**The 3rd International Symposium on Intercloud and IoT (ICI 2016)**

### Session 1: Inter-cloud and IoT

**Multilayer Virtualized Systems Analysis with Kernel Tracing** .................................................1

*Cédric Biancheri, Naser Ezzati Jivan, and Michel R. Dagenais*

**A Coordination-Based Brokerage Architecture for Multi-cloud Resource Markets** ...........................................................7

*Sarah Aldawood, Frank Fowley, Claus Pahl, Davide Taibi, and Xiaodong Liu*

**Legal and Regulative Aspects of IoT Cloud Systems** ..............................................................15

*E.E. Kalmar, A. Kertesz, Sz. Varadi, R. Garg, and B. Stiller*

**MobIoTSim: Towards a Mobile IoT Device Simulator** ..............................................................21

*T. Pflanzner, A. Kertesz, B. Spinnewyn, and S. Latré*
Using Block Cipher for Confidentiality of Images in Cloud-Based Systems ........................................28
Rana Adnan Rihan and Khaled M. Khan

Session 2: Mobile Cloud and Data
Power Optimization of Large Scale Mobile Cloud System Using Cooperative Cloudlets ..............................................................34
    Muneera Al-Quraan, Mahmoud Al-Ayyoub, Yaser Jararweh, Lo'ai Tawalbeh, and Elhadj Benkhelifa
Mobile Health (m-Health) System in the Context of IoT .................................................................39
    Sultan H. Almotiri, Murtaza A. Khan, and Mohammed A. Alghamdi
Inter-domain Mobility Management Using SDN for Residential/Enterprise Real Time Services ..........................................................43
    Walaa F. Elsadek and Mikhail N. Mikhail
Evaluating NoSQL Document Oriented Data Model .................................................................51
    Hadi Hashem and Daniel Ranc
Knowledge Management as a Service (KMaaS) ........................................................................57
    Peter Balco and Martina Drahošová

Session 3: Security and Privacy
Security and Privacy Considerations for IoT Application on Smart Grids: Survey and Research Challenges .................................................................63
    Fisnik Dalipi and Sule Yildirim Yayilgan
Cyber-Attack Modeling Analysis Techniques: An Overview .................................................................69
    Hamad Al-Mohanni, Qublai Mirza, Anitta Namanya, Irfan Awan, Andrea Cullen, and Jules Disso
A Survey on Network Security Monitoring Systems ........................................................................77
    Ibrahim Ghafir, Vaclav Prenosil, Jakub Svoboda, and Mohammad Hammoudeh
State-Level Views on Professional Competencies in the Field of IoT and Cloud Information Security ........................................................................83
    Natalia Miloslavskaya and Alexander Tolstoy
Provable Secure Pairing-Free Certificate-Less Authenticated Key Agreement Protocol .................................................................91
    Amr Farouk and Mohamed M. Fouad

Session 4: Cloud and Networking
Dual-Backhaul Links in LTE - A Mobile Relay System for High-Speed Railways .........................................................98
    Khaled M. Addali, Abderrahmane BenMimoune, Fawaz A. Khasawneh, Amamer M. Saied, and Michel Kadoch
Distributed Interference Alignment in Partially Connected Networks without Preliminary Topological Knowledge .................................................................103
  Peter Farkaš, Matej Staroň, and Frank Schindler

Virtual Machines' Load-Balancing in Inter-clouds .........................................................109
  Mohamed Riduan Abid, Karima Kaddouri, Kevin Smith,
  Moulay Idriss El Ouadghiri, and Michael Gerndt

A Container-Based Edge Cloud PaaS Architecture Based on Raspberry Pi Clusters ..................................................................................................................117
  Claus Pahl, Sven Helmer, Lorenzo Miori, Julian Sanin, and Brian Lee

An Autonomous Aquaponics System Using 6LoWPAN Based WSN ........................................125
  N. Hari Kumar, Sandhya Baskaran, Sanjana Hariraj, and Vaishali Krishnan

The 3rd International Symposium on Big Data Research and Innovation (BigR&I-2016)

Session 1: Big Data Research and Innovation 1

Survey of Big Data Information Security ........................................................................133
  Natalia Miloslavskaya and Aida Makhmudova

The Retrieval System Design for Big Data Content on Lucene in the Coal Industry ........139
  Jun Wang and Chunyang Liu

Investigating Metrics to Build a Benchmark Tool for Complex Event Processing Systems ........................................................................................................143
  Andre Leon S. Gradvohl

Application of Big Data, Fast Data, and Data Lake Concepts to Information Security Issues ..............................................................................................................148
  Natalia Miloslavskaya and Alexander Tolstoy

Session 2: Big Data Research and Innovation 2

Taxonomy for Unsecure Big Data Processing in Security Operations Centers ..................154
  Natalia Miloslavskaya, Alexander Tolstoy, and Sergey Zapechnikov

Forecasting the Natural Gas Price Trend - Evaluation of a Sentiment Analysis ..................160
  Tina Grundmann, Carsten Felden, and Marco Pospiech

Rule- and Cost-Based Optimization of OLAP Workloads on Distributed RDBMS with Column-Oriented Storage Function .........................................................165
  Takamitsu Shioi and Kenji Hatano

Infrastructure-Aware Functional Testing of MapReduce Programs ..................................171
  Jesús Morán, Bibiano Rivas, Claudio De La Riva, Javier Tuya,
  Ismael Caballero, and Manuel Serrano
An Incremental Approach for Real-Time Big Data Visual Analytics .........................................................177
  Ignacio García, Rubén Casado, and Abdelhamid Bouchachia

The International Symposium on Advanced Big Data and Applications (ABA 2016)

Generational Garbage Collection Algorithm Based on Lifespan Prediction ...........................................183
  Xin Ren and Ying Zhangxu
Spar(k)ql: SPARQL Evaluation Method on Spark GraphX ........................................................................188
  Gergő Gombos, Gábor Rácz, and Attila Kiss
Data Modeling and Case-Based Reasoning for Social Monitoring ...........................................................194
  Hadi Hashem and Daniel Ranc

The 3rd International Symposium on Social Networks Analysis, Management, and Security (SNAMS 2016)

Session 1: Social Media 1

Human Acceptance of Autonomous Social Media Agent ........................................................................200
  B.H. Fatima, S.W. Jaffry, M.M. Mubasher, M K.A. Sherwani, and A. Haseeb
Towards Automatic Persona Generation Using Social Media ...................................................................206
  Jisun An, Hoyoun Cho, Haewoon Kwak, Mohammed Ziyaad Hassen, and Bernard J. Jansen
AffinityFinder: A System for Deriving Hidden Affinity Relationships on Twitter Utilizing Sentiment Analysis ..............................................................................................................................212
  Abdelmounaam Rezgui, Daniel Fahey, and Ian Smith
Correlation of Weather and Moods of the Italy Residents through an Analysis of Their Tweets ...............216
  Gianfranco E. Modoni and Davide Tosi

Session 2: Social Media 2

A Social Network Analysis of Tweets during the Gaza War, Summer 2014 .................................................220
  Wael F. Al Sarraj, Khalid M. Kahloot, Ashraf Y. Maghari, and Mahmoud M. Abu-Ghosh
Using a Rich Context Model for Real-Time Big Data Analytics in Twitter ...........................................228
  Alisa Sotsenko, Marc Jansen, Marcelo Milrad, and Juwel Rana
Social Networks Benchmark Dataset for Diseases Classification ...............................................................234
  Muhammed Quwaider and Mosab Alfaqeeh
Using Dynamic Parallelism to Speed Up Clustering-Based Community Detection in Social Networks .................................................................................................................................240
  Mohammed Alandoli, Mahmoud Al-Ayyoub, Mohammad Al-Smadi, Yaser Jararweh, and Elhadj Benkhelifa
Session 3: Security, Data, and Semantics

Exploring Research Networks with Data Science: A Data-Driven Microservice Architecture for Synergy Detection ........................................................................................................................................246

Thomas Thiele, Thorsten Sommer, Sebastian Stiehm, Sabina Jeschke, and Anja Richert

Microblogging Hash Tag Recommendation System Based on Semantic TF-IDF: Twitter Use Case ...................................................................................................................................................................................252

Mir Saman Tajbakhsh and Jamshid Bagherzadeh

An Intelligent Model for Vulnerability Analysis of Social Media User ..................................................................................................................................................................................258

Firya Rashid Abubaker and Pinar Sarisaray Boluk

The Black Mark beside My Name Server: Exploring the Importance of Name Server IP Addresses in Malware DNS Graphs ....................................................................................................................................264

Jukka Ruohonen, Sanja Šćepanović, Sami Hyrynsalmi, Igor Mishkovski, Tuomas Aura, and Ville Leppänen

The 3rd International Workshop on Mobile Applications (MobiApps 2016)

Malware Development on Mobile Environments ..................................................................................................................................................................................................................270

Gianluca Papaleo, Enrico Cambiaso, Luca Patti, and Maurizio Aiello

Application for the Detection of Dangerous Driving and an Associated Gamification Framework ..........................................................................................................................................................................................276

Keshav Bahadoor and Patrick Hosein

Smart Mobile-Based Emergency Management and Notification System .........................................................................................................................................................................................................................282

Mohammed Ghazal, Samr Ali, Marah Al Halabi, Nada Ali, and Yasmina Al Khalil

Towards Secure Mobile Process Tracking Using Wearable Computing in mGovernment Applications ........................................................................................................................................................................................................288

Mohammed Ghazal, Yasmina Al Khalil, Fasila Haneefa, Assem Mhanna, Dana Awachi, and Samr Ali

A Mobile Cloud System for Different Useful Applications .........................................................................................................................................................................................................................295

Lo’ai A. Tawalbeh and Waseem Bakhader

GPRS-Based Robotic Tracking System with Real Time Video Streaming ........................................................................................................................................................................................................299

Tasneem M. Yousif, Aysha K. Alharam, Wael Elmedany, Abeer A. AlKhalaf, and Zainab Fardan

Joint Resource Allocation Optimization in OFDM Relay Networks with SWIET .................................................. 304
     Gaofei Huang

A New Scalable and Energy Efficient Algorithm for VMs Reassignment in Cloud Data Centers .................................................. 310
     Makhlouf Hadji, Nabila Djenane, Rachida Aoudjit, and Samia Bouzefrane

A Novel Authentication and Key Agreement Protocol for Internet of Things Based Resource-Constrained Body Area Sensors .................................................. 315
     Muhammad A. Iqbal and Magdy Bayoumi

Particle Swarm Optimization Scheduling for Energy Saving in Cluster Computing Heterogeneous Environments .................................................. 321
     Eloi Gabaldon, Fernando Guirado, Josep Lluis Lerida, and Jordi Planes

Energy Efficiency in Mobile Cloud Computing Architectures .................................................. 326
     Thinh Le Vinh, Reddy Pallavali, Fatiha Houacine, and Samia Bouzefrane

The International Workshop on Standardising the IoT and Its Applications (SITA 2016)

An Investigation on the M2M/IoT Trajectory and Its Relationship with Formal Standards .................................................. 332
     Dong-Hyu Kim and Heejin Lee

IoT Standardization - The Approach in the Field of Data Protection as a Model for Ensuring Compliance of IoT Applications? .................................................. 336
     Kees Stuurman and Irene Kamara

Standardisation of E-Merging IoT Applications: Past, Present, and a Glimpse into the Future .................................................. 342
     Kai Jakobs

Humans Are Back in the Loop! Would Production Process Related Ethics Support the Design, Operating, and Standardization of Safe, Secure, and Efficient Human-Machine Collaboration? .................................................. 348
     Hartwig Steusloff

On the Performance of Tabu Search Algorithm for the Vehicle Routing Problem with Time Windows ..............................................................351
  Pınar Kirci

Authentication and Key Management in an LTE-Based Unmanned Aerial System Control and Non-payload Communication Network ........................................355
  Gicheol Wang, Byoung-Sun Lee, and Jae Young Ahn

Optimised QoS-Aware DBA Mechanisms in XG-PON for Upstream Traffic in LTE Backhaul ........................................................................361
  Jerome A. Arockiam, Kenneth N. Brown, and Cormac J. Sreenan

Sizing Network Buffers: An HTTP Adaptive Streaming Perspective ..................................................369
  Dario Raca, Ahmed H. Zahran, and Cormac J. Sreenan

Author Index ............................................................................................................................................377
