TABLE OF CONTENTS

VOLUME 1

3D Multiscale Imaging of the Distribution of Pores, Organic Matter and Oil in Place in Vaca Muerta Shale Samples ............................................................ 1
Sommacaal, Silviano; Fogden, Andrew; Young, Benjamin; Noel, William; Arena, Alessio; Salazar, Leonardo; Gerwig, Tobias; Cheng, Qianhao; Kingston, Andrew; Marchal, Denis; Perez Mazas, Ana Maria; Naide, Claudio Hugo; Kohler, Guillermia; Cagnolatli, Marcelo

Accurate Forecasting of Liquid Rich Gas Condensate Reservoirs with Multiphase Flow ................................................................. 17
Khanal, Ajitjaya; Khushghadam, Mohammad; Lee, W. John

Adsorption and Capillarity Condensation in Heterogeneous Nanoporous Shales .................................................................................. 34
Ma, Yixin; Chen, Jin-Hong; Jamali, Ahmad

Analytical Pressure and Rate Transient Models for Analysis of Complex Fracture Networks in Tight Reservoirs ................................ 51
Acuna, Jorge A.

Anticosti Island, Quebec: Updated Review of a Major Shale Play in North Eastern America ................................................................. 69
Dorrer, Peter K.; Marcel, Jean-Sebastien; Lavore, Jerome; Mecht, Nabil

Application of Bayesian Networks for Estimating Risk in Shale Operations ......................................................................................... 79
Fanasiloo, Pedram; Clemens, Jeffrey

Application of High-Resolution Blended Resistivity Measurement in Characterization of Unconventional Plays ........................ 86
Moharrer, Anthony; Mukherjee, Sandeep; Garrison, Nick; Caraway, Allison; Medina, Romulo; Sarmah, Bhaskar Bikash

Applying Digital Rock Characterization to a New Anadarko Basin Shale Play .................................................................................. 98
Hinzman, Tiffany; Walls, Joel D.; Morcote, Anyela

Applying Oil Fingerprinting to Unconventional Reservoirs in the Permian Basin for Characterization of Fracture Height and the Contribution of Multiple Formations to Commingled Production ........................................ 104
McCaffrey, Mark A.; Baskin, David K.

An Approach for Generating Spatially and Physically Correlated Natural Fracture Network Properties for Unconventional Reservoirs ................................................................. 115
Pandey, Yogendra Narayan; Yaras, Jeffrey M.; Shi, Genbao; Liceras, Veronica

Assessment of Rock Types Properties in a South American Unconventional Shale Play ................................................................. 126
Mathieu, Jean-Philippe; Luc, Jean-Pierre; Pellestor, Jonathan; Vidal-Gilbert, Sandrine; Su, Kun; Ravera, Mariano F.

Azimuthal Velocity Analysis of 3-D Pre-Stack Seismic Data for Fracture-Induced Anisotropy in the Altamont-Bluebell Field .......................... 142
Al Dulaian, Khaled; Margrave, Gary

Bakken Flare Mitigation Field Trial .................................................................................................................................................................. 156
Ravindrani, Satish; Raffer, Chris; Sneary, Loy

Benchmarking Recovery Factors of Individual Wells Using a Probabilistic Model of Original Gas in Place to Pinpoint the Good, Bad and Ugly Producers .................................................................................................................................................................................. 164
Buedt, John; Yu, Wei; Westermars, Rus

Blinking Out: North Dakota without Capital for Replacing Production .................................................................................................. 187
Kazma, Heidi Anderson; Ekland, Christine; Rapp, Tim; Santos, Ralph

Breakthrough in Hydraulic Fracture & Proppant Mapping: Achieving Increased Precision with Lower Cost ..................... 192
Dawson, Matthew; Kumpf, Gänther

Brittleness and Rock Strength of the Bakken Formation, Williston Basin, North Dakota .................................................................................................................. 213
Xu, Jiajia; Sunnengberg, Steve

Brittleness Index - A Parameter to Embrace or Avoid? ................................................................................................................................. 231
Mathias, Elsa; Ratcliffe, Ken; Wright, Milly

Calibration of PS Shear Wave Anisotropy in a Mississippi Lime Play, North-Central Oklahoma ............................................................................. 241
Singleton, Scott; Chi, Shihong; Sanford, Lisa; Constance, Paul

Cana Woodford: Seismic to Simulation Reservoir Characterization ........................................................................................................ 257
Almasoodi, Moun; Cage, Brad; Jayakumar, Ram; Nguyen, Phuong; Veach, Dwain

A Case Study in the Pennsylvania Cleveland Sandstone on the Nemaha Ridge: Leveraging High Resolution 3D Seismic & Stratigraphic Analysis to Create the Conditions for Repeatable Drilling Opportunities in Complexly Distributed Reservoirs ................................. 270
Luo, Tony; Krystinik, Lee

Centralizer Selection and Placement Basis for Overcoming Liner Running Challenges in Extended-Reach Horizontal Three Forks Shale Completions ................................................................................................................................. 279
Long, Jordan; Abshire, Tyree; Dall’Acqua, Dan

Characterizing Light Versus Bound Hydrocarbon in a Shale Reservoir by Integrating New Two-Dimensional NMR and Advanced Spectroscopy Measurements .................................................................................................................. 297
Ali, Mous, R.; Rahil, Vivek; Chhabra, Aria; Grover, Rahul; Pirie, Iain; Nett, Orlando

Codell Sandstone, a Review of the Northern DJ Basin Oil Resource Play, Laramie County, Wyoming and Weld County, Colorado ................................................................................................. 313
Sterling, Robert H.; Bottjer, Richard; Smith, Kevin H.

Coiled Tubing Frac Sleeve Application in the Eagle Ford Shale — An Optimization of Shale Completions ........................................... 322
Lee, P.; Wende, J.; Gil, E.; Sebastian, H.; Patel, H.; Cashwalder, S.

Combination of Lattice Density Functional Theory and a Multi-Scale Network Model for Sorption Isotherms in Study in Tight Formations .................................................................................................................. 338
Xu, Hai; Mahmanti, Ayaz; Qasab, Ali; Prodanovic, Maja; Daigle, Hugh; Nguyen, Scott
Combining Hydraulic Fracturing Considerations and Well Spacing Optimization for Pad Development in the Vaca Muerta Shale .........................................................................................................................350

Combining the Stochastic Earth Model with Geomechanical Modeling to Quantify Well Performance: Application to Mississippian Shale .................................................................................................................................361

Grechishnikova, Alena; Davila, Carlos; Dusterhauf, Ron; Siddiqui, Shameem

Comparing WTI Index Price Effects on Stimulation Fluid Design, Water Utilization, and Resulting Production for Newly Completed and Fractured Wells in Texas and North Dakota ..............................................................................................................371

Boshbahar, Scott

Completion Optimization Using Both Vertical and Horizontal Measurements, an Eagle Ford Shale Case Study ........................................................................................................................................................................382

Kreimeier, William; Panjaitan, Maradan; Fisher, Kevin; Xu, Jian; McMillan, Danny

Compositional Variation Study for Improving Recovery in Gas-Condensate Reservoirs ........................................................................................................................................................................................................402

Vo, Hai X.; Horne, Roland N.

Control and Import of Sedimentary Microfacies on Tight Oil Occurrence in the Chang 7-3 Member of the Triassic Yanchang Formation, Ordos Basin of China ..........................................................................................................................................................419

Tu-Feng, Wang; Tao; Hu, Xi-Feng; Yan, Rong-Hui; Wang, Da-Li

Correlation of Acoustic Velocity, Stress, Rock Composition, Organic Matter and Rock Lamination in Organic-Rich Shales ........................................................................................................................................................................................................427

Alqahtani, Adel A.; Tutuncu, Azra N.

Correlation of Eagle Ford South Texas Eaglebine East Texas and Tuscaloosa Louisiana-Mississippi Using High Resolution Biostratigraphy, TOC/%CO3 and Maximum Flooding Surface Sequence Stratigraphic Analysis ........................................................................................................................................................................................................437

Wornardt, Walter W. Jr.

Cost-Effective Reservoir Characterization from Advanced Surface Logging Technologies in Unconventional Reservoirs ........................................................................................................................................................................453

Gawankar, K.; Pate, C.; Ranew, J.; Cameron, N.

Could Diagenesis in Carbonate Source Rock Predefine Its Fracturing Behavior? ........................................................................................................................................................................................................471

Hussain, Maaruf; Minhas, Naeem; Agrawal, Gaurav; Cantrell, Dave

Coupled Kinetic and Fluid Dynamic Models to Understand H2S Occurrence in Unconventional Petroleum Reservoirs ........................................................................................................................................................................................................482

Xia, Xinyu; Ellis, Geoffrey S.

Coupling Geomechanics and Petrophysical Measurements for Production Enhancement in Organic-Rich Shales ..................................................................................................................................................492

Tutuncu, Azra N.; Katsuki, Daisuke; Bui, Binh T.; Padin, Anton; McDowell, Bryan

Deciphering Dynamic Fracture Systems through Multiple Monitoring Wells with Permanent Downhole Gauges in the Midland Basin ..........................................................................................................................................................510

Tang, Yuli; Liang, Baosheng; Larsen, Leif

Depositional Facies and Organic Content of Upper Wolfcamp Formation (Permian) Delaware Basin and Implications for Sequence Stratigraphy and Hydrocarbon Source ........................................................................................................................................................................................................532

Wang, Xiuyu; Wang, Xiaosiu; Wang, Jianfui; Pu, Yu; Yang, Shenglai

Determination of Natural Fracture Porosity Using NMR ..................................................................................................................................................................................................................556

Veselinovic, Dragjan; Green, Derrick; Dick, Mike

Determining Maximum Horizontal Stress with Microseismic Focal Mechanisms - Case Studies in the Marcellus, Eagle Ford, Wolfcamp ........................................................................................................................................................................564

Agharazi, Alireza

The Development and Application of a New Semi-Analytical Model to Estimate Permeability from Mercury Infiltration Capillary Pressure.... ........................................................................................................................................................................................................575

Agharazi, Alireza

The Development and Application of a New Semi-Analytical Model to Estimate Permeability from Mercury Injection Capillary Pressure........................................................................................................................................................................................................575

Agharazi, Alireza

Development of Limited Discrete Fracture Network Using Surface Microseismic Event Detection Testing in Canadian Horn River Basin ........................................................................................................................................................................................................590

Virues, Claudio; Hendrick, Jason; Kashikar, Sudhesh

A Diagenetic Study of the Wolfcamp Shale, Midland Basin, West Texas ........................................................................................................................................................................................................606

Wickard, Alyssa K.; Elmore, R. Douglas; Heij, Gerhard

A Diagnostic Framework for “Bashed” Wells in Unconventional Reservoirs: A Numerical Simulation and Model Selection Theory Approach ........................................................................................................................................................................................................621

Zhe, L.; Younis, R.; Jiang, J.

Differential Maturation, Generation, and Expulsion of Petroleum: Causes and Effects on Jurassic Unconventional Resources in Saudi Arabia ........................................................................................................................................................................................................638

Al-Dahilain, Mohammed A.; Hekami, Ahmad; Abdelghayoum, Leyna; Kvale, Erik P.; Rahman, Mohammad

Dimensionless Productivity Index and Its Derivative - A New Approach to Analyzing Unconventional Reservoirs ........................................................................................................................................................................................................645

Kaul, Sandeep P.; Vaz, Robert F.; Gildin, Eduardo

Direct Determination of Surface Relaxivity in Isolated Kerogen by Pulsed-Field Gradient NMR ........................................................................................................................................................................................................665

Zhang, Boyang; Daigle, Hugh

Discrete Fracture Network Generation Using Microseismic Data from a Single Monitoring Well ........................................................................................................................................................................................................675

Yu, Xue; Batledge, Jim; Leaney, Scott; Chapman, Chris

Discrete Fracture Network Model Developed from a High Resolution LIDAR Outcrop Survey of a Naturally Fractured Unconventional Niobrara Reservoir, Denver Basin ........................................................................................................................................................................................................688

Grechishnikova, Alena
VOLUME 2

Enhanced Recovery in Shales: Molecular Investigation of CO₂ Energized Fluid for Re-Fracturing Shale Formations ................................................................. 841
Pathak, Manav; Punja, Palash; Huang, Hai; Deo, Milind

ESP Real-Time Data Enables Well Testing with High Frequency, High Resolution, and High Repeatability in an Unconventional Well ......................................................... 849
Camilleri, L.; El Gindy, M.; Baba, A.

Estimation of TOC and Brittleness Volumes and Correlation with Reservoir Production ......................................................... 884
Verma, Sumit; Zhao, Tao; Marfurt, Kurt J.; Devengoda, Deepak; Grana, Darin

EUR Assessment of Unconventional Assets Using Parallelized History Matching Workflow Together with RMI. Method ................................................................. 900
Chen, Chaohui; Li, Ruirui; Gao, Guohua; Vink, Jeroen C.; Cao, Richard

Evaluation of In-Situ Stress Environment in the Utica Play and Implications on Completion Design and Well Performance ................................................................. 913
Antoine, Bertoncello; Frederic, Brignaud

Evaluation of Rock Damage and Fracture Propagation on MicroCracks Development and Stimulation Quality of Tight Formations: Quantitative and Statistical Characterization ................................................................. 922
El-Monier, Ilham

Evaluation on Occluded Hydrocarbon in Deep-ultra Deep Ancient Source Rocks and Its Cracked Gas Resources ................................................................. 933
Jian, Li; Jianggong, Shi; Yifeng, Wang; Ma; Donghang; Wang; Chenghua, Ma; Zhisheng, Li

Examination of Water Management Challenges and Solutions in Shale Resource Development - Could Waterless Fracturing Technologies Work? ................................................................. 941
Oraki Kohshour, Iman; Leschchynsh, Tim; Munro, Jason; Yoror, Meaghan Cassye; Adejumo, Adehola T; Ahmed, Usman; Barati, Reza; Kugler, Imre; Reynolds, Michael; Cullen, Mike; Andrew, James; Wedel, Dave

Experimental Study of Hydraulic Fracture/Natural Fracture Interaction on a Tight Sandstone Formation ................................................................. 976
Yang, Xiangdong; Burchardt, Jeffrey; Zhang, Hui; Zhang, Yang; Fuxiang; Pei, Jianyong; Qi, Chunyan; Qiu, Kaihui; Whitney, Nick

An Experimental Study on Supercritical CO₂ Injection in Fractured Tight Reservoir to Enhance Oil Recovery ................................................................. 988
Tang, Guo-Qing; Aminzadeh, Behdad; Zhou, Dengheng; Zhang, Max; Lowry, Dustin; Inouye, Art; Song, Steven; Li, Lin

Extended Abstract: Geochemical Analysis of Parasequences within the Productive Middle Member of the Eagle Ford Formation at Lozier Canyon Near Del Rio, Texas ................................................................. 1005
Shane, Timothy

Extended Abstract: Quantifying Natural Fracture Spatial Organization in Horizontal Image Logs: Application in Unconventional Reservoirs ................................................................. 1017
Li, John Z.; Gale, Julia F. W.; Marrett, Randall A.; Laubach, Stephen E.

Extension of the Multiple Interacting Continua Method to Discrete Fracture Models for Unconventional Low Permeability Reservoir Simulations ................................................................. 1025
Farah, N.; Ding, D. Y.; Delorme, M.

Extracting Meaningful Estimates of Rock Properties from 3-D Anisotropic Velocity Models Derived from Borehole Microseismic ................................................................. 1045
Taylor, Scott; King, Jeremy; Schaefer, Todd; McCreath, Lucas; Guhamem, Khadeel

Fact-Based Re-Frac Candidate Selection and Design in Shale - A Case Study in Application of Data Analytics ................................................................. 1061
Mohaghegh, Shahab D.
Fast, Accurate, Easy - Pick 3: Using Monthly Production Ensembles for EUR Estimation
Lindsey, A.; Tharion, J.; Robertson, K. .............................................................. 1075

Fault and Fracture Detection in Unconventional Reservoirs: A Utica Shale Study
Refayee, Hesham; Jaglan, Hardeep; Adcock, Steve ................................. 1080

Fault Facies Identification to Determine Optimum Coal Cleat Occurrence as Coal Bed Methane Reservoir
Potential, Case Studies: Warukin Coal Bearing Formation (WCBF), Barito Basin, South Kalimantan, Indonesia
Putra, Rizka R.; Larasati, Dian; Ardi, Sunarti; Fiqih, Fikri Muhammad; Ramdani, Hilmam; Widarto, Djedi; Guntoro, Agus; Usman, Alfian .......................... 1089

Fluid Typing and Maturity Index from Logs: A New Framework for Petrophysical Evaluation of Organic-rich Mudrock
Moses, Laurent; Craddock, Paul Ryan; Rylander, Erik; Ortiz, Alberto; Bernhardt, Carolina .................................................. 1106

Fracture and Matrix Permeability Hysteresis in Organic Rich Mudrocks
Teklu, Tadesse Weldu; Li, Xiaopeng; Zhou, Zhou; Cui, Qi; Abas, Hazim ................................. 1125

Fracture Properties Characterization of Shale Rocks
Ghasemi, Ahmad; Riley, Spencer; Ye, Zhi .............................................................. 1144

Gas Isotope Analysis: A Cost Effective Method to Improve Understanding of Vertical Drainage in the Delaware Basin
Goldsmith, Mindy; Abrams, Michael A. .............................................................. 1157

A Generalized Methodology for Estimating Stress-Dependent Properties in Tight Petroleum Reservoirs and Its Application to Drill Cuttings Data
Maire, Irina; Lopez, Bruno; Aguilar, Roberto .................................................. 1166

Geochemical Analysis of Returned Treatment Waters (RTW) Associated With Shale Gas Production in the Appalachian Basin (USA) and Deep Basin (Canada): Potential Use of Total Dissolved Solids (TDS) and Oxygen Isotope Data for Assessing Water: Rock Ratios and Stimulated Rock Volume (SRV)
Bryndzia, L. Taras; Fay, Matthew C. .................................................. 1186

Geochemistry of Cretaceous Oils and Source Rocks in the Powder River Basin
Rahman, Mohammad; Olson, Robert K.; Symcox, Carl W.; Bingham, Sean .................................................. 1197

Geological and Geomechanical Modeling of the Haynesville Shale: A Full Loop for Unconventional Fractured Reservoirs
Bayler, W. Sebastian; Wunderle, Marcus; Aranjo, Exerton; Alcalde, Rene; Yao, Calvin; Suhy, Fred; Jo, Thomas; Bases, Fleur; Sami, Abu M.; Ma, Yive; Bansal, Abhishek; Peterson, Eric; Goudge, Rohan; Awasthi, Ankar; Bhatia, Mukal .......................... 1210

Geological Characterization of La Luna Formation as an Unconventional Resource in Lago De Maracaibo Basin, Venezuela
Liborius-Parada, A.; Slatt, R. M. .............................................................. 1236

Geological Considerations During Microseismic Monitoring, Processing, and Interpretation of Hydraulic Fracture Treatment
Iwobi, Christopher; More, Stephen; Major, Jan; Verhagen, Iris; Brindle, Scott; Behoul, Romain; O'Connor, Dave .................................................. 1256

A Geological Evaluation of Jurassic Shale Oil Plays in Southern England
Wilson, Kurt; Ahmed, Ibrahim; MacIvor, Kirk .............................................................. 1298

A Geomechanical Study of Refracturing Based on Microseismic Observations - Case Study of Haynesville and Eagle Ford Wells
Agharazi, Aitouze; Karshkar, Sadhendu .................................................. 1314

Geomechanical Tools to Bolster Social License: Quantifying the Mechanical Effects of Faults on Induced Seismicity Potential
Umhozol, Nicholas M.; Ouenes, Ahmed .................................................. 1333

Geomechanics of Fault Activation and Induced Seismicity during Multi-stage Hydraulic Fracturing
Grob, M.; Maxwell, S. .............................................................. 1352

Handling Risk and Uncertainty in Portfolio Production Forecasting
Allen, David P. B. .............................................................. 1361

Horizontal Pressure Disequilibrium and Its Indication on Fluid Continuity in Shale Plays
Xia, Xinyu; Gao, Yongli .............................................................. 1376

How (And Why) To Recognize Sequences in Basinal Shales
Schutter, Stephen R. .............................................................. 1382

How Low Can You Go? Quality Vs. Cost in Guar-Borate Fracturing Fluids
Schnoor, El; Maxey, Jason; Russell, Aaron .................................................. 1398

Pore Network
Khosrakham, Mohammad; Khanal, Aaditya; Rubnajegadonji, Neda; Lee, W. John .................................................. 1419

Identifying Re-Stimulation Effectiveness by Utilizing Microseismic Attributes
Preiksaaitis, M.; Baig, A.; Bowman-Young, S.; Urbanicie, T. .................................................. 1426

Impact of Coal Mine Water on Modern Gas Well Cements
Gardiner, James; Kutchko, Barbara; Fazio, James; Spaulding, Richard; Hakala, Alexandra .................................................. 1444
Balan, H. Onur; Gupta, Anuj; Georgi, Daniel T.; Al-Shawaf, Ali M.

Low Cost Field Application of Pressure Transient Communication for Rapid Determination of the Upper Limit of
Horizontal Well Spacing ................................................................................................................................. 1781
Bucker, W. Kurt; Bobich, Jen; Wallace, Kerstan

LWD Resistivity Imaging in Invert Emulsion Oil-Based Drilling Fluid .......................................................... 1790
Yang, Jianzhong; Szabo, Joseph; Ogozuei, Reza E.; Arensdorf, Joseph; Swartzwout, Rosa; Hartmann, Andreas; Morris, Stephen A.

Managed Pressure Flowback in Unconventional Reservoirs: A Permian Basin Case Study .......................................................... 1797
Dyker, B.J.; Stoker, Robert; Keeseley, Gabriel; Davis, Carley D.; Davis, Hugo

Managing the Impact of Characterization and Modeling Uncertainties on EUR Assessment in Unconventional
Plays ................................................................................................................................................................. 1807
Raverta, Mariano F.; Osadiya, Olasegun; Bruguiere, Frederic; Rostagno, Arnaud

Mapping of Rock Property Changes in Space and Time Using Microseismic Data through Full-Waveform
Inversion .......................................................................................................................................................... 1816
Behara, Jyoti

Maximizing Efficiency in Haynesville Restimulations: A Case Study in Improving Lateral Coverage to Maximize
Incremental Gas Recovery .................................................................................................................................. 1824
Whitsett, Andrew; Holmedal, James; Leonard, Dick

Maximizing Productive Stimulated Reservoir Volume in the Eagle Ford - An Infill Case Study .................................................. 1842
Anderson, David M.; Thompson, John M.; Cadwallader, Stephen D.; Sebastian, Herbert; Gil, Ivan; Lee, Philip

Mexican Unconventional Plays: Geoscience, Endowment and Economic Considerations .......................................................... 1855
Cruz, Marcelo; Urban, Edgar; Aguileria, Roberto F.; Aguilera, Roberto

Mexico’s Tithonian Pimienta Shale: Potential for Unconventional Production ........................................................................................................ 1875
Jarvis, Daniel; Muende, Albert

Microseismic Activity: What Does It Really Say? Insights from Coulomb Failure Function Analysis .................................................. 1890
Roux, Pierre-Francois

Microseismic Geomechanical Optimization of Hydraulic Fracturing in the Horn River Basin .................................................. 1904
Mack, M.; Maxwell, S. C.; Lee, B. T.

Microseismic Quality Control Using Synthetic Seismograms ............................................................................................. 1913

Migration Happens: Geochemical Evidence for Movement of Hydrocarbons in Unconventional Petroleum Systems .......................................................... 1925
Zumberge, John J.; Curtis, John B.; Reed, Jackie D.; Brown, Stephen W.

Multidisciplinary Characterization of the Vaca Muerta Shale: Data Driven De-Risking of a World Class Resource
Play .................................................................................................................................................................. 1935
Cataldo, Osvaldo Davogusto; Desjardins, Patrice; Thomas, Mark; Notta, Raul; Williams, Britt; Chavarría, José; Dieckmann, Volker

Multiscale Modeling of Gas Transport in Organic-Rich Shale: From Molecular Scale to Core Plug Scale .......................................................... 1943
Kazemi, Mohammad; Tahbiri-Boroujeni, Ali

Multi-Scale Rock Imaging for Reservoir Characterization: A Wolfcamp Case Study .................................................................................. 1953
Morchere, Anela; Sungkorn, Radompon; Carpio, Gustavo; McGroarty, Michael; Everts, Michael

Multiscale Shale Porosity Characterization .................................................................................................................. 1962
Verba, Circe; Crundall, Dustin; Moore, Johnathan

Multivariate Analytics of Seismic Inversion Products to Predict Horizontal Production in the Wolfcamp
Formation of the Midland Basin .......................................................................................................................... 1973
Jarvie, Daniel; Maende, James; Cuth, Patrick

New Models for Time-Cumulative Behavior of Unconventional Reservoirs — Diagnosis Relations, Production
Forecasting, and EUR Methods .................................................................................................................................. 1982
Yousof, Wajid; Blasingame, Thomas A.

New Production Performance and Prediction Tool for Unconventional Reservoirs .......................................................... 2006
Velasco, Raul; Panja, Pulak; Deo, Milind

A New Slim Full Bore Electrical Micro-Imaging Tool Conveyed through the Drill String and Bit for Geological
and Reservoir Characterization of Unconventional Reservoirs .................................................................................. 2022
Bammi, Sachin; Wells, Peter; Fredette, Mark; Tontiolo, Julian; Mallick, Abhishek; Nguyen, Henry; Haddad, Elia; Laronga, Robert; Kherroubi, Josselin

Nitrogen Fracture-Injection/Falloff Testing and Analysis in Underpressured Reservoirs .......................................................... 2031
Tompkins, Darryl; Persac, Stephen; Craig, David P.; Birdwell, Joe

NMR Response of Methane in Gas Shale .......................................................................................................................... 2040
Gu, Zhaobin; Liu, Wei; Sun, Dianqing; Sun, Wei; Hu, Zhiming

A Novel Tight Gas Evaluation Workflow for Targeting and Optimizing the Emerging Horizontal Lower Cotton
Valley Play in North Louisiana ........................................................................................................................................ 2045
Buller, Dan; Persac, Stephen; Medina, Rojelo; Garrison, Nick; Truax, Jerome; Cottingham, Byron

Observations on the Geochemistry and Origin of Gas Occurring along Lower Cretaceous Shelf Margins, South
Texas .................................................................................................................................................................. 2064
Ilitch, Harold; Waite, Lowell; Tomlin, Beau; Covarrubias, Edgardo

An Oil-Source Rock Correlation Examining the Potential of the Chattanooga Shale as a Source Rock for Oil
within the Spivey-Grabs-Basil Field, Kingman and Harper Counties, Kansas .................................................................................. 2072
Wall, Meagan; Totten, Matthew; Chaudhuri, Sambudha; Kvansky-Wilson, Brianna; Evans, Drew

Optimization of Well and Hydraulic Fracture Spacing for Tight/Shale Gas Reservoirs .......................................................... 2092
Balan, H. Omur; Gupta, Anuj; Georgi, Daniel T.; Al-Shawaf, Ali M.
