2016 IEEE 3rd International Conference on Cyber Security and Cloud Computing

CSCloud-SSC 2016

Table of Contents

Message from the General Chairs of CSCloud/SSC 2016.................................................................X
Message from the Program Chairs of CSCloud 2016...........................................................................xi
Committee Members of CSCloud 2016..............................................................................................xii
Message from the Program Chairs of SSC 2016................................................................................xv
Committee Members of SSC 2016........................................................................................................xvi

The Third IEEE International Conference on Cyber Security and Cloud Computing (CSCloud 2016)

CSCloud 1

Cyber Security, a Threat to Cyber Banking in South Africa: An Approach to Network and Application Security .................................................................................................................................1
  Thierry Mbah Mbelli and Barry Dwolatzky
Wormhole Detection in Secured BGP Networks ..............................................................................7
  Youssef Gahi, Junaid Israr, and Mouhcine Guennoun
Electricity Cost Management for Cloud Data Centers under Diverse Delay Constraints .............12
  Yuqi Fan, Yongfeng Xia, Yuheng Liu, and Xiaohui Yuan
SE-ORAM: A Storage-Efficient Oblivious RAM for Privacy-Preserving Access to Cloud Storage ...............................................................................................................................20
  Qiumao Ma, Jinsheng Zhang, Yang Peng, Wensheng Zhang, and Daji Qiao

CSCloud 2

Controlling a Car Through OBD Injection .........................................................................................26
  Yu Zhang, Binbin Ge, Xiang Li, Bin Shi, and Bo Li
A Novel Software Defined Networking Framework for Cloud Environments ...................................30
  Yukun Zhang and Bo Li
Saphena: An Approach for Analyzing Similarity of Heterogeneous Policies in Cloud Environment ............................................................................................................................36
  Li Lin, Jian Hu, Xinya Mao, and Jianbiao Zhang
A Cluster-Based Intrusion Detection Framework for Monitoring the Traffic of Cloud Environments .................................................................................................................................................................................42

Bo Li, Peng Liu, and Li Lin

CSCloud 3
Towards an Out-of-the-Box Cloud Application Monitoring Framework .................................................................46
Jianjun Li, Wei Li, and Ming Li
CloudAuditor: A Cloud Auditing Framework Based on Nested Virtualization .................................................................50
Zhe Wang, Jin Zeng, Tao Lv, Bin Shi, and Bo Li
A New Block-Based Data Distribution Mechanism in Cloud Computing ........................................................................54
Chandrima Dadi, Ping Yi, Zongming Fei, and Hui Lu
An Analysis of Server-Side Design for Seed-Based Mobile Authentication .........................................................................60
Longbin Chen, Li-Chiou Chen, Nader Nassar, and Meikang Qiu
Efran (Ω): “Efficient Scalar Homomorphic Scheme on MapReduce for Data Privacy Preserving” .................................................................66
Konan Martin, Wenyong Wang, and Brighter Agyemang

CSCloud 4
MongoDB NoSQL Injection Analysis and Detection ........................................................................................................75
Boyu Hou, Kai Qian, Lei Li, Yong Shi, Lixin Tao, and Jigang Liu
A Framework Research of Power Grid Knowledge Recommendation and Situation Reasoning Based on Cloud Computing and CEP ............................................................................................................................................................79
Jian Su, Yu Huang, Guangxian Lv, Haitao Liu, and Peng Jin
Sequence-Based Analysis of Static Probe Instrumentation Data for a VMM-Based Anomaly Detection System ...............................................................................................................................................................................84
Ady Wahyudi Paundu, Takeshi Okuda, Youki Kadobayashi, and Suguru Yamaguchi
A Review of Intrusion Detection in 802.15.4-Based Wireless Sensor Networks .................................................................95
Mounib Khanafer, Youssef Gahi, Mouhcine Guennoun, and Hussein T. Mouftah
Security Vulnerabilities and Countermeasures for Time Synchronization in IEEE802.15.4e Networks .................................................................102
Wei Yang, Qin Wang, Yadong Wan, and Jie He

CSCloud 5
A Threshold Multi-server Protocol for Password-Based Authentication ................................................................................108
Mengxiang Guan, Jiaxing Song, and Weidong Liu
Shortest Processing Time First Algorithm for Hadoop ........................................................................................................119
Laurent Bobelin, Patrick Martineau, Di Zhao, and Haiwu He
Resource Optimization Strategy for CPU Intensive Applications in Cloud Computing Environment .................................................................................................................................................................................................124
Junjie Peng, Jinbao Chen, Shuai Kong, Danxu Liu, and Meikang Qiu

</table>
Preparation of Graphene and Its Performance Analysis .......................................................... 216

Wan Sheng

Dynamic Android Malware Classification Using Graph-Based Representations .......................... 220

Lifan Xu, Dongping Zhang, Marco A. Alvarez, Jose Andre Morales, Xudong Ma,
and John Cavazos

The Second IEEE International Conference of Scalable and Smart Cloud (SSC 2016)

SSC 1

SensIaas: A Sensor-Cloud Infrastructure with Sensor Virtualization ........................................... 232

Sunanda Bose and Nandini Mukherjee

Powering Filtration Process of Cyber Security Ecosystem Using Knowledge Graph ...................... 240

Claude Asamoah, Lixin Tao, Keke Gai, and Ning Jiang

Scalable Fog Computing with Service Offloading in Bus Networks ............................................. 247

Dongdong Ye, Maoqiang Wu, Shensheng Tang, and Rong Yu

A Remote Backup Approach for Virtual Machine Images ............................................................ 252

Zhe Wang, Jin Zeng, Tao Lv, Bin Shi, and Bo Li

An Improved Matrix Encoding Steganography Algorithm Based on H.264 Video ............................ 256

Liyun Qian, Zhitang Li, Pei Zhou, and Jian Chen

SSC 2

A Semantic Approach to Intelligent and Personal Tutoring System .............................................. 261

Maria Sette, Lixin Tao, Keke Gai, and Ning Jiang

Reducing Complexity of Diagnostic Message Pattern Specification and Recognition
on In-Bound Data Using Semantic Techniques ........................................................................... 267

Gilbert Alipui, Lixin Tao, Keke Gai, and Ning Jiang

Privacy-Aware Adaptive Data Encryption Strategy of Big Data in Cloud Computing ..................... 273

Keke Gai, Meikang Qiu, Hui Zhao, and Jian Xiong

Improving Data Governance in Large Organizations through Ontology and Linked Data ............... 279

R. J. DeStefano, Lixin Tao, and Keke Gai

Experimental Analysis of Tools Used for Doxing and Proposed New Transforms to Help
Organizations Protect against Doxing Attacks ............................................................................... 285

Parul Khanna, Pavol Zavarsky, and Dale Lindskog

SSC 3

Drug Side Effects Data Representation and Full Spectrum Inferencing Using
Knowledge Graphs in Intelligent Telehealth .................................................................................. 289

Saravanan Jayaraman, Lixin Tao, Keke Gai, and Ning Jiang

Understanding Taxonomy of Cyber Risks for Cybersecurity Insurance of Financial
Industry in Cloud Computing ........................................................................................................ 295

Sam Adam Elnagdy, Meikang Qiu, and Keke Gai
