Tungsten, Refractory & Hardmaterials IX

Contents

Part 1 - Powder Production

Part 2 - Hardmaterials Processing

Part 3 - Hardmaterial Mechanical/Physical Behavior

Part 4 - Tungsten & Doped Tungsten

Part 5 - Tungsten Heavy Alloys

Part 6 - Tungsten-Copper

Part 7 - Molybdenum Alloys & Composites

Part 8 - Refractory Metals

Part 9 - Coatings

Subject Index

Author Index
Part 1 - Powder Production

Optimizing the Synthesis of Nanostructured Tungsten Carbide Powders by Effective Combination of Carbon Sources and Atmospheres
Raquel de Oro Calderon, Eduard Hryha, Raffaele Gilardi, Lars Nyborg and Luigi Alzati

Effective Synthesis of Nanocrystalline Tungsten Carbide Powders by Mechanical and Thermal Activation of Precursors
Raquel de Oro Calderon, Eduard Hryha, Lars Nyborg, Raffaele Gilardi and Luigi Alzati

Ravi K. Enneti

The Role of Carbon Source in the Production of WC Powders
Raffaele Gilardi, Luigi Alzati, Raquel De Oro Calderón, Eduard Hryha and Lars Nyborg

Optimized Tungsten Carbide Powder for Welding and Energy Applications
Colin G. McCracken, Joel R. Kelch, Ken R. Muir and Christian Gerk

Particle Characterization, Rheology and Pressing Behavior of Zinc Recycled and Un-Recycled WC-6wt.%Co Powders
Christopher S. Freemantle and Natasha Sacks

A Microstructural Study of Zinc-treated WC-Co
Oladapo O. Eso

A Novel Method to Make High Purity Potassium Fluorotantalate (K2TaF7) and Tantalum Pentoxide (Ta2O5)
Raj P. Singh Gaur
Part 2 - Hardmaterials Processing

Cemented Carbides: Review of Alternate Binder Systems
Rajendra Sadangi and Animesh Bose, FAPMI .................................................................91

Properties and Applications of WC Hardmetals with Iron Based Binders
Leo Prakash.........................................................................................................................113

Investigations into Co-Cu Binder System in WC Based Hardmetals
Manfred Wolf, Armin Helldoerfer, Guenter Roder, Chuck McNerny and
Pankaj K. Mehrotra...........................................................................................................126

Kinetics of Acute Effect of Water as Solvent on Tungsten Carbide Cobalt (WC-Co) Milling and Delay Study on Hydrolysis
Sivaraman Gopal Rao, Rukhsar Alam, Sudarshana Shetty and
J. Guruprasath..................................................................................................................133

Effects of Macro-Contamination on Ready to Press WC-Co Grade Powder
Thomas Jewett and Timothy Bard....................................................................................141

Different Effects of Cr₂C₂ and VC on Sintering Behavior of WC-Co Materials
Hongtao Wang, Tim Webb and Jonathan W. Bitler.........................................................153

Cemented Carbides with Functional Surface Layers Obtained by Tailored Sintering Techniques
Igor Konyashin, Bernd Ries and Sebastian Hlawatschek .............................................162

Influence of the Electrical Current on the Densification Behavior of Ultrafine WC-6Co Cemented Carbide during Field Assisted Sintering
Maria Zivcic and Christoph Broeckmann.....................................................................177

Spark Plasma Sintering of Near-Nano WC Composites; Microstructure and Properties
Jack Stiglich, Andrew J. Sherman and Mark Grogan.......................................................186

Effect of the Cr Content on the Sintering Behaviour of TiCN-WC-Ni-Cr3C2 Powder Mixtures
I. Iparraguirre, N. Rodriguez, F. Ibarreta, R. Martinez, and J.M. Sanchez.......................196
Part 3 - Hardmaterial Mechanical/Physical Behavior

Consideration on Mechanical Properties of 100 nm-Grained WC-Co Hardmetal
Masaru Kawakami, Kozo Kitamura and Osamu Terada.................................204

Effect of Interfacial Characteristics on Mechanical Properties of Nanocrystalline Cemented Carbides
Xiaoyan Song, Yang Gao, Haibin Wang, Xilong Wang and Xuemei Liu...............215

The Use of Niobium Carbide (Nbc) for Wear Resistant Tribosystems and the Tribological Backgrounds as Cutting Tools
Mathias Woydt and Hardy Mohrbacher..........................................................222

Tailoring the Mechanical Properties of Prealloyed Diamond Impregnated Bonds by Different Strategies
Inigo Iturriza, Carmen Luno-Bilbao and Ane Miren Mancisidor......................233

Residual Stress and Damage in Coated Hard Metal Milling Inserts
Tamara Teppernegg, Thomas Klünsner, Christian Tritremmel, Paul Angerer, Christoph Czettl, Jozef Keckes, Reinhold Ebner and Reinhard Pippan.................................245

Fracture and Fatigue Behavior of Cemented Carbides: 3-D Fib Tomography of Crack-Microstructure Interactions
Luis Llanes, Jose M. Tarrago, Emilio Jimenez-Piqué, Miquel Turon, Lorenzo Rivero, Ihsan Al-Dawery and Ludwig Schneider.................................254

Nanoindentation and HRTEM Studies on Binder Phase of WC-Co Alloy with Different States of Post-Sintering Treatment
Zhang Li, Tao Xu, Ling Zhang, Zhe Wang, Rong-xian Ke and Qing-lei Wan........267

Micro Beam Testing: A New Method for the Mechanical Characterization WC-Co Hardmetals
Jose M. Sanchez, Maria Trueba, Nieves Rodriguez, Izaskun Iparraguirre, M. Reyes Elizalde, Ibon Ocaña, and Jose M. Martinez Esnaola.................................279

Tribological Characteristics of Sintered Tungsten Cermet Composites
Peter A. Olubambi, Kenneth Kanayo Alaneme and Anthony Andrews...........287
Part 4 - Tungsten & Doped Tungsten

Refractory Metals Revolutionizing the Lighting Technology: A Historical Review
Hugo M. Ortner and Peter Schade.................................................................298

Ultra High Purity Tungsten and Its Applications
Yang Yu, Feng Bai, Ailong Zheng, Jiupeng Song and Fusheng Peng................313

Effect of Green Density on Sintering of Nano W
Xu Wang, Zak Z. Fang and Lin Gu.................................................................321

The Effects of High-Energy Ball-Milling Activation on the Densification Behavior of Ultrafine Tungsten Powder
Yong Han, Jinglian Fan, Tao Liu, Huichao Cheng and Jiamin Tian..................326

The Properties and Applications of Tungsten Prepared via Chemical Vapor Deposition
Lyu Yanwei, Liu Junyong, Yan Binyou, Yu Yang, Zhuang Zhigang and Song Jiupeng.................................................................345

Metal Injection Molding of Tungsten Cathodes for Ion Implanter with Ultrafine Powders
Jiupeng Song, Mingliang Ouyang, Wei Wang, Yang Yu, Daoxing Ye, Yanwei Lv, Binyou Yan and Zhigang Zhuang.................................351

Tungsten-Based Functional Composites for Medical Radiation Protection
Guozhang Zhao, Yang Yu, Fusheng Peng, Jiupeng Song, Wei Xu and Zhigang Zhuang.................................................................358
### Part 5 - Tungsten Heavy Alloys

Part 6 - Tungsten-Copper

**Formation and Growth of Columnar-Shape W-Cu Oxide Particle**
Tao Liu, Jinglian Fan and Yaofeng Guo.................................................................419

**Densification and Microstructure of Nanocrystalline W-(25/30)Cu Powders**
Jinglian Fan, Yaofeng Guo, Tao Liu and Song Zhu.............................................426

**Effect of Transition Metal Additions on Densification and Grain Growth of W-Cu, Mo-Cu, and WC-Cu**
John L. Johnson.......................................................................................................431

**Influence of the Homogeneity of WCag and WCu Contact Material Microstructure Under High Energy Impact**
Claudia Kowanda, Frank E.H. Mueller and Sabine Böning.................................447

**Microstructural Characterization of W/Cu Functionally Graded Materials Produced by Spark Plasma Sintering for Plasma Facing Components**
Emmanuel Autissier, Frederic Bernard, Marianne Richou, Ludivine Minier and Foad Naimi.................................................................461

**High Temperature Compression Behavior of Tungsten-Copper (W-Cu) Alloys**
Dongguo Lin, Seong Jin Park and Young Sam Kwon.............................................470

**First Principles Calculation of W-Cu Bulk and Interface Structure**
Haoran Gong, Chaoping Liang and Jinglian Fan..................................................476
Development and Testing of Novel Advanced Materials with Very High Thermal Shock Resistance
Alessandro Bertarelli, Federico Carra, Nicola Mariani, Brevetti Bizz and Stefano Bizzaro

The Effect of Lanthana Content on the Mechanical Properties and Formability of ODS Mo Alloys
Maria B. Winnicka

FEM Analysis of the Creep Deformation of Molybdenum and TZM Components in High-Temperature Furnaces
Bernhard Valentini, Christoph Leuprecht, Arno Plankensteiner and Lorenz S. Sigl

Molybdenum-Rhenium Implantable Medical Devices
Todd Leonhardt and Udayan Patel
Part 8 - Refractory Metals

Low-Cost, High-Performance Refractory Metal Alloys for Rocket Engines
Arthur J. Fortini........................................................................................................537

Development of Nozzle Throat Based on W-25wt%Re Using Powder Injection Molding
Dong Yong Park, Yong Jun Oh, Seong Taek Im, Seong Jin Park and Young Sam, Kwon00........................................................................................................544

Rapid, Near Net-Shape Melt Infiltration Processing of Refractory Matrix Composites
Tim Stewart, Jerry Brockmeyer and Brian Williams.................................................551

Experimental Observation of Texture Heterogeneity in Tantalum during Complex Strain Paths
Abhishek Bhattacharyya, Patrick Hogan, Thomas Hoekman and Marc Abouaf........................................................................................................561

Diminishing Manufacturing Sources and Material Sources Case Study – Uses of Refractory Materials in DoD Applications and the need to Increase Communications Between End Users and Material Suppliers
K. Bryan Mitsdarffer................................................................................................568
Tungsten Coatings for Improved Electrical Breakdown Resistance
J. Scott O'Dell, Timothy N. McKechnie and Stephen J. Wukitch.........................573

Cold Sprayed Refractory Metals for Chrome Reduction in Gun Barrel Liners
Blake Barnett, Matthew Trexler and Victor Champagne.................................582

Fabrication of Nanostructured WC-Co Coating with Low Decarburization
Haibin Wang, Xiaoyan Song, Xuemei Liu, Deqiang You,
Xingwei Liu and Yang Gao.................................................................................593

Mechanisms of Fracture Toughness Enhancement in Ultrafine-Structured WC-Co Coating
Haibin Wang, Xiaoyan Song, Yang Gao, Xingwei Liu
and Deqiang You................................................................................................601

Corrosion Properties of Altin, Alcrn and Alcrsiwn Coatings in 3.5 Wt.% Nacl Solution
Li Zhang, Yu-ping Feng, Rong-xian Ke, Qing-lei Wan, Zhe Wang
and Zhi-hong Lu..................................................................................................610
