Towards future innovative transport: visions, trends and methods

Frankfurt, Germany
28-30 September 2015

Editors:
Pierluigi Coppola

# TABLE OF CONTENTS

Towards Future Innovative Transport: Visions, Trends and Methods ................................................................. 1

Pierluigi Coppola

Adriana Ortegon-Sanchez, Nick Tyler

Assessing the Long-term Effects of Autonomous Vehicles: A Speculative Approach ........................................ 18

Wolfgang Gruel, Joseph M. Stanford

Pioneering Driverless Electric Vehicles in Europe: The City Automated Transport System (CATS) ........................................... 30

Derek Christie, Anne Koymans, Thierry Chanard, Jean-Marc Lasgouttes, Vincent Kaufmann

Willingness to Pay for Electromobility: An Investigation Among Owners of Energy-efficient Houses ....................... 40

Leif Jacobs, Karolyn Laurenz, Stephan Keuchel, Christoph Thiel

What Drives Mobility Trends: Results from Case Studies in Paris, Santiago de Chile, Singapore and Vienna ......................... 49

Mirko Goletz, Irene Feige, Dirk Heinrichs

Longitudinal Analysis of Car Ownership and Car Travel Demand in the Paris Region using a Pseudo-panel Data Approach ................................................................. 61

Benoit Cornut

New Findings in the Netherlands about Induced Demand and the Benefits of New Road Infrastructure ........................................... 72

Han van der Loop, Rinus Haaijer, Jasper Willigers

Modelling and Observing the Effects of Long Distance bus Market Liberalization in Germany .............................. 81

Martin Thust, Christian Kreling, Bernhard Fell

Exploring the Sustainability Challenges of Long-distance Passenger Trends in Europe ........................................... 90

Angel Aparicio

Evolutions of the Reference Values Used in Transport CBA National Guidelines of 3 Countries and What they Reveal ................................................................. 100

David Meunier, Christoph Walther, Tom Worsley, Alexander Dahl, Hélène Le Maître

The Measurement of Indirect Effects in Project Appraisal ......................................................................................... 114

Tünde Vörös, Mattias Juhász, Krisztian Koppány

A Methodology for Measuring Sustainability of Dry Ports Location Based on Bayesian Networks and Multi-criteria Decision Analysis ............................ 124

Samir Awad-Núñez, Nicolett González-Cancelas, Francisco Soler-Flores, Alberto Camarero-Orive

Sustainable, Participatory and Practical: The NISTO Evaluation Framework for Urban and Regional Mobility Projects ................................................................. 134

Imre Keseru, Jeroen Bulckaen, Cathy Macharis

Impacts on Land Use Characteristics from Fixed Link Projects: Four Case Studies from Norway .............................. 145

Stig Nyland Andersen, Øyvind Lervik Nilsen, María Diez Gutiérrez, Trude Tørset

Management of On-demand Transport Services in Urban Contexts. Barcelona Case Study ...................................... 155

Víctor Cuevas, Miguel Estrada, Josep Maria Salanova

Speed Management in Rural Two-way Roads: Speed Limit Definition through Expert-based System .............................. 166

Nuno Gregório, Ana Bastos Silva, Alvaro Seco

A Multi-modal Routing Approach Combining Dynamic Ride-sharing and Public Transport ................................ 176

Sebastian Fahnenschreiber, Felix Giindling, Mohammad H. Keyhani, Mathias Schnee

Short Term Traffic Prediction on the UK Motorway Network Using Neural Networks ...................................... 184

Carl Goves, Robin North, Ryan Johnston, Graham Fletcher

A Game-based Analysis of Freight Paths Allocation with a Case Study on Great Britain Brighton Main Line ................................................................. 196

Konrad Bablinski
