TABLE OF CONTENTS

PART 1

Preface ................................................................................................................................................. 1
Andrey A. Radionov
Conceptual Area of Development of Power Saving Thyristor Electric Drives of Rolling Mills ................................................................. 3
Improvement of Electric and Mechanical System for Automated Strip Tension Control at Continuous Wide-Strip
Hot-Rolling Mill .................................................................................................................................. 11
V. R. Khramshin, A. A. Radionov, G. P. Kornilov, K. E. Odintsov
Stationary System for Monitoring Technical State of Power Transformer .................................................. 18
S. A. Evedykov, Yu. N. Kondrashova, O. I. Karandaeva, M. S. Gallyamova
Device for Monitoring Permanent Magnet Friction Brakes .................................................................. 26
I. V. Borcharev, R. R. Khramshin
Methods of Multi-Parameter Diagnostics of Electric Equipment Condition within On-line Monitoring Systems .................................................. 32
A. S. Karandaev, I. M. Yakshikov, V. R. Khramshin
Research of the Mine Shuttle Car Drive Mode at Potash Mines .................................................................. 39
D. I. Shishlyanov, M. A. Vasilyeva
Analysis of Performance Criteria of Boosted Diesel Engine Slide Bearings ........................................ 45
N. Marina, E. Ovchinikova
Modeling of Injection Parameters for Diesel Engine Injector Nozzles with the Additional Precision Guiding
Interface .................................................................................................................................................. 52
V. Lazarev, G. Lomakin, E. Lazarev
Estimation of Gas Turbine Blades Cooling Efficiency ........................................................................... 61
A. B. Meskulenski, A. I. Kozhevnikov
Refined Solution for Dynamic Axisymmetric Electroelasticity Problem for Rigid Bi-morph Plate ....... 68
D. A. Shtyakhin
Changes in the Engineering Products Performance During Operation ................................................... 74
I. A. Krivosheev, D. G. Kozhinov, K. E. Razhkov
Mathematical Modeling of Elastic Hysteresis Phenomenon in Round Plates in Presence of Residual Tension ................................................................. 81
T. A. Baltayev, A. V. Kovalov, T. M. Mannapova
Effect of Material Damage on Parameters of a Torsional Wave Propagated in a Deformed Rotor .......... 86
A. B. Dar-Enkov, A. S. Pleshkov, V. I. Erofeev
Frictional Self-oscillation of a Deformable Washer Interacting with a Rigid Rod that Rotates at a Constant
Angular Velocity .................................................................................................................................. 91
A. S. Pleshkov, V. V. Kashaev, V. I. Erofeev
Calculation Method of Pipeline Vibration with Damping Supports Made of the MR Material ................... 101
A. M. Ulanov, S. A. Bezboskorov
Assessing the Adequacy of Mathematical Models of Light Impurity Fractionation in Sedimentary Chambers of
Grain Cleaning Machines .................................................................................................................. 107
V. E. Saitov, R. F. Karbanov, A. N. Suvorov
The Influence of Cross-profiling of Inlet and Exhaust Pipes on the Gas Exchange Processes in Piston Engines .............................................................................. 111
L. V. Plotnikov, B. P. Zhilkin, Yu. M. Brodov
Stability of the Low-cycle Deformation of Structures ........................................................................... 117
O. F. Cherniavsky
An Approach to Numerical Modeling of Selective Laser Melting .......................................................... 121
I. O. Cherniavsky, K. V. Gorbanov
The Thermo-Gas-Dynamic Modeling of Afterburning Turbofan Engine for High Maneuverable Aircraft
Combined with Its Automatis ............................................................................................................. 126
A. B. Dar’Enkov, A. S. Karandaev, A. E. Kishalov
Peculiarities of Gas Pressure Development Depending on the Intensity of a Burning Fuel in the Diesel Engine
Cylinder .................................................................................................................................................. 132
E. A. Lazarev, M. A. Matreulevich, V. E. Lazarev
Research and Design of Construction of a Bearing Plate of a Counter Rail Attachment Fitting............... 138
V. G. Podolyukov, E. E. Bikhler, G. G. Protsenko
Fatigue-based Classification of Loading Processes .................................................................................. 144
A. V. Erpalov, L. A. Shefer
Justification of a Rational Design of the Pivot Center of the Open-top Wagon Frame by means of Computer
Simulation ............................................................................................................................................... 150
New 1-D Method for the Prediction of Axial-flow Compressors Off-design Performance ...................... 155
A. E. Mikhailov, A. B. Mikhailova, D. A. Akhmedzyanov
Designing of Optimal Annular Nozzles with Multiphase Flows ............................................................. 161
A. L. Kartashhev, M. A. Kartashcheva
Mathematical Modeling of Transient Processes in the Jet Pipe Servoactuator with a Dual-Mode Controller ........................................................................ 168
A. V. Mesropyan, R. R. Sharipov
Analysis of Kinetic Characteristics of Continuous Action Loading Organs Mechanisms ................................................................. 173
A. V. Otroskov, G. S. Khazanovich, V. G. Khazanovich

Modeling of the Ceramics Structure for the Finite Element Analysis ........................................................................................................... 179
E. I. Shchururova

Small Enclosed Diesel Generator with a Multifunctional Brushless Exciter and Nanostructured Insulating Materials Used .................................................................................................................. 185
T. S. Asteer, V. I. Denisenko

Simulation of Fuel Ignition Delay in Diesel Engines with Various Fuel Feeding Systems ........................................................................................................... 190
A. P. Senachin, A. A. Kortchavin, P. K. Senachin

Foam Fixer Hydrodynamics and Design Calculation ................................................................................................................................. 204
E. K. Spiridonov, D. F. Khaburova

Simulation Model and Characteristics of the Cavitation Mixer with Hydrodynamic Grid ...................................................................................................... 210
E. K. Spiridonov, S. Y. Bituytsikh

Operational Assessment of Machine Tool Vibration Resistance ...................................................................................................................... 215
F. S. Sabirov, N. A. Kochnev, S. S. Shemyakin

The Valve is a Shutoff for the Passive Protection Systems of Pipelines ............................................................................................................... 220
I. R. Chinyaev, A. V. Fominykh, E. A. Pokhvalov

Optimization of Diesel Fuel and Corn Oil Mixtures Composition ........................................................................................................................ 225
V. A. Markov, V. G. Kamaltdinov, S. S. Loboda

Controlling the Oscillatory Process Composition in Machining by Correcting the Exciting Force Structure in the Cutting Zone ........................................................................................................................................... 241
B. M. Brzhazhevsky, I. N. Tandin, M. B. Brovkova

Operational Process and Characteristics of Liquid-gas Jet Pumps with the Ejected Vapor-gas Medium ........................................................................... 247
A. R. Ismagilov, E. K. Spiridonov

Model of Accumulation of a Cycle Fatigue Damage in the Multi-parametric Random Loading .................................................................................. 254
A. A. Abzov, O. S. Sadakov

Method for Determining of the Valve Cavitation Characteristics ...................................................................................................................... 260
I. R. Chinyaev, A. V. Fominykh, E. A. Pokhvalov

Defining of the Power of a Control Loop Actuator ........................................................................................................................................... 266
B. T. Budai

Stability Enhancement of High-speed Rotors on Foil Bearings with the Automatic Mode Switch ................................................................................ 271
A. S. Lyutin, V. T. Vurin, S. Antonov

Energy-saving Shut-off and Regulating Device ........................................................................................................................................... 277
I. R. Chinyaev, A. V. Fominykh, S. A. Sukhov

Choice of the Traction Motor for the Electric Racing Car “Formula Student” ........................................................................................................... 283
D. S. Korobkov, O. V. Ufimtseva

On the Study of Setting Dynamics of Axial Piston Pumps with Electro Hydraulic Proportional Control .................................................................................. 289
O. V. Zalogin, A. S. Noskov

Determination of Rotor Surfacing Time for the Vertical Microturbine with Axial Gas-Dynamic Bearings ........................................................................... 294
N. N. Efimov, V. V. Papin, R. V. Bezuglov

Vibration Diagnostics of Gas Pipelines Technological Equipment Using Wavelet Analysis ................................................................................... 300
A. M. Zakhezin, V. G. Pryadko

Application of the Ranque-Hilsch Vortex Effect for Creation of the Evaporation Plant for Water Demineralization ................................................................. 307
A. L. Kartashev, M. A. Kartashova, E. V. Safonov

Dynamics Simulation Model for the Internal Combustion Engine Valve Gear ........................................................................................................... 312
A. V. Vasilyev, Y. S. Bakhracheva, S. Y. Storojakov

Estimation of Truck Frame Fatigue Life under Service Loading .......................................................................................................................... 318
A. N. Savkin, A. S. Gorobtsov, K. A. Badikov

Micro Energy Complex Based on Wet-SteamTurbine........................................................................................................................................... 324
N. N. Efimov, V. V. Papin, R. V. Bezuglov

Dynamic Verification of a Grid Structure Numerical Model Consisting of Different Stiffness Parts ................................................................................................................................. 330
A. V. Ignatov, S. B. Sapozhnikov, P. A. Taranenko

Study of the Oscillation Modes of a Coriolis Flowmeter Using a Parametric Finite Element Model, Verified by the Results of Modal Testing ........................................................................................................................................... 336
A. A. Yashnev, P. A. Taranenko, V. A. Loginovskiy

Analysis of Mathieu Equation Stable Solutions in the First Zone of Stability .................................................................................................. 341
A. A. Prakhodko, A. V. Nesterov, S. V. Nesterov

Development Systems and Methods for Adaptive Control of Electromagnetic Actuators Based on Sensorless Control Weber-Current Characteristics ........................................................................................................... 347
R. I. Leukhin, D. V. Shaykhutdinov, V. I. Leukhin

Efficiency of Shock Absorber in Vehicle Suspension ........................................................................................................................................... 354
I. V. Ryabov, V. V. Novikov, A. V. Pozaleev

Vibroacoustic Control of Technical Conditions of GTE ........................................................................................................................................... 363
A. V. Kochergin, N. V. Pardonova, E. A. Valyeva

System Synthesis of Machine Tool Manufacturing Process Control Based on Synergetic Conception ........................................................................... 370
V. L. Zacovorontoy, A. D. Lukyanov

Reliability for the Robotic Assembly of Cylindrical Parts ........................................................................................................................................... 376
M. Vartanov, N. Martynovich
Energy Analysis of Vehicle Suspension Oscillation Cycle .................................................. 384
Mathematical Modeling of Cooling High-Temperature Cylindrical Workpieces ................. 393
Building a Dynamic Model of the Internal Cylindrical Grinding Process ............................. 400
Impact of Roughness of Interacting Surfaces of the Wheel-Rail Pair on the Coefficient of Friction in their Contact Area ............................................................. 406
Analytical Model for the Wide-Strip Rolling Mills Working Rolls Wear-Out Failures ........... 411
Modeling of Wear-Out Failures and Service Life Improvement of Sealing Units............... 416
Dynamics of Adhesion Control for Different Lubricants ....................................................... 426
Equations of Rounded-Edge Profile for a Ring Gear in a Wave Reducer with Intermediate Rolling Elements ................................................................. 430
Studying the Resonance Processes in the Surface Layers of Friction Pairs with Lubrication by Means of Molecular Dynamics ......................................................... 435
Increase of the Wear Resistance of Metal Details on the Basis of a Simultaneous Application of the High-Test Cover and Ultrasonic Vibrations ............................................. 442
Compressor Reliability Improvement .......................................................... 448
The Research of Stresses in the Molds of Injection Molding Machines ............................ 453
The Mechanism of Lubricants Protective Layers Formation in Friction Sliding .................... 458
Service Life of Magnetic Liquid Vacuum Tribounits ......................................................... 468
The Assurance Factor Definition of Metal Ware for the Technological and Engineering Objectives Control ................................................................. 475
Method of Control the Effect of Temperature for the Oxidation Process of Partially Synthetic Motor Oils ................................................................. 480
Apparatus for Determining of the Pour Point of Crude Oil and Petroleum Products ........ 486
Experience of the Diesel Engine Cooling System Simulation ........................................... 490
Microscip Mechanism in Raceways and Rolling Elements of Roller Bearings .................... 497
Improving the Assembly of Ballscrews Using Analysis of Interactions between the Working Parts ................................................................. 502
To the Projection of a Peristaltic Slit Pump .......................................................... 506
Hydrodynamic Seal on the Basis of a Cylindrical Layer of the Compressible Fluid with a Running Wave ................................................................. 514
Antifriction Composites Based on Phenylene C2 for Work under Conditions of Dry Friction ................................................................. 520
On the Friction Theory of Solids with Flat Contact Surface ............................................. 527
Elastohydrodynamic Lubrication (EHL) of Piston Rings in the Internal Combustion Engine .... 536
Effect of the Heat Insulating Coating of the Piston Crown on Characteristics of the “Piston-Cylinder Liner” Pair ................................................................. 541
Coefficient of a Rolling Motion Bearing Drive ............................................................. 547
Radial Bearings with Porous Elements ............................................................................. 559
Mathematical Model of Complete Electromagnetic Rotor Suspension ................................ 571
Investigation of Cholesteric Liquid Crystals and Carbon Nanotubes Additives on Mineral Oil Antifrictional and Rheological Characteristics ................................. 579
Computing of the Molecular Orientation State of the Lubrication Layer ........................... 584
Improve the Flow Ducts of Heat Engine Sprayers

V. P. Smolentsev, S. V. Saffenov, V. V. Zolotarev

PART 2

Application of Combined Taps for Increasing the Shaping Accuracy of the Internal Threads in Aluminium Alloys

S. Bratan, P. Novikov, S. Roshchapkin

Analysis of Relation Between Grinding Wheel Wear and Abrasive Grains Wear

Yu. Novoselov, S. Bratan, V. Bogatsky

Researching the CNC-Machine Stiffness Impact on the Grinding Cycle Design

V. I. Guseev, A. K. Nurek

The Problem of Forecasting the Facial Layer Quality While Cutting Steel with Advance Plastic Deformation

P. Norechko, D. Krayev, I. Kezachadzhenko

The Radiation Control with the Different Energy Resources in the Engineering Industry

G. S. Morokina

Special Characteristics of the Multi-product Manufacturing

A. V. Kaptianov

Special Features of Antivibration Mountings, Steel Structures, and Equipment Production

E. I. Yatsun, M. S. Razumov, A. N. Grechukhin

Determination of Shape Errors During Polygonal Turning of Polyhedrons with an Odd Number of Faces

M. Razumov, A. Grechukhin, A. Pykhin

Control of Manufacturing Aircraft Gas-turbine Engines Labor Intensity at the Early Stages of Design

A. S. Yanyushkin, D. A. Rychkov, D. V. Lobanov

Modeling of the Turbine Rotor Journal Restoration on Horizontal Balancing Machines

L. V. Shipulin, A. A. D'Yakonov

SPH-Simulation of the Fiber-reinforced Composite Workpiece Cutting for the Surface Quality Improvement

A. V. Shchurkov, A. V. Nikonenko, I. S. Boldyrev

Numerical Simulation of the Aluminum 6061-T6 Cutting and the Effect of the Constitutive Material Model and Failure Criteria on Cutting Forces' Prediction

I. S. Boldyrev, A. V. Shchurkov, A. V. Nikonov

Synthesis of the Four-Bar Double-Constraint Mechanisms by the Application of the Grubler's Method

A. Fomin, M. Paramonov

Shaping of Cell Chips at Rotary Milling

A. V. Shchurkov

Definition of Fuel Ignition Delay Based on Running Process Diesel Engine Mathematics Modeling Method

A. A. Obzunov, G. S. Mhatchchenko, D. I. Subbotenko

Controlling the Parameters of the Component Quality Using Program Means While Performing Mechanical Machining

V. G. Shalamanov, V. I. Guseev, S. D. Smetanin

Development of Basic Conditions for Division of Mechanisms into Subfamilies

A. S. Apachanov, A. V. Rud, K. Y. Belousov

Finishing of the Helical-bevel Gear Teeth Flanks

B. A. Lopatino, S. V. Plotnikova

Modeling of the Motion Clay Mass in the Screw Channel of the Screw Press

A. S. Apachanov, A. V. Rud, K. Y. Belousov

Phenomenological Model of the Mixing Process of Components of a Moldable Mixture for Manufacturing of Abrasive Tools

A. V. Slavkin, S. A. Kryukov

The Influence of Ceramic Binder Grinding Wheel Structural and Mechanical Characteristics on its Durability

V. M. Shumyurchak, A. V. Slavkin, S. A. Kryukov

On the Mechanism of Interaction of Abrasive Tools and a Workpiece at Grinding

V. M. Shumyurchak, A. V. Slavkin, B. M. Brzhozowsky

Determining the Rational Immersion Depth of a Mining Complex Capsule for Underwater Mining of Ferromanganese Nodules

S. L. Serzhan

Research and Development of Tubular Products Magnetic Pulse Welding–Forming Technology for Space Engineering

S. V. Nescorommy, E. L. Strizhakho, D. V. Rogozin

Imitation Model of Forecasting Surface Relief When Forming it During Cylindrical Grinding

L. V. Shipulin, A. A. D'Yakonov

Rationalization of Polymer Composite Materials Processing by Improving Production Efficiency

A. S. Tangasihin, D. A. Richtung, D. V. Lobanov

Surface Relief Shaping by Combined Machining of Aluminum Alloys

V. E. Inozemtsev

Complex Quality Assurance Methods for Surface Machining

M. Yu. Kalikov, V. E. Inozemtsev, A. A. Bocharov

Probabilistic Calculation of Tolerances of the Dimension Chain Based on the Floyd-warshall Algorithm

A. V. Muholzoev, V. B. Maysagin
The Optimal Parameters of Installation of the Snow Removing Blade
A. V. Lysyanovskiy, V. G. Shram, N. N. Lysyanova

Theoretical Underpinning of Diagnosing the Cylinder Group During Motoring
A. Gritsenko, S. Kukov, K. Glemba

Experimental Studies of Cylinder Group State During Motoring
A. Plaksin, A. Gritsenko, K. Glemba

The Control System Improvement of the City Motor Transportation
I. I. Lyubimov, A. N. Melnikov, A. A. Trubin

Improvement of the Vehicles Fleet Structure of a Specialized Motor Transport Enterprise
A. N. Melnikov, I. I. Lyubimov, K. I. Manayev

Evaluation of the Economic Efficiency of Various Alternative Fuels in Transport
E. A. Kaimov, S. A. Plotnikov

Structural and Circuit Design Solution Arguments of Mine Excavators Ergonomics Management
V. S. Felikanov, E. A. Ilina, N. V. Dyorina

Evaluation of Single-bucket Excavators Energy Consumption
A. V. Komissarov, Yu. A. Lugovskiy, O. A. Lukashuk

Car Windshield Protection
A. S. Pereverzev, B. A. Semenikhin

Multifunctional Test Stand for Researching of Main Operational Characteristics of the Automotive Transmission
M. V. Lyashenko, E. V. Klementiev, N. S. Sokolov-Dobrev

Decreasing of the Dynamic Loading of Tractor Transmission by Means of Change of the Reactive Element

Torsional Stiffness
S. V. Shekhovtsiev, P. V. Potapov, P. P. Sosnov

Analysis of Possible Dynamic Vibration Dampers Uses in Tractor Cabins Suspensions
M. V. Lyashenko, A. V. Pobedin, P. V. Potapov

Decrease of the Vibration Load Level on the Tractor Operator Working Place by Means of Using of Vibrations
Dynamic Dampers in the Cabin Suspension
A. V. Pobedin, A. A. Dolotov, V. V. Shekhovtsiyov

1. Optimization of Technical Equipment for Crop Sowing Processes
S. Shepelev, V. Shepelev, Z. Smetnova

Strength Calculation and Analysis of Equalizer Beam Embedments for the Operated Equalizing Beam
Suspension of the Universal Rotor-screw Rescue Vehicle for the Arctic
A. A. Koshurina, M. S. Krasheninnikov, R. A. Dorofeev

Car Hood Space Temperature Condition Management
M. I. Filatov, V. V. Trunov, E. V. Frolova

Loads and Stress Analysis Cycle Automation in the Automotive Suspension Development Process
D. V. Dvoryn, I. Chichkin

Suspension Kinematics Study of the “Formula SAE” Sports Car
S. Chupikov, G. Markin, A. Akulova

Characteristics of the Diesel 4CHN13/15 Working Process with Exhaust Gases Recirculation and their Cooling in the Vortex Tube
V. S. Kukin, A. V. Raznoshinskaia

Energy Datum of the Flow of Exhaust Gases of the Internal Combustion Engine
V. A. Kozminskiy, A. V. Raznoshinskaia

Moldboard Surface Universalization of the Ploughshare Operating Unit
Y. V. Blednykh, P. G. Sveches, I. P. Troyanovskaya

Dynamic Modeling of Lift Hoisting Mechanism Block Pulley
A. A. Reutov, V. V. Kobishchanov, V. I. Sakalo

Algorithm for Evolutionary Optimization of Reinforced Concrete Frames Subject to Nonlinear Material
Deformation
I. N. Serpik, I. V. Mirosenko, I. V. Iwerechenkov

Increasing the Work Scope of Conveyor Transport at Mining Companies
S. E. Gavrikov, K. V. Burnatros, N. G. Tomilin

Mathematical Model of the Straight-line Rolling Tire – Rigid Terrain Irregularities Interaction
V. A. Gorelov, A. I. Komissarov

Justification of Lever Arrangement Parameters for Friction-type Traction Gear
I. Timofeyev, A. Bolshunov, A. Avdeev

On the Possibility of Reducing the Objective Lens Diameter in the Optoelectronic System
B. T. Budai

Development of Microprocessor-based Car Engine Control System
A. I. Nefed’Ev, G. I. Sharunov

Development of the Autonomous Heat Gun for Repair and Maintenance of Utilities
G. I. Pavlov, A. P. Abrakonov, B. R. Khalilov

Development of the Energy-saving Air Regeneration System in Production Rooms
M. S. Minin, D. N. Kaimov, A. D. Lukyanov

High Pressure Piping of Tractive Transport Vehicles
N. A. Fomenko, S. V. Alekseev, S. G. Artyomova

Theoretical Prerequisites for Lowering Piston Temperature in Internal Combustion Engines
A. Sh. Khattayinov, A. A. Glushchenko

Optimization of the Prestress Value in Binding of Reinforced Concrete Structures..........................................................1771
I. A. Ivashenkov

Study of the Reasons of Emergency Shutdown of Multiple Hearth Furnace for Production of the Magnesia Binding Material ..................................................................................................................................................1776

Study of the Effect of Thermal Cutting on the Microstructure and Chemical Composition of the Edges of Workpieces Made of Steel Brands S345, S390 .............................................................................................................................1783
A. K. Tingaev, R. G. Gabaydulin, I. A. Ilin

Interlayer Bond Evaluation in the Flexible Pavement Structures Using a Nondestructive Testing Method.................1791
E. V. Uglieva, A. N. Tirataryan

Improvement of a Method of Calculation of a Residual Resource of Small Reinforced Concrete Bridge Constructions ..........................................................................................................................................................1797
T. A. Krakhmal’Ny, S. I. Evtushenko, M. P. Krakhmal’Naya

Optimizing the Parameters of Water-Retaining Protective Structures under Small Stream Conditions ..................1804
D. V. Kashkarin

Results of the Study on the Influence of Shell Structures on their Stability ........................................................................1811
T. P. Kashkarina

Additional Finite Elements and Additional Loads for Analysis of Systems with Several Nonlinear Properties ........1817
A. Ermakova

Accurate Solution of Problem of the Stress-strain State of a Multi-span Compressed-bent Elastic Bar in the Linear Statement .........................................................................................................................................................1824
N. G. Bandurin, S. Yu. Kulashnikov

Method of Composite Materials Characteristics Forecasting .........................................................................................1831
G. B. Verzhboskii

Reasons for Exterior Effective Brick Walls Deterioration as Exemplified with Buildings Under Construction ...............1837
V. A. Subbotin, I. A. Subbotin

Evaluation of Reliability of the Earthquake Resistant Building Provided by Means of the Analysis for Design-Basis Earthquake .........................................................................................................................................................1841
V. V. Drezvalov, V. A. Pshenichkina, K. N. Sukhina

Determination of a Real Strain-stress State of the Steel-wire Rope Elements..............................................................1848
V. A. Musikhin

Joint Functioning of Crane Rails and Industrial Buildings Crane Girders Under Local Crane Loads .........................1853
V. F. Saburov, V. V. Aksenov

Principles of Ecological and Economical Justification of Construction and Operating Waterwork Units ................1861
V. L. Bondarenko, E. A. Semenova

Vibration-based Damage Detection of the Reinforced Concrete Column ........................................................................1867
A. Lyapin, Y. Shatilov

Calculation of Plane Bending Stability of Beams with Variable Stiffness .......................................................................1872
A. A. Karamishcheva, S. B. Yazyev, A. A. Avakov

I. Calculating the Strength of Concrete Filled Steel Tube Columns of Solid and Ring Cross-section .................................1878
A. L. Krishan, E. P. Chernyshova, B. R. Sabirov

Strain-stress State and Strength of Chimney Reinforced Concrete Shell ........................................................................1885
V. Solomin

Research of Total Mechanical Energy of Steel Roof Truss during Structurally Nonlinear Oscillations .......................1891
E. Ufimtsev, M. Voronina

Time Analysis of Dissipative Systems Elastic Response. Part 1 .........................................................................................1898
A. Potapov

Time Analysis of Dissipative Systems Elastic Response. Part 2 .........................................................................................1904
A. Potapov

Formalization of Requirements to Road Tunnels ..............................................................................................................1914
A. Nosken, A. Domnitziy, E. Shemshura

Evaluation of Reinforced Concrete Cylindrical Reservoirs with Single-layered Walls ..................................................1919
V. N. Aksenov, Vu Le Quyen, E. V. Trafianova

Planning of Multilayer Cylindrical Wall Reservoirs .........................................................................................................1926
