Geosteering and Well Placement Workshop 2010

Balancing Value & Risk

Dubai, United Arab Emirates
7 – 10 November 2010

# TABLE OF CONTENTS

Keynote Address: Geosteering: Where Are We? Where Are We Going? .......................................................... 1  
S. Williams

Geosteering - The Key to Late Life Appraisal on a Giant Producing Field .......................................................... 4  
J. Scott, F. Salamov

When Production Strategy Based On Latest Well Placement Solutions Successfully Lead To The Redevelopment Of A Previously Abandoned Oil Field On The Norwegian Continental Shelf ........................................ 9  
E. Stueland, C. Dupuis, N. Stevenson, J. Denichou

Geophysical Support to a Challenging Horizontal Drilling- A Case History from SE Kuwait ................................ 13  
A. Al-Ghareeb, R. Kotecha, A. Omran, P. Mukherjee, M. Anandan, M. Hafez

Resistivity Images, NMR & PLT Logs Analysis of the Campanian Reservoirs of the Santos Basin .................. 17  
L. Masuti

Optimized Sidetrack Placement Through the use of a Bed Boundary Mapping Tool ...................................... 21  
M. Spotkaeff, R. Hill, M. Croft

Transition Zone Geosteering ............................................................................................................................... 26  
A. Berle, J. Jensen, A. Thorsen

Geosteering in Thin Carbonate Clinoform Reservoirs - A Low Tech and High Tech Case Study ...................... 31  

Optimizing a Two Compartment Reservoir in Deep Water Turbidite Sand by Single Well Placement .......... 34  
G. Santoso, O. Babayevu, D. Nwabor, C. Odiah, E. Penna, V. Bandele

Keynote Address: Geosteering to Consistency - Building Well Placement Teams to Deliver High-Rate Gas Developments Offshore Trinidad .......................................................... 37  
L. Verteuil

Evaluation of an Independent Solution for Geosteering and Horizontal Well Placement – A Case Study for Dubai Ilam Reservoir ........................................................................................................ 39  
N. Suarez, M. D'Cruz

Well Productivity Estimation During Drilling ........................................................................................................ 44  
Y. Jalali

Keynote Address: Unconventional Geosteering for Unconventional Reservoirs ........................................... 48  
J. Pitcher

Geosteering with Minimal LWD Capability: Biosteering during Underbalanced, Coiled Tubing Drilling Operations for Gas in the Middle East and the Development of the Stratsteer Concept ................. 53  
P. Marshall

Innovative Well Placement Solutions for Optimized Shale Gas Development ................................................... 57  
S. Hen, J. Kok, R. Malpani, E. Tollefsen, J. Bailey, J. Denichou

Keynote Address: Key Performance Indicators for Geosteering ...................................................................... 59  
A. Thorsen

PeriScope Tool as the Drive to Improve the Geosteering Performance on Odoptu-More Field, Sakhalin ........ 63  
A. Shirshov, O. Fedorova

Geological Risk Analysis for Horizontal Wells based on Drilling Campaign in the Cretaceous Burgan Formation, Kuwait .................................................................................................................. 67  

Planning and Drilling Horizontal Wells in a Deep Water Environment, Campos Basin, Brazil ..................... 69  
A. Meira, G. Schmitt, M. Moraes, R. Carvalho, R. Beer

Brown Field Well Placement Optimisation using NMR ...................................................................................... 71  
S. Williams

Geosteering with LWD Azimuthal Sonic Measurements ....................................................................................... 73  
A. Aki

Implementation of a New Well Placement Technique in Deepwaters Channel-Levee Complexes: Case Study-Oyofield Nigeria .............................................................................................................. 75  
K. Akram, I. Gagok

Successful Application of a Distance to Boundary Technology under Tough Drilling and Reservoir Conditions ......................................................................................................................................... 79  
A. Guedes, D. Salim, C. Silva, R. Samaroo
Horizontal Well Placement and Segmentation for Completion at M1 Sandstone, Oriente Basin, Ecuador

Utilizing Collaborative Environments and 4-D Earth Models to Enhance Real-Time LWD-Based Reservoir Navigation

Innovative Use of Real Time Density Image in Well Placement

Simplifying Geosteering Interpretation and Decision-Making in Complex Environments Using Deep Resistivity Images

The Value of Integrated Pre-job Modeling and Planning in the Change to Horizontal Drilling and Completion Strategies

Optimized Wellbore Positioning Delivers Section 100% in the Pay Zone and Reduces Operational Time by 12 Days

Structural Complexity Mapped at Well Scale

Deep Resistivity Images as a Factor in Making Geosteering Decisions
