# TABLE OF CONTENTS

## VOLUME 1

10 Fluid Mechanics of Cricket Ball Swing ................................................................. 1
    Rabindra Mehta

11 Nanoscale Instrumentation for Measuring Turbulence ........................................ 9
    Alexander Smits, M. Hultmark

12 Flow and Turbulent Processes in the Coastal Ocean ........................................... 16
    Gregory Ivey

13 Turbulent Cavitating Vortical Structures and their Impact on the Performance of Turbomachines .......................................................... 21
    L. Misuri, Joseph Katz

14 Nature Inspired Solutions of Energy Efficiency - the Past, the Current and the Future .......................................................... 23
    Yuying Yan

15 Advances in Probability Density Function Methods for Turbulent Reactive Flows .......................................................... 27
    Stephen Pope, R. Tirunagari

16 Can Combustion Models be Developed from DNS Data? ..................................... 34
    Heinz Pitsch, P. Trisperm

17 Plasma Diagnostics of a DC Glow Discharge using Tuneable Diode Laser Absorption Spectroscopy .......................................................... 42
    Ronnak Manoharan, Philip Varughese, Sean O’Brien

18 Wave Refraction on Southern Ocean Eddies ....................................................... 46
    Henrique Rapito, Alexander Babanin, Odin Gramstad, Malek Ghanous

19 Unsteady Natural Convection Heat Transfer in a Baffled Triangular Enclosure .......................................................... 50
    Suvash Saha, Yuan Tong Gi

20 Effect of Wing Flexibility on Dragonfly Hover Flight ....................................... 54
    Vinhal Naidu, John Young, Joseph Lai

21 Thermodynamic Analysis of the Energy Separation in a Counter-flow Vortex Tube .......................................................... 58
    Yunpeng Xue, Maziar Arjomandi

22 The Formation of Kelvin-Helmoltz Instabilities on Swirling Axisymmetric Vortex Rings .......................................................... 62
    Christopher Gargan-Shingles, Murray Rudman, Kris Ryan

23 On the Influence of a Wire Placed Upstream of a Rotating Cylinder: Three-dimensional Effects .......................................................... 66
    Aniruddha Rao, Alexander Rudi, Jivan Leontini, Mark Thompson, John Sheridan, Kerry Hourigan

24 Amplifier Design for New CNT Radiation Gauges in Expansion Tunnels ............... 70
    Hadas Porat, Barry Allson, Richard Morgan, S. Srinath, K. P. J. Reddy, Tim McIntyre

25 Experimental Analysis of a Linear Expansion-Deflection Nozzle at Highly Overexpanded Conditions .......................................................... 74
    Kyl Schomberg, John Olsen, Andrew Neely, Graham Doig

26 Evaluating the Shadow Position Mixing Model for Transformed PDF Modelling of Non-Premixed Flames .......................................................... 78
    Joshua Tang, Austin Kong, Evatt Hawkes, Stephen Pope, Jacqueline Chen

27 Biofuel Production from Algae Utilizing Wastewater ........................................... 82
    Saleh Mohin, Firoz Alam

28 Secondary Atomization Characteristics of Biofuels with Different Physical Properties .......................................................... 89
    Phuong Pham, Agisilaos Kourtzamitzis, Aseeda Masri

29 Aerodynamic Efficiency and Thermal Comfort of Road Racing Bicycle Helmets .......................................................... 93
    Israt Mustury, Harun Chowdhury, Bavin Loganathan, M. Alharthi, Firoz Alam

30 A Direct Numerical Simulation Investigation of Ignition at Diesel Relevant Conditions .......................................................... 97
    Alexander Krisman, Evatt Hawkes, Mohsen Talee, Ankli Bhagatwala, Jacqueline Chen

31 Flow-Induced Noise from a Sharp-Edged Flat Plate Using a Quasi-Periodic CFD-BEM Technique .......................................................... 101
    Mahmood Karimi, Paul Croaker, Nicole Kessisoglou, Con Donnan, Steffen Marburg

32 Progress in Numerical Modelling of Packed Bed Biomass Combustion .................. 105
    Md. Rezwanul Karim, Jamal Naser

33 Effect of Recycled Ratio on Heat Transfer Performance of Coal Combustion in a 0.5 MWt Combustion Test Facility .......................................................... 109
    Arafat Ahmed Bhuiyan, Jamal Naser

34 Separation of Yawed Turbulent Flows over a Forward-Facing Ramp .................... 113
    Delia Fang Xie, Hugh Blackburn, John Sheridan

35 An Experimental Model of Wave-Induced Motions of an Ice Floe ....................... 117
    Michael Meylan, Alessandro Trofli, Luke Bennett, Claudio Cavaliere, Alberto Alberello, Alexander Babanin

36 The Effects of Tuberces on Scept Wing Performance at Low Angles of Attack ............ 121
    Michael Donald Bolzson, Richard Kelso, Maziar Arjomandi

37 Aerodynamic Behaviour of Small Savonius Turbine with 3 Different Configurations .......................................................... 125
    Bavin Loganathan, Israt Mustury, Harun Chowdhury, Firoz Alam

38 Fouling of Waste Heat Recovery: Numerical and Experimental Results .................. 129
    Emilie Saret, Iman Abdi, Kamel Hooman

39 Optimising Camera Arrangement for Stereoscopic Particle Image Velocimetry ............ 133
    Soon-Kong Lee, Matteo Giacobello, Peter Manovski, Chetan Kumar

40 Modelling Melting Ice using the Smooth Dissipative Particle Dynamics Method ............ 137
    Danielle Tan
41 Subgrid CFD Film-Drainage Modelling: Application to Buoyancy-Driven Droplet-Wall Collisions in Emulsions .......................... 141
   Lachlan Mason, Geoffrey Stevens, Dalton Harris

42 Flow Interactions between Two Inline Cyclists ................................................................. 145
   Nathan Barry, David Burton, John Sheridan, Nicholas Brown

43 Numerical Investigation into Wave Transformation around King Island ......................................................... 149
   Jake Shayer, Tuing Jin, Shuhong Chai, Jessica Walker

44 Topology of Flow around a Conventional Submarine Hull ......................................................... 153
   Soon-Kong Lee

45 Simulation of Respiratory Flows ............................................................................................. 157

46 Numerical Analysis of Building Shadow Effect on Buoyant Flows in Urban Street Canyons ......................... 161
   Zijing Tan, Jingliang Dong, Yimin Xiao, Jiysun Yu

47 Study of a Savonius Type Wind Turbines for its Aerodynamic Characteristics ................................. 165
   Barin Loganathan, Irsat Mustary, Harun Chowdhury, Firoz Alam

48 Modelling Water Wave and Tethered Structure Interactions using 3D Smoothed Particle Hydrodynamics .... 168
   David Gunn, Murray Budman, Raymond Cohen

49 The Effects of Surface Wettability on Droplet Fingering .......................................................... 172
   Cameron Stanley, Robert Jackson, Nitin Karwa, Gary Rosengarten

50 An Effective Laboratory Method for Thermal Fluid Mechanics Course ....................................... 176
   Firoz Alam, Harun Chowdhury, Bavin Loganathan, Saleh Mobin, A. Kootsookos, J. Tu, N. Islam

51 Laboratory Scaling of the Free-Decay of an Oscillating Vertical-Axis Underwater Cylinder ...................... 180
   Liviu Paticiu, Richard Mannasseh

52 Coherent Structures in a Three-dimensional Chaotic Potential Flow .............................................. 184
   Lachlan Mason, Murray Budman, Daniel Lester, Guy Metcalfe

53 Validation of a Microbubble Seeding Generator for Particle Image Velocimetry Applications ............. 188
   Gustavo A. Zarruk, Alan D. Henderson, Katrina De Graaf, Paul A. Brandner, Bryce W. Pearce

54 A Hybrid RANS-Implicit LES Method for External Aerodynamics .............................................. 192
   Asifur Islam, Ben Thornber

55 Modelling of Two-Phase Bubbly Flow over a Flat Plate .................................................................. 196
   Sara Yavahi, Li Chen, Sherman C. P. Cheung, Jiysun Yu

56 Numerical Study of Turbulent Convective Cooling of Vertical Heat-Generating Rods Using Supercritical Water .......... 200
   Mohsen Mohsenian, Mostafa Odabaee, Iris Bao, Kamil Hooman

57 CFD Modelling of Primary Atomisation of Diesel Spray .................................................................. 204
   Mohammadali Ghiji, Laurie Goldsworthy, Vikram Garaniya, Paul A Brandner, Peter Held

58 Aerodynamic Drag of Contemporary Soccer Balls ................................................................. 208
   Firoz Alam, Harun Chowdhury, Bavin Loganathan, Irsat Mustary, Simon Watkins

59 Comparison between In-Flame and Exhaust Soot Particles in a Single-Cylinder, Light-Duty Diesel Engine .... 212
   Han Wei, Wilson Y. K. Chan, Peter Jacobs, Richard Morgan

60 Computational Optimisation and Analysis of a Truncated Hypersonic Nozzle for X3 Expansion Tunnel ...... 216
   Han Wei, Wilson Y. K. Chan, Peter Jacobs, Richard Morgan

61 Drop Formation at a T-Junction with Dilute Xanthan Gum Solutions as the Dispersed Phase ............... 220
   Song-Liow, Zhipeng Gu

62 Noise from Sub-Boundary Layer Steps ....................................................................................... 224
   Con Doolan, Danielle Moreau, Paul Brandner, Bryce Pearce, Katrina De Graaf

64 A Second-Order Cantilevered Plate Model of the Palate-Uvula System during Snoring .......................... 228
   Julien Cosson, Noval F J Elliott, Anthony D Lacey, Matthias Heil

   Hamed Sadeghi, Andrew Pollard, Philippe Lavoie

66 Heat Transmission in a Geothermal Wellbores: Modelling and Application .................................... 236
   Isa Kolo, Rita Sousa, Tieyun Zhang

69 Computational Fluid Dynamics Study on Wind, Solar Effect and Pollutant Dispersion in Masdar City ........ 240
   Najmul Hasan Abid, Ioa Kolo, Iasam Janjireh

70 Tracking Blood Drops Ejected from the Nasal Cavity during Violent Assault ................................ 244
   Patrick Geoghegan, Callum Spence, Natalia Kabaliuk, Jonathan Aplin, Julie Wilhelm, Michael Taylor, Mark Jermy

71 Experimental Study on Inlet Air Cooling by Water Spray for Natural Draft Dry Cooling Towers Enhancement ......................................................... 248
   Abdullah Alkheidhair, Zhiqiang Guan, He Gurgenci, Ingo John, Suuying He

72 Effect of Sinusoidal Leading Edge Pattern on Flat Plate Boundary Layer Flow .................................. 252
   Ben Needleman, James Harvey, Malcolm Jones, Julio Soria, J. L Palmer

74 Unsteady Lift Generation on a Low-Aspect-Ratio, Rotating Flat Plate ......................................... 256
   Ben Needleman, James Harvey, Malcolm Jones, Julio Soria, J. L Palmer

77 Low Cost Hot-element Anemometry Verses the TFI Cobra ....................................................... 260
   Daniel Prohasky, Simon Watkins

78 Linear Stability Analysis of Horizontal Convection Forced Radially in a Rotating Cylindrical Enclosure ........ 264
   Wasiu Hussain, Tze Tsi, Gregory Sheard

80 Hypersonic Leading Edge Separation ......................................................................................... 268

81 Formation of Back-Spattered Bloodstain Patterns: Air Flow Visualisation and Form of the Damage in a Brain Tissue Simulant ................................................................................................. 272
   Milad Soltanipour Lazarjan, Patrick Geoghegan, Michael Taylor, Mark Jermy
82 Hydrodynamic Stability Analysis on Inviscid Cross Sheared Stratified Flows ......................................................... 276
83 Three-dimensional Momentum and Heat Transport in a Turbulent Cylinder Wake .................................................. 280
84 Coherent Structures in Cross Sheared Flows in Weakly Stratified Environments ......................................................... 284
86 Growth and Departure Dynamics of Isolated Vapour Bubbles: An Improved CFD Model for Bubble Evolution in Pool Boiling ............................................................................................................ 288
87 Tunable Diode Laser Absorption Spectroscopy of Hypersonic Flows ................................................................. 292
88 An Investigation of Particulate Flow Behaviour and Sedimentation in Curved Channel Using Euler-Euler Approach .................................................................................................................................................. 296
90 Modified Equation of State Laws for Heat Transfer and Natural Convection in Smoothed Particle Hydrodynamics ........................................................................................................................................... 300
91 Gasoline Direct Injection Engine Injector Tip Drying ........................................................................................................... 304
92 Fluid Thermal Structural Interactions on a Fin in Hypersonic Flow ................................................................................. 308
93 Statistics and Scaling of Axisymmetric Turbulent Boundary Layers under the Transition from Zero to Adverse Pressure Gradients ........................................................................................................... 312
94 The Attached Eddy Hypothesis and von Kármán's Constant .............................................................................................. 316
95 Comparative Analysis of Pulsatile and Steady Flow on Arterial Mass Transport ............................................................. 320
96 Direct Numerical Simulation of a Turbulent Lifted Flame: Stabilisation Mechanism ........................................................... 324
97 Vortex-induced Vibration of Four Cylinders in an In-line Square Configuration in Steady Flow .................................... 328
98 Particle Collection using Vibrating Bubbles ...................................................................................................................... 332
99 Deposition-driven Growth in Atherosclerosis Modelling ...................................................................................................... 336
100 Lift Curve Breakdown for Airfoil Undergoing Dynamic Stall ............................................................................................ 340
101 A Mixture Fraction-Based Model for Evaporation, Pyrolysis and Char Conversion of Dilute Fuel Dispersions ...... 344
102 POD Analyses of PIV and Hot Wire Velocity Data in a Cylinder Wake ........................................................................ 348
104 Techniques Towards Understanding Shear Dependent Thrombus Formation ................................................................. 352
105 A Modeling and Simulation Framework for Aircraft Transonic Flutter ............................................................................ 356
106 Turbulent Kinetic Energy and Temperature Variance Budgets in the Far Wake Generated by a Circular Cylinder ............................................................................................................................................................ 360
107 The Effect of the Forcing Temperature Profile on Horizontal Convection Flows ................................................................. 364
108 Global and Convective Stability of Horizontal Convection ............................................................................................... 368
111 Numerical Investigation on Flow Control Effects of Plasma Actuators for Subsonic Aerofoils in Turbine Applications .................................................................................................................................................. 376
113 Equivalent Direct Connect Free-Stream Shock Tunnel Conditions for Injection Locations in an Axisymmetric Scramjet .............................................................................................................................................. 384
114 Jet Flow Structure under the Perturbation of Two Unsteady Microjets ............................................................................ 388
115 Simulation of a Transient Supersonic Jet .............................................................................................................................. 392
116 Transformation of Internal Waves at the Bottom Ledge ...................................................................................................... 396

367 A Microfluidic Cross-Slot Device for Measurement of Erythrocyte Deformability .......................................................... 1022
Zhibin Zhao, Kaiyu Zhang, Yuqing Feng, Peter Witt, Phil Schwarz, Zhaowen Wang, Mark Cooksey

369 A Numerical Investigation of Dominant Factors Affecting the Bubble Dynamics Between Air-water and CO2- cryolite Systems ............................................................................................................................................................................................ 1026
Anupam Patti, Sridhar Abhishek, Ramesh Narayanasamy, James Jevakes, Anthony Lacey

370 A Novel Flow Control Valve for Pulsatting Flows .......................................................................................................................... 1031
Vishal Chaugule, Ramesh Narayanasamy, Vinod Narayanan, James Jevakes, Anthony Lacey

371 Computational Analysis of Fluid Dynamics and Heat Transfer Characteristic of a Vibrating Heated Plate .................................................. 1035
Anupam Patti, Sridhar Abhishek, Ramesh Narayanasamy, James Jevakes, Anthony Lacey, Vinod Narayanan

374 Experimental Measurements of Rotating and Stationary Wind Turbine Rotor Blade Noise ............................................................. 1039
Branko Zajamsek, Con Doolan, Zebb Prime

376 A Novel Algorithm to Estimate Soot Sheet Dimensions in Delft-Adeelaide Flame .............................................................................. 1043
Qing Xian Chan, Paul Medewell, Graham Nathan, Sanghoon Kook

377 Centrifugal Instability over a Rotating Cone ....................................................................................................................................................... 1047
Zahir Hussain, Stephen Garrett, Sharon Stephen

378 Wavelet Multiresolution Analysis on Wake Structure of a Yawed Square Cylinder ......................................................................................... 1051
Xiaoan Lou, Tongming Zhou, Akira Rintetsuhi, Liang Cheng

380 A New Method for Prescribing Non-Uniform Wall Temperatures on Wind Tunnel Models ........................................................................ 1055
Andrew Neely, Arnab Dasgupta, Rishabh Choudhury

381 Thermo-fluid-structural Analysis of the Oxford High Density Tunnel ................................................................................................................... 1059
Andrew Neely, Matthew McGilvray, Thomas Calder-Smith, Peter Ireland

382 Asymmetric Flow about a Chevron-Shaped Cavity .............................................................................................................................................. 1063
Karon Schumacher, Richard Kelso, Con Doolan, C. T. Thong

383 Development of a Drag Reduction System for Multi-Element Race Car Wings ......................................................................................... 1071
Scott Wordley, Damien McArthur, Luke Pherson, Daniel Tadball Smith, David Burton

384 Direct Numerical Simulation of Particle Behaviour in a Gas-Solid Three Dimensional Plane Jet ........................................................................... 1075
Nabeel Ahmed Qazi, Joshua Tang, Evatt R. Hawkes, Guan Yeoh, Ray Grout, Hariwaram Sitaraman, Mohsen Talei, Robert Taylor, Michele Bolla, Haizai Wang

385 Heat Transfer Prediction of a Turbine Stage using Fluid-Thermal-Structural Interaction Simulation .................................................................... 1079
Irizariz Ubolum, Andrew Neely, Krishna Shankar

389 The Effect of Length to Height Ratio on the Wake Structure and Surface Pressure of a High-Speed Train ............................................. 1083
James Bell, David Burton, Mark Thompson, Astrid Herbst, John Sheridan

390 Three-Dimensional Simulation of Flow Past Two Circular Cylinders of Different diameters ........................................................................ 1087
Jitendra Thapa, Ming Zhao, Shailesh Vaidya

391 Performance of a Stepped Airfoil at Low Reynolds Numbers .......................................................................................................................... 1091
Matthew Cox, Yukik Avakian, Phuoc Huynh

392 Developing Three-Dimensional CFD City Model Based on Public Accessible Information for Street-Level Wind Risk Assessment ................ 1095
Haiyan Miao, Jialie Shen

400 Chaotic Mixing in a Twisted Pipe: Optimisation of Heat, Mass Transfer and RTD ...................................................................................... 1099
Benny T Kuan, Daniel Lester, W. Yang, Gay Metcalfe

401 Aerodynamic Characteristics of Australian Rules Footballs .......................................................................................................................... 1103
Jason Cavuto, Lachlan Earl, Thomas Fathy, Richard Kelso

402 PIV Measurements of the Spanwise Flow Characteristics in a Naturally Transitioning Natural Convection Boundary Layer ........................................... 1107
Yongling Zhao, Chengwang Lei, John Patterson

406 Thrust Augmentation by After-Burning in a Scramjet Nozzle ..................................................................................................................... 1111
Michael Canadon, Hideaki Ogawa, Graham Dorrington

407 Entrainment and Spreading of Turbulent Shear Flows ................................................................................................................................. 1115
Yongling Zhao, Chengwang Lei, John Patterson

408 Impacts on Hemodynamics of Different Bifurcation Coronary Stent Configurations ....................................................................................... 1119
Eric Poon, Preet Barlis, Umair Hayat, Stephen Moore, Andrew Ooi

409 Estimation and Control of Vortex Shedding at Low Reynolds Numbers .............................................................................................................. 1123
Simon Illingworth

410 An Experimental Investigation of the Flow in the Near Wake of a Sharp-edged Strut ........................................................................... 1127
Cristobal Albarracin, Con Doolan

411 Time-resolved PIV Measurement of a Developing Zero Pressure Gradient Turbulent Boundary Layer .......................................................... 1131
Junghoon Lee, Yongseok Kwon, Jason Monty, Nicholas Hutchins

412 Comparisons of Turbulence Stresses from Experiments against the Attached Eddy Hypothesis in Boundary Layers .................................................. 1135
Rio Baidiya, Jimmy Philip, Jason Monty, Nicholas Hutchins, Ivan Marusic

413 Regions of Uniform Streamwise Momentum in Turbulent Boundary Layers ................................................................................................. 1139
Charitha De Silva, Ivan Marusic, Nicholas Hutchins

421 Simulation and Experimental Testing of Leonardo da Vinci’s Helical Rotor .......................................................................................... 1143
Graham Dorrington, Hideaki Ogawa, Jesse McCarthy, Robert Curese

422 Development of a 2-phase Flow Nozzle for Fine Droplet Generation ........................................................................................................... 1147
Thomas Van Puyenbroeck, Stefan Brieschenk, Ingo Jahn
423 Laminar Separation Bubble Effect on the Lift Curve Slope of an Airfoil

Kristo Hansen, Richard Davison, Monika Czirjak

425 Numerical Study of Heat Pipes Effects to a 3-Dimensional Room with Driven Ventilation

Zakaria Khadda, Ba Phuoc Huy Nguyen, Awang Arip

427 Penetration Height and Onset of Asymmetric Behaviour of Transitional Plane Fountains in Linearly Stratified Fluids

Mohammad Bia Ismail, Wensian Lin, Steven Armfield, Yinghe He

430 Instabilities of the Sidewall Boundary Layer in a Rapidly Rotating Split Cylinder

Juan Lopez, P. Gutierrez

431 LES Modelling of Mesoscale Chambers with Arrhenius Complex Chemistry

Pierre Bénard, Vincent Moureau, Ghislain Larrique, Yves D'Angelo

432 Investigation of the Flame Structure of Spray-A Using the Transported Probability Density Function

Muhammad Ashfaq Chishty, Yuanjiang Pei, Evatt R. Hawkes, Michele Bolza, Sanghoon Kook

434 Comparison between OH* Chemiluminescence and OH Planar Laser-Induced Fluorescence Images in a Light-Duty Optical Diesel Engine

Chonghe Zhao, Shawn Kook, Qing Chen, Evatt Hawkes

435 Flow Modelling in Medium-Scale Stirred-Tank Bioreactors Featuring Large Free Surface Deformations

Petar Liovic, J. D Sutalo

436 Statistical Development of Wind Turbine Wakes for the Fully Developed Wind Turbine Array Boundary Layer Characterized via Wall-Normal-Spanwise Planes

Nicholas Hamilton, R. B Cal

437 Wall-Parallel PIV Measurements in Turbulent Boundary Layers with Highly Directional Surface Roughness

Nicholas Stuart, David Holmes, Wensian Lin

438 Characterization of Turbulence and Deterministic Stresses through Phase-Dependent Measurements in the Near Wake of a Wind Turbine in an Infinite Turbine Array

Nicholas Hamilton, Murat Tuzun, R. B Cal

440 Engine Combustion and Emissions of Coconut Oil-Based Biodiesel and Diesel Blends

Changhwan Woo, Shawn Kook, Evatt R Hawkes, Peter L. Rogers, Christopher Marquis

441 Direct Numerical Simulation of Pulsatil Flow in Pipes

Xiao Chen, L Chen, N Hutchins, E. R. W Poon, A Ooi

444 Direct Numerical Simulation of Sheared Convective Boundary Layer Mixing and Entrainment

Nicholas Stewart, David Holmes, Wensian Lin

445 Ocean Wave Energy Converter Performance at a Specific Geographical Location

Subhith Ilesinghe, Richard Manasseh, Roger Durgaville, Andrew Ooi

447 CFD Simulation and Analysis of a Two-sided Windcatcher's Inlet/Outlet Geometric Shape Effect in Ventilation Flow Through a Three Dimensional Room

Amirreza Nokhsh, Phuoc Huynh

449 Thermal Instability of a Horizontal Fluid Layer Subject to Absorption of Incoming Radiation and Surface Heat Exchange

Tae Hattori, John Patterson, Chenguang Lei

450 Inertial Effects on the Capture of Particles in Aquatic Systems

Alexis Espinosas-Gayosso, Marco Ghisalberti, Gregory Ivey, Nicole Jones

451 Initial Experiments Investigating Gas Giant Entry Radiation in an Expansion Tube

Christopher James, David Godfrin, Richard Morgan, Tim McIntyre

453 A Hybrid CFD-BEM Technique Based on the Burton-Miller Formulation Applied to Aeroacoustic Scattering

Paul Croucher, Mahmud Karimi, Nicole Kessissoglou

458 The Existence of Multiple Solutions for Rotating Cylinder Flows

Mark Thompson, A Rao, J. S Leontini, R Hourigan

459 Fluid-Structure Interaction of a Cylinder Rolling Down an Incline under Gravity

Farah Houdroge, K Hourigan, T Leweke, M. C Thompson

460 An Experimental Investigation of the Effect of Nitric Oxide (NO) on Knock Onset in a Spark-Ignition Engine

Abolghasem Naghsh, T Hattori, J. C Patterson, C Lei

461 Linear Stability of Natural Convection Induced by Absorption of Radiation in a Parallelepiped Cavity

Nicholas Armfield, Nicholas Williamson, Wensian Lin, Michael Kirkpatrick

462 Nusselt Number Scaling in an Inclined Differentially Heated Square Cavity

Steve Armfield, Nicholas Williamson, Wensian Lin, Michael Kirkpatrick

463 How Does Transverse Mixing Control Residence Time Evolution?

Daniel Lester

468 Topological Mixing in Three-Dimensional Porous Media

Daniel Lester, M Dent, T Leborgne

466 Multiphase Porous Media Model for Heat and Mass Transfer during Drying of Agricultural Products

Chandan Kumar, Mohammad U. H. Joardder, Troy Farrell, Graeme Miller, Asharul Karim

468 Fitting Micro-sized Droplet into Thinner Line

Yee Cheong Lam, C. Y Lim

469 Second Law Analysis of Small Data Centre Airspace

Daniel Lester, M Dent, T Leborgne

472 Holographic Microscopy of Micron-Sized Droplets at Liquid-Liquid Interfaces

Gholamreza Keshavarzi, A Wang, T J Barber, G H Yeoh, Y N Manshooran

474 Instabilities around a Rotating Ellipsoid in a Stratified Rotating Flow

Patrice Meunier, B Miquel, S Le Dizes
