Volume 148

Scientific Conference on Automotive Vehicles and Combustion Engines (KONMOT 2016)

22–23 September 2016, Krakow, Poland

Accepted papers received: 30 August 2016
Published online: 27 September 2016

Preface

011001
OPEN ACCESS
Scientific Conference on Automotive Vehicles and Combustion Engines (KONMOT 2016)

Marek Brzezanski and Wladyslaw Mitianiec

011002
OPEN ACCESS
Peer review statement

Papers

Design and research of automobiles

012001
OPEN ACCESS
The influence of number and values of ratios in stepped gearbox on mileage fuel consumption in NEDC test and real traffic

P Bera and D Wędrychowicz.....1
012002
OPEN ACCESS
Analysis of limit forces on the vehicle wheels using an algorithm of Dynamic Square Method
M. Brukalski.....11

012003
OPEN ACCESS
A Two-Wheeled, Self-Balancing Electric Vehicle Used As an Environmentally Friendly Individual Means of Transport
D Bżdziuch and W Grzegożek.....20

012004
OPEN ACCESS
Parametric study on the performance of automotive MR shock absorbers
J Gołdasz and S Dzierżek.....28

012005
OPEN ACCESS
Experimental verification and comparison of the rubber V- belt continuously variable transmission models
W Grzegożek, K Dobaj and A Kot.....38

012006
OPEN ACCESS
The experimental analysis of the slip in the rubber belt CVT
W Grzegożek and A Kot.....48

012007
OPEN ACCESS
Analysis of an employment of a gear ratio rate in CVT control system
W Grzegożek and M Szczepek.....56
012008
OPEN ACCESS
Torque vectoring for improving stability of small electric vehicles

W Grzegożek and K Weigel-Milleret.....66

012009
OPEN ACCESS
Proposal to use vibration analysis steering components and car body to monitor, for example, the state of unbalance wheel

R Janczur.....76

012010
OPEN ACCESS
Calibration procedure of measuring system for vehicle wheel load estimation

M Kluziewicz and M Maniowski.....86

012011
OPEN ACCESS
Simplified planar model of a car steering system with rack and pinion and McPherson suspension

J. Knapczyk and P Kucybała.....96

012012
OPEN ACCESS
Method of planning a reference trajectory of a single lane change manoeuver with Bezier curve

D Korzeniowski and G Ślaski.....103

012013
OPEN ACCESS
Kinematic Analysis of Four-Link Suspension of Steering Wheel by Means of Equation Sets of Geometrical Constraints with Various Structure

M S Kowalski.....113
Optimization of damping in the passive automotive suspension system with using two quarter-car models

Z Lozia and P Zdanowicz.....121

Simulation research of the tire Basic Relaxation Model in conditions of the wheel cornering angle oscillations

W Luty.....132

Does an active adjustment of aerodynamic drag make sense?

Marek Maciejewski.....139

On the impact of size and position of semi-trailer on the aerodynamic drag of an articulated vehicle

M Maciejewski.....148

The test bench for testing torsional stiffness of active anti-roll bar made of extended profiles with rectangular cross-section

K R Macikowski and S Kaszuba.....158

Multi-criteria optimization of chassis parameters of Nissan 200 SX for drifting competitions

M Maniowski.....167
Modernisation of a test rig for determination of vehicle shock absorber characteristics by considering vehicle suspension elements and unsprung masses

M Maniowski, S Para and M Knapczyk.....175

Merging into platoons

A Modi.....185

Classification of the road surface condition on the basis of vibrations of the sprung mass in a passenger car

K Prażnowski and J Mamala.....195

The influence of the pressure force control signal on selected parameters of the vehicle continuously variable transmission

A. Bieniek, M. Graba and K. Prażnowski.....205

Evaluation of the influence of velocity on dynamic passenger loads during a frontal minibus impact against an obstacle

L Prochowski, A Dębski, A Żuchowski and K Zielonka.....214

A portable wheel tester for tyre-road friction and rolling resistance determination

J Pytka, P Budzyński, P Tarkowski and M Piaskowski.....224
Design and Calibration of Rolling Resistance Test Trailer R²Mk.2
G Ronowski.....232

A statistical analysis of energy and power demand for the tractive purposes of an electric vehicle in urban traffic - an analysis of a short and long observation period
G Slaski and B Ohde.....243

Method and algorithm of automatic estimation of road surface type for variable damping control
K Dąbrowski and G Ślaski.....254

The theoretical analysis of an instrument for linear and angular displacements of the steered wheel measuring
K Wach.....264

Analysis of vehicle dynamics under sadden cross wind
S Walczak.....273

Influence of the vertical load exerted by the trailer on the coupling device on towing vehicle's steerability and stability
D Więckowski, T Pusty and P Jędrys.....282
Research methodology simplification for teaching purposes illustrated by clutch automatic control device testing

J Wojs.....291

Exploitation of automobiles

Impact of multisource VOC emission on in-vehicle air quality: test chamber simulation

K Brodzik, J Faber, A Golda-Kopek and D Łomankiewicz.....300

Simulation analysis of the EUSAMA Plus suspension testing method including the impact of the vehicle untested side

K Dobaj.....309

Energy balance in motor vehicles

M Dziubiński, A Drozd, M Adamiec and E Siemionek.....319

Electromagnetic interference in electrical systems of motor vehicles

M Dziubiński, A Drozd, M Adamiec and E Siemionek.....328

The analysis of the accuracy of the wheel alignment inspection method on the side-slip plate stand

A Gajek and P Strzępek.....339
Diagnostics monitor of the braking efficiency in the on board diagnostics system for the motor vehicles

Andrzej Gajek.....349

Analysis of motion of the body of a motor car hit on its side by another passenger car

M Gidlewski and L Prochowski.....359

Use of certain alternative fuels in road transport in Poland

W Gis, J Pielecha, J Waśkiewicz, M Gis and M Menes.....369

Torque measurement issues

J Goszczak.....378

The influence of battery degradation level on the selected traction parameters of a light-duty electric vehicle

Z Juda and M Noga.....387

Technical and legal considerations and solutions in the area of battery charging for electric vehicles

Z Juda.....397
The influence of nitrogen ion implantation on the tribological properties of piston rings made of Hardox and Raex steels

P Budzyński, M Kamiński and K Pyszniak.....406

Long-range effect of ion implantation of Raex and Hardox steels

P Budzyński, M Kamiński, A Droździel and M Wiertel.....413

The influence of nitrogen ion implantation on microhardness of the Stellite 6 alloy

P Budzyński, M Kamiński, K Pałka, A Droździel and M Wiertel.....421

ZeroFlow - new, environmentally friendly method of controlled gas nitriding used for selected car parts

J Kowalska and L Małdziński.....428

Test and assessment method of Automotive Safety Systems (SSB) particularly to monitor traffic incidents

B Pijanowski, S Łukjanow and R Burliński.....438

Some control problems of continuously variable belt transmission

B Radzymiński.....445
012050
OPEN ACCESS
The impact of European Registers of Road Transport Undertakings on security and enforcement of the system of digital tachograph

M Rychter and R Rychter.....453

012051
OPEN ACCESS
Modelling and optimization of rotary parking system

A Skrzyniowski.....461

012052
OPEN ACCESS
Study of the various factors influencing deposit formation and operation of gasoline engine injection systems

Z Stepień.....470

012053
OPEN ACCESS
The use of surface layer with boron in friction pairs lubricated by engine oils

W Szczypiński-Sala and J Lubas.....481

012054
OPEN ACCESS
The analysis of diagnostics possibilities of the Dual-Drive electric power steering system using diagnostics scanner and computer method

W Szczypiński-Sala and K Dobaj.....490

012055
OPEN ACCESS
Evaluation the course of the vehicle braking process in case of hydraulic circuit malfunction

W Szczypiński-Sala and J Lubas.....500
Kinetic energy recovery systems in motor vehicles

C Śliwiński.....506

Comparison of spectral analysis of vibration using commercial knock sensor and 3-axis acceleration sensor

Ł Zieliński, D Walczak, K Szczurowski and S Radkowski.....517

A concept of the assessment of Electric Vehicles' Operational Safety (EVOS)

S Łukjanow and W Zieliński.....526

Combustion engines and emission

An assessment of consistence of exhaust gas emission test results obtained under controlled NEDC conditions

K Balawender, A Jaworski, H Kuszewski, K Lejda and A Ustrzycki.....536

A comparison of exhaust emissions from vehicles fuelled with petrol, LPG and CNG

P Bielaczyc, A Szczotka and J Woodburn.....546

Determination of operating parameters of industrial engine fuelled with post processing gases with high hydrogen content

M Brzeżański, M Mareczek, W Marek and T Papuga.....556
A study on the indirect urea dosing method in the Selective Catalytic Reduction system
M Brzeżański and R Sala..560

Micro turbine engines for drones propulsion
J Dutczak..569

The use of gaseous fuels mixtures for SI engines propulsion
M Flekiewicz and G Kubica..579

Analysis of the CO₂, NOₓ emission and fuel consumption from a heavy-duty vehicle designed for carriage of timber
P Fuc, P Lijewski and A Ziolkowski..589

The combustion properties analysis of various liquid fuels based on crude oil and renewables
K Grab-Rogalinski and S Szwaja..597

Analysis of thermal stress of the piston during non-stationary heat flow in a turbocharged Diesel engine
P Gustof and A Hornik..607
The problems of piston skirt microgeometry in combustion engines
A Iskra, M Babiak and E Wróblewski.....616

Analysis of optimisation method for a two-stroke piston ring using the Finite Element Method and the Simulated Annealing Method
M Kaliszewski and P Mazuro.....623

The study on injection parameters of selected alternative fuels used in diesel engines
K Balawender, H Kuszewski, K Lejda and K Lew.....630

The characteristics of the combustion process occurring under real operating conditions of traction
R Longwic and P Sander.....640

Some aspects of the CI engine modification aimed at operation on LPG with the application of spark ignition
J Kaparuk, S Luft, T Skrzek and M Wojtyniak.....650

Pneumatic injection system using a hot exhaust gases, developed in Institute of Automobiles and Internal Combustion Engines of Cracow University of Technology
W Marek and K Śliwiński.....658
Investigation of work parameters of SI engine dedicated to energetics aggregates with pneumatic injection system

W Marek and K Śliwiński.....664

Investigation of ecological parameters of four-stroke SI engine, with pneumatic fuel injection system

W Marek and K Śliwiński.....670

Impact of the injection dose of exhaust gases, on work parameters of combustion engine

W Marek and K Śliwiński.....677

Development of the methodology of exhaust emissions measurement under RDE (Real Driving Emissions) conditions for non-road mobile machinery (NRMM) vehicles

J Merkisz, P Lijewski, P Fuc, M Siedlecki and A Ziolkowski.....685

Conversion of the exhaust emission results obtained from combustion engines of heavy-duty vehicles

J Merkisz and J Pielecha....696

Characterisation of solid particles emitted from diesel and petrol engines as a contribution to the determination of the origin of carbonaceous particles in urban aerosol

M Michalik, M Brzeżański, W Wilczyńska-Michalik, K Fisior, B Klmas, L Samek and B Pietras.....706
Assessment of total efficiency in adiabatic engines

W Mitianiec.....715

Influence of increased exhaust gas recirculation ratio on the thermodynamic processes in CI-DI engine

I Pielecha, M Skowron, W Bueschke, W Cieślik and K Wisłocki.....724

The impact of air-fuel mixture composition on SI engine performance during natural gas and producer gas combustion

G Przybyła, S Postrzednik and Z Żmudka.....734

Numerical investigation of CAI Combustion in the Opposed- Piston Engine with Direct and Indirect Water Injection

R Pyszczek, P Mazuro and A Teodorczyk.....744

Statistics of indicated pressure in combustion engine.

L J Sitnik and M Andrych-Zalewska.....755

Transient states analysis of CI engine injectors with the use of optical methods

M Skowron, I Pielecha and K Wisłocki.....764
Assessment of the effect of gaseous fuel delivery mode on thermal efficiency and fuel losses during the valve overlap period in a dual-fuel compression ignition engine

T Skrzek.....772

Utilization of waste glycerin to fuelling of spark ignition engines

Z Stelmasiak and D Pietras.....780

Research on the 2nd generation biofuel BIOXDIESEL in aspects of emission of toxic substances in exhaust gases

M S Struś, W Poprawski and M Rewolte.....791

Research on the influence of ozone dissolved in the fuel-water emulsion on the parameters of the CI engine

M K Wojs, P Orliński, W Kamela and P Kruczyński.....799

Influence of sliding surface roughness and oil temperature on piston ring pack operation of an automotive IC engine

A Wolff.....807

The influence of fuel type on the cooling system heat exchanger parameters in heavy-duty engines

B Worsztynowicz.....817
Enhancing the properties of Fischer-Tropsch fuel produced from syngas over Co/SiO2 catalyst: Lubricity and Calorific Value

O Doustdar, M L Wyszynski, H Mahmoudi and A Tsolakis.....824
