## Tour to Palma de Mallorca

All participants.

## Welcome reception

## Plenary talk

### Mon-1a: Detection and estimation theory I

<table>
<thead>
<tr>
<th>Title</th>
<th>Authors</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Mon-1a.1 Efficient Distributed Estimation of Inverse Covariance Matrices</strong></td>
<td>Jesús Arroyo and Elizabeth Hou (University of Michigan, USA)</td>
</tr>
<tr>
<td><strong>Mon-1a.2 Sampling schemes and parameter estimation for nonlinear Bernoulli-Gaussian sparse models</strong></td>
<td>Megane Boudineau (Université Toulouse III Paul Sabatier, France); Hervé Carfantan (Université de Toulouse, UPS-OMP / CNRS, IRAP, France); Sébastien Bourguignon (Ecole Centrale de Nantes, IRCCyN, France); Michaël Bazot (New York University Abu Dhabi, United Arab Emirates (UAE))</td>
</tr>
<tr>
<td><strong>Mon-1a.3 Measure transformed quasi likelihood ratio test for Bayesian binary hypothesis testing</strong></td>
<td>Nir Halay and Koby Todros (Ben Gurion University of the Negev, Israel); Alfred Hero III (University of Michigan, USA)</td>
</tr>
<tr>
<td><strong>Mon-1a.4 Detecting the dimension of the subspace correlated across multiple data sets in the sample poor regime</strong></td>
<td>Tanuj Hasija (Universität Paderborn, Germany); Yang Song (University of Paderdon, Germany); Peter J. Schreier (Universitaet Paderborn, Germany); David Ramírez (University Carlos III of Madrid, Spain)</td>
</tr>
<tr>
<td><strong>Mon-1a.5 Nonparametric estimation of a shot-noise process</strong></td>
<td>Paul Ilhe (Télécom ParisTech, France); Francois Roueff (Telecom ParisTech, Finland); Eric Moulines (Télécom Paris Tech, France); Antoine Souloumiac (CEA, LIST, Laboratoire Outils pour l’Analyse de Données, France)</td>
</tr>
<tr>
<td><strong>Mon-1a.6 Finite sample performance of least squares estimation in sub-Gaussian noise</strong></td>
<td>Michael Kriakheli (Bar Ilan University, Israel); Amir Leshem (Bar-Ilan University, Israel)</td>
</tr>
<tr>
<td><strong>Mon-1a.7 Weighting a resampled particle in Sequential Monte Carlo</strong></td>
<td>Luca Martino (University of Helsinki, Finland); Víctor Elvira (University Carlos III of Madrid, Spain); Francisco Louzada (Universidade de São Paulo (USP), Brazil)</td>
</tr>
<tr>
<td><strong>Mon-1a.8 Structure-Induced Complex Kalman Filter for Decentralized Sequential Bayesian Estimation</strong></td>
<td>Arash Mohammadi (Concordia University, Canada); Konstantinos N Platanitis (University of Toronto, Canada)</td>
</tr>
<tr>
<td><strong>Mon-1a.9 An EM Algorithm for Maximum Likelihood Estimation of Barndorff-Nielsen’s Generalized Hyperbolic Distribution</strong></td>
<td>Jason Palmer (University of California San Diego, USA); Ken Kreutz-Delgado (University of California, San Diego, USA); Scott Makeig (University of California San Diego, USA)</td>
</tr>
<tr>
<td><strong>Mon-1a.10 Markov-tree Bayesian Group-sparse Modeling with Wavelets</strong></td>
<td>Ganchi Zhang and Nick Geoffrey Kingsbury (University of Cambridge, United Kingdom)</td>
</tr>
</tbody>
</table>

</tbody>
</table>
Mon-2b SS.2 The impact of unknown extra parameters on scatter matrix estimation and detection performance in complex $t$-distributed data  161
Stefano Fortunati, Maria S. Greco and Fulvio Gini (University of Pisa, Italy)

Mon-2b SS.3 Mean Square Error performance of sample mean and sample median estimators  165
Adrià Gusi-Amigó and Pau Closas (Centre Tecnològic de Telecomunicacions de Catalunya (CTTC), Spain); Luc Vandendorpe (Université catholique de Louvain, Belgium)

Mon-2b SS.4 A robust estimation approach for fitting a PARMA model to real data  170
Alessandro J. Q. Sarnaglia (Federal University of Espírito Santo, Brazil); Valderio Anselmo Reisen (Federal University of Espírito Santo, Brazil); Pascal Bondon (LSS CNRS, France); Céline Lévy-Leduc (AgroParisTech, France)

Mon-2b SS.5 Automatic diagonal loading for Tyler’s robust covariance estimator  175
Teng Zhang (University of Central Florida, USA); Ami Wiesel (Hebrew University in Jerusalem, Israel)

Mon-2c SS: Recent advances in Monte Carlo methods for multi-dimensional signal processing and machine learning

Mon-2c SS.1 NLOS Mitigation in TOA-based Indoor Localization by nonlinear filtering under Skew $t$-distributed measurement noise  180
Pau Closas (Centre Tecnològic de Telecomunicacions de Catalunya (CTTC), Spain); Jordi Vilà-Valls (Universitat Politècnica de Catalunya (UPC), Spain)

Mon-2c SS.2 A Partially Collapsed Gibbs Sampler with Accelerated Convergence for EEG Source Localization  185
Facundo Costa (University of Toulouse & ENSEEIHT, France); Hadj Batia and Thomas Oberlin (University of Toulouse, France); Jean-Yves Tourneret (University of Toulouse & ENSEEIHT, France)

Mon-2c SS.3 Multiple Importance Sampling with Overlapping Sets of Proposals  190
Víctor Elvira (University Carlos III of Madrid, Spain); Luca Martino (University of Helsinki, Finland); David Luengo (Universidad Politecnica de Madrid (UPM), Spain); Monica F. Bugallo (Stony Brook University, USA)

Mon-2c SS.4 An improved SIR-based sequential Monte Carlo algorithm  195
Roland Lamberti (Télécom SudParis, France); Yohan Petetin (Telecom SudParis); François Septier (Telecom Lille, Univ Lille, CNRS - CRISTAL, France); François Desbouvries (Telecom SudParis, France)

Mon-2c SS.5 Sticky proposal densities for adaptive MCMC methods  200
Luca Martino (University of Helsinki, Finland); Roberto Casarin (University Ca’ Foscari of Venice, Italy); David Luengo (Universidad Politecnica de Madrid (UPM), Spain)

Mon-2c SS.6 Sequential Monte Carlo methods under model uncertainty  205
Ifíigo Urteaga, Monica F. Bugallo and Petar M. Djurić (Stony Brook University, USA)

Mon-2c SS.7 Use of Particle filtering and MCMC for Inference in Probabilistic Acoustic Tube Model  210
Ruobai Wang (Tsinghua University, P.R. China); Yang Zhang (University of Illinois, Urbana-Champaign, USA); Zhijian Ou (Tsinghua University, P.R. China); Mark Hasegawa-Johnson (University of Illinois, USA)

Plenary talk

Tue-1a: Array processing, radar and sonar

Tue-1a.1 Online Angle of Arrival Estimation in the Presence of Mutual Coupling  215
Ahmad Bazzi (EURECOM & RivieraWaves-A CEVA COMPANY, France); Dirk Slock (EURECOM, France); Lisa Meilhac (CEVA-RivieraWaves, France)
Tue-1a.2 Robust Adaptive Subspace Detection in Impulsive Noise  
Ismail Ben Atitallah (KAUST, Saudi Arabia); Abla Kammoun (Kaust, Saudi Arabia); Mohamed-Slim Alouini (King Abdullah University of Science and Technology (KAUST), Saudi Arabia); Tareq Y. Al-Naffouri (King Abdullah University of Science and Technology, USA)

Tue-1a.3 A sparse approach for DOA estimation with a multiple spatial invariance sensor array  
Marc-Abel Bisch and Sebastian Miron (CRAN, Université de Lorraine, CNRS, France); David Brie (CRAN, Nancy Université, CNRS, France)

Tue-1a.4 Improved RARE Methods for DOA Estimation in Uniform Circular Arrays with Unknown Mutual Coupling  
Shu Cai (Nanjing University of Posts and Telecommunications, P.R. China)

Tue-1a.5 Elevation and azimuth estimation in arbitrary planar mono-static MIMO radar via tensor decomposition  
Ming-Yang Cao (Harbin Institute of Technology, P.R. China); Sergiy A. Vorobyov (Aalto University, Finland); Xingpeng Mao (Harbin Institute of Technology, P.R. China)

Tue-1a.6 Comparison of Passive Radar Detectors with Noisy Reference Signal  
Sandeep Gogineni (Wright State University, USA); Pawan Setlur (Wright State University & Wright State Research Institute, USA); Muralidhar Rangaswamy (AFRL, USA); Raj Rao Nadakuditi (University of Michigan, USA)

Tue-1a.7 Fast Convolution Formulations for Radar Detection using LASSO  
Zeyi Lee, Yanjun Zhan and Han Lun Yap (DSO National Laboratories, Singapore); Radmila Pribić (Thales Nederland BV Delft, The Netherlands)

Tue-1a.8 SINR Analysis in Persymmetric Adaptive Processing  
Jun Liu (National Laboratory of Radar Signal Processing & Xidian University, P.R. China); Liu Hongwei and Bo Chen (Xidian University, P.R. China); Xiang-Gen Xia (Shenzhen University & University of Delaware, USA)

Tue-1a.9 Stochastic Resolution Analysis of Co-prime Arrays in Radar  
Radmila Pribić (Thales Nederland BV Delft, The Netherlands); Mario Coutino and Geert Leus (Delft University of Technology, The Netherlands)

Tue-1a.10 Multiple target tracking in the fully adaptive radar framework  
Luis Úbeda-Medina and Jesús Grajal (Universidad Politécnica de Madrid, Spain)

Tue-1a.11 Direct Data Domain Based Adaptive Beamforming for FDA-MIMO Radar  
Jingwei Xu, Yanhong Xu and Guisheng Liao (Xidian University, P.R. China)

Tue-1b: Detection and estimation theory II

Tue-1b.1 Wald-Kernel: A Method for Learning Sequential Detectors  
Diyan Teng and Emre Ertin (The Ohio State University, USA)

Tue-1b.2 Signal Reconstruction for Multi-source Variable-rate Samples with Autocorrelated Errors in Variables  
Andrew Fox (Carnegie Mellon University, USA); Vinod Sharma (Indian Institute of Science, India); B. V. K. Vijaya Kumar (Carnegie Mellon University, USA)

Tue-1b.3 Inferring High-Dimensional Poisson Autoregressive Models  
Eric C Hall (University of Wisconsin-Madison, USA); Garvesh Raskutti (University of Melbourne, Australia); Rebecca Willett (University of Wisconsin-Madison, USA)

Tue-1b.4 Generalized Legendre Transform Multifractal Formalism for Nonconcave Spectrum Estimation  
Roberto Leonarduzzi (Université de Lyon, France); Hugo Touchette (Stellenbosch University, South Africa); Herwig Wendt (University of Toulouse & IRIT - ENSEEIHT, CNRS, France); Patrice Abry (Ecole Normale Superieure, Lyon, France); Stephane Jaffard (University of Paris-Est Creteil, France)
Tue-1b.5 An Auxiliary Variable Method for Langevin based MCMC algorithms  288
  Yosra Marnissi and Emilie Chouzenoux (Université Paris-Est Marne-la-Vallée, France); Jean-
  Christophe Pesquet (Université Paris-Est, France); Amel Benaza (Carthage University, Tunisia)

Tue-1b.6 Alternative Sample Size measures for Importance Sampling  293
  Luca Martino (University of Helsinki, Finland); Víctor Elvira (University Carlos III of Madrid, Spain);
  Francisco Louzada (Universidade de São Paulo (USP), Brazil)

Tue-1b.7 Robust Markov Random Field Outlier Detection and Removal in Subsampled Images  298
  Paul McCool (NHS, United Kingdom); Yoann Altmann and Antonios Perperidis (Heriot-Watt
  University, United Kingdom); Steve McLaughlin (Heriot Watt University, United Kingdom)

Tue-1b.8 Translation Invariant DWT based Denoising using Goodness of Fit Test  303
  Naveed ur Rehman (COMSATS Institute of Information Technology, Pakistan); Ubaid ur Rehman
  (University of Kassel, Germany); Syed Zain Abbas, Anum Asif and Anum Javed (COMSATS Institute
  of Information Technology, Pakistan)

Tue-1b.9 A wavelet based likelihood ratio test for the homogeneity of Poisson processes  308
  Youssef Taleb and Edward Cohen (Imperial College London, United Kingdom)

---

Tue-1c SS: Multivariate statistical signal modeling and analysis

Tue-1c SS.1 Distributed Multivariate Regression with Unknown Noise Covariance in the
presence of Outliers: An MDL Approach  313
  Roberto López-Valcarce (Universidad de Vigo, Spain); Daniel Romero (University of Minnesota,
  USA); Josep Sala-Alvarez (Universitat Politècnica de Catalunya, Spain); Alba Pagès-Zamora
  (Technical University of Catalonia & UPC, Spain)

Tue-1c SS.2 Optimal transport vs. Fisher-Rao distance between copulas for clustering
multivariate time series  318
  Gautier Marti (Ecole Polytechnique & Hellebore Capital, France); Sébastien Andler (Ecole Normale
  Supérieure de Lyon, France); Frank Nielsen (Ecole Polytechnique, France); Philippe Donnat
  (Hellebore Capital, United Kingdom)

Tue-1c SS.3 A Generalized Multivariate Logistic Model and EM Algorithm based on the Normal
Variance Mean Mixture Representation  N/A
  Jason Palmer (University of California San Diego, USA); Ken Kreutz-Delgado (University of
  California, San Diego, USA); Scott Makeig (University of California San Diego, USA)

Tue-1c SS.4 Approximating Bayesian confidence regions in convex inverse problems  323
  Marcelo Pereyra (University of Bristol, United Kingdom)

Tue-1c SS.5 Balanced Least Squares: Estimation in Linear Systems with Noisy Inputs and
Multiple Outputs  328
  Javier Via and Ignacio Santamaria (University of Cantabria, Spain)

Tue-1c SS.6 Multimodal Metric Learning with Local CCA  333
  Or Yair and Ronen Talmon (Technion - Israel Institute of Technology, Israel)

---

Coffee break

---

Tue-2a: Signal processing over graphs and networks II

Tue-2a.1 Evolutionary Spectral Graph Clustering Through Subspace Distance Measure  338
  Esraa Al-sharoa (Michigan State University, USA); Selin Aviyente (Electrical and Computer
  Engineering, Michigan State University, MI, USA)
Tue-2a.2 Diffusion estimation of mixture models with local and global parameters  343
Kamil Dedecius (Institute of Information Theory and Automation, Czech Academy of Sciences, Czech Republic); Vladimira Seckarova (Institute of Information Theory and Automation, Czech Academy of Sciences)

Tue-2a.3 Translation on Graphs: An Isometric Shift Operator  N/A
Benjamin Girault (ENS Lyon, France); Paulo Gonçalves (INRIA, France); Eric Fleury (ENS Lyon / INRIA, France)

Tue-2a.4 Identifying Rumor Sources with Different Start Times  348
Feng Ji and Wee Peng Tay (Nanyang Technological University, Singapore)

Tue-2a.5 Estimation of Time-Varying Mixture Models: An Application to Traffic Estimation  353
Sean Lawlor and Michael Rabbat (McGill University, Canada)

Tue-2a.6 Synchronization for classical blind source separation algorithms in wireless acoustic sensor networks  358
Cosme Llerena, Roberto Gil-Pita, David Ayllón and Héctor Adrián Sánchez-Hevia (University of Alcalá, Spain); Inmaculada Mohino-Herranz (University of Alcala, Spain); Manuel Rosa (University of Alcalá, Spain)

Tue-2a.7 A Hawkes' eye view of network information flow  363
Michael G Moore and Mark Davenport (Georgia Institute of Technology, USA)

Tue-2b: Compressed sensing

Tue-2b.1 Oracle Performance Estimation of Bernoulli-distributed Sparse Vectors  368
Rémy Boyer (Université Paris-Sud (UPS), CNRS, CentraleSupelec, France); Pascal Larzabal (ENS-Cachan, PARIS, France); Bernard Henri Fleury (Aalborg University, Denmark)

Tue-2b.2 Bound on the estimation grid size for sparse reconstruction in direction of arrival estimation  372
Mario Coutino (Delft University of Technology, The Netherlands); Radmila Pribić (Thales Nederland BV Delft, The Netherlands); Geert Leus (Delft University of Technology, The Netherlands)

Tue-2b.3 On Sparse Recovery Using Finite Gaussian Matrices: RIP-Based Analysis  376
Ahmed Elzanaty, Andrea Giorgetti and Marco Chiani (University of Bologna, Italy)

Tue-2b.4 Bilevel Feature Selection in Nearly-Linear Time  381
Chinmay Hegde (Iowa State University, USA)

Tue-2b.5 Sparse Error Correction with Multiple Measurement Vectors  386
Sharmin Kibria, Jinsub Kim and Raviv Raich (Oregon State University, USA)

Tue-2b.6 A Refined Analysis for the Sample Complexity of Adaptive Compressive Outlier Sensing  391
Xingguo Li and Jarvis D. Haupt (University of Minnesota, USA)

Tue-2b.7 Low Rank Matrix Recovery From Column-Wise Phaseless Measurements  396
Seyedyehsara Nayer and Namrata Vaswani (Iowa State University, USA); Yonina C. Eldar (Technion-Israel Institute of Technology, Israel)

Tue-2c SS: Bayesian detection and estimation techniques for radar applications

Tue-2c SS.1 Weiss-Weinstein bound for an abrupt unknown frequency change  401
Lucien Bacharach (Université Paris 11, France); Mohammed Nabil El Korso (Paris 10 University & LEME-EA 4416, France); Alexandre Renaux (Universite Paris 11, France)
Tue-2c SS.2 Adaptive Waveform Design for Target Detection with Sequential Composite Hypothesis Testing 406
Shahar Bar and Joseph Tabrikian (Ben-Gurion University of the Negev, Israel)

Tue-2c SS.3 Estimation and compensation of I/Q imbalance for FMCW radar receivers 411
Angelo Coluccia, Vincenzo Dodde and Antonio Masciullo (University of Salento, Italy); Giuseppe Ricci (University of Salento, Lecce, Italy)

Tue-2c SS.4 Improving Separating Function Estimation Tests Using Bayesian Approaches 415
Ali Ghabadzadeh and Raviraj Adve (University of Toronto, Canada)

Tue-2c SS.5 Velocity ambiguity mitigation of off-grid range migrating targets via Bayesian sparse recovery 419
Marie Lasserre and Stéphanie Bidon (University of Toulouse / ISAE, France); François Le Chevalier (Thales Air Systems & TU Delft, France)

Tue-2c SS.6 Bayesian Framework and Radar: On Misspecified Bounds and Radar-Communication Cooperation 424
Christ D. Richmond and Prabahan Basu (MIT Lincoln Laboratory, USA)

Tue-2c SS.7 Detection in Multiple Channels Having Unequal Noise Power 428
Songsrir Sirianunpiboon and Stephen D Howard (Defence Science and Technology Group, Australia); Douglas Cochran (Arizona State University, USA)

---

**Tue-2d SS: Making sense out of multi-channel physiological data for pervasive health applications**

---

Tue-2d SS.1 Accelerometer-based gait assessment: pragmatic deployment on an international scale 433
Silvia Del Din, Aodhan Hickey, Simon Woodman, Hugo Hiden and Rosie Morris (Newcastle University, United Kingdom); Paul Watson (University of Newcastle, United Kingdom); Kianoush Nazarpour, Michael Catt, Lynn Rochester and Alan Godfrey (Newcastle University, United Kingdom)

Tue-2d SS.2 Cortical Distribution of N400 Potential in Response to Semantic Priming with Visual Non-Linguistic Stimuli 438
Elvira Khachatryan (KULeuven & YSMU, Belgium); Nikolay Chumerin (Katholieke Universiteit Leuven, Belgium); Evelien Carrette (University Hospital Ghent, Belgium); Flavio Camarrone (KU Leuven, Belgium); Leen De Taeye (UZ Ghent, Belgium); Alfred Meurs, Paul Boon and Dirk Van Roost (University Hospital Ghent, Belgium); Marc Van Hulle (KU Leuven, Belgium)

Tue-2d SS.3 Reconstruction of Brain Activity in EEG / MEG Using Reduced-Rank Nulling Spatial Filter 443
Tomasz Piotrowski (Nicolaus Copernicus University, Poland); Jan Nikadow (Nicolaus Copernicus University, Poland); David Gutierrez (Center for Research and Advanced Studies & Monterrey's Unit, Mexico)

Tue-2d SS.4 Efficient Low-Rank Spectrotemporal Decomposition using ADMM 448
Gabriel Schambur (University of California, San Diego, USA); Demba E Ba (Harvard University); Mark Wagner (University of California, San Diego, USA); Todd Coleman (UCSD, USA)

Tue-2d SS.5 Dimensionality Reduction of Sample Covariance Matrices by Graph Fourier Transform for Motor Imagery Brain-Machine Interface 453
Toshihisa Tanaka, Takashi Uehara and Yuichi Tanaka (Tokyo University of Agriculture and Technology, Japan)

Tue-2d SS.6 Estimation of High-Dimensional Connectivity in fMRI Data via Subspace Autoregressive Models 458
Chee-Ming Ting (Universiti Teknologi Malaysia, Malaysia); Abd-krim Seghouane (The University of Melbourne, Australia); Sh-Hussain Salleh (Universiti Teknologi Malaysia, Malaysia)

Tue-2d SS.7 Hierarchical Online SSVEP Spelling Achieved With Spatiotemporal Beamforming 463
Benjamin Wittevrongel and Marc Van Hulle (KU Leuven, Belgium)
Lunch

Plenary talk

Coffee break

Tue-3a: Signal processing for communications

**Tue-3a.1 A Finite Moving Average Test for Transient Change Detection in GNSS Signal Strength Monitoring** 468
Daniel Egea-Roca (Universitat Autònoma de Barcelona, Spain); Gonzalo Seco-Granados (Universitat Autònoma de Barcelona, Spain); José A. López-Salcedo (Universitat Autònoma de Barcelona, Spain); H. Vincent Poor (Princeton University, USA)

**Tue-3a.2 Statistical Analysis and Optimization of FFR/SFR-aided OFDMA-based Multi-cellular Networks** 473
Jan García-Morales, Guillem Femenias and Felip Riera-Palou (University of the Balearic Islands, Spain)

**Tue-3a.3 Analog joint source channel coding over MIMO fading channels with imperfect CSI** 478
José P González-Coma, Pedro Suárez-Casal, Óscar Fresno and Luis Castedo (University of A Coruña, Spain)

**Tue-3a.4 A new approach for solving anti-jamming games in stochastic scenarios as pursuit-evasion games** 483
Juan Parras and Jorge del Val (Universidad Politécnica de Madrid, Spain); Santiago Zazo (Universidad Politécnica Madrid, Spain); Javier Zazo (Universidad Politécnica de Madrid, Spain); Sergio Valcarcel Macua (Universidad Politécnica de Madrid (UPM), Spain)

**Tue-3a.5 Weighted Sum Rate Maximization of MISO Interference Broadcast Channels via Difference of Convex Functions Programming: A Large System Analysis** 488
Wassim Tabikh and Dirk Slock (EURECOM, France); Yi Yuan-Wu (Orange Labs, France)

**Tue-3a.6 Recursive End-To-End Distortion Estimation for Error-Resilient Adaptive Predictive Compression Systems** 493
Sina Zamani (University of California Santa Barbara, USA); Tejaswi Nanjundaswamy and Kenneth Rose (University of California, Santa Barbara, USA)

**Tue-3a.7 Study of Statistical Robust Closed Set Speaker Identification with Feature and Score-Based Fusion** 498
Musab Al-Kaltakchi and Wai Lok Woo (Newcastle University, United Kingdom); Satnam Dlay (University of Newcastle, United Kingdom); Jonathon Chambers (Newcastle University, United Kingdom)

**Tue-3a.8 Analog Distributed Coding of Correlated Sources for Fading Multiple Access Channels** 503
Óscar Fresno, Pedro Suárez-Casal and Luis Castedo (University of A Coruña, Spain); Javier Garcia-Frias (University of Delaware, USA)

**Tue-3a.9 Generalized Integration techniques for high-sensitivity GNSS receivers affected by oscillator phase noise** 508
David Gómez-Casco and José A. López-Salcedo (Universitat Autònoma de Barcelona, Spain); Gonzalo Seco-Granados (Universitat Autònoma de Barcelona, Spain)

**Tue-3a.10 Measurement Matrix Design For Compressive Sensing With Side Information at the Encoder** 513
Pingfan Song (University College London); Joao Mota (University College London, United Kingdom); Nikos Deligiannis (Vrije Universiteit Brussel, Belgium); Miguel Raul Dias Rodrigues (University College London, United Kingdom)
### Tue-3b: Machine learning and pattern recognition II

**Tue-3b.1 Efficient KLMS and KRLS Algorithms: A Random Fourier Feature Perspective**  518  
Pantelis Bouboulis, Spyridon Pougkakiotis and Sergios Theodoridis (University of Athens, Greece)

**Tue-3b.2 Designing Classifier Architectures using Information Theory**  523  
John Cortese (Massachusetts Institute of Technology, USA)

**Tue-3b.3 Democratic prior for anti-sparse coding**  528  
Clément Elvira and Pierre Chainais (Ecole Centrale Lille & CRISTAL CNRS, France); Nicolas Dobigeon (University of Toulouse, France)

**Tue-3b.4 Group invariant subspace learning for outlier detection**  532  
Bo Fan and Shuchin Aeron (Tufts University, USA)

**Tue-3b.5 Human Authentication From Ankle Motion Data Using Convolutional Neural Networks**  537  
Matteo Gadaleta, Luca Merelli and Michele Rossi (University of Padova, Italy)

**Tue-3b.6 Unsupervised segmentation of piecewise constant images from incomplete, distorted and noisy data**  542  
Jean-François Giovannelli (IMS, UMR CNRS 52 18, Université Bordeaux 1, France); Andrei Barbos (IMS, France)

**Tue-3b.7 Multilinear Subspace Clustering**  547  
Eric Kernfeld (University of Washington, USA); Nathan Majumder, Shuchin Aeron and Misha Kilmer (Tufts University, USA)

**Tue-3b.8 Order-based Generalized Multivariate Regression**  552  
Milad Kharratzadeh and Mark Coates (McGill University, Canada)

**Tue-3b.9 Hierarchical Bayesian variable selection in the probit model with mixture of nominal and ordinal responses**  557  
Eleftheria Kotti, Ioanna Manolopoulou and Tom Fearn (University College London (UCL), United Kingdom)

**Tue-3b.10 Jeffreys Prior Regularization for Logistic Regression**  562  
Tam Nguyen, Raviv Raich and Phung Lai (Oregon State University, USA)

### Tue-3c SS: Statistical signal processing and learning in smart grid

**Tue-3c SS.1 An Approximation Algorithm for future wind scenarios**  567  
Bita Analui (Arizona State University & Arizona State University, USA); Anna Scaglione (Arizona State University, USA)

**Tue-3c SS.2 Online Learning and Pricing for Demand Response in Smart Distribution Networks**  572  
Sevi Baltaoglu, Lang Tong and Qing Zhao (Cornell University, USA)

**Tue-3c SS.3 Decentralized MMSE Attacks in Electricity Grids**  577  
Ifnaki Esnaola (University of Sheffield, United Kingdom); Samir M. Perlaza (INRIA, France); H. Vincent Poor (Princeton University, USA); Oliver Kosut (Arizona State University, USA)

**Tue-3c SS.4 A Graphical Approach to Quickest Outage Localization in Power Grids**  582  
Javad Heydari and Ali Tajer (Rensselaer Polytechnic Institute, USA)

**Tue-3c SS.5 Estimating Treatment Effects in Demand Response**  587  
Pan Li and Baosen Zhang (University of Washington, USA)

**Tue-3c SS.6 Dynamic Decentralized Voltage Control for Power Distribution Networks**  592  
Hao Jan Liu (University of Illinois at Urbana Champaign, USA); Wei Shi and Hao Zhu (University of Illinois at Urbana-Champaign, USA)
**Banquet Dinner**

**Plenary talk**

**Coffee break**

**Wed-1a: Applications (biomedical, energy, security)**

<table>
<thead>
<tr>

</table>
Wed-1b.2 Regularised Estimation of 2D-Locally Stationary Wavelet Processes  651
Alexander Gibberd and James D B Nelson (University College London, United Kingdom)

Wed-1b.3 Fast filtering with new sparse transition Markov chains  656
Ivan Gorynin and Emmanuel Monfrini (Institut Telecom, Telecom SudParis, France); Wojciech Pieczynski (Télécom SudParis, France)

Wed-1b.4 On the estimation of many closely spaced complex sinusoids  661
Roland Jonsson (SAAB Electronic Defence Systems, Sweden)

Wed-1b.5 A Multiscale Approach for Tensor Denoising  665
Alp Ozdemir and Mark Iwen (Michigan State University, USA); Selin Aviyente (Electrical and Computer Engineering, Michigan State University, MI, USA)

Wed-1b.6 Two-Stage Estimation after Parameter Selection  670
Tirza Routtenberg (Ben Gurion University of the Negev, Israel)

Wed-1b.7 An order fitting rule for optimal subspace averaging  675
Ignacio Santamaria (University of Cantabria, Spain); Louis Scharf (Colorado State, USA); Chris Peterson and Michael Kirby (Colorado State University, USA); Joseph M. Francos (Ben Gurion University, Israel)

Wed-1b.8 Block-Wise MAP Inference for Determinantal Point Processes with Application to Change-Point Detection  679
Martin Jinye Zhang (Stanford University, P.R. China); Zhijian Ou (Tsinghua University, P.R. China)

Wed-1c SS: Optimization and simulation for image processing

Wed-1c SS.1 Spatial regularization for nonlinear unmixing of hyperspectral data with vector-valued kernel functions  684
Rita Ammanouil (University of the Cote d’Azur, Lebanon); André Ferrari and Cédric Richard (Université de Nice Sophia-Antipolis, France); Jean-Yves Tourneret (University of Toulouse & ENSEEIHT, France)

Wed-1c SS.2 A Regularized Sparse Approximation Method for Hyperspectral Image Classification  689
Leila Belmerhnia (CRAN, Université de Lorraine, CNRS, France); El-Hadi Djermoune (Université de Lorraine & CRAN UMR 7039 CNRS, France); David Brie (CRAN, Nancy Université, CNRS, France); Cédric Carteret (LCPME, France)

Wed-1c SS.3 Unbiased Injection of Signal-Dependent Noise in Variance-Stabilized Range  N/A
Lucas Borges (UFSC, Brazil); Marcelo A. C. Vieira (University of São Paulo, Brazil); Alessandro Foi (Tampere University of Technology, Finland)

Wed-1c SS.4 Bayesian Multifractal Analysis of Multi-temporal Images Using Smooth Priors  694
Sébastien Combirexelle (University of Toulouse & IRIT-ENSEEIHT, France); Herwig Wendt (University of Toulouse & IRIT - ENSEEIHT, CNRS, France); Jean-Yves Tourneret (University of Toulouse & ENSEEIHT, France); Patrice Abry (Ecole Normale Superieure, Lyon, France); Steve McLaughlin (Heriot Watt University, United Kingdom)

Wed-1c SS.5 Robust hyperspectral unmixing accounting for residual components  699
Abderrahim Halimi (Heriot-Watt University, United Kingdom); Paul Honeine (Université de Rouen, France); José Bioucas-Dias (Instituto Superior Técnico, Portugal)

Wed-1c SS.6 Analysis Dictionary Learning for Scene Classification  704
Wen Tang, Ives Rey Otero and Hamid Krim (North Carolina State University, USA)

Wed-1c SS.7 Weakly-supervised Analysis Dictionary Learning with Cardinality Constraints  709
Zeyu You, Raviv Raich, Xiaoli Fern and Jinsub Kim (Oregon State University, USA)

Closing
