PORTS 2016

Port Planning and Development

Papers from Sessions of the 14th Triennial International Conference

Seattle, Washington, USA
12 – 15 June 2016

Editors:

Don Oates
Elizabeth Burkhart
Jennifer Grob

ISBN: 978-1-5108-2964-0
Contents

Terminal Planning and Design

A Case Study and Recommendation for Large-Diameter FRP Monopile
Dolphin Systems.................................................................................................................1

Port of Long Beach Middle Harbor Redevelopment: Designing the World’s
Most Technologically Advanced and Greenest Container Terminal.................12
Thomas Baldwin, Doug Sereno, Kent Sayler, and Erika Martin

Gulf Gateway Terminal—Crude by Water Success.................................................20
Charles W. Nelson and Stephen Champagne

Slope Protection under Piled Quays ...............................................................31
Martin G. Hawkswood and Matthew King

No Piles Required: Innovative Marine Terminal Design Concepts..................41
Michelle Ng, Farhad Shushtarian, and Ron Byres

Berths 144-147 Automated Backland Redevelopment at POLA .....................51
Adrienne Fedrick, Christina Sar, Milind Desai, Robert Henderson, and John Lee

BC Ferries Minor/Intermediate Standardized Berths .....................................61
Robert Seitz, David Carroll, and Stephen Mayall

Designing a Battery Exchange Building for Automated Guided Vehicles ..........71
Bruce R. Farrell and Robert McKie

PIANC Guidelines: Oil and Petrochemical Terminal Design .........................81
R. Heffron, W. Asante, M. Eskijian, G. Johnson, and Jerko Kocijan

Big Ship Ready in Tacoma—The Reconfiguration of Pier 4.........................91
S. Kuebler and T. Thornsley

Port Canaveral Cruise Terminal 1 Berth.....................................................101
Gary D. Ledford, Tomas Montemayor, Scott Fenical, Sandra D. Rice, and Songtao Yang

Fender System Upgrade at a Bulk Offloading Terminal...............................111
Craig Lewis and Clay Serrahn
Modernizing a Dry Bulk Terminal in Burnside, LA ........................................... 121
Deborah C. MacPherson and Johnny Arellano

Sausalito Ferry Terminal Vessel Boarding Rehabilitation ............................... 131
Azadeh Bozorgzadeh, Bo Jensen, and John Eberle

Owner, Operator, Engineer: A Joint Approach for the Design, Construction,
and Start-Up of the Long Beach Middle Harbor Automated Container
Terminal .................................................................................................................. 145
Doug Thiessen, Tom Baldwin, Ashebir Jacob, and Anthony Otto

Fuel Transfer Facility—Fender System Replacement ........................................ 155
Louis Klusmeyer

Integrated Planning and Analysis Tool for Container Terminals .............. 164
Hardik M. Gajjar and Thomas Ward

Canadian Codes for Marine Oil and Gas Terminals ................................. 173
Pooja Jain and Stuart Stringer

Port of Long Beach Middle Harbor Terminal: Modern Container
Terminal Pavement Design and Construction ..................................................... 183
Kenneth W. Wylie and Tristan Le

Design and Construction of Two Concrete Pontoons to Serve as Berths at
the Port of Juneau Cruise Ship Terminal ............................................................. 193
Yeliz Firat, Robert Easley, and Manfred Zinserling

Lake Charles Refinery Docks 1 and 2—A New Life ....................................... 204
William J. Bohlen, Jonathan E. Thomas, and Derick L. Hoffpauir

Port Infrastructure: Marine Commerce Terminal in New Bedford, MA .... 214
Susan Nilson, John DeRug eris, Eric M. Hines, Jay Borkland, David Carchedi,
and Diane Y. Baxter

Seismic Design of Marine Loading Arms and Cargo Hose Towers ............ 224
W. M. Bruin, P. H. Fikse, G. S. Johnson, and L. H. Palacios

Development of Mexico’s Newest Container Terminal ............................. 234
David Street, Arq. Ricardo Cheng, and John Bardi

Seattle Multimodal Terminal: Reconstructing Washington State Ferries’
Largest and Busiest Terminal ................................................................. 245
Genevieve F. Rucki and Douglas R. Playter

© ASCE
Berth Expansion at Manzanillo International Terminal, Colon, Panama ........ 254
Ajaya P. Malla and Christopher B. Cornell

Innovative Upgrades to a Passenger Ferry Loading System ................. 264
Daniel W. Hartford, James Schufreider, and Scott Holloway

Unique Development for a New 12-Ferry Maintenance Base ................. 273
Nathan Watson and Michael Gougherty

Evolution of a Container Terminal Wharf Design at the Port of Long Beach Middle Harbor Terminal .............................................................. 283
Larry W. Nye and Omar Jaradat

Retrofit of an Existing Container Yard to Accommodate Automated Stacking Cranes—Manzanillo International Terminal, Panama .......... 293
Brett Ozolin and Christopher Cornell

Practical Design of a Wind Turbine Logistics Port .................................. 303
Christopher B. Matson

Design and Construction of a Flexible Layberth Facility to Withstand Severe Weather Forces ................................................................. 313
Frank Proctor, Robert Rogers, Michael Krieber, John Frazier, and Kyle Masters

Port of New Orleans: Mississippi River Intermodal Terminal .................. 323
Andrée L. Fant and Jonathan G. McDowell

Cost-Effective Design of a Marina Breakwater Using Horizontal Sheet Piling .......................................................... 333
Shannon Kinsella and Erik Bishop

A Marine Oil Terminal Trestle Repair and Replacement Project ............. 343
Ted W. Trenkwalder, Sandy Yee, and Andres Espinoza

Port Planning and Operations

Ross W. Dunning

Delivering the First LNG Bunker Fuel Facility to the Pacific Northwest .... 360
Thomas J. McCollough and James Hogan
A Port Operation Model as a Decision-Making Tool for Breakwater Construction .................................................................................................................. 366
Joan Leal, Mayira Molina, and Andres Miller

Enhancing U.S. Port Resiliency ............................................................................. 376
Shannon McLeod, Frank Southworth, Anne Strauss-Wieder, and Jolene Hayes

Gateway to Resources—Logistics in a Remote Location ..................................... 396
A. Roper and H. Jenkins

Economic Resiliency Assessment Framework for Investments in Maritime Security ....................................................................................................... 406
Hardik M. Gajjar

Lessons Learned to Improve the Resiliency of Floating Structures .................. 415
Matthew L. Teeden

Portwide Seismic Risk Assessment: (1) Engineering Analyses ........................... 423
Scott McMahon, Stephen Dickenson, Scott Schlechter, and Jack Gordon

Portwide Seismic Risk Assessment: (2) Benefit-Cost Analysis ........................... 434
William P. Graf, Dave Dittmer, Tom Wharton, and Hans Conradt

Developing State-of-the-Art Marine Concrete Repair ....................................... 441
Daniel B. Robbins and Linn B. Lebel

Bulkheads: Are They Always Needed? ................................................................. 451
Daniel B. Robbins, Eric T. Levesque, and Kyle Vandemoer

Comprehensive Commissioning Benefits for Building Owners during Design, Construction, and Beyond .......................................................... 459
Rodger Kuo and Bryan Low

Community Collaboration to Solve Design Challenges ..................................... 468
Sue L. Lai, Sal S. Zambrano, Thomas E. Sardo, Mary McCormick, and Ruth A. Lehmann

Innovative Rehabilitation of a Cellular Cofferdam ............................................. 477
W. Stuart Lewis

Defining the Anchorage Port Modernization Project ........................................ 486
Todd Cowles, Lon Elledge, Douglas R. Playter, and George Newman

Setting the Pace with Rail Access at San Pedro Bay Ports ................................ 496
Michael Leue and Carlo Luzzi
The New ASCE Waterfront Facilities Inspection and Assessment Manual .....506
Ron Heffron

Sea-Level Change Considerations for Marine Civil Works—COPRI
Committee Update on Best Practices.................................................................517
Jean O. Toilliez, Todd J. Mitchell, and Austin Becker

Channel Capacity Analysis for the Jasper Ocean Terminal .......................530
Jason P. Ball, Ali Rezvani, and Michael Rieger

Egyptian Fishing Ports Challenges and Opportunities Case Study:
Mediterranean Sea Ports ....................................................................................540
Mahmoud Sharaan, Abdelazim Negm, Moheb Iskander, and Kazuo Nadaoka

Risk-Based Approach for More Resilient and Sustainable Marine
Structures ...........................................................................................................550
Daniel J. Kennedy and Jean O. Toilliez

Physical Modelling and Design Optimizations for a New Container
Terminal at the Port of Moin, Costa Rica ........................................................560
S. Baker, G. Frank, A. Cornett, D. Williamson, and D. Kingery

Statewide Strategic Planning for Oregon’s Port System ..............................570
Scott Keillor, Dave Harlan, John Burns, Brooke Walton, Todd Chase, and
Nicole McDermott

Managing New York City’s Aging Waterfront Infrastructure ....................579
Brian Craine, Jim Hall, and Stephen Famularo

Planning of Offshore Container Terminals ....................................................589
D. Pachakis, P. Beamish, and P. Menegazzo

Environmental

Container Terminal Gravity-Based Media Filtration ..................................599
Ross W. Dunning, Ticson Mach, and Nathan A. Watson

Innovative Stormwater Management at a Waterfront Log Handling
Facility ...........................................................................................................609
Ben Fuentes and Anita Fichthorn

Unique Cold Ironing Applications .................................................................616
Christopher Mansour and John Demers

Using Simulation Modeling to Determine Future Environmental Impacts ......623
Krystle L. McBride

© ASCE
Active Above-Ground Stormwater Treatment at a Break Bulk and Container Terminal .................................................................633
Ben Fuentes

Whatcom Waterway Phase 1 Remediation .................................................................638
M. Woltman and T. Wang

Integrating Marine Infrastructure with Environmental Cleanup ..................648
Erik Gerking, Lawrence Beard, and Pooja Jain

Water Quality Impact Assessment and Mitigation Due to the Construction of a Marina on Ayia Napa Beaches in Cyprus ..............658
Mauricio Wesson, Margaret Boshek, and Jack C. Cox

Phase 1 Esquimalt Graving Dock Waterlot Remediation .................................669

Huntington Harbour Dredging Project: Case Study of Dredge Material Re-Use with Multiple Benefits ...........................................679
K. J. Garvey and S. Brodeur

Evaluation of PCB Availability in Sediment after the Application of an Activated Carbon Amendment at an Active U.S. Naval Shipyard ........689
Victoria Kirtay, Gunther Rosen, D. Bart Chadwick, Melissa Grover, Jason Conder, David Moore, and Victor Magar

Present and Future Challenges of Infrastructure Developments on the Coast of Chile ......................................................................696
F. J. Repetto and P. M. Guthrie

Possible Re-Alignment of the Lower Mississippi River and Influences on Navigation .........................................................................706
Rob Nairn, Ed Liegel, John Vickerman, Steven Davie, Joe Cancienne, and Dale Miller

Beneficial Use of Dredged Material at South Padre Island, Texas: A Partnership Success Story ..........................................................716
E. Ray Newby

Habitat Restoration and Environmental Remediation Success at a National Wildlife Refuge Wetland .......................................................724
Joshua C. Elliott, Laurie Olin, Madi Novak, Phil Wiescher, Curtis Riley, and Michael Reiter
Sustainable Design Solutions for Harbor Expansion Projects in Space-Constrained Environmentally Sensitive Areas.................................734
Lawrence DeRose and Zachary R. Bihr

Fort Tilden Historical Bulkhead Assessment.......................................................744
Bethany Bearmore, Brett Ozolin, and Patricia Sacks

Meeting the Port of Los Angeles’ Solar Power Goals..........................................752
Carlos C. Baldenegro

Savannah Harbor Expansion Project—Simulating Future Conditions in the Harbor.........................................................................................762
Steven Davie

Navigation and Waterways

Submerged Pile Removal in a Dredge Borrow Area, Port of Long Beach West Basin Site .................................................................772
Todd Graham and Derek Davis

Demolition of a Deep Sea Quay Wall in Rotterdam............................................782
Erik Broos, Tim Schmidt, Wim Hoebee, and Jarit de Gijt

Dredging for Beneficial Reuse and Improved Navigation ....................................792
Jose Hernandez, Derek Davis, and Todd Graham

Simulating Complex Passing Ship Hydrodynamic Phenomena .........................802
S. Fenical and F. Salcedo

Fragility of Floating Docks for Small Craft Marinas..........................................812
A. S. Keen, M. L. Eskijan, and P. J. Lynett

The Permitting Journey to Deepening and Widening a Federal Navigation Channel .....................................................................................822
Carl Sepulveda, Ashley Judith, Dana Cheney, and David Casebeer

Multi-Port Comparison of the Tidal Influence on Navigating Vessel Populations ................................................................................832
B. M. Scully

Assessing Alternative Concepts and Future Developments for the Extension of the Port of Zeebrugge......................................................843
Bart Verheyen, Gijsbert van Holland, Marc Sas, and Youri Meersschaut

Beneficial Use of Mississippi River Navigation Dredged Material ....................853
Brett McMann, Paul Tschirky, Mike Schulze, and Ehab Mesehle
