### IWPE: Second International Workshop on Privacy Engineering

DataTags, Data Handling Policy Spaces and the Tags Language               1  
*Michael Bar-Sinai, Latanya Sweeney, and Mercè Crosas*

Compliance Monitoring of Third-Party Applications in Online Social Networks 9  
*Florian Kelbert and Alexander Fromm*

Privacy Risk Analysis Based on System Control Structures: Adapting  
System-Theoretic Process Analysis for Privacy Engineering                17  
*Stuart S. Shapiro*

*Kaniz Fatema, Christophe Debruyne, Dave Lewis, Declan O’Sullivan, John P. Morrison, and Abdullah-Al Mazed*

A Critical Analysis of Privacy Design Strategies                           33  
*Michael Colesky, Jaap-Henk Hoepman, and Christiaan Hillen*
Oblivious Mechanisms in Differential Privacy: Experiments, Conjectures, and Open Questions ..........................................................41
   Chien-Lun Chen, Ranjan Pal, and Leana Golubchik

Obstacles to Transparency in Privacy Engineering .................................................49
   Kiel Brennan-Marquez and Daniel Susser

From Privacy Impact Assessment to Social Impact Assessment ...........................53
   Lilian Edwards, Derek McAuley, and Laurence Diver

Privacy Harm Analysis: A Case Study on Smart Grids ........................................58
   Sourya Joyee De and Daniel Le Métayer

Improving Performance and Usability in Mobile Keystroke Dynamic Biometric Authentication ........................................................................66
   Faisal Alshanketi, Issa Traore, and Ahmed Awad Ahmed

Detection of Mobile Malware: An Artificial Immunity Approach ..........................74
   James Brown, Mohd Anwar, and Gerry Dozier

Polymorphic Malware Detection Using Sequence Classification Methods ..........81
   Jake Drew, Tyler Moore, and Michael Hahsler

LINEBACKER: LINE-Speed Bio-Inspired Analysis and Characterization for Event Recognition ........................................................................88
   Christopher S. Oehmen, Paul J. Bruillard, Brett D. Matzke, Aaron R. Phillips,
   Keith T. Star, Jeffrey L. Jensen, Doug Nordwall, Seth Thompson,
   and Elena S. Peterson

MIGRATE: Towards a Lightweight Moving-Target Defense Against Cloud Side-Channels ................................................................................96
   Mohamed Azab and Mohamed Eltoweissy

Ecology-Based DoS Attack in Cognitive Radio Networks ....................................104
   Shin-Ming Cheng and Pin-Yu Chen

Hunting Bugs with Lévy Flight Foraging ..............................................................111
   Konstantin Böttinger

A Biosequence-Based Approach to Software Characterization ..........................118
   Christopher S. Oehmen, Elena S. Peterson, Aaron R. Phillips, and Darren S. Curtis

LangSec: Third Workshop on Language Theoretic Security
Papers

Caradoc: A Pragmatic Approach to PDF Parsing and Validation ................................................................. 126
Guillaume Endignoux, Olivier Levillain, and Jean-Yves Migeon

In Search of Shotgun Parsers in Android Applications ............................................................................. 140
Katherine Underwood and Michael E. Locasto

An Incremental Learner for Language-Based Anomaly Detection in XML .............................................. 156
Harald Lampesberger

Grammatical Inference and Machine Learning Approaches to Post-Hoc LangSec .............................................. 171
Sheridan S. Curley and Richard E. Harang

Research Reports and Work-in-Progress Reports

A Posteriori Taint-Tracking for Demonstrating Non-interference in Expressive Low-Level Languages .......................................................................................................................... 179
Peter Aldous and Matthew Might

Research Report: Analysis of Software for Restricted Computational Environment Applicability .......................................................................................................................... 185
Jacob I. Torrey and Jonathan Miodownik

Research Report: Mitigating LangSec Problems with Capabilities .......................................................... 189
Nathaniel Wesley Filardo

Declarative Verifiable SDI Specifications .................................................................................................. 198
Rick McGeer

MoST: Mobile Security Technologies

Session 1: Studies

Target Fragmentation in Android Apps ........................................................................................................ 204
Patrick Mutchler, Yeganeh Safaei, Adam Doupé, and John Mitchell

Perceptions of Risk in Mobile Transaction .................................................................................................. 214
Shari Trewin, Cal Swart, Larry Koved, and Kapil Singh

A Study of Grayware on Google Play ........................................................................................................ 224
Benjamin Andow, Adwait Nadkarni, Blake Bassett, William Enck, and Tao Xie

Session 2: Attacks

Browser History Stealing with Captive Wi-Fi Portals .................................................................................. 234
Adrian Dabrowski, Georg Merzdovnik, Nikolaus Kommenda, and Edgar Weippl
Sensor-Based Mobile Web Fingerprinting and Cross-Site Input Inference
Chuan Yue .................................................................241

Is Anybody Home? Inferring Activity From Smart Home Network Traffic .................................................245
Bogdan Copos, Karl Levitt, Matt Bishop, and Jeff Rowe

Session 3: Defenses

DroidScribe: Classifying Android Malware Based on Runtime Behavior .................................................................252
Santanu Kumar Dash, Guillermo Suarez-Tangil, Salahuddin Khan, Kimberly Tam, Mansour Ahmadi, Johannes Kinder, and Lorenzo Cavallaro

Analysis of Code Heterogeneity for High-Precision Classification of Repackaged Malware ..........................................................262
Ke Tian, Danfeng (Daphne) Yao, Barbara G. Ryder, and Gang Tan

At Your Fingertips: Considering Finger Distinctness in Continuous Touch-Based Authentication for Mobile Devices ..................................................................................272
Zaire Ali, Jamie Payton, and Vincent Sritapan

Hold and Sign: A Novel Behavioral Biometrics for Smartphone User Authentication .................................................................276
Attaullah Buriro, Bruno Crispo, Filippo Delfrari, and Konrad Wrona

WRIT: Workshop on Research for Insider Threat

Validating an Insider Threat Detection System: A Real Scenario Perspective .................................................................286
Ioannis Agrafiotis, Arnau Erola, Jassim Happa, Michael Goldsmith, and Sadie Creese

PRI: Privacy Preserving Inspection of Encrypted Network Traffic .................................................................................296
Liron Schiff and Stefan Schmid

Investigating Airplane Safety and Security Against Insider Threats Using Logical Modeling .............................................................................304
Florian Kammüller and Manfred Kerber

A Model-Based Approach to Predicting the Performance of Insider Threat Detection Systems .................................................................314
Shannon C. Roberts, John T. Holodnak, Trang Nguyen, Sophia Yuditskaya, Maja Milosavljevic, and William W. Streilein

A Hybrid Framework for Data Loss Prevention and Detection .................................................................................324
Elisa Costante, Davide Fauri, Sandro Etalle, Jerry Den Hartog, and Nicola Zannoni

Activity Pattern Discovery from Network Captures .................................................................................334
Alan C. Lin and Gilbert L. Peterson

Author Index ............................................................................................................................................343
