*Nasser Mustafa and Yvan Labiche*

Extracting Knowledge for Searching for and Identifying Hazards on Construction Site
*Ren-Jye Dzeng and Yi-Cho Fang*

GR-TNCES: New Extensions of R-TNCES for Modelling and Verification of Flexible Systems under Energy and Memory Constraints
*Oussama Khlifi, Olfa Mosbahi, Mohamed Khalgui and Georg Frey*
Towards More Relational Feature Models
Arnaud Gotlieb, Dusica Marijan and Sagar Sen

Using Aspect-Oriented Approach for Software Product Line Development
Lei Tan and Yuqing Lin

Towards Gamification in Software Traceability: Between Test and Code Artifacts
Reza Meimandi Parizi, Asem Kasem and Azween Abdullah

Designing and Describing QVTo Model Transformations
Ulyana Tikhonova and Tim Willemse

Using GDT4MAS as a Formal Support for Engineering Multi-Agents Systems
Bruno Mermet and Gaëlle Simon

Design of Adaptive Domain-Specific Modeling Languages for Model-Driven Mobile Application Development
Xiaoping Jia and Christopher Jones

Usability Evaluation Methods for Spatial Information Visualisation - Case Study: Evaluation of Tourist Maps
Pavel Sedlák, Jitka Komárková, Miloslav Hub, Stanislav Straška and Miroslav Pásler

Opportunistic Software Composition: Benefits and Requirements
Charles Triboulot, Sylvie Trouilhet, Jean-Paul Arcangeli and Fabrice Robert

A UML KPI Profile for Energy Aware Design and Monitoring of Cloud Services
Christophe Ponsard and Jean-Christophe Deprez

DISTRIBUTED AND MOBILE SOFTWARE SYSTEMS

SHORT PAPERS

Parallel Applications and On-chip Traffic Distributions: Observation, Implication and Modelling
Thomas Canhao Xu, Jonne Pohjankukka, Paavo Nevalainen, Ville Leppänen and Tapio Pahikkala

A Proposal of Web Data Mining Application for Mapping Crime Areas in the Czech Republic
Martin Lněnìčka, Jan Hovad, Jitka Komárková and Miroslav Pásler

Iterative Mapreduce MPI Oil Reservoir Simulator
Madina Mansurova, Darkhan Akhmed-Zaki, Adai Shomanov, Bazargul Makterim and Ermek Alimzhanov

Spatio-Temporal Normalization of Data from Heterogeneous Sensors
Alessio Fanelli, Daniela Micucci, Marco Mobilio and Francesco Tisato

Wise Objects for Calm Technology
Ilham Alloui, David Esale and Flavien Vernier

AUTHOR INDEX
2015 10th International Joint Conference on Software Technologies (ICSOFT 2015)

Colmar, Alsace, France
20-22 July 2015

Volume 2
Pages 1-175
CONTENTS

INVITED SPEAKERS

KEYNOTE SPEAKERS

Cloud Computing - State-of-the-Art and Future Research Trends
Eleni Karatza

Connecting Services to the Web of Data
John Domingue

What Do We Know and How Well Do We Know It? Current Knowledge about Software Engineering Practices
David Budgen

MODELS

FULL PAPERS

SuperMod — A Model-Driven Tool that Combines Version Control and Software Product Line Engineering
Felix Schwägerl, Thomas Buchmann and Bernhard Westfechtel

Semantic Version Management based on Formal Certification
Jean-Yves Vion-Dury and Nikolaos Lagos

Java–Meets Eclipse - An IDE for Teaching Java Following the Object-later Approach
Lorenzo Bettini and Pierluigi Crescenzi

Systematic Identification of Information Flows from Requirements to Support Privacy Impact Assessments
Rene Meis and Maritta Heisel

Model Checking to Improve Precision of Design Pattern Instances Identification in OO Systems
Mario L. Bernardi, Marta Cimitile, Giuseppe De Ruvò, Giuseppe A. Di Lucca and Antonella Santone

Transformation from R-UML to R-TNCES: New Formal Solution for Verification of Flexible Control Systems
Mohamed Ouassama Ben Salem, Olfa Mosbah, Mohamed Khalgui and Georg Frey

SHORT PAPERS

A Tool for Management of Knowledge Dispersed throughout Multiple References
Carlos Saéz-Adán, Francisco J. García-Izquierdo, Ángel Luis Rubio, Eduardo Sáenz-de-Cabezón Irigaray, Emilio Rodríguez-Priego and Oscar Díaz

A Pi-calculus-based Approach for the Verification of UML2 Sequence Diagrams
Aissam Belghiat and Allaoua Chaoui

On A-posteriori Integration of Ecore Models and Hand-written Java Code
Thomas Buchmann and Felix Schwägerl

DBMS for Business Systems
Evgeniy Grigoriev
Linear Software Models: Equivalence of Modularity Matrix to Its Modularity Lattice
Iaakov Exman and Daniel Speicher

ASPECTS

SHORT PAPER

OCL for Rich Domain Models Implementation - An Incremental Aspect based Solution
Alberto-Manuel Fernández-Álvarez, Daniel Fernández-Lanvin and Manuel Quintela-Pumares

SERVICES

SHORT PAPERS

Novel Approach for Computing Skyline Services with Fuzzy Consistent Model for QoS- based Service Composition
Fatma Rhimi, Saloua Ben Yahia and Ben Ahmed Samir

An Approach for Integrating Kerberized non Web-based Services with Web-based Identity Federations
Aleksandr Bersenev, Arsen Hayrapetyan, Marcus Hardt and Michael Simon

A Service-oriented Architecture for GIS Applications
Atif Naseer, Hossam I. Aldoobi and Basem Y. Alkazemi

CONTEXT

SHORT PAPERS

Progress Report on a Proposed Theory for Software Development
Diana Kirk and Stephen MacDonell

A Model Driven Approach for Improving the Generation of Accessible User Interfaces
Lamia Zouhaier, Yousra Bendaly Hlaoui and Leila Jenni Ben Ayed

AUTHOR INDEX
