2016 IEEE 66th Electronic Components and Technology Conference (ECTC 2016)

Las Vegas, Nevada, USA
31 May – 3 June 2016

Pages 1-653
**2016 IEEE 66th Electronic Components and Technology Conference**

**ECTC 2016**

**Table of Contents**

**Message from the ECTC 2016 General and Program Chairs**

**Executive Committee**

**Program Committee**

**Session 1: Advances in Fan-Out Packaging**

**InFO (Wafer Level Integrated Fan-Out) Technology**

Chien-Fu Tseng, Chung-Shi Liu, Chi-Hsi Wu, and Douglas Yu

**Adaptive Patterning Design Methodologies**

Craig Bishop, Boyd Rogers, Chris Scanlan, and Tim Olson

**Wafer Warpage Experiments and Simulation for Fan-Out Chip on Substrate**

Yuan-Ting Lin, Wei-Hong Lai, Chin-Li Kao, Jian-Wen Lou, Ping-Feng Yang, Chi-Yu Wang, and Chueh-An Hseih

**Foldable Fan-Out Wafer Level Packaging**

**Panel Level Advanced Packaging**

Roger McCleary, Philippe Cochet, Tom Swarbrick, ChinTiong Sim, Gurvinder Singh, Yong Chang Bum, and Andy Kyawoo Aung

**Development of Non-TSV Interposer (NTI) for High Electrical Performance Package**

Fang-Yu Liang, Hung-Hsien Chang, Wen-Tsung Tseng, J. Y. Lai, Stephen Cheng, Mike Ma, Suresh Ramalingam, Xin Wu, and Jaspree Gandhi

**Fan-Out Packaging of Microdevices Assembled Using Micro-Transfer-Printing**

**Session 2: TSV Fabrication, Characterization, and Reliability**

Small Pitch, High Aspect Ratio Via-Last TSV Module ............................................................................................................43
  Stefaan Van Huylenbroeck, Michele Stucchi, Yunlong Li, John Slabbekoorn,
  Nina Tutunjyan, Stefano Sardo, Nicolas Jourdan, Lieve Bogaerts, Filip Beirnaert,
  Gerald Beyer, and Eric Beyne

Impact of Interconnections on Vertically Stacked 20 um-Thick DRAM Chips ...............................................................50
  M. Murugesan, T. Fukushima, J. C. Bea, S. Tanikawa, T. Tanaka, H. Hashimoto,
  and M. Koyanagi

Analysis and Remedy of the Discolor on Back-Side Revealing TSV ............................................................................56
  Ming-Hung Chen, Ting-Chun Lin, Yu-Hsiang Hsiao, Yuan-Feng Chiang, Po-Wei Lu,
  Zhe-Hao Huang, and Ping-Feng Yang

Electroless and Electrolytic Copper Plating of Glass Interposer Combined with Metal Oxide Adhesion Layer for Manufacturing 3D RF Devices ...........................................................................................................................................................................62
  Zhiming Liu, Hailuo Fu, Sara Hunegnaw, Jun Wang, Michael Merschky,
  Tafadzwa Magaya, Akira Mieno, Aric Shorey, Satoru Kuramochi, Miyuki Akazawa,
  and Hobie Yun

High-Frequency Analysis of Embedded Microfluidic Cooling within 3-D ICs Using a TSV Testbed ...........................................................................................................................................................................................................................................................................................................68
  Hanju Oh, Xuchen Zhang, Gary S. May, and Muhammed S. Bakir

Electrical Model of Different Architectures of through Silicon Capacitors for High Frequency Power Distribution Network (PDN) Decoupling Operations ..............................................................................................................................74
  Khadim Dieng, Cédric Bermond, Philippe Artillan, Olivier Guiller, Thierry Lacreuz,
  Sylvain Joblot, Grégory Houzet, Alexis Farcy, Yann Lamy, and Bernard Fléchet

Gold TSVs (Through Silicon Vias) for High-Frequency III-V Semiconductor Applications ..................................................82
  K. Kröehnert, V. Glaw, G. Engelmann, R. Jordan, K. Samulewicz, K. Hauck, R. Cronin,
  M. Robertson, O. Ehrmann, and K.-D. Lang

**Session 3: Enhancement in Thermal Compression Bonding Processes**

Development of Next Generation Flip Chip Interconnection Technology Using Homogenized Laser-Assisted Bonding ...........................................................................................................................................................................................................................................88
  Yanggyoo Jung, Dongsu Ryu, Minho Gim, Choonghoe Kim, Yunseok Song,
  Jinyoung Kim, Juhoon Yoon, and Chooneung Lee

Photonic Flash Soldering on Flex Foils for Flexible Electronic Systems ...............................................................................95
  Gari Arutinov, Rob Hendriks, and Jeroen van den Brand

Thermocompression Bonding Process Design and Optimization for Warpage Mitigation of Ultra-Thin Low-CTE Package Assemblies ...........................................................................................................................................................................................................................................101
  Vidya Jayaram, Scott McCann, Ting-Chia Huang, Satomi Kawamoto, Raj Pulugurtha,
  Vanessa Smet, and Rao Tummala

High-Throughput Thermal Compression Bonding of 20 um Pitch Cu Pillar with Gas Pressure Bonder for 3D IC Stacking ...........................................................................................................................................................................................................................................................................................................108
  Ling Xie, Sunil Wickramanayaka, Ser Choong Chong, Vasarla Nagendra Sekhar,
  and Daniel Ismael Cereno
Chip Rework on Ceramic and Organic Modules ...............................................................115
Richard Langlois and Christian Bergeron

Wafer Level Multi-chip Gang Bonding Using TCNCF ......................................................122
Seokgeun Ahn, Hwankyu Kim, Dong Wook Kim, David Hiner, Keunsoo Kim,
Taekyeong Hwang, Minjae Lee, Daebyoung Kang, and Juhoon Yoon

3D Stacking Using Bump-Less Process for Sub 10um Pitch Interconnects ....................128
Jaber Derakhshandeh, Inge De Preter, Carine Gerets, Lin Hou, Nancy Heylen,
Eric Beyne, Gerald Beyer, John Slabbeekoom, Vikas Dubey, Anne Jourdain,
Goedele Potoms, Fumihiro Inoue, Geraldine Jamieson, Kevin Vandersmissen,
Samuel Suhard, Tomas Webers, Giovanni Capuz, Teng Wang, Kenneth June Rebibis,
and Andy Miller

Session 4: Next Generation Substrates for Package Integration

Large Panel Level Fan Out Package Built up Study with Film Type Encapsulation ............134
Hiroshi Takahashi, Hirokazu Noma, Naoya Suzuki, Yutaka Nomura, Aya Kasahara,
Nozomu Takano, and Toshihisa Nonaka
Studying the Effect of Stackup Structure of Large Die Size Fan-In Wafer Level Package
at 0.35 mm Pitch With Varying Ball Alloy to Enhance Board Level Reliability .................140
Kuei Hsiao (Frank) Kuo, Jerry Chiang, Kui Chang, Jack Shu, F. L. Chien, Katch Wang,
and Rick Tain
2/2um Embedded Fine Line Technology for Organics Interposer Applications .................147
Dyi-Chung Hu, Wen-Liang Yeh, Yu-Hua Chen, and Ray Tain
Full-Sized Panel Photodesmear for Via Residue Cleaning ...........................................153
Masahito Namai, Akira Aiba, Hiroko Suzuki, Hiroki Horibe, Hajime Kikuiri, Masaki Miura,
Kazuki Arikawa, Noritaka Takezoe, Shinichi Eindo, Shintaro Yabu, and Tomoyuki Habu
A Novel Photosensitive Dry-Film Dielectric Material for High Density Package ..............159
Xiaozhu Wei and Yoko Shibusaki
The Study on Parameters Affecting Depth-Wise Photo-Curing Process Based
on Interaction Between Light and Metal Surface .........................................................165
Giho Jeong, Choonhee Lee, Jinil Kang, Okseon Lee, and Anseob Shin
Demonstration of 20 um I/O Pitch RDL Using a Novel, Ultra-Thin Dry Film
Photosensitive Dielectric for Panel-Based Glass Interposers .......................................172
Atsushi Kubo, Chandrasekharan Nair, Ryuta Furuya, Tomoyuki Ando, Hao Lu,
Fuhan Liu, Venky Sundaram, and Rao Tummala
Session 5: Novel Materials, Devices and 3D Interconnects

Tunable Curvature of Large Visible CMOS Image Sensors: Towards New Optical Functions and System Miniaturization .......................................................... 178
  B. Chambion, L. Nikitushkina, Y. Gaeremynck, W. Jahn, E. Hugot, G. Moulin, S. Getin,
  A. Vandeneynde, and D. Henry

Packaging Architecture for Fluidic Components in Microfluidic PCBs ........................................ 188
  Sarkis Babikian, G. P. Li, and Mark Bachman

Biopackaging of Intracranial Pressure Microsystem for Multimodality Neuro Monitoring of Severe Head Injury Patients ................................................................. 194
  Ramona Damalerio, Kwan Ling Tan, Ruiqi Lim, Weiguo Chen, Yuan Gao, Ning Xue,
  Ming-Yuan Cheng, and Jai Prashanth Rao

Integration of Micro-Fabricated Scalar Magnetometer with the Combination of Mx and Mz Techniques ................................................................. 200
  Qi Gan, Jintang Shang, Lei Wu, and Yu Ji

Highly-Effective Integrated EMI Shields with Graphene and Nanomagnetic Multilayered Composites ................................................................. 206
  Atom O. Watanabe, Seungtaek Jeong, Subin Kim, Youngwoo Kim, Junki Min,
  Denny Wong, Markondeya R. Pulugurtha, Ravi Mullapudi, Joungho Kim,
  and Rao R. Tummala

Double-Densified Vertically Aligned Carbon Nanotube Bundles for Application in 3D Integration High Aspect Ratio TSV Interconnects .................................................. 211
  Wei Mu, Josef Hansson, Shuangxi Sun, Michael Edwards, Yifeng Fu, Kjell Jeppson,
  and Johan Liu

Metallic Nanoparticle Based Interconnect for Heterogeneous 3D Integration .................................. 217
  H. W. Van Zeijl, Y. Carisey, A. Damian, R. H. Poelma, A. Zinn, and C. Q. Zhang

Session 6: Solder Joint Reliability Characterization and Modeling

Solder Joint Fatigue Life Prediction of Electronic Packages Using Combined FEA and Peridynamics ................................................................. 225
  Forrest Baber and Ibrahim Guven

Life Prediction and RUL Assessment of Fine Pitch Solder Joint Fuze Electronics Under Mechanical Shock Loads Up to 50,000g .......................................................... 232
  Pradeep Lall, Kalyan Dornala, Jeff Suhling, Ryan Lowe, and Jason Foley

Solder Joint Reliability Investigation of Chip Scale Package with Plastic Core Solder Balls on Thermomechanically Loaded PCBs .................................................. 244
  Fama Ghaffari Ashtiani, Allen Jose George, Thomas Heinrich, Simon Wolfangel,
  Hossein Shirangi, and Christian Klein

Characterization of Thermal Cycling Ramp Rate and Dwell Time Effects on AF (Acceleration Factor) Estimation ................................................................. 251
  K. C. Wu, C. H. Lee, and Kuo-Ning Chiang
Session 7: 2.5 and 3D Process and Integration Technologies

A Cost-Effective, CMP-Less, Via-Last TSV Process for High Density RDL Applications ......................................................277

King-Jien Chui, Woon Leng Loh, Chunmei Wang, Ka-Fai Chang, Qin Ren, Gilho Hwang, Hung-Ming Chua, and Mingbin Yu

End-to-End Integration of a Multi-die Glass Interposer for System Scaling Applications ..............................................................283

Brittany Hedrick, Vijay Sukumar, Benjamin Fasano, Christopher Tessler, John Garant, Jorge Lubguban, Sarah Knickerbocker, Michael Cranmer, Koushik Ramachandran, Ian Melville, Daniel Berger, Matthew Angyal, Richard Indyk, David Lewison, Charles Arvin, Luc Guerin, Maryse Courmoyer, Marc Phaneuf Luc Ouellet, Jean Audet, Franklin Baez, Shidong Li, and Subramanian Iyer

Transfer and Non-transfer 3D Stacking Technologies Based on Multichip-to-Wafer

Self-Assembly and Direct Bonding ..................................................................................................................................................289

T. Fukushima, H. Hashiguchi, H. Kino, T. Tanaka, M. Murugesan, J. Bea, H. Hashimoto, K. Lee, and M. Koyanagi

Cost Comparison of Different TSV Implementation Options ...........................................................................................................295

Dimitrios Velenis, Stefaan Van Huylenbroeck, Nancy Heylen, Kevin Vandersmissen, Anne Jourdain, Andy Miller, and Eric Beyne

Development of 3D Thin WLCSP Using Vertical Via Last TSV Technology with Various
Temporary Bonding Materials and Low Temperature PECVD Process ..............................................................................................302

Zhiyi Xiao, Jun Fan, Yulong Ren, Yang Li, Xiaohua Huang, Daquan Yu, and Wei Zhang

Silicon Interposer Warpage Study for 2.5D IC without TSV Utilizing Glass Carrier CTE
and Passivation Thickness Tuning ..................................................................................................................................................310

Chieh-Lung Lai, Hung-Yuan Li, Allen Chen, and Terren Lu

Robust and Low Cost TSV Backside Reveal for 2.5D Multi-Die Integration ....................................................................................316

Chongshen Song, Lei Wang, Yue Yang, Zhun Wang, Wenqi Zhang, and Liqiang Cao

Session 8: Innovations in TSV Interconnect and Bonding Technologies

2.5D IC Micro-Bump Materials Characterization and IMCs Evolution Under Reliability Stress Conditions ..............................................................................................322

Fluxless Bonding Process Using Thermo-Compression Micro-Scrub for 61 µm Pitch
SnAg Solder 3-D Interconnections ........................................................................................................329
Katsuyuki Sakuma, Buck Webb, Xiao Hu Liu, John Knickerbocker, Thomas Weiss,
Shidong Li, Hongqing Zhang, Conor R. Thomas, Eric Perfecto, Tingge Xu, and Hongbing Lu

The Development and Technological Comparison of Various Die Stacking
and Integration Options with TSV Si Interposer ......................................................................................336
Mike Ma, Stephen Chen, J. Y. Lai, Terrence Lu, Alex Chen, G. T. Lin, C. H. Lu,
Cheng-Hsiang Liu, and Shih-Liang Peng

All-Copper Flip Chip Interconnects by Pressureless and Low Temperature Nanoparticle
Sintering ..................................................................................................................................................343
Jonas Zürcher, Luca Del Carro, Gerd Schlottig, Daniel Nilsen Wright,
Astrid-Sofie B. Vardøy, Maaike M. Visser Taklo, Tobias Mills, Uwe Zschenderlein,
Bernhard Wunderle, and Thomas Brunschwhiler

Novel W2W/C2W Hybrid Bonding Technology with High Stacking Yield Using
Ultra-Fine Size, Ultra-High Density Cu Nano-Pillar (CNP) for Exascale 2.5D/3D
Integration ...............................................................................................................................................350
K. W. Lee, C. Nagai, J. C. Bea, T. Fukushima, T. Tanaka, M. Koyanagi, R. Suresh,
and X. Wu Xilinx

Mechanical and Thermal Characterization of TSV Multi-chip Stacked Packages
for Reliable 3D IC Applications ..................................................................................................................356
Ho-Young Son, Tackeun Oh, Joo-Wan Hong, Byeong-Do Lee, Ji-Hyuk Shin,
Sung-Ho Kim, and Nam-Seog Kim

Understanding the Behavior of SnAg Bumps at 10 µm Pitch and Below for Imaging
and Microdisplay Application ....................................................................................................................361
D. Taneja, M. Volpert, G. Lasfargues, T. Catelain, D. Henry, and F. Hodaj

Session 9: Design and Analysis of Power Delivery Systems

Power Delivery Design and Analysis of 14nm Multicore Server CPUs with Integrated
Voltage Regulators ......................................................................................................................................368
Krishna Bharath and Srikrishnan Venkataraman

Magnetic Materials and Design Trade-Offs for High Inductance Density, High-Q
and Low-Cost Power and EMI Filter Inductors .........................................................................................374
Teng Sun, P. Markondeva Raj, Junki Min, Zihan Wu, Himani Sharma,
Tadashi Takahashi, Keiji Takemura, Hobie Yun, Francesco Carobolante, and Rao Tummala

Signal and Power Integrity Analysis on Integrated Fan-Out PoP (InFO_PoP)
Technology for Next Generation Mobile Applications ..............................................................................380
Chuei-Tang Wang and Douglas Yu

Analysis and Measurement of Power Integrity and Jitter Impacts on Thin-Core
and Coreless Packages ...............................................................................................................................386
Yeon-Chang Hahm, Ming Li, John Yan, Yuri Tretiakov, Hai Lan, Scott Chen,
and Simon Wang

Measurement-Based Method for Decomposing PDN Matrix Loop Inductances ................................393
Javid Mohamed, Varin Srboonlu, Tim Michalka, and Larry Smith
Impact of Channel Loading to Power Distribution Network Designs .......................................................... 401
  Changwook Yoon and Dan Oh

Design and Analysis of Power Distribution Network (PDN) for High Bandwidth Memory
(HBM) Interposer in 2.5D Terabyte/s Bandwidth Graphics Module .......................................................... 407
  Kyungjun Cho, Youngwoo Kim, Hyungsuk Lee, Heegon Kim, Sumin Choi, Subin Kim,
  and Joungho Kim

Session 10: Novel Interconnect Materials

Novel Low Cost Bumping Process with Non-strip Type Photosensitive Resin and Injection Molded Solder (IMS) for Fine Pitch Flip Chip Joining .......................................................... 413
  Toyohiro Aoki, Takashi Hisada, Eiji Nakamura, Yasuharu Yamada, Hiroyuki Mori,
  Yasumitsu Orii, Seiichirou Takahashi, Jun Mukawa, Chihiro Kobata, Kenzou Ohkita,
  and Koichi Hasegawa

Design and Fabrication of Silver Solid Solution Layer on Silicon and Its Solid-State Bonding Applications .......................................................... 420
  Yi-Ling Chen, Yongjun Huo, and Chin C. Lee

Die Attach Material for Power Semiconductor Having Nano-Level Sn-Cu Diffusion Control .......................................................... 426
  Hiroaki Ikeda, Shigenobu Sekine, Ryuji Kimura, Koichi Shimokawa, Keiji Okada,
  Hiroaki Shindo, Tatsuya Ooi, Rei Tamaki, and Makoto Nagata

Exploring Bismuth as a New Pb-Free Alternative for High Temperature Electronics .......................................................... 432
  Junghyun Cho, Sandeep Mallampati, Russell Tobias, Harry Schoeller, Liang Yin,
  and David Shaddock

Porous Cu3Sn Formation in Cu-Sn IMC-Based Micro-Joints .......................................................... 439
  Yaodong Wang, David T. Chu, and King-Ning Tu

Solder Process for Fluxless Solder Paste Applications .......................................................... 447
  Alexander Hanss, Matthias Hutter, Joerg Trodler, and Gordon Elger

Improved Joint Strength with Sintering Bonding Using Microscale Cu Particles by an Oxidation-Reduction Process .......................................................... 455
  Xiangdong Liu and Hiroshi Nishikawa

Session 11: Optical Interconnects and 3D Photonics

Scalable Optical Coupling between Silicon Photonics Waveguides and Polymer Waveguides .......................................................... 461
  Antonio La Porta, Roger Dangel, Daniel Jubin, Norbert Meier, Daniel Chelladurai,
  Folkert Horst, and Bert Jan Offrein

Multi-layer Electro-Optical Circuit Board Fabrication on Large Panel .......................................................... 468
  Henning Schröder, Marcel Neitz, Simon Whalley, Christian Herbst, and Christopher Frey

Low-Loss Characteristics of a Multimode Polymer Optical Waveguide at 1.3 um Wavelength on an Electrical Hybrid LSI Package Substrate .......................................................... 477
  Takeru Amano, Shigenari Ukita, Yoshiyuki Egashira, Mikko Sasaki, Akihiro Noriki,
  Masahiko Mori, Kazuhiro Kurata, and Yoichi Sakakibara
3D Silicon Photonics Packaging Based on TSV Interposer for High Density On-Board Optics Module ..............................................................................................................................................................483
Yan Yang, Mingbin Yu, Qing Fang, Junfeng Song, Xiaoguang Tu, Patrick Guo-Qiang Lo, and Rusli

Graded-Index Multimode Polymer Optical Waveguide Enabling Low Loss and High Density 3D On-Board Integration ..............................................................................................................................................................................................490
Akira Yamauchi, Yoshiie Morimoto, Tadayuki Enomoto, Kyuta Suzuki, Hikaru Masuda, and Takaaki Ishigure

Design and Demonstration of Micro-Mirrors and Lenses for Low Loss and Low Cost Single-Mode Fiber Coupling in 3D Glass Photonic Interposers ...........................................................................................................................................................................................................................................................................................................................................497
Bruce C. Chou, William Vis, Bilal Khan, Ryuta Furuya, Fuhan Liu, Venky Sundaram, and Rao Tummala

Wet Etched Silicon Interposer for the 2.5D Stacking of CMOS and Optoelectronic Dies ..........................................................................................................................................................................................504
Chenhui Li, Barry Smalbrugge, Tjibbe de Vries, Ripalta Stabile, and Oded Raz

Session 12: Electromigration, Warpage, and Material Characterization
The Nonlinearity of Stress Evolution in Polymer-Metal Composite Thin Films During Thermal Treatment ..................................................................................................................................................................................................................................................................................................................................................510
Heng Li, Gong Cheng, Gaowei Xu, and Le Luo

Substrate Trace Modeling for Package Warpage Simulation ............................................................................................................................................................................................................................................................................................................................................516
Mingji Wang and Brendan Wells

Wafer Warpage Characterization of Multi-layer Structure Composed of Diverse Passivation Layers and Re-Distribution Layers for Cost-Effective 2.5D IC Packaging Alternatives ...........................................................................................................................................................................................................................................................................................................................................524
Cheng-Hsiang Liu, Chen-Hong Chiu, Hsiao-Chun Huang, Lu-Yi Chen, Chang-Lun Lu, and Shih-Ching Chen

Measurement of the Comprehensive Viscoelastic Properties of Advanced EMC Using FBG Sensor ...........................................................................................................................................................................................................................................................................................................................................531
Yong Sun, Hyun-Seop Lee, and Bongtae Han

Electromigration Induced Stress in Lead-Free Solder Joints ...........................................................................................................................................................................................................................................................................................................................................538
Jiamin Ni, Antoinette Maniatty, Yong Liu, Jifa Hao, and Matt Ring

Peridynamic Direct Concentration Approach by Using ANSYS ...........................................................................................................................................................................................................................................................................................................................................544
S. W. Han, C. Diyaroglu, S. Oterkus, E. Madenci, E. Oterkus, Y. Hwang, and H. Seol

Electromigration Induced Voiding and Resistance Change in Three-Dimensional Copper through Silicon Vias ...........................................................................................................................................................................................................................................................................................................................................550
Marco Rovitto and Hajdin Ceric
Session 13: Substrate Embedding and Advanced Flip-Chip Packaging

Embedded Multi-die Interconnect Bridge (EMIB) — A High Density, High Bandwidth Packaging Interconnect

Ravi Mahajan, Robert Sankman, Neha Patel, Dae-Woo Kim, Kemal Aygun, Zhiguo Qian, Yidnekachew Mekonnen, Islam Salama, Sujit Sharan, Deepti Iyengar, and Debendra Mallik

Design of High Efficiency Integrated Voltage Regulators with Embedded Magnetic Core Inductors

Fluxless Chip Join Process Using Formic Acid Atmosphere in a Continuous Mass Reflow Furnace

Maud Samson, Valérie Oberson, Isabelle Paquin, Clément Fortin, Jean-Claude Raymond, Charles Bureau, Michael Barnes, Xike Zhao, and David Wright

Eternal Packages: Liquid Metal Flip Chip Devices

Assane Ndieguene, Pierre Albert, Clément Fortin, Valérie Oberson, and Julien Sylvestre

Toward High-Yield 3D Self-Alignment of Flip-Chip Assemblies via Solder Surface Tension

Yves Martin, Jae-Woong Nah, Swetha Kamlapurkar, Sebastian Engelmann, and Tymon Barwicz

Ultra Fine Pitch / Low Cost FCCSP Package and Chip Package Interaction (CPI) for Advanced CMOS Nodes

Yen-Liang Lin, Chung-Shi Liu, and Douglas Yu

Session 14: Advancement on Wirebond Process and Reliability

Copper Ball Voids for Pd-Cu Wires: Affecting Factors and Methods of Controlling

Chu-Chung (Stephen) Lee, Varughese Mathew, Tuanh Tran, Rusli Ibrahim, and Poh-Leng Eu

Wire Bonding Looping Solutions for Advanced High Pin Count Devices

Ivy Qin, Basil Milton, Gary Schulze, Cuong Huynh, Bob Chylak, and Nelson Wong

Reliable Manufacturing of Heavy Copper Wire Bonds Using Online Parameter Adaptation

Tobias Meyer, Andreas Unger, Simon Althoff, Walter Sextro, Michael Brökelmann, Matthias Hunstig, and Karsten Guth

Corrosion Behavior of Cu-Al Intermetallic Compounds in Copper Wire Bonding in Chloride-Containing Accelerated Humidity Testing

Dong Liu, Haibin Chen, Jingshen Wu, and Edward Then
Principal Components Regression Model for Prediction of Acceleration Factors for Copper-Aluminum Wirebonds Subjected to Harsh Environments ................................................................. 637
  Pradeep Lall, Shantanu Deshpande, and Luu Nguyen

Solid-State Reactions of Silver and Aluminum Associated with Silver Wire Bonds .................................................. 648
  Shao-Wei Fu and Chin C. Lee

The Electrical Reliability of Silver Wire Bonds under High Temperature Storage ....................................................... 654
  Michael Mayer, Di Erick Xu, and Kieran Ratcliffe

Session 15: Advanced Assembly Technology Solutions

Two-Phase Flow Simulation of Molded Underfill Process to Mitigate Void and Assure Reliability at Product Level .......................................................................................................................... 660
  Kwang Won Choi, In Hak Baick, Donghwan Lee, Eunjung Lee, Eunmi Kwon, Sangwoo Pae, and Jongwoo Park

Effect of High Tg Mold Compound on MEMS Sensor Package Performance .............................................................. 666
  Yeonsung Kim, Dipak Sengupta, Benoit Dufort, Dapeng Liu, and Michael Zybinski

BOP Design of the Substrate to Decrease Overall Cost of FC Packaging ...................................................................... 673
  Fletcher (Cheng Piao) Tung, Max (Chin Yu) Lu, Albert (Chang Yi) Lan, Vincent (Wen-Hsien) Huang, Raymond ( Kwok Cheung) Tsang, and Edward Law

Process Capability and Elastomer Stamp Lifetime in Micro Transfer Printing .............................................................. 680
  David Gomez, Kanchan Ghosal, Matthew A. Meitl, Salvatore Bonafede, Carl Prevatte, Tanya Moore, Brook Raymond, David Kneeberg, Alin Fecioru, António Jose Trindade, and Christopher A. Bower

Solving Inter-Layer Dielectric Crack with Copper Wire: A Silicon — Package Co Design Approach ........................................................................................................................................... 688
  Ernesto P. Rafael Jr., Mark Gerald R. Pinlac, and Joel G. Raopas

Dynamic Warpage Characterization and Reflow Soldering Defects of BGA Packages ................................................... 694
  Kaiqiang Peng, Weihua Yang, Linlin Lai, Wei Xu, and Lei Feng

In Situ Measurement of Stress Development in ECA for Die-Attachment of Electronic Devices .................................................. 700
  Eike Möller, Alexander Schiiftmacher, Andi Wijaya, and Jürgen Wilde

Session 16: Performance Enhanced Adhesives, Underfills, and TIMs

Heat Dissipation Enhancement of 2.5D Package with 3D Graphene and 3D Boron
Nitride Networks as Thermal Interface Material (TIM) ........................................................................................................ 707
  Manuela Loeblein, Siu Hon Tsang, Yong Han, Xiaowu Zhang, and Edwin Hang Tong Teo

Inline Monitoring of Epoxy Molding Compound in Transfer Molding Process for Smart Power Modules ........................................................................................................... 714
  Burcu Kaya, Jan-Martin Kaiser, Karl-Friedrich Becker, Tanja Braun, and Klaus-Dieter Lang

Development of Highly Thermal Conductive Adhesive Film for High Performance Power Modules .................................................. 722
  Fumikazu Komatsu, Issei Aoki, Jyunya Sato, Hiroshi Takasugi, and Shin Teraki
   Marie-Claude Paquet, Catherine Dufort, Thomas E. Lombardi, Tuhin Sinha, Masahiro Hasegawa, Kodai Okoshi, and Kazuyuki Kohara

Effects of Cooling Processes and Silica Filler Contents of Solder ACFs (Anisotropic Conductive Films) on the Joints Reliability .................................................................737
   Shuye Zhang and Kyung-Wook Paik

Ceramic-Metal Composite Filler for Thermally Conductive Underfill ........................................743
   Chia-Chi Tuan, Gang Lian, Kyoung-Sik Moon, and Ching-Ping Wong

Development of Encapsulant Material for Molded Underfill for Fine Pitch Flip Chip Packages .................................................................749
   Takayuki Tsuji, Takahiro Akashi, Naoki Watanabe, Kyoko Nishidono, and Masashi Nakamura

Session 17: Advancements in Characterization and Reliability Methods

Innovations in Fault Isolation Methods for 3D Packages with 10X Improvement in Accuracy ..............................................................................................................................755
   Mayue Xie, Tom Begala, Kasemsak Kijkanjanapaiboon, and Deepak Goyal

Global and Local Characterization of Passivated Aluminum Metallization Film for Extracting Elastoplastic Constitutive Model .................................................................766
   Hung-Yun Lin and Siva P. Gurrum

Crevice Corrosion of Ball Bond Intermetallics of Cu and Ag Wire ........................................774
   M. van Soestbergen, A. Mavinkurve, J. J. M. Zaal, G. M. O’Halloran, R. T. H. Rongen, and M. L. Farrugia

In-Situ Warpage Characterization of BGA Packages with Solder Balls Attached During Reflow with 3D Digital Image Correlation (DIC) .....................................................782
   Yuling Niu, Huayan Wang, Shuai Shao, and S. B. Park

Characterization of Moisture Induced Die Stresses in Flip Chip Packaging ................................789
   Quang Nguyen, Jordan C. Roberts, Jeffrey C. Suhling, Richard C. Jaeger, and Pradeep Lall

Reliability of Copper-Plated Through-Package-Via (TPV) in Glass Packages with in-Situ Stress Measurements Using Raman Spectroscopy ...........................................799
   Kaya Demir, Abdellah Benali, Venky Sundaram, P. Markondeya Raj, and Rao Tummala

Use of Digital Signal Characteristics for Solder Joint Failure Precursors ..................................806
   Jinwoo Lee and Daeil Kwon

Session 18: Additive Fabrication Technologies for Packaging

Conductive and Stretchable Silver-Polymer Blend for Electronic Applications ..........................812
   Todd Houghton, Jignesh Vanjaria, and Hongbin Yu

Fabrication of Terahertz Components Using 3D Printed Templates ...........................................817
   Jennifer A. Byford, Zachary Purtill, and Premjeet Chahal
3-D Inkjet Printed Ultra-Wideband Equi-Angular Spiral Antennas ...............................................................823
   Xing Lan, Maggie Yihong Chen, Xuejun Lu, Wesley Chan, Jun Yu, Neal Yamamoto,
   and May Tan

Novel High-Temperature, High-Power Handling All-Cu Interconnections
through Low-Temperature Sintering of Nanocopper Foams ...............................................................829
   Ninad Shahane, Kashyap Mohan, Rakesh Behera, Antonia Antoniou,
   Pulugurtha Raj Markondeya, Vanessa Smet, and Rao Tummala

Selective Laser Melting for Additive Manufacturing of High-Temperature Ceramic
Circuit Carriers .............................................................................................................................................837
   Aarief Syed-Khaja and Joerg Franke

Low Warpage Wafer Level Transfer Molding Post 3D Die to Wafer Assembly ........................................843
   Francisco Cadacio Jr., Teng Wang, Abdellah Salahouelhadj, Giovanni Capuz,
   Goedele Potoms, Kenneth June Rebibis, Gerald Beyer, Eric Beyne, Wilfred Gal,
   Jurrian Zijl, Sebastiaan Kersjes, and Henk Wensink

Enabling Rapid Production and Mass Customisation of Electronics Using Digitally
Driven Hybrid Additive Manufacturing Techniques ..................................................................................849
   Thomas Wasley, Ji Li, Robert Kay, Duong Ta, Jonathon Shephard, Jonathan Stringer,
   Patrick Smith, Emre Esenturk, and Colm Connaughton

Session 19: MEMS and Sensor Technologies

Hermetic Wafer Level Thin Film Packaging for MEMS ...........................................................................857
   Jeffrey Bo Woon Soon, Navab Singh, Enes Calayir, Gary K. Fedder, and Gianluca Piazza

Chip-Scale Integration of a SERF-Regime Optical Magnetometer ..........................................................863
   Lei Wu, Jintang Shang, Qi Gan, and Yu Ji

 Reliable 300 mm Wafer Level Hybrid Bonding for 3D Stacked CMOS Image Sensors ...........................869
   S. Lhostis, A. Farcy, E. Deloffre, F. Lorut, S. Mermoz, Y. Henrion, L. Berthier, F. Bailly,
   D. Scevola, F. Guyader, F. Gigon, C. Besset, S. Pellissier, L. Gay, N. Hotellier,
   A. -L. Le Berrigo, S. Moreau, V. Balan, F. Fournel, A. Jouve, S. Chéramy, M. Arnoux,
   B. Rebhan, G. A. Maier, and L. Chitu

Demonstration of a Packaged Capacitive Pressure Sensor System Suitable for Jet
Turbofan Engine Health Monitoring ..........................................................................................................877
   Maximilian C. Scardelletti, Jennifer L. Jordan, Roger D. Meredith, Kevin Harsh,
   Evan Pilant, Michael W. Ursey, Glenn M. Beheim, Gary W. Hunter, and Christian A. Zorman

LiTaO3 Capping Technology for Wafer Level Chip Size Packaging of SAW Filters ...............................889
   Kai Zoschke, Matthias Wegner, Christina Lopper, Matthias Klein, Richard Gruenwald,
   Clemens Schoenbein, and Klaus-Dieter Lang

Organic Chip-Scale Physics Packages for MEMS Atomic Clocks ............................................................897
   Jongchelp Park, Tae Hyun Kim, Chung-Mo Yang, Hee Yeoun Kim, and Taeg Yong Kwon

Microfluidic Cooling for Distributed Hot-Spots .......................................................................................903
   Yudan Pi, Wei Wang, Jing Chen, and Yufeng Jin
Session 20: Flip-Chip: Bonding, Materials, and Reliability

Study of Crystal Orientation and Microstructure in Sn-Bi and Sn-Ag-Cu Solder with Thermal Compression Bonding and Mass Reflow ..............................................................909
Kei Murayama, Mitsuhiro Aizawa, and Takashi Kurihara

A Study on the Double Layer Non Conductive Films (NCFs) for Fine-Pitch Cu-Pillar/Sn-Ag Micro-Bump Interconnection .................................................................917
SeYong Lee, Ji-Won Shin, Hyeong Gi Lee, Young Soon Kim, and Kyung-Wook Paik

Use of Non-conductive Film (NCF) with Nano-Sized Filler Particles for Solder Interconnect: Research and Development on NCF Material and Process Characterization ...........................................................................................................923
Tatsuo Nagamatsu, Keiji Honjo, Katsuyuki Ebisawa, Tomoyuki Ishimatsu, Takayuki Saito, Daichi Motomura, and Hidekazu Yagi

A Room Temperature Flip-Chip Technology for High Pixel Count Micro-Displays and Imaging Arrays ...........................................................................................................929
F. Marion, S. Bisotto, F. Berger, A. Gueugnot, L. Mathieu, D. Henry, F. Templier, and T. Catelain

Thermal Compression Bonding of 30um Pitch Cu Pillar Microbump on Organic Substrate with Bare Cu Bondpad ..................................................................................936
K. Y. Au, F. X. Che, Jong-Kai Lin, Hsiang-Yao Hsiao, Xiaowu Zhang, Sharon Lim, Jie Li Aw, and Alvin Chow

Improving Copper Pillar Interconnection on Embedded Trace Substrates .................................................................................................................................943
Brendan C. Wells

Low Temperature Cu Nanorod/Sn/Cu Nanorod Bonding Technology for 3D Integration ..................................................................................................................951
Li Du, Tielin Shi, Zirong Tang, Junjie Shen, and Guanglan Liao

Session 21: High-Speed Systems: Design and Analysis

A Feasibility Study on 100Gbps-Per-Channel Die-to-Die Signal Transmission on Silicon Interposer-Based 2.5-D LSI with a Passive Digital Equalizer ...................................................957
Ryuichi Oikawa

Fast and Accurate Modelling of Large TSV Arrays in 3D-ICS Using a 3D Circuit Model Validated Against Full-Wave FEM Simulations and RF Measurements ...........................................966
M. Rack, J. -P. Raskin, X. Sun, G. Van der Plas, P. Absil, and E. Beyne

Design and Demonstration of 2.5D Glass Interposers as a Superior Alternative to Silicon Interposers for 28 Gbps Signal Transmission .......................................................................................972
Brett Sawyer, Bruce C. Chou, Jialing Tong, William Vis, Kadappan Panayappan, Shuhui Deng, Hugues Tournier, Venky Sundaram, and Rao Tummala

Investigation of Package Crosstalk and Impact to 28-32Gbps Transceiver Jitter Margin ..................................................................................................................978
Hong Shi, Siow Chek Tan, and Sarajuddin Niazi

Improved Package Modeling and Correlation Methodology for High Speed IO Design ..................................................................................................................985
Cemil S. Geyik, Zhichao Zhang, and Kemal Aygün
Co-Design of a High Performance 12-Bit 8GHz DDR4 Switch on a Laminate-Based CSP (Chip Scale Packaging) Technology ...........................................................................................................................................................................992
Ming Li, Oscar Moreira-Tamayo, and Rajen Murugan

Behavioral Circuit Models of Data Clocked and Reference Clock Driven Retimers for Signal Integrity Transient Simulation ..........................................................................................................................................................................................997
Zhaoqing Chen

Session 22: Mechanical Modeling and Characterization of Interposer and Wirebonds

Effect of Silicone Gel on the Reliability of Heavy Aluminum Wire Bond for Power Module During Thermal Cycling Test .................................................................................................................................1005
Ling Xu, Miaocao Wang, Yang Zhou, Zhengfang Qian, and Sheng Liu

Cohesive Zone Parameters for a Cyclically Loaded Copper-Epoxy Molding Compound Interface ..................................................................................................................................................................................1011
David Samet, Abhishek Kwatra, and Suresh K. Sitaraman

Contact Pressure and Load Measurement Techniques for Applications in Semiconductor Packaging ..............................................................................................................................................................................1019
Sivakumar Yagnamurthy, Steven Klein, Nicholas Haehn, Seth Reynolds, Tannaz Harirchian, Chia-Pin Chiu, Shankar Devasenathipathy, Pramod Malatkar, Haowen Liu, and Shaw Fong Wong

Multiphysics Life-Prediction Model Based on Measurements of Polarization Curves for Copper-Aluminum Intermetallics ..................................................................................................................................................................................1027
Pradeep Lall, Yihua Luo, and Luu Nguyen

Simulation Methods for Crack Initiation and Propagation in Bulk Mold Material of Electro Mechanical Components ..............................................................................................................................................................................1039
Fabian Welschinger and Przemyslaw Jakub Gromala

Stress Concentration and Profile under Thermal Cycling Test in Power Device Heat Dissipation Structures Using Double-Side Chip Bonding with Ag Sintered Layer on Cu Plate ..........................................................................................................................................................................................1047
Kensuke Osonoe, Masaaki Aoki, Takahiro Asai, Yoshio Murakami, Hitoshi Kida, Goro Yoshinari, and Nobuhiko Nakano

Determination of Adhesion Strength of EMC/PSR Interface in Thin Packages Using Modified Offset Single Cantilever Adhesion Test ..............................................................................................................................................................................1054
Kenneth Mahan and Bongtae Han

Session 23: Transceivers and Silicon Photonic Modules

A Four-Channel Silicon Photonic Carrier with Flip-Chip Integrated Semiconductor Optical Amplifier (SOA) Array Providing >10-dB Gain ..................................................................................................................................................................................1061
Fuad E. Doany, Russell Budd, Laurent Scharres, Tam Huynh, Michael Wood, Daniel Kuchta, Nicolas Dupuis, Clinit Schow, Benjamin Lee, M. Moehrle, A. Sigmund, W. Rehbein, T. Y. Liow, L. W. Luo, and G. Q. Lo
Session 24: Reliability of Interconnects

Effect of Environmental and Testing Conditions on Board Level Vibration ........................................1105
   R. Roucou, J. J. M. Zaai, J. Jalink, R. De Heus, and R. Rongen

Impact of Lead Free Solder Joint Orientation on Multi-terminal Passive Components During FCBGA Board Level Reliability .................................................................1112
   Jaimal M. Williamson, Gregory T. Ostrowicki, Vikas Gupta, Siva P. Gurrum, and Andy Zhang

Cyclic Stress-Strain Behavior of SAC305 Lead Free Solder: Effects of Aging, Temperature, Strain Rate, and Plastic Strain Range .................................................................1119
   Nianjun Fu, Jeffrey C. Suhling, and Pradeep Lall

The Mechanism of Dense Interfacial Voids and Its Impact on Solder Joint Reliability ..........................1128
   Pilin Liu, Cyber Lin, Balu Pathangey, and Deepak Goyal

Choice of Intermetallic Compounds for Structural Applications in Near Submicron Joints ..................1135
   J. J. Yu, J. Y. Wu, L. J. Yu, and C. R. Kao

Reliability Assessment and Microstructure Characterization of Cu Pillars Assembled on Si and Glass Substrates .........................................................................................1141
   Mohammed Genanu, Francis Mutuku, Eric J Cotts, Eric Perfecto, Scott Pollard, Aric Shorey, and Babak Arfaei
Cu Bump Flip Chip Package Reliability on 28nm Technology .................................................................1148

P. H. Tsao, Steven Hsu, Y. L. Kuo, J. H. Chen, Abel Chang, H. P. Pu, L. H. Chu,
and M. J. Lii

Session 25: Wafer-Level CSP and Heterogeneous Integration

UFI (UBM-Free Integration) Fan-In WLCSP Technology Enables Large Die Fine Pitch Packages .................................................................................................................................1154

Max K. C. Wu, Chung Shi Liu, and Douglas Yu

Implementation of Keep-Out-Zones to Protect Sensitive Sensor Areas During Backend Processing in Wafer Level Packaging Technology .................................................................................................................................1160

André Cardoso, Mariana Pires, Raquel Pinto, Elisabete Fernandes, Isabel Barros,
Heikki Kuisma, and Sami Nurmi

Challenges of Ultra-Thin 5 Sides Molded WLCSP .............................................................................................1167

Tom Tang, Albert Lan, Jason Wu, Joe Huang, Jensen Tsai, Jerry Li, Arthur Ho,
Jerry Chang, and Wh Lin

Stacking of Insulating Substrates and a Field Plate to Increase the PDIV for High Voltage Power Modules .................................................................................................................................................................................................1172

Christoph Friedrich Bayer, Uwe Waltrich, Amal Soueidan, Eberhard Baer,
and Andreas Schletz

Ultra-Fine Pitch 3D Integration Using Face-to-Face Hybrid Wafer Bonding Combined with a Via-Middle Through-Silicon-Via Process .................................................................................................................................1179

Soon-Wook Kim, Mikael Detalle, Lan Peng, Philip Nolmans, Nancy Heylen,
Dimitrios Velenis, Andy Miller, Gerald Beyer, and Eric Beyne

Heterogeneous Integration of Microscale Gallium Nitride Transistors by Micro-Transfer-Printing .................................................................................................................................................................................................1186

Ralf Lerner, Stefan Eisenbrandt, Salvatore Bonafede, Matthew A. Meitl, Alin Fecioru,
António Jose Trindade, Richard Reiner, Patrick Waltreit, and Christopher A. Bower

Miniaturized Double Side Cooling Packaging for High Power 3 Phase SiC Inverter Module with Junction Temperature over 220°C .................................................................................................................................1190

Daniel Rhee Min Woo, Hwang How Yuan, Jerry Aw Jie Li, Lee Jong Bum,
and Zhang Hengyun

Session 26: Innovative Interconnects

Low Cost, High Density Interposers in Aluminum Oxide Films .................................................................................................................................1197

Hsiang-Yu Chan, Chisa Fukuda, Dogukan Yildirim, G. P. Li, and Mark Bachman

Micro-Scale Solder Joints between Cu-Cu Wires Formed by Nanoparticle Enabled Lead-Free Solder Pastes .................................................................................................................................................................................................1203

Evan Wernicki, Edward Fratto, Yang Shu, Fan Gao, and Zhiyong Gu

Pressure-Activated Electrical Interconnection During Micro-Transfer-Printing .................................................................................................................................1209

Carl Prevatte, Matthew A. Meitl, David Gomez, Kanchan Ghosal, Salvatore Bonafede,
Brook Raymond, Tanya Moore, António Jose Trindade, Paul Hines, Ibrahim Guven,
and Christopher A. Bower
Novel Growth of Whole Preferred Orientation Intermetallic Compound Interconnects for 3D IC Packaging

M. L. Huang, Z. J. Zhang, F. Yang, and N. Zhao

Ultrasonic-Assisted Soldering of Sn-Based Solder Alloys to Form Intermetallic Interconnects for High Temperature Application

Hongjun Ji, Mingyu Li, and Yunfei Qiao

Characterization and Optimization of Sn-Cu TLPS Interconnects for High Temperature Power Electronics through In-Situ-X-Ray Investigations

Aarief Syed-Khaja, Alexander Klemm, Thomas Zerna, and Joerg Franke

Design of Mechanical Properties of Transient Liquid Phase Bonds with Tertiary Metal Particles

Masao Noguchi, Shailesh N. Joshi, and Ercan M. Dede

Session 27: Advancement in 3D Handling and Packages

A Novel Dicing Technologies for WLCSP Using Stealth Dicing through Dicing Tape and Back Side Protection-Film

Shinya Takyu, Yusuke Fumita, Daisuke Yamamoto, Shigeyuki Yamashita, Kenji Furuta, Yohei Yamashita, Kei Tanaka, Naoki Uchiyama, Takafulmi Ogiwara, and Yuta Kondo

Investigation of Advanced Dicing Technologies for Ultra Low-k and 3D Integration

A. Podpod, F. Inoue, I. De Wolf, M. Gonzalez, M. K. Rebibis, R. A. Miller, and E. Beyne

Improvement of a TSV Reveal Process Comprising Direct Si/Cu Grinding and Residual Metal Removal

Naoya Watanabe, Masahiro Aoyagi, Tsubasa Bandoh, Takahiko Mitsui, and Eiichi Yamamoto

No Pumping at 450°C with Electrodeposited Copper TSV

Kazuo Kondo

Integration and Packaging of Embedded Radial Micro-Channels for 3D Chip Cooling

Bing Dang, Evan Colgan, Fanghao Yang, Mark Schultz, Yang Liu, Qianwen Chen, Jae-Woong Nah, Robert Polastre, Michael Gaynes, Gerard McVicker, Pritish Parida, Cornelia Tsang, John Knickerbocker, and Timothy Chainer

Wafer-Level Fabrication of Silicon-in-Glass Electrodes for Electrostatic Transduction

Bin Luo, Ming-Ai Zhang, Chenyue Lu, and Jintang Shang

Room Temperature Bonding and Deboning of Ultra-Thin Glass Substrates for Fabrication of LCD

Kai Takeuchi, Masahisa Fujino, and Tadatomo Suga

Session 28: RF, Microwave, and Millimeter Wave

Breakthrough Packaging Level Shielding Techniques and EMI Effectiveness Modeling and Characterization

Jimmy-Dinh V. Hoang, Robert Darveau, Tony Lobianco, Yi Liu, and Wayne Nguyen
Modeling Design Fabrication and Demonstration of RF Front-End Module with Ultra-Thin Glass Substrate for LTE Applications .................................................................................................................................1297
   Junki Min, Zihan Wu, Markondeya Raj Pulugurtha, Vanessa Smet, Venky Sundaram,
   Arjun Ravindran, Christian Hoffmann, and Rao Tummala

Chip Last Fan-Out Packaging for Millimeter Wave Application .................................................................1303
   Hsin-Chia Lu, Yuan-Hong Wang, Jeng-Long Leou, Harrison Chan, and Scott Chen

A Highly Integrated RFSoC Design for 3G Smart Phone Application .................................................................1309
   Nan-Cheng Chen, Wen Zhou Wu, Sheng-Mou Lin, Wan-Ju Kuo, Kun-Ting Hung,
   and Ya-Ling Tseng

TGV (Thru-Glass Via) Metallization by Direct Cu Plating on Glass ........................................................................1316
   Shigeo Onitake, Kotoku Inoue, Masatoshi Takayama, Takashi Kozuka,
   Satoru Kuramochi, and Hobie Yun

In-Substrate Resonators and Bandpass Filters with Improved Insertion Loss in K-Band
Utilizing Low Loss Glass Interposer Technology and Superlattice Conductors ..................................................1322
   Arian Rahimi, David E. Senior, Aric Shorey, and Yong-Kyu Yoon

Analysis and Estimation on EMI Effects in AP-DRAM Interface for a Mobile Platform .............................................1329
   Sungwook Moon, Seil Kim, Dong-Chul Kim, Donny Yi, Seung-Bae Lee, and Jaemin Shin

Session 29: Advanced Reliability Applications

Combination of Experimental and Simulation Methods for Analysis of Sintered Ag Joints for High Temperature Applications .............................................................................................................1335
   Constanze Weber, Hans Walter, Marius Van Dijk, Matthias Hutter, Olaf Wittler,
   and Klaus-Dieter Lang

   Pradeep Lall, Peter Sakalaukus, and Lynn Davis

An Advanced Study on Ion Impurities on Solder Resist and the Solutions for High-Temperature Reliability Performance ..................................................................................................................1352
   Lei Zhang and Hideaki Kojima

Joule Heating Enhanced Electromigration Failure in Redistribution Layer in 2.5D IC .................................................1359
   Yingxia Liu, Menglu Li, Mengjie Jiang, Dong Wook Kim, Sam Gu, and K. N. Tu

Electromigration Studies on 6 µm Solid Cu TSV (Via last) in 32 nm SOI Technology ..................................................1364
   Prakash Periasamy, Michael Iwatake, Menglu Li, Joyce Liu, Troy Graves-Abe,
   Thuy Tran Quinn, and Subramanian S. Iyer

Enhancing Thermal Fatigue Reliability of Large CLCC Package ..............................................................................1370
   Ketan R. Shah, Sridhar Canumalla, Tung Nguyen, Mohan Kirloskar, and Xiangdong Qiu

Demonstration of Enhanced System-Level Reliability of Ultra-Thin BGA Packages with Circumferential Polymer Collars and Doped Solder Alloys ..............................................................................1377
   Bhuender Singh, Ting-Chia Huang, Satomi Kawamoto, Venky Sundaram,
   Raj Pulugurtha, Vanessa Smet, and Rao Tummala
Session 30: Thermo-Mechanical and Thermal Characterization

Simulation Driven Design of Novel Integrated Circuits — Physics of Failure Simulation of the Electronic Control Modules for Harsh Environment Application .................................................................1386
  Alicja Palczynska, Arun Sasi, Matthias Werner, Alexandru Prisacaru,
  Przemyslaw Gromala, Bongtae Han, Dirk Mayer, and Tobias Melz

Non-linear Finite Element Analysis on Stacked Die Package Subjected to Integrated Vapor-Hydro-Thermal-Mechanical Stress .................................................................................................................1394
  Jing Wang and Seungbae Park

Electronic PCB and PKG Thermal Stress Analysis .................................................................................................1402
  G. Refai-Ahmed, H. Shi, Y. Bhartiya, T. Pawlak, M. Keshavamurthy, B. Boots, S. Shah,
  D. Ostergaard, and S. G. Pytel

Conductivity Enhancement of Thermal Interface Material via Capillary Attraction .................................................1409
  Hongye Sun and M. M. F. Yuen

Thermal Simulations and Experimental Verification of Power Modules Designed for Double Sided Cooling .................................................................................................................................1415
  Klas Brinkfeldt, Jonas Ottosson, Alexander Otto, Alexander Mann, Olaf Zschieschang,
  Sophia Frankeser, and Dag Andersson

Investigation of Geometry, Frequency and Material's Effects in Lock-In Thermography Applications in Semiconductor Packages ........................................................................................................1423
  Kasemsak Kijkanjanapaiboon, Mayue Xie, and Xuejun Fan

Analysis and Comparison of Thermal Performance of Advanced Packaging Technologies for State-of-the-Art Mobile Applications .......................................................................................................1430
  Cheng-Chieh Hsieh, Chi-Hsi Wu, and Douglas Yu

Session 31: 3D Applications and Wafer Processing

An Overview of the Development of a GPU with Integrated HBM on Silicon Interposer ........................................1439
  Chang-Chi Lee, Cp Hung, Calvin Cheung, Ping-Feng Yang, Chin-Li Kao,
  Dao-Long Chen, Meng-Kai Shih, Chien-Lin Chang Chien, Yu-Hsiang Hsiao,
  Li-Chieh Chen, Michael Su, Michael Alfano, Joe Siegel, Julius Din, and Bryan Black

3D SiP with Organic Interposer for ASIC and Memory Integration .................................................................................1445
  Li Li, Pierre Chia, Paul Ton, Mohan Nagar, Sada Patil, Jie Xue, Javier Delacruz,
  Marius Voicu, Jack Hellings, Bill Isaacson, Mark Coor, and Ross Havens

3Di DC-DC Buck Micro Converter with TSVs, Grind Side Inductors, and Deep Trench Decoupling Capacitors in 32nm SOI CMOS ..............................................................................................................1451
  John Safran, Giri N. K. Rangan, Venkata Nr Vanukuru, Sandeep Torgal,
  Vikram Chaturvedi, Sarath Lal K. P., Shahid Butt, Gary Maier, Alberto Cestero,
  Thuy Tran-Quinn, Joyeeta Nag, Sami Rosenblatt, Norman Robson, Matthew Angyal,
  Troy Graves-Abe, Daniel Berger, James Pape, and Subramanian Iyer
Session 32: Novel Fan-Out Interconnections

A Comparative Study of a Fan Out Packaged Product: Chip First and Chip Last .................................................................1483

Scott Chen, Simon Wang, John Hunt, William Chen, Leander Liang, Golden Kao, and Abner Peng

Versatile Metrology Platform for FOWLP PoP Manufacturing Process Control .................................................................1489

Francy Abraham and Jeong Yul Jeon

A Novel System in Package with Fan-Out WLP for High Speed SERDES Application .............................................................1495

Nan-Cheng Chen, Tung-Hsien Hsieh, Jimmy Jinn, Po-Hao Chang, Fandy Huang, Jw Xiao, Alan Chou, and Benson Lin

Effect of Local Grain Distribution and Enhancement on Edgebond Applied Wafer-Level Chip-Scale Package (WLCSP) Thermal Cycling Performance .................................................................1502

Tae-Kyu Lee, Weidong Xie, Steven Perng, Edward Ibe, and Karl Loh

The Development and the Integration of the 5 µm to 1 µm Half Pitches Wafer Level Cu Redistribution Layers .................................................................1509

Next Generation Panel-Scale RDL with Ultra Small Photo Vias and Ultra-Fine Embedded Trenches for Low Cost 2.5D Interposers and High Density Fan-Out WLPs .................................................................1515

Fuhuan Liu, Atsushi Kubo, Chandrasekharan Nair, Tomoyuki Ando, Ryuta Furuya, Shreya Dwarakanath, Venky Sundaram, and Rao R. Tummala

Development of High Density Fan Out Wafer Level Package (HD FOWLP) with Multi-layer Fine Pitch RDL for Mobile Applications .................................................................1522

Vempati Srinivasa Rao, Chai Tai Chong, David Ho, Ding Mian Zhi, Chong Ser Choong, Sharon Lim PS, Daniel Ismael, and Ye Yong Liang
Session 33: Advances in RF Materials and Components

A New Reliable Adhesion Enhancement Process for Directly Plating on Molding Compounds for Package Level EMI Shielding .................................................................1530
Kenichiroh Mukai, Brian Eastep, Kwonil Kim, Lee Gaherty, and Anirudh Kashyap

Silver Hybrid Paste for Improvement of Radio Frequency Characteristics .................................................1538
Kwang-Ho Jung, Sang-Woo Kim, Seung-Boo Jung, and Dong Gun Kam

High Frequency Characterization of Silicon Substrate and through Silicon Vias ........................................1544

A Novel Approach to Integrating 3D/4D Printing and Stretchable Conductive Adhesive Technologies for High Frequency Packaging Applications ..........................................................1551
Taoran Le, Chia-Chi Tuan, Ryan A. Bahr, C. P. Wong, and M. M. Tentzeris

Metamaterial-Inspired Sensor on Porous Substrate for Detection of Volatile Organic Compounds in Air ..............................................................................................................1557
Nophadon Wiwatcharagoses, Kyoung Y. Park, and Premjeet Chahal

MEMS-Based Tunable TSV Inductors ........................................................................................................1563
Bruce Kim, Saikat Mondal, and Sang-Bock Cho

Fabrication and Modeling of Nitride Thin Film Encapsulation Based on Anti-Adhesion-Assisted Transfer Technique and Nitride/BCB Bilayer Wrinkling .................................................1569
Seonho Seok

Session 34: 3D, TSV, and TGV Reliability and Characterization

Board-Level Reliability of 3D through Glass via Filters During Thermal Cycling ........................................1575
Scott McCann, Satoru Kuramochi, Hobie Yun, Venkatesh Sundaram, M. Raj Pulugurtha, Rao R. Tummala, and Suresh K. Sittaraman

Remaining Useful Life Assessment of Field Deployed Electronics Using X-Ray Micro-CT Based Digital Volume Correlation and Finite-Element Analysis ..................................................1583
Pradeep Lall and Junchao Wei

Impact of 3D Via Middle TSV Process on 20nm Wafer Level FEOL and BEOL Reliability .........................................................1593

Effect of Electroplating Parameter on the TSV-Cu Protrusion During Annealing ...........................................1599
Chen Si, Qin Fei, An Tong, and Chen Pei

Comprehensive Investigation of Die Shift in Compression Molding Process for 12 Inch Fan-Out Wafer Level Packaging ..................................................................................................1605
Yong Han, Mian Zhi Ding, Bu Lin, and Chong Ser Choong

Low Residual Stress in Si Substrate of Annular-Trench-Isolated TSV .............................................................................1611
Wei Feng, Tung Thanh Bui, Naoya Watanabe, Masahiro Aoyagi, and Katsuya Kikuchi
Mechanical Effects of the Volmer-Weber Growth in the TSV Sidewall
Santo Papaleo, Marco Rovitto, and Hajdin Ceric

Session 35: Wearable, Flexible, and Stretchable Electronics

A Wearable Flexible Hybrid Electronics ECG Monitor
Mark Poliks, James Turner, Kanad Ghose, Zhanpeng Jin, Mohit Garg, Qiong Gui,
Ana Arias, Yasser Kahn, Mark Schadt, and Frank Egito

Wearable Sensor Patch for Early Extravasation Detection
Ming-Yuan Cheng, Ramona Damalerio, Ruiqi Lim, Weiguo Chen, Kwan Ling Tan,
Choon Looi Bong, and Swee Kim Tan

An Implantable, Stretchable Microflow Sensor Integrated with a Thin-Film Nitinol Stent
Connor Howe, Yongkuk Lee, Yanfei Chen, Youngjae Chun, and Woon-Hong Yeo

A Flexible and Stretchable Resistive Epidermal Pressure Sensor for Health Monitoring
Zhibo Chen, Wei Huang, Xinfeng Zhang, and Matthew M. F. Yuen

Screen-Printed Stretchable Interconnects
Jari Suikkola, Timo Kankkunen, Pekka Iso-Ketola, Jukka Vanhala, and Matti Mäntysalo

Flexible Wire-Component for Weaving Electronic Textiles
Jussi Mikkonen and Emmi Pouta

Mechanical Reliability Analysis of Ultra-Thin Chip-on-Foil Assemblies under Different
Types of Recurrent Bending
N. Palavesam, D. Bonfert, W. Hell, C. Landesberger, H. Gieser, C. Kutter, and K. Bock

Session 36: 3D Materials and Processing

Feasibility Study of Si Handler Debonding by Laser Release
Bing Dang, Tom Wassick, Yang Liu, Qianwen Chen, Paul Andry, Li-Wen Hung,
Hongqing Zhang, Jeffrey Gelorme, and John Knickerbocker

High Throughput Air Jetting Wafer Debonding for 3D IC and MEMS Manufacturing
Hao Tang, Chris Luo, Ming Yin, Yushen Zeng, and Wei Zhang

Extremely Low-Force Debonding of Thinned CMOS Substrate by Laser Release of
a Temporary Bonding Material
Alain Phommahaxay, Goedele Potoms, Greet Verbinnen, Erik Sleeckx, Gerald Beyer,
Eric Beyne, Alice Guerrero, Dongshun Bai, Xiao Liu, Kim Yess, Kim Arnold,
Walter Spiess, Tim Griesbach, Thomas Rapps, and Stefan Lutter

In Plane Collective CoS Assembly by NCF-TCB Enabled Using the Newly Developed
Bonding Force Leveling Film
Hitoshi Onozeki, Hiroshi Takahashi, Naoya Suzuki, Kumpei Yamada, and Yuta Koseki

Rapid Scan In-Situ FT-IR Curing Studies of Low-Temperature Cure Thin Film Polymer
Dielectrics in Solid State
Frank Windrich, Mikhail Malanin, Klaus J. Eichhorn, and Brigitte Voit

Development of Novel Low-Temperature Curable Positive-Tone Photosensitive
Dielectric Materials with High Elongation
Yu Shoji, Yuki Masuda, Keika Hashimoto, Kimio Isebe, Yutaro Koyama, and Ryoji Okuda

xxvi
Formation of Polymer Insulation Layer (Liner) on Through Silicon Vias (TSV) with High Aspect Ratio over 5:1 by Direct Spin Coating .................................................................1713
  Liyi Li, Guoping Zhang, Chia-Chi Tuan, Kyoung-Sik Moon, and Rong Sun

Session 37: Interactive Presentations 1
A Wirebond-Less Package for High Voltage Cascode Gallium Nitride Devices .........................................................1720
  Wenli Zhang, Zhengyang Liu, Fred C. Lee, and Shuojie She
Constitutive Relations for Finite Element Modeling of SnAgCu in Thermal Cycling — How Wrong We Were! ........................................................................................................1726
  Thaer Alghoul, Dustin Watson, Nardeeka Adams, Saif Khasawneh, Farhan Batieha, Chris Greene, and Peter Borgesen
Novel Process of RDL Formation for Advanced Packaging by Excimer Laser Ablation ..........................................................1733
  Habib Hichri, Markus Arendt, and Matthew Gingerella
Ultra-Precise Low-Cost Surface Planarization Process for Advanced Packaging Fabrications and Die Assembly: A Survey of Recent Investigations on Unit Process Applications and Integrations ........................................................................................................1740
  Frank Wei, Vanessa Smet, Ninand Shahane, Hao Lu, Venky Sundaram, and Rao Tummala
Formation of High-Aspect-Ratio through Silicon Vias (TSVs) with a Broad Range of Diameter by Uniform Metal-Assisted Chemical Etching (MaCE) ........................................1746
  Liyi Li and C. P. Wong
Effective Post-TSV-DRIE Wet Clean Process for through Silicon Via Applications ........................................................................1752
  Laura Mauer, Stephen Olson, Victor Vartanian, John Taddei, John Clark, Kenji Nulman, and Michael Hatzistergos
Fabrication and Characterization of Low Stress Si Interposer with Air-Gapped Si Interconnection for Hermetrical System-in-Package ...........................................................................1758
  Rongfeng Luo, Kuili Ren, Shenglin Ma, Jun Yan, Yanming Xia, Yufeng Jin, Jing Chen, Tianzhun Wu, Hangao Yang, and Lifang Yuan
Study on Ar(5%H2) Plasma Pretreatment for Cu/Sn/Cu Solid-State-Diffusion Bonding in 3D Interconnection .................................................................1765
  Junqiang Wang, Qian Wang, Dejun Wang, and Jian Cai
Advanced 3D eWLB-PoP (Embedded Wafer Level Ball Grid Array - Package on Package) Technology ..................................................................................................................1772
  Yaojian Lin, Chen Kang, Linda Chua, Won Kyung Choi, and Seung Wook Yoon
Impact of Via Density on the Mechanical Integrity of Advanced Back-End-of-Line During Packaging .................................................................................................................................1778
  Luka Kljucar, Mario González, Kristof Croes, Ingrid De Wolf, Gayle Murdoch, Joeri De Vos, Jürgen Bömmels, Eric Beyne, and Zsolt Tőkei
Die Bonding with Non-Clean Flux in Fine Pitch Copper Pillar Bump Study and Reliability Performance for 2.5D IC Package ...................................................................................................1786
  J. C. Liao, Ally Liao, Sam Peng, G. T. Lin, Terrence Lu, and Stephen Chen
High Quality Fine-Pitch Cu-Cu Wafer-on-Wafer Bonding with Optimized Ti Passivation at 160°C

Asisa Kumar Panigrahi, Satish Bonam, Tamal Ghosh, Siva Rama Krishna Vanjari, and Shiv Govind Singh

Evaluation and Optimization of Thermo-Mechanical Reliability of a TSV-Based 3D MEMS

Qinghua Zeng, Wei Meng, Yong Guan, Jing Chen, and Yufeng Jin

Low Cost Wafer Level Packaging of MEMS Devices by Vertical Via-Last Process

Xiangmeng Jing, Fengwei Dai, Chunyan Zhang, Wenqi Zhang, and Liqiang Cao

Thermo-Compression Bonding Using Non-conductive Films (NCFs) for 3-D TSV Interconnection

Hyeong-Gi Lee, Se-Yong Lee, Yong-Won Choi, and Kyung-Wook Paik

3D WL MEMS with Various TSV Technologies’ Thermo-Mechanical Analysis

Ying-Te Ou, Hung-Hsiang Cheng, Dao-Long Chen, Hsiao-Yen Lee, Ying-Chih Lee, Meng-Kai Shih, Chin-Cheng Kuo, Ping-Feng Yang, and Chen-Chao Wang

Joint Properties and Thermomechanical Reliability of Nanoparticle-Added Sn-Ag-Cu Solder Paste

Kyoung-Ho Kim, Sehoon Yoo, Jonghyuk Yoon, Songhee Yim, Bum-Gyu Baek, Jong Hyun Yoon, Dohyun Jung, and Jae Pil Jung

Study of Chip Stacking Process and Electrical Characteristic Evaluation of Cu Pillar Joint

Toshiya Akamatsu, Shinji Tadaki, Kazutoshi Yamazaki, Hideki Kitada, and Seiki Sakuyama

Reliability Demonstration of an Ultra-Thin Core (UTC) Large Die, Large Laminate Package

Tomoyuki Yamada, Michio Ohori, Fumio Kumokawa, Hiroyuki Fukushima, Sushumna Iruvanti, Shidong Li, Tuhin Sinha, Jeff Coffin, Hai Longworth, and Charlie Reynolds

Challenges in Assembly and Reliability of Thin NAND Memory Die

Ning Ye, Qing Li, Huirong Zhang, Zhongli Ji, Xiaoyu Yang, Chin-Tien Chiu, and Hem Takiar

Thermal Isolation within High-Power 2.5D Heterogeneously Integrated Electronic Packages

Michael Fish, Patrick McCluskey, and Avram Bar-Cohen

Electromagnetic Bandgap Design for Power Distribution Network Noise Isolation in the Glass Interposer

Youngwoo Kim, Jonghyun Cho, Jinwook Song, Subin Kim, Venky Sundaram, Rao Tummala, and Joungho Kim

On Chip RF Passives Using an Su-8 Composite with Magnetic Nanoparticles

Huseyin Sagkol, Erdal Korkmaz, Mamady Kebe, and Zilhicce Mehmedi
Session 38: Interactive Presentations 2

Proposal of Package Structure Requirements for Effective Cooling from the Bottom Side of Chips (from the Substrate Side), Aiming for a Three-Dimensional (3D) Chip Stack

Keiji Matsumoto and Hiroyuki Mori

Innovative Temperature and Heat Distribution Measurement Protocol Applied to 3D TSV Technology

Denis Mercier, Thomas Portanier, David Bouchu, Stéphane Moreau, and Christophe Aumont

Study on Process Induced Wafer Level Warpage of Fan-Out Wafer Level Packaging

F. X. Che, David Ho, Mian Zhi Ding, and Daniel Rhee MinWoo

Simulation Model to Predict Failure Cycles in Board Level Drop Test

Wei Wang, Daniel Robbins, and Christopher Glancey

Assembly Process and Warpage Management of Large Size through Silicon Interposer (38.7mm × 26.7mm) Package

Zhaohui Chen, Jong-Kai Lin, Mian Zhi Ding, Sharon Pei Siang Lim, and Xiaowu Zhang

Characterization of Warpages and Layout-Dependent Local-Deformations for Large Die 3D Stacking

Aki Dote, Hideki Kitada, Yoriko Mizushima, Tomoji Nakamura, and Seiki Sakuyama

Comparison of Thermal Measurement Methods of Die Attach Materials Used in Power Electronic Modules

Wolfgang Schmitt, Susanne Duch, and Thomas Krebs

Sub-100 nm Patterning Process and Adhesion Force Simulation in UV-Nanoimprint Lithography

Yinsheng Zhong and Matthew M. F. Yuen

Deep, High Aspect Ratio Etches in Alumina Films for MEMS and Advanced Packages

Dogukan Yildirim, Guann-Pyng Li, and Mark Bachman

Effect of Temperature on the High Strain Rate Properties of SAC Leadfree Alloys at Temperatures up to 200°C

Pradeep Lall, Di Zhang, Vikas Yadav, Jeff Suhling, and David Locker

A Fast and Low Computation Consumption Model for System-Level Thermal Management in 3D IC

Yudan Pi, Ningyu Wang, Jiaxi Zhang, Wei Wang, Guojie Luo, Min Miao, Wenhua Xu, and Yufeng Jin

Mass Transport-Induced Failure of Hybrid Bonding-Based Integration for Advanced Image Sensor Applications

Stephane Moreau, David Bouchu, Viorel Balan, Anne-Lise Le Berrigo, Amandine Jouve, Yann Henrion, Carine Besset, Daniel Scevola, Sandrine Lhostis, François Guyader, Emilie Deloffre, Sébastien Mermoz, and Julien Pruvost
In Vehicle Infotainment and Advanced Driver Assistance Systems: Advantages of Knowledge-Based Qualification over Standard-Based Qualification for Solder Joint Reliability .................................................................1946

Ru Han, Min Pei, Sibasish Mukherjee, Milena Vujosevic, Kenneth Darschewski, and Robert Kwasnick

Demonstration of Novel Adhesive Technology Enabling Low-Temperature Polymeric Bonding for Use in Microelectronics Applications .........................................................1952

Lyndon Larson and Kate Johnson

Fabrication and Integration of Ultrathin, High-Density, High-Frequency Ta Capacitors on Silicon for Power Modules ..............................................................................................1958

Parthasarathi Chakraborti, Nathan Neuhart, Kamil-Paul Rataj, Christoph Schnitter, Saumya Gandhi, Himani Sharma, P. M. Raj, Frank Stepniak, Matt Romig, Naomi Lollis, and Rao R. Tummala

Optimization Design of 2.5D TSV Package Using Thermo-Electrical Co-Simulation Method .............................................................................................................................1964

Fengze Hou, Yunyan Zhou, Fengman Liu, Meiyng Su, Cheng Chen, Jun Li, Tingyu Lin, and Liqiang Cao

A Novel Experimental System for Characterizing Interface Delamination under Mixed-Mode Fatigue Loading ..........................................................................................1970

Tz-Cheng Chiu, Wei Lu, Chi-An Hua, and Chia-Kuei Hsu

Simulative Investigations of the Mechanical Reliability of the Flexible Optoelectronic Packaging Using Optodic Bonding ..................................................................................1977

Yixiao Wang, Xiaoxu Yang, and Ludger Overmeyer

Effect of Die Size and Die Tilt on Solder Reliability under Thermal Cycling .................................................................................................................................1984

Miaocao Wang, Ling Xu, Yang Zhou, and Sheng Liu

Deformation of Display for Handheld Devices During Drop Impact .................................................................................................................................1990

Charandeep Singh, Satish Chaparala, Chunfeng Zhou, Bin Zhang, and S. B. Park

Reliability Assessment of QFN Components for Aerospace Applications .................................................................................................................................1996

Chunyan Yin, Stoyan Stoyanov, Chris Bailey, Paul Stewart, and Steve McCallum

Impact of Die Pin Capacitance and Package Crosstalk on DDR4 Channel Jitter .................................................................................................................................2003

Janani Chandrasekhar, Changwook Yoon, Alan Liu, Hui Liu, and Dan Oh

A Novel Programmable On-chip Voltage Droop Detector for FPGA Applications .................................................................2009

Hing Yan “Thomas” To, Changyi Su, Sean Long, Juan Wang, Nanju Na, Dima Klokotov, and Yong Wang

Reliability Assessment of Fan-Out Packages Using High Resolution Moiré Interferometry and Synchrotron X-Ray Microdiffraction ................................................................2016

Laura Spinella, Jang-Hi Im, and Paul S. Ho

Crosstalk-Induced Jitter Simulation Methodology for High-Density I/O Designs .................................................................................................................................2022

Shen Dong and Hong Shi

Detection of Noise Coupling between Power Domains on Package .................................................................................................................................2028

Suzanne Lynn Huh and Hong Shi
Session 39: Interactive Presentations 3

Miniaturized Integrated Micro-Supercapacitors as Efficient Power Sources for Wearable and Biocompatible Electronic Devices ......................................................................................................................2046
Bo Song, Liyi Li, Yuntong Zhu, Kyoung-Sik Moon, and C. P. Wong

Thermal and Electrical Designs of RF 3D Module Based on Si Interposers with Redundant TSVs ................................................................................................................................................2051
Kwang-Seong Choi, Seok Hwan Moon, Yong-Sung Eom, Hyun-Cheol Bae, and Jin Ho Lee

Low-Stress Design for SiC Power Modules with Sintered Porous Ag Interconnection .................................................................................................................................................2058
Chuantong Chen, Shijo Nagao, Hao Zhang, Tohru Sugahara, Katsuaki Suganuma, Tomohito Iwashige, Kazuhiko Sugiura, and Kazuhiro Tsuruta

A Characterized Redistribution Layer Architecture for Advanced Packaging Technologies ..................................................................................................................................................................................2063
Hiroshi Kudo, Takamasa Takano, Masaya Tanaka, Ryohhei Kasai, Jyunichi Suyama, Miyuki Akazawa, Mitsuhiro Takeda, Hiroshi Mawatari, Toshio Sasao, Yumi Okazaki, Naoki Oota, Susumu Tashiro, Haruo Iida, Kouji Sakamoto, Hiroyuki Sato, Daisuke Kitayama, Shouhei Yamada, and Satoru Kuramochi

Binder Chemistry for Ultra-Highly Conductive Pastes by Low Temperature Sintering of Silver Micro-Fillers .......................................................................................................................................2068
Masahiro Inoue, Yasunori Tada, and Yoshiaki Sakaniwa

Effects of Reflow Cooling Rate on the Growth of Ag3Sn Platelets and Deformation of Solder Balls .................................................................................................................................................2075
Chi Pu Lin, Katch Wan, Tommy Sun, Chih-Ming Chen, and Rick Lee

Interconnection of Flexible Lithium Thin Film Batteries for Systems-in-Foil ...................................................................................................................................................................................2082
Messaoud Bedjaoui, Steve Martin, and Raphael Salot

Development and Reliability Evaluation of Large Scale Thin TSV Die Stacking on Wafer ...................................................................................................................................................................2089
Lee Jong Bum, Chong Seo Choong, Au Keng Yuen, and Rhee Min Woo

Characterization of Extreme Si Thinning Process for Wafer-to-Wafer Stacking ...............................................................................................................................................................................2095
Fumihiro Inoue, Anne Jourdain, Joeri De Vos, Erik Sleecx, Eric Beyne, Jash Patel, Oliver Ansell, Huma Ashraf, Janet Hopkins, Dave Thomas, and Akira Uedono

Shape-Dependent Transmittable Tangential Force of Wire Bond Tools ......................................................................................................................................................................................2103
Simon Althoff, Tobias Meyer, Andreas Unger, Walter Sextro, and Florian Eacock

Effect of Different Oxide Layers on the Ultrasonic Copper Wire Bond Process ................................................................................................................................................................................2111
Florian Eacock, Andreas Unger, Paul Eichwald, Olexandr Grydin, Florian Hengsbach, Simon Althoff, Mirko Schaper, and Karsten Guth

Electrophoretic Deposition of Ni/Au Coated Particles for Ultra-Fine Pitch Interconnection ..................................................................................................................................................................2119
Junlei Tao, David C. Whally, and Chanqing Liu
Advances in Panel Scalable Planarization and High Throughput Differential Seed Layer Etching Processes for Multilayer RDL at 20 Micron I/O Pitch for 2.5D Glass Interposers ...........................................2210

Hao Lu, Frank Wei, Ryuta Furuya, Atsushi Kubo, Fuhan Liu, Venky Sundaram, and Rao Tummala

Process Design of Fine Pitch Ball Bonding by Volume Conservation Modelling ......................................................2216

Michael Mayer

2D Grating Pitch Mapping of a through Silicon Via (TSV) and Solder Ball Interconnect Region Using Laser Diffraction: IEEE Electronic Components and Technology Conference, 2016 ......................................................................................................................................................2222

Todd Houghton, Michael Saxon, Zeming Song, Hoa Nyugen, Hanqing Jiang, and Hongbin Yu

Copper Ball Bond over a Variety of Probe Marks in Two Pad Aluminum Thicknesses .............................................................2228

Jacob Marsh, Austin Doutre, Kyle Syndergaard, Priscila Brown, Kok Inn Hoo, Edsel De Jesus, and Stevan Hunter

Session 40: Interactive Presentations 4

Forward Tactile Sensing Device Development and Biopackaging for Endovascular Guidewire Intervention Application ..........................................................................................................................2233

Ruiqi Lim, Ee Lim Tan, Kwan Ling Tan, Weiguo Chen, Ramona Damalerio, Benjamin Soo Yeng Chua, Melvin Wee Chuan Loh, Rachel Tsui Ying Hong, and Ming-Yuan Cheng

Ultra-Miniaturized Planar Absorbing Metamaterial Structures for Millimeter Wave and Terahertz Imaging Array .................................................................................................................................................2239

Kyoung Youl Park, Premjeet Chahal, and Nophadon Wiwatcharagoses

A Study on the Cu-Rod Anisotropic Conductive Films (ACFs) for Flex-on-Fabric (FOF) Interconnections Using an Ultrasonic Bonding Method .........................................................................................................................................................................................2245

Seung-Yoon Jung, Hye Eun Hong, and Kyung-Wook Paik

Novel Periodic-Aperiodic Routing to Mitigate Floquet Mode Resonances in Crosstalk Transfer Function Due to Periodically Routed Structures ....................................................................................................................................................................................2251

Arun Chada, Bhyrav Mutnury, Jun Fan, and James L. Drewniak

Sub-Micron Bondline-Shape Control in Automated Assembly of Photonic Devices ...............................................................2257

Nicolas Boyer, Alexander Janta-Polczynski, Jean-Francois Morissette, Swetha Kamlapurkar, Sebastian Engelmann, Yoichi Taira, Shotaro Takenobu, Hidetoshi Numata, Paul Fortier, and Tymon Barwicz

A Novel Modular Design and Modeling Methodology for High Speed High Density Die Package PCB Co-Simulation and Model Library Creation ..................................................................................................................................................................................2264

Jenny Xiaohong Jiang, Chit Zhung Tan, Xinyun Guo, Lei Hua, Yee Huan Yew, Nate Unger, Hui Liu, and Pheak Ti Teh

Narrowband-Stop Reflector Using Guided-Mode Resonance in Waveguide Cavity for WDM Optical Interconnects .................................................................................................................................2270

Shogo Ura, Masahiro Nakata, Kenichi Yanagida, Junichi Inoue, and Kenji Kintaka

xxxiii
Behavioral Circuit Models of Jitter Modulator and Single-Ended-Mode to Mixed-Mode Transformer for Signal Integrity Transient Simulation

Zhaoqing Chen

Simulation, Modeling and Analysis of Dynamic Power Delivery Network and Its Impact on Jitter

Sheng-Feng Lee, Chia-Yu Chan, and Shang-Pin Chen

Performance Improvement in Side Contact Multilayer Graphene Nanoribbon Interconnects Using Intercalated Doping

Atul Kumar Nishad and Rohit Sharma

Stochastic LIM for Transient Simulations of Printed Circuit Board Transmission Lines with Uncertainties

Xu Chen, José E. Schutt-Ainé, and Andreas C. Cangellaris

High Speed Data Acquisition and Pre-Processing System of the Photodetector Linear Array with through-Silicon Vias (TSVs) 2.5D/3D Integration

An Ultra Low Loss SerDes Signal Design on a FC Package Applied in 56 Gbps Networks

Yuan-Hsi Chou, Tsun-Lung Hsieh, Cheng-Yu Tsai, Chen-Chao Wang, and Lih-Tyng Hwang

High Density Micro-Lens Array Connector for Optical Multi-chip Module

Koji Masuda, Hsiang-Han Hsu, Masao Tokunari, and Shigeru Nakagawa

Large-Scale, High-Speed and High-Precision Simulation Method for the Multi-domain/Multi-scale Electronic System

Hideki Asai, Shingo Okada, and Yuta Inoue

Synthesis and Characterization of One-Dimensional Cu-Sn Nanowire Diffusion Couples for Nanowire Assembly and Interconnection

Fan Gao, Qiyue Yin, Jirui Wang, Guangwen Zhou, and Zhiyong Gu

Novel Power Delivery Noise Mitigation Scheme Using Negatively Coupled Inductors

Amit K. Jain and Sameer Shekhar

System Co-Design for Low Power, High Performance Multicore DSP Systems

Tapobrata Bandopadhyay, Anita Pratti, Bill Taboada, Thomas Krause, Tom Johnson, and Snehamay Sinha

Design and Demonstration of Ultra-Thin Glass 3D IPD Diplexers

Zihan Wu, Junki Min, Minsuk Kim, Markondeya Raj Pulugurtha, Venky Sundaram, and Rao R. Tummala

Room-Temperature Wafer Bonding Using Al/Ti/Au Layers for Integrated Reflectors in the Ultraviolet Spectral Region

Eiji Higurashi, Yutaka Kunimune, and Tadatomo Suga

Slot Waveguide Enhanced Field Confinement by CMOS-Compatible Hybrid Plasmonic Structures

Jing Xiao and Qi-Qin Wei
Ultra-Thin Wireless Power Module with Integration of Wireless Inductive Link and Supercapacitors ..............................................................2364
   Chintan Buch, P. Markondeva Raj, Billyde Brown, Himani Sharma, Teng Sun, Kyoung-Sik Moon, Klaus-Jürgen Wolter, Rao Tummala, Tadashi Takahashi, Keiji Takemura, Hobie Yun, Francesco Carobolante, Mirbozorgi Seyedabdollah, and Maysam Ghovanloo

Optoelectronic Integration with Improved Sensitivity for Microfabricated Optical Magnetometers ......................................................................2372
   Yu Ji, Jintang Shang, Lei Wu, and Qi Gan

Investigation of Differential Twisted-Pairs Implemented on Silicon IPD and High Performance Multilayer Organic Platforms ........................................2378
   Hsiao-Wei Chin, Pei-Shuo Lee, Chung-Yi Hsu, Cheng-Yu Ho, Chen-Chao Wang, Lih-Tyng Hwang, and Tzyy-Sheng Homg

Innovative Electrical Thermal Co-Design of Ultra-High Q TPV-Based 3D Inductors in Glass Packages ......................................................................2384
   Min Suk Kim, Markondeva Raj Puluurtha, Zihan Wu, Venky Sundaram, and Rao Tummala

Electrical and Optical TSVs for High Frequency Photonic Applications ........................................................................................................2389
   J. Kraft, G. Meinhardt, K. Molnar, T. Bodner, and F. Schrank

Performance Methodology and Characterization of a Multi-Fiber Expanded Beam Lensed Optical Interconnect .........................................................2394
   Dirk Schoellner, Jilcha Wakjira, Steven Chuang, and Sharon Lutz

RFID Compatible Sensor Tags for Remote Liquid Sample Interrogation ........................................................................................................2401
   Saranraj Karuppuswami, Amanpreet Kaur, Mohd Irfat Mohd Ghazali, and Premjeet Chahal

Effect of Ultra-Fine Pitch RDL Process Variations on the Electrical Performance of 2.5D Glass Interposers up to 110 GHz ........................................2408
   Chandrasekharan Nair, Hao Lu, Kadappan Panayappan, Fuhan Liu, Venky Sundaram, and Rao Tummala

Fabrication of Freeform Lens Based on Ionic Wind for Chip-on-Board Light-Emitting Diodes ........................................................................2414
   Zefeng Zhang, Jiading Wu, Xing Guo, Xiang Lei, Sheng Liu, and Huai Zheng

Session 41: Student Interactive Presentations

Determination of Tracer Diffusivites of Cu Atoms and Sn Atoms in Cu3Sn Intermetallic Compound by Considering Chemical Effect ........................2419
   Yi-Ting Chen, K. N. Tu, and A. M. Gusak

Highly Conductive Polyurethane/Polyaniline-Based Composites for Wearable Electronic Applications ................................................................2424
   Bo Song, Chia-Chi Tuan, Liyi Li, Yuntong Zhu, Kyoung-Sik Moon, and C. P. Wong

Fabrication and Traceable Quality Evaluation of Fine Pitch TSV with Self-Integrated Micro Heater and Thermocouple ........................................2430
   Yong Guan, Yunhui Zhu, Shenglin Ma, Qinghua Zeng, Yuan Bian, Xiao Zhong, Jing Chen, and Yufeng Jin

Surface Treatment to Enable Low Temperature and Pressure Copper Direct Bonding ..................................................2435

V. Dubey, J. Derakhshandeh, E. Beyne, C. Gerets, E. Cooper, P. Laermans,
K. D. Leersnijder, K. Baumans, K. J. Rebibis, A. Miller, and I. De Wolf

Probe Card Design with Signal and Power Integrity for Wafer-Level Application

Processor Test in LPDDR Channel ..................................................................................................................................2442

Jinwook Song, Eunjung Lee, Jonghoon Kim, Shinyoung Park, Jung Keun Park,
Jong Hyun Park, Yoon Hee Bang, Hyun Min Kim, Young Bu Kim, Seungki Nam,
and Joungho Kim

Optimized Power Delivery for 3D IC Technology Using Grind Side Redistribution Layers .............................................2449

Menglu Li, Prakash Periasamy, K. N. Tu, and Subramanian S. Iyer

Light Extraction Efficiency Enhancement of Deep-Ultraviolet Light-Emitting Diodes
with Nanostructured Silica Glass ........................................................................................................................................2455

Yang Peng, Simin Wang, Hao Cheng, and Mingxiang Chen

Effects of ACFs Adhesion on the Bending Reliability of Chip-in-Flex Packages
for Wearable Electronics Applications ..........................................................................................................................2461

Ji-Hye Kim, Tae-Ik Lee, Taek-Soo Kim, and Kyung-Wook Paik

Study of Sintered Nano-Silver Die Attachment Materials Doped with Indium .................................................................2468

C. A. Yang and C. Robert Kao

Design of an On-Interposer Passive Equalizer for High Bandwidth Memory (HBM)
with 30Gbps Data Transmission ....................................................................................................................................2475

Yeseul Jeon, Heegon Kim, Sumin Choi, Youngwoo Kim, and Joungho Kim

Measurement of High-Bandwidth and High-Density Silicone Rubber Socket up
to 110GHz ..................................................................................................................................................................2481

Junyong Park, Hyesoo Kim, Jonghoon J. Kim, Bumhee Bae, Dongho Ha, Michael Bae,
and Joungho Kim

Process Development and Characterization for Integrating Microchannel into TSV Interposer .................................................................................................................................2487

Yannming Xia, Kuili Ren, Shenglin Ma, Rongfeng Luo, Jun Yan, Yufeng Jin, and Jing Chen

Controlling the Conduction Mechanisms in Isotropic Conductive Adhesives
with Silver-Coated Polymer Spheres ................................................................................................................................2494

Sigurd R. Pettersen, Helge Kristiansen, Keith Redford, Susanne Helland, Erik Kalland,
Zhiliang Zhang, and Jianying He

Development of New Low Melting Solder Alloys ................................................................................................................2501

Chih-Hao Chen, Boon-Ho Lee, Hsiang-Chuan Chen, Chang-Meng Wang, and Albert T. Wu

Millimeter-Wave Wireless Intra-/Inter Chip Communications in 3D Integrated Circuits
Using Through Glass Via (TGV) Disc-Loaded Patch Antennas .........................................................................................2507

Seahee Hwangbo, Aric B. Shorey, and Yong-Kyu Yoon

A Novel Package Feasibility Study Tool for Power Delivery Network Design
and Optimization .................................................................................................................................................................2513

Lei Zheng, Kevin Cai, Julia Cline, and Arun Vaidyanath
Signal Integrity of Bump-Less High-Speed through Silicon Via Channel for Terabyte/s Bandwidth 2.5D IC .....................................................................................................................................................2519
Hyunsuk Lee, Heegon Kim, Sumin Choi, Jaemin Lim, Kyungjun Cho, Yeseul Jeon, Jongjoo Shim, Hyungsoo Kim, Yong-Ju Kim, and Joungho Kim

Analysis of Bending Effects for Optical-Bus-Couplers .........................................................................................................2523
Lukas Lorenz, Krzysztof Nieweglowski, Klaus-Jürgen Wolter, and Karlheinz Bock

Size-Controllable Copper Nanomaterials for Flexible Printed Electronics ...............................................................................2529
Yu Zhang, Pengli Zhu, Gang Li, Tao Zhao, Rong Sun, and Ching-Ping Wong

A Hybrid Electrical-Mechanical Wireless Magnetoelastic Sensor for Liquid Sample Measurements ..........................................................................................................................2535
Saranraj Karuppuswami, Harikrishnan Arangali, and Premjeet Chahal

Low Temperature Bonding between Polyether Ether Ketone (PEEK) and Pt through Vapor Assisted VUV Surface Modification ...................................................................................................................2541
Weixin Fu, Akitsu Shigetou, Shuichi Shoji, and Jun Mizuno

Study of a Novel Amorphous Silicon Temporary Bonding and Corresponding Laser Assisted De-bonding Technology ........................................................................................................................................2547
Yu-Hsiang Huang, Hao-Wen Liang, Chuan-An Cheng, Chien-Hung Lin, Chia-Lin Lee, Shan-Chun Yang, and Kuan-Neng Chen

Demonstration of Next-Generation Au-Pd Surface Finish with Solder-Capped Cu Pillars for Ultra-Fine Pitch Applications ................................................................................................................................2553
Ting-Chia Huang, Vanessa Smet, Pulugurtha Markondeya Raj, Rao R. Tummala, Gustavo Ramos, Arnd Kilian, Robin Taylor, and Rick Nichols

Microstructural Evolution of Transient Liquid Phase Sinter Joints in High Temperature Environmental Conditions ........................................................................................................................................2561
Hannes Greve, S. Ali Moeini, F. Patrick McCluskey, and Shailesh Joshi

Polysiloxane-Based Surface Modification of Silica Fillers for Low Stress Underfill ................................................................2569
Chia-Chi Tuan, Kyoung-Sik Moon, and Ching-Ping Wong

Embedded Passive RF Tags towards Intrinsically Locatable Buried Plastic Materials ................................................................2575
Mohd Ifwat Mohd Ghazali, Saranraj Karuppuswami, and Premjeet Chahal

Electrical Comparison between TSV in Silicon and TPV in Glass for Interposer and Package Applications ..................................................2581
Jialing Tong, Kadappan Panayappan, Venky Sundaram, and Rao Tummala

High Performance 3D Glass-Embedded Inductors Fabricated by a Glass Reflow Process ................................................................2588
Ming-Ai Zhang, Jintang Shang, and Bin Luo

Self-Actuating 3D Printed Packaging for Shape-Changing Antenna Arrays ..................................................................................2594
