2016 IEEE 11th International Conference on Global Software Engineering Workshops (ICGSEW 2016)

Irvine, California, USA
2 August 2016
Table of Contents

Message from the General and Program Chairs..........................................................vii
Message from the Workshop Co-chairs........................................................................ix
Message from the Doctoral Symposium Co-chairs....................................................x
Organizing Committee..................................................................................................xii
Program Committee...................................................................................................xiii
Steering Committee....................................................................................................xiv
Keynotes......................................................................................................................xv
Sponsors and Supporters............................................................................................xvii

PARIS Workshop

Hybrid-Computing Elements: A Multi-sourcing Model for Managing
Crowdsourcing Software ............................................................................................1
Tarek Ali, Mervat Gheith, Eman S. Nasr, and Perihan Elbaz

Managing Customer Involvement in Globally Distributed Agile Projects ....................7
Reem Bin-Hezam and Sultan Alyahya

Agile Practices for the Global Teaming Model ............................................................13
John Noll, Abdur Razzak, Ita Richardson, and Sarah Beecham

GSE-Ed Workshop

GSDgame: A Serious Game for the Acquisition of the Competencies Needed
in GSD ......................................................................................................................19
David Valencia, Aurora Vizcaíno, Lilia Garcia-Mundo, Mario Piattini,
and Juan Pablo Soto

Distributed Software Development with One Hand Tied Behind the Back: A
Course Unit to Experience the Role of Communication in GSD .................................25
Marco Kuhrmann and Jürgen Münch
Measures for Predicting Task Cohesion in a Global Collaborative Learning Environment

Alberto Castro-Hernández, Kathleen Swigger, Mirna P. Ponce-Flores, and J. David Terán-Villanueva

Challenges and Lessons Learned on Preparing Graduate Students for GSE Work: Brazilians’ Perceptions on a Multi-site Course Experience

Josiane Kroll, Caroline Q. Santos, Letícia S. Machado, Sabrina Marczak, and Rafael Prikladnicki

Using Data Analytics for Collaboration Patterns in Distributed Software Team Simulations: The Role of Dashboards in Visualizing Global Software Development Patterns

Waqar Hussain and Kelly Blincoe

Teaching Global Software Development through Game Design

John Noll and Andrew Butterfield

Doctoral Symposium

An Empirical Study on Lean and Agile Methods in Global Software Development

Mohammad Abdur Razzak

Content and Temporal Analysis of Communications to Predict Task Cohesion in Software Development Global Teams

Alberto Castro-Hernández

Condensing Architectural Knowledge from Unstructured Textual Media in Agile GSD Teams

Gilberto Borrego

Do Open Projects “Break the Mirror”? Re-conceptualization of Organizational Configurations in Free/Libre Open Source Software (FLOSS) Development

Eunyoung Moon

Reflections on Requirements Change Management in Global Software Development: A Multiple Case Study

Waqar Hussain
