Geo-Chicago 2016

Sustainable Waste Management and Remediation

Selected Papers from Geo-Chicago 2016

Geotechnical Special Publication Number 273

Chicago, Illinois, USA
14-18 August 2016

Editors:

Nazli Yesiller
Arvin Farid
Krishna R. Reddy

Dimitrios Zekkos
Anirban De

ISBN: 978-1-5108-2983-1
Some format issues inherent in the e-media version may also appear in this print version.

Contents

Advances in Heavy Metal Treatment

Advances in Surface Complexation Modeling for Chromium Adsorption on Iron Oxide ............................................................... 1
N. Bompoti, M. Chrysochoou, and M. Machesky

Characterization of Heavy Metals in Mine Tailings and Lake Sediments: Implications on Remediation .............................................. 12
Oznur Karaca, Claudio Cameselle, and Krishna R. Reddy

Effectiveness of Heavy Metal Removal in Urban Permeable Pavement Systems ........................................................................... 22
S. Javadi, S. Abdollahian, Q. Zhao, M. Ghavami, and T. Rockaway

Heavy Metals Sorption by Drinking Water Treatment Byproducts in Jar Tests .................................................................................. 32
Megan L. Hart, Ryan Holmes, John T. Kevern, and Alexander A. Silvius

Physical and Microscopic Characteristics Experiments with Heavy Metal Polluted Cohesive Soil ......................................................... 42
Ya Chu, Songyu Liu, Guojun Cai, Hanliang Bian, and Tao Zhang

Removal of Arsenic from Coal Fly Ash Leachate Using Manganese Coated Sand ............................................................................. 53
Snover Punia, Kamel Babaievelni, Lisha Wu, and Amid P. Khodadoust

Removal of Chromium, Copper, and Arsenic from Contaminated Water Using Manganese Oxide Based Adsorbents .......................... 62
Lisha Wu, Snover Punia, and Amid P. Khodadoust

Simultaneous Immobilization of Copper (Cu), Nickel (Ni), and Lead (V) Using Steel Slag Fines ................................................................. 70
D. G. Grubb, S. C. Jagupilla, and M. Wazne

Stabilized Nickel and Copper in a Ceramic Matrix and Their Leaching Behavior .................................................................................. 79
Yuanyuan Tang, Chengshuai Liu, and Kaimin Shih
The Leaching Characteristics of Chromite Ore Processing Residue from China
Y. Du and M. Chrysochoou

Contaminant Fate and Transport

Absorption and Diffusion Potential of Waste Wood Ash-Treated Lateritic Soil

Adsorption Kinetics of Cadmium, Lead, and Nickel in Vermiculite
Bernardo J. Jiménez and Maria E. G. Boscov

Contaminant Transport through a Compacted Clay Liner with the Consideration of Consolidation Effects
Hefu Pu, Patrick J. Fox, and Charles D. Shackelford

Detecting and Monitoring Oil Contamination Using Electrical Resistivity
Naji N. Khoury and Yara S. Maalouf

Evaluation of Diffusion Rate Constants from Soil Column Studies in Lime-Treated Semi Arid Soils—Pb\(^{2+}\) and Zn\(^{2+}\) Scenarios
Arif Ali Baig Moghal, Syed Abu Sayeed Mohammed, Mosleh Ali Al-Shamrani, Waleed M. Zahid, and Bhaskar C. S. Chittoori

Evaluation of Two Methods for Measuring Radon Flux from Earthen Radon Barriers
Nicholas Stefani, William J. Likos, and Craig H. Benson

Hydraulic Conductivity and Solute Transport in Two Different GCLs Permeated with a Synthetic Solution
Francesco Mazzieri and Erio Pasqualini

Leaching Characteristics of Trace Elements from Municipal Solid Waste Incineration Fly Ash
Yibo Zhang, Jiannan Chen, William J. Likos, and Tuncer B. Edil

Time-Dependent Reliability Analysis of the Contaminant Migration of Radioactive Waste in Groundwater
S. Sujitha, Deepthi Mary Dilip, Sampurna Datta, and G. L. Sivakumar Babu

Electrokinetic Remediation: Current Status and Future Challenges

Assessing the Use of Aluminium Electrodes on the Electrokinetic Dewatering and Stabilization of Dredged Mud Slurries
M. Malekzadeh and N. Sivakugan

Laboratory Evaluation of Low-Temperature Thermally-Enhanced Soil Vapor Extraction
Lauren Reising and John S. McCartney

One-Dimensional Model Test Study of Air Flow Patterns in Common and Surfactant-Enhanced Air Sparging
Zhibin Liu, Songyu Liu, Wei Fang, and Baiyang Mao

Predicting the Volatilization of Contaminants from Soil: Comparison of Theoretical Models and Direct Measurement of Vapor Emissions
Marta Di Sante, Virginia Brianzoni, Francesco Mazzieri, and Erio Pasqualini

Quicklime-Enhanced Remediation of Volatile Chlorohydrocarbon-Contaminated Soil in an Abandoned Chemical Plant Site by Mechanical Soil Aeration
Yan Ma, Xiao-Ming Du, Bin-Bin Dong, Yi Shi, and Fa-Sheng Li

Remediation by Surfactant of Clayey Soil Contaminated by Copper
Shweta Kandpal and R. K. Srivastava

Remediation of Organic Contaminated Industrial Sites by Ozone Micro-Nano Bubbles
Zhiran Xia and Liming Hu

Simulation-Optimization Models for the Remediation of Groundwater Contamination
Swathi Boddula and T. I. Eldho

Contaminated Sediments

A New Technology to Decontaminate Sediments Using Ultrasound with Ozone Nano Bubbles
Jay N. Meegoda and Janitha H. Batagoda

Bioretention Infrastructure to Manage the Nutrient Runoff from Coastal Cities
N. Shetty, P. J. Culligan, B. Mailloux, W. R. McGillis, and H. Y. Do

CPT Interpretation in Highly Organic Soils and Soft Clay Soils
Jay M. Merani, Christopher E. Hunt, Jennifer L. Donahue, and Jonathan D. Bray

Engineering Properties of Lightly Cemented Dredged Soil
Mohammed O. A. Bazne, Farshid Vahedifard, Isaac L. Howard, and Braden T. Smith

Establishing the Contaminant Footprint at Contaminated Sediment Sites
Terri Blackmar and Benjamin J. Hendron
Evaluation of the Sediment Concentration in Part of Bhogdoi River in Assam, India, by ANN and MLR .................................................................439
Triptimoni Borah and Mamata Das

Field and Laboratory Characterization of Native Coastal Deposits Using a Portable Free-Fall Penetrometer and Settling Column Tests.................449
Nina Stark and Malay Ghose Hajra

An Integrated Subsurface Investigation for Sediment Capping Projects .........459
Ali Ebrahimi, Mustafa B. Erten, Clinton Carlson, Taro Coraspe, Ming Zhu,
and J. F. Beech

Sustainable Use of Dredge Materials at Engineering Fills and the Investigation of Their Performance with Different Additives .......................471
M. Murat Monkul and Yeliz Yukselen-Aksoy

The Role of Geo-Disturbances on the Geotechnical Behavior of Dredged Sediments ......................................................................................481
J. Rajaraman, K. Thiruvenkatasamy, and S. Narasimha Rao

Uncertainty of Model Parameters in PSDDF for Coastal Restoration ........492
Timothy D. Stark and Navid H. Jafari

Soil Remediation Using Solidification/Stabilization

Environmental Soil Mixing: A 30-Year Update on Means, Methods,
Applications, and Advances ........................................................................501
K. B. Andromalos and J. A. Carr

Immobilization of Cadmium (Cd) and Zinc (Zn) Using Steel Slag Fines........513
D. G. Grubb, S. C. Jagupilla, and M. Wazne

Integrating Lightly Cemented Very High Moisture Content Fine Grained Soils into a Vegetated Landscape ...........................................................522
Isaac L. Howard, Farshid Vahedifard, and Mohammed O. A. Bazne

Process Stabilization–Solidification and the Physicochemical Factors Influencing the Strength Development of Treated Dredged Sediments ....532
Gregory P. Makusa, Josef Mácsik, Göran Holm, and Sven Knutsson

Remediation of VOCs and SVOCs In Situ Contaminated Soils by Stabilization/Solidification ...............................................................546
H. L. Wu, Y. J. Du, W. Y. Xia, M. L. Wei, and F. Wang
