2016 IEEE International Conference on Software Quality, Reliability and Security (QRS 2016)

Vienna, Austria
1 – 3 August 2016
2016 IEEE International Conference on Software Quality, Reliability and Security
QRS 2016

Table of Contents

Message from the QRS 2016 Steering Committee Chairs .................................................................................................................. xi
Message from the QRS 2016 General Chair ........................................................................................................................................... xiii
Message from the QRS 2016 Program Chairs ...................................................................................................................................... xiv
QRS 2016 Steering Committee ......................................................................................................................................................... xv
QRS 2016 Organizing Committee ...................................................................................................................................................... xvi
Chairs of Workshops Co-Located with QRS 2016 Program Committee .................................................................................................... xvii
QRS 2016 Program Committee ...................................................................................................................................................... xviii
QRS 2016 Additional Reviewers ....................................................................................................................................................... xx
Keynote Speeches ........................................................................................................................................................................... xxii
Invited Talk by VVASS Workshop .................................................................................................................................................. xxviii
Invited Talk by SSCPS Workshop .................................................................................................................................................. xxix
Panel by CRE Workshop ............................................................................................................................................................. xxx

Session: Cloud-Based and Concurrent Programs

Hunting Killer Tasks for Cloud System through Machine Learning: A Google Cluster Case Study .......................................................... 1
Hongyan Tang, Ying Li, Tong Jia, and Zhonghai Wu

HistLock: Efficient and Sound Hybrid Detection of Hidden Predictive Data Races with Functional Contexts ........................................ 13
Jialin Yang, Chunbai Yang, and W.K. Chan
Session: Program Verification - Invariants and Constraints

Automatic Invariant Synthesis for Arrays in Simple Programs ..............................................................108
Bin Li, Zhenhao Tang, Juan Zhai, and Jianhua Zhao

Verifying Distributed Controllers with Local Invariants ........................................................................120
Yiqun Wang, Shengwei An, Xiaoxing Ma, Chun Cao, and Chang Xu

Precondition Calculation for Loops Iterating over Data Structures .........................................................132
Juan Zhai, Bin Li, Zhenhao Tang, Jianhua Zhao, and Xuandong Li

A Method for Pruning Infeasible Paths via Graph Transformations and Symbolic Execution ..................144
Romain Aissat, Marie-Claude Gaudel, Frédéric Voisin, and Burkhart Wolff

Session: Debugging and Fixing

Towards Understanding Interactive Debugging ..........................................................................................152
Fabio Petrillo, Zéphyrin Soh, Foutse Khomh, Marcelo Pimenta, Carla Freitas, and Yann-Gaël Guéhéneuc

Tommaso Dal Sasso, Andrea Mocci, and Michele Lanza

The Bugs Framework (BF): A Structured Approach to Express Bugs ....................................................175
Irena Bojanova, Paul E. Black, Yaacov Yesha, and Yan Wu

Using a Distributed Representation of Words in Localizing Relevant Files for Bug Reports .....................183
Yukiya Uneno, Osamu Mizuno, and Eun-Hye Choi

Session: Defect Prediction Models

Thresholds for Size and Complexity Metrics: A Case Study from the Perspective of Defect Density ..........191
Kazuhiro Yamashita, Changyun Huang, Meiappan Nagappan, Yasutaka Kamei, Audris Mockus, Ahmed E. Hassan, and Naoyasu Uabayashi

Correlation between the Distribution of Software Bugs and Network Motifs ........................................202
Shaoxiong Zhang, Jun Ai, and Xuelin Li

Empirical Evaluation of Cross-Release Effort-Aware Defect Prediction Models ......................................214
Kwabena Ebo Bennin, Koji Toda, Yasutaka Kamei, Jacky Keung, Akito Monden, and Naoyasu Uabayashi

Profiling Android Vulnerabilities ..............................................................................................................222
Matthieu Jimenez, Mike Papadakis, Tegawendé F. Bissyandé, and Jacques Klein
Session: Security
Protecting Legacy Code against Control Hijacking via Execution Location Equivalence Checking ................................................................. 230
  Tobias F. Pfeffer, Stefan Sydow, Joachim Fellmuth, and Paula Herber
Firewalls for the Web 2.0 ........................................................................ 242
  René Rietz, Hartmut König, Steffen Ullrich, and Benjamin Stritter
Testing Security Requirements with Non-experts: Approaches and Empirical Investigations .......................................................... 254
  Bernhard Peischl, Michael Felderer, and Armin Beer

Session: Databases
Detecting and Preventing Program Inconsistencies under Database Schema Evolution .......................................................................................... 262
  Loup Meurice, Csaba Nagy, and Anthony Cleve
Quantitative Analysis of Variation-Aware Internet of Things Designs Using Statistical Model Checking ......................................................... 274
  Siyuan Xu, Weikai Miao, Thomas Kunz, Tongquan Wei, and Mingsong Chen
Quantifying the Impact of Replication on the Quality-of-Service in Cloud Databases ...................................................................................... 286
  Rasha Osman, Juan F. Pérez, and Giuliano Casale

Session: Mobile Apps Testing and Verification
Facilitating Monkey Test by Detecting Operable Regions in Rendered GUI of Mobile Game Apps ................................................................. 298
  Chenglong Sun, Zhenyu Zhang, Bo Jiang, and W.K. Chan
  Tim Wahls
Improving Protocol Passive Testing through "Gedanken" Experiments with Finite State Machines ................................................................. 315
  Natalia Kushik, Jorge López, Ana Cavalli, and Nina Yevtushenko

Session: Memory and Non-functional Errors
Leveraging Static Analysis Tools for Improving Usability of Memory Error Sanitization Compilers ........................................................................ 323
  Rigel Gjomemo, Phu H. Phung, Edmund Ballou, Kedar S. Namjoshi,
  V.N. Venkatakrishnan, and Lenore Zuck
NOTICE: A Framework for Non-Functional Testing of Compilers ..........................................................335
Mohamed Boussaa, Olivier Barais, Benoit Baudry, and Gerson Sunyé

A Specification-Based Approach to the Testing of Java Memory Bloat ..................................................347
Ju Qian, Xiaoyu Zhou, Wanchun Dang, and Ziyuan Wang

**Session: Mutation and Prioritization**

Mutation Integration Testing .....................................................................................................................353
Mark Grechanik and Gurudev Devanla

A Model to Estimate First-Order Mutation Coverage from Higher-Order
Mutation Coverage .........................................................................................................................................365
Ali Parsai, Alessandro Murgia, and Serge Demeyer

Test Case Prioritization Using Adaptive Random Sequence
with Category-Partition-Based Distance ........................................................................................................374
Xiaofang Zhang, Xiaoyuan Xie, and Tsong Yueh Chen

**Session: Project and Process Prediction Models**

Software Reliability Analysis of NASA Space Flight Software: A Practical Experience ..................................................386
Harish Sukhwani, Javier Alonso, Kishor S. Trivedi, and Issac Mcginnis

How Does the Dependence between Inspectors Impact Capture-Recapture Estimation? An Empirical Study ..........................................................398
Ou Wu

Which Change Sets in Git Repositories Are Related? .....................................................................................406
Jasmin Ramadani and Stefan Wagner

**Session: Fault Localization**

DFL: Dual-Service Fault Localization ........................................................................................................412

Automatic Localization of Bugs to Faulty Components in Large Scale Software
Systems Using Bayesian Classification .................................................................................................................423
Leif Jonsson, David Broman, Måns Magnusson, Kristian Sandahl, Mattias Villani, and Sigrid Eldh

Towards More Accurate Fault Localization: An Approach Based on Feature Selection Using Branching Execution Probability ..........................................................431
Ang Li, Yan Lei, and Xiaoguang Mao
Session: Testing and Processes

Testing and Debugging in Continuous Integration with Budget Quotas on Test Executions .................................................. 439

Bo Jiang and W.K. Chan

A Tool Supported Testing Method for Reducing Cost and Improving Quality ........................................ 448

Shaoying Liu

Resource/Schedule/Content Test Planning Model .................................................................................. 456

Pete Rotella

Author Index ........................................................................................................................................ 464
