
Ostrava, Czech Republic
7-9 September 2016
2016 International Conference on Intelligent Networking and Collaborative Systems

INCoS 2016

Table of Contents

Welcome Message from the INCoS 2016 Conference Chairs ................................................................. xiii
Welcome Message from the INCoS 2016 Workshops Co-Chairs ............................................................... xv
INCoS 2016 Organizing Committee ........................................................................................................... xvi
INCoS 2016 Tracks and Program Committee Members ........................................................................... xviii
INCoS 2016 Reviewers ................................................................................................................................. xxvi
Keynote Talk I ................................................................................................................................................ xxvii
Keynote Talk II ............................................................................................................................................. xxviii
Keynote Talk III ........................................................................................................................................... xxix
Welcome Message from the ALICE 2016 Workshop Chairs ..................................................................... xxx
ALICE 2016 Organizing Committee ........................................................................................................... xxxi
ALICE 2016 Reviewers ................................................................................................................................. xxxii
Welcome Message from the FINCoS 2016 Workshop Organizers ............................................................ xxxiii
FINCoS 2016 Organizing Committee ......................................................................................................... xxxiv
FINCoS 2016 Reviewers ............................................................................................................................... xxxv
Welcome Message from IABP 2016 Workshop Chairs ............................................................................ xxxvi
IABP 2016 Organizing Committee ........................................................................................................... xxxvii
IABP 2016 Reviewers ................................................................................................................................. xxxviii
Welcome Message from WIND 2016 Workshop Chairs ......................................................................... xxxix
WIND 2016 Organizing Committee ......................................................................................................... xli
WIND 2016 Reviewers ............................................................................................................................... xlii
Welcome Message from ESN 2016 Workshop Chairs ............................................................................. xliii
ESN 2016 Organizing Committee ........................................................................................................... xliiv
ESN 2016 Reviewers ................................................................................................................................. xlv
Welcome Message from SecureSysCom 2016 International Workshop Organizers ................................. xlvi
SecureSysCom 2016 Organizing Committee ............................................................................................. xlvii
SecureSysCom 2016 Reviewers ................................................................................................................ xlviii
Welcome Message from IWCBS 2016 International Workshop Organizer .................................................. xlvix
IWCBS 2016 Organizing Committee ....................................................................................................... li
IWCBS 2016 Reviewers ............................................................................................................................ lii
Sponsors ..................................................................................................................................................... liii
Eighth IEEE International Conference on Intelligent Networking and Collaborative Systems (INCoS-2016)

**Session 1: Intelligent Networking and Collaborative Systems**

Estimating Proper Communication Distance for Epidemic Routing in Japanese Urban Areas Using SNS-Based People Flow Data ................................................................. 1

Akihiro Fujihara

The Research of Possibility of Sharing Use of Wireless and Mobile Technologies for Organizing the Radio Channels of Operation Control System of Earthmoving and Construction Machines ................................................................. 9

Tatyana Golubeva and Sergey Konshin

The Benefits and Risks of Enterprise Social Networks ................................................................................................................................. 15

Martina Drahošová and Peter Balco

Ahmad Raza Hameed, Nadeem Javaid, Saif Ul Islam, Ghafur Ahmed, Umar Qasim, and Zahoor Ali Khan

Multi-class Intelligent Fault Diagnosis Approach Based on Modified Relevance Vector Machine ........................................................................ 27

Jianshe Kang, Kun Wu, Kuo Chi, and Yinxia Du

Node Importance of Complex Networks Based on Cascading Failure Dynamic .................................................................................................................. 31

Zhen-Hua Li and Dong-Li Duan

**Session 2: Cloud Computing for Secure Data and Management Systems**

Design Patterns in Management Systems ................................................................................................................................. 36

Viliam Malcher

Data Understanding Techniques for Management Application and Cryptography ................................................................................................. 40

Marek R. Ogiela and Lidia Ogiela

Identity Based Proxy Re-Encryption Scheme (IBPRE+) for Secure Cloud Data Sharing ................................................................................................. 44

Xu An Wang, Fatos Xhafa, Zhiheng Zheng, and Jinting Nie

A Cloud Platform for CAE Simulation in Supercomputing Environment .................................................................................................................. 49

Ziyun Deng and Jing Zhang

Review of Virtual Memory Optimization in Cloud Environment ................................................................................................................................. 53

Ye Ding, He Xu, Peng Li, and Jie Ding

Locality-Aware and Energy-Aware Job Pre-Assignment for Mapreduce .................................................................................................................. 59

Lei Chen, Jing Zhang, Lijun Cai, Ziyun Deng, Tingqing He, and XuAn Wang

**Session 3: Intelligent Systems for Collaborative Robotics and Sensing**

Using Octree Maps and RGBD Cameras to Perform Mapping and A* Navigation ................................................................................................................................. 66

Peter Beňo, Vladimír Pavelka, František Duchoň, and Martin Dekan

Agent-Based Cloud Computing Systems for Traffic Management ................................................................................................................................. 73

Jan Vasek, Jakub Hvizdoš, and Michal Puheim

Neural Network Based Ball Tracking for Robot Nao ................................................................................................................................. 80

Denis Vereš, Rudolf Jakša, and Jakub Hvizdoš

Network Based Linear Population Size Reduction in SHADE ................................................................................................................................. 86

Adam Viktorin, Michal Pluhacek, and Roman Senkerik
Research on Failure Prognostics Method of Electronic System Based on Improved Fruit Fly Algorithm

and Grey Fast Relevance Vector Machine .................................................................94

Kun Wu, Jianshe Kang, and Xuan Wang

Multi-sensor Fusion Approach for Fire Alarm Using BP Neural Network ..................99

Yan-Hua Liang and Wei-Min Tian

Session 4: Semantics, Social Networking and Collaborative Systems

Providing Smart Objects with Intelligent Tutoring Capabilities by Semantic Technologies..........................................................103

Giuseppe Fenza, Vincenzo Loia, and Francesco Orciuoli

Apache Mahout’s k-Means vs Fuzzy k-Means Performance Evaluation .................................................................110

Fatos Xhafa, Adriana Bogza, Santi Caballé, and Leonard Barolli

Ontology-Based Approach for Semantic Description and the Discovery of e-Learning Web Services .....................................................117

Kabina Rabahallah, Faïcal Azouaou, and Mohamed Tayeb Laskri

An Optimization Research on the Alternate Interval for Electronic Products ...............................................................125

Yutao Wu, Xisheng Jia, Liang Wen, and Xu'an Wang

The Research of Enhancing the Dependability of Cloud Services Using Self-Healing Mechanism .................................................................130

Feng Ye, Shengyan Wu, Qian Huang, and Xu An Wang

An Improved Community Detection Algorithm Based on the Distance Dynamics .................................................................135

Tao Meng, Lijun Cai, Tingqin He, Lei Chen, and Ziyun Deng

Session 5: Wireless, Mobile and Cognitive Networking Systems

Traffic Control Method for Interactive Projection Mapping Control System .................................................................143

Yoshifumi Kamada, Tsuyoshi Yamasaki, Yuki Tsuno, Nobuyuki Tsuchimura, and Hiroyoshi Miwa

Determinism through Path Diversity: Why Packet Replication Makes Sense .................................................................150

Jesica de Armas, Pere Tuset, Tengfei Chang, Ferran Adelantado, Thomas Watteyne, and Xavier Vilajosana

Creating Dynamically Changing World Map for Computer Games with Advanced Image Processing — A Use Case .................................................................155

Tomasz Hácha

A Stackelberg Game for DSTC-Based Cognitive Radio Networks with Multiple Cooperative Relays .................................................................161

Lijie Wang, Yi Tang, Bo Yuan, and Dangfeng Zhu

An Identity-Based Proxy Signature Scheme from Lattices in the Standard Model .................................................................167

Wang Li

RSM and VSM: Two New Routing Protocols for Underwater WSNs .................................................................173

Session 6: Hidden Complex Networks

Creating Complex Networks Using Multi-swarm PSO .................................................................180

Michal Pluhacek, Roman Senkerik, Adam Viktorin, and Ivan Zelinka

On the Transforming of the Indices Selection Mechanism inside Differential Evolution into Complex Network .................................................................186

Roman Senkerik, Adam Viktorin, and Michal Pluhacek

On Evolutionary Dynamics Modeled by Ant Algorithm .................................................................193

Ivan Zelinka, Lukas Tomaszek, and Lumír Kojecky
An Efficient Proxy Re-Encryption Based on (Semi) Group Factorization Problems .................................199
  Licheng Wang, Jing Li, Jianhua Yan, and Zhiguo Qu

New Related-Key Impossible Differential Attack on MIBS-80 ..............................................................203
  Lu Cheng, Peng Xu, and Yuechuan Wei

Limitations on Low Variance k-Fold Cross Validation in Learning Set of Rules Inducers .........................207
  Michal Vasinek, Jan Platoš, and Vaclav Snasel

**Session 7: Nature's Inspired Computing and Optimization**

Point-Based Scan Matching by Differential Evolution ..................................................................................215
  Pavel Krömer, Jaromír Konečný, and Michal Prauzek

Optimal Allocation of Public Parking Slots Using Evolutionary Algorithms .............................................222
  Javier Arellano-Verdejo and Enrique Alba

Smart Traffic Lights: A First Parallel Computing Approach .....................................................................229
  D. Souravlias, G. Luque, E. Alba, and K. E. Parsopoulos

Mission-Oriented Maintenance Optimization Subject to Resources Constraints ........................................237
  Wenbin Cao, Qiwei Hu, Wenyuan Song, and Yutao Wu

Comparative Assessment of Performance for Home Energy Management Controller in Smart Grid ..........244
  Muhammad Hassan Rahim, Nadeem Javaid, Muhammad Bilal Janjua, Muhammad Naeem, Zahoor Ali Khan,
  and Umar Qasim

The Features of Low-Connectivity Essential Proteins ...............................................................................251
  Yun-Yuan Dong

**Session 8: Machine Learning and Mining**

A Behavioral Biometrics Based and Machine Learning Aided Framework for Academic Integrity in E-Assessment .........................................................................................................................255
  Alexander Amigud, Joan Arnedo-Moreno, Thanasis Daradoumis, and Ana-Elena Guerrero-Roldan

How to Solve Common Human Actions Recognition Use Cases with Gesture Description Language ........263
  Tomasz Hachaj

Knowledge Management Approaches for Data Understanding .................................................................270
  Lidia Ogiela and Marek R. Ogiela

Using Exploratory Analysis Modeling to Study the Correlation between EEG Signal and Respiratory Rhythm ...........................................................................................................................................274
  Xuan Guo, Yixiao Sun, Zhiting Xiao, and Wenhui Wu

Identity Authentication System Based on Fingerprint Identification and Pulse Certification ........................280
  Qian Xu and Jie Deng

New Differential Fault Attack on Lightweight Cipher LBlock .....................................................................285
  Yuechuan Wei, Yisheng Rong, and Xu An Wang
Session 9: Intelligent Algorithms for Scheduling, Resource Management and Image Processing

Wide Image Geometric Mosaic and Measure Algorithm of Mobile Mapping System .................................................................289
Wu Meng, Gao Yang, Guan Bin, and Li Kui

Research of Web Resources Protection Based on Digital Watermarking and Digital Signature ..........................................................294
Chun He

A Novel QoS-Aware Load Balancing Mechanism in Cloud Environment ..................................................................................298
Feng Ye, Shengyan Wei, Qian Huang, and Xu An Wang

Binocular Stereo Vision Based Face Recognition Using Sparse Representation ........................................................................302
Yang Liu, Yabo Yang, and Jing Wang

Retail Commodity Sale Forecast Model Based on Data Mining .........................................................................................307
Jing Zhang and Juan Li

Session 10: Secure Intelligent Collaborative Systems

A Star-Topological Privacy Encryption for Telecare Medical Information Systems ...............................................................311
Jing Li, Licheng Wang, and Xinxin Niu

A New Approach to Security Analysis of Wireless Sensor Networks for Smart Home Systems ..................................................318
Miao Zhang, Yang Liu, Jiteng Wang, and Yangyu Hu

Research and Design of Dedicated Instruction for Reconfigurable Matrix Multiplication of VLIW Processor ................................324
Su Yang, Wei Yuechuan, and Zhang Mingshu

Non-transferable Unidirectional Proxy Re-Encryption Scheme for Secure Social Cloud Storage Sharing ............................................328
Xu An Wang, Fatos Xhafa, Wei Hao, and Wei He

Position Aware Mobility Pattern of AUVs for Avoiding Void Zone in Underwater WSNs .............................................................332
Mudassir Ejaz, Anwar Khan, Muhammad, Umar Qasim, Zahoor Ali Khan, and Nadeem Javaid

Sixth International Workshop on Adaptive Learning via Interactive, Collaborative and Emotional approaches (ALICE-2016)

Session 1: Formative Assessment and Learners’ Profiling

Towards a Personalized Summative Model Based on Learner’s Preferences ............................................................................339
David Bañeres

A Preliminary Study about the Analytic Maturity of Educational Organizations ............................................................................345
Isabel Guitart, Jordi Conesa, and Jordi Casas

eOrient@ — A Recommender System to Address Life-Long Learning and Promote Employability ................................................351
David Bañeres and Jordi Conesa

Session 2: Interactive Learning Systems and Analytics

On the Road to Speed-Reading and Fast Learning with CONCEPTUM .....................................................................................357
Daniele Toti and Marco Rinelli

A Prototype of an eLearning Platform in Support for Learning Analytics and Gamification .........................................................362
David Gàñà, Santi Caballé, Robert Clarísò, and Jordi Conesa

Learning through the Design of Interactive Storie: Exploring the Concept of Storyworld ........................................................370
Giuliana Dettori
International Workshop on Evolution of Social Networks (ESN 2016)

Session 1: Evolution of Social Networks

Author Evaluation Based on H-Index and Citation Response ................................................................. 375
Miloš Kudělka, Jan Platoš, and Pavel Krömer

Intelligent SMS Spam Filtering Using Topic Model ................................................................................. 380
Jialin Ma, Yongjun Zhang, Jinling Liu, Kun Yu, and XuAn Wang

A Rational Secret Sharing Relying on Reputation ..................................................................................... 384
Jianghao Jin, Xie Zhou, Chuangui Ma, and Xu'an Wang

A Secure Private Information Retrieval in Cloud Environment ............................................................... 388
Yang HaiBin and Zhang Ling

Frontiers in Intelligent Networking and Collaborative Systems (FINCoS-2016)

Session 1: Frontiers in Intelligent Networking Systems and Application

Design and Implementation of Library Books Search and Management System Using RFID Technology ............................................................ 392
Haiming Cheng, Ling Huang, He Xu, Yifan Hu, and Xu An Wang

A Novel Secure Architecture for the Internet of Things ........................................................................ 398
Jiewei Qian, He Xu, and Peng Li

A Novel Multi-class Classification Approach Based on Fruit Fly Optimization Algorithm and Relevance Vector Machine .......................................................................................................................... 402
Jianshe Kang, Kun Wu, Kuo Chi, and Xuan Wang

A Calibration Approach for Accuracy Infrared Temperature ................................................................. 407
Yan-Hua Liang and Ze-Dong Qian

Bayesian Parameter Estimation of Weibull Mixtures Using Cuckoo Search ........................................ 411
Kuo Chi, Jianshe Kang, Kun Wu, and Xuan Wang

Numerical Investigation of Initial Condition and Singular Perturbation Parameter Value Influence on the Dynamical System Oscillatory Behaviour .................................................................................. 415
Zuzana Sutova and Robert Vrabel

2016 International Workshop on Intelligent Applications for Business Productivity (IABP 2016)

Session 1: Intelligent Applications for Business Productivity

The Research of the University Public Opinion Management on Internet ................................................... 420
Hongxia Li and Kai Yan

Research on Selecting Emergency Material Production Enterprises Based on Productivity Reserve ............................................................... 423
Liying Chen, Feng Wang, and Yutao Wu

A Bi-objective Model for Relief Supply Location in Post-Disaster Management ........................................ 428
S. M. Khalili, M. Babagolzadeh, M. Tazdzani, M. Saberi, and E. Chang

A Goal Programming Approach for Group Decision Making with Four Incomplete Preference Relations ............................................................... 435
Ben Cheng, Shan Hu, Jiang-Wei Wang, and Yun-Yuan Dong
Eighth International Workshop on Information Network Design (WIND 2016)

Session 1: Network Design, Management and Performance

Network Design Method by Finding Server Placement and Protected Links to Keep Connectivity to Servers
Against Link Failures ................................................................. 439
Daishi Irie and Hiroyoshi Miwa

Network Design Method Based on Link Protection Taking Account of the Connectivity and Distance
Between Sites ........................................................................ 445
Tsuyoshi Yamasaki, Makoto Anan, and Hiroyoshi Miwa

Proposal of the Network Resonance Method for Estimating Eigenvalues of the Scaled Laplacian Matrix ......................................................... 451
Satoshi Furutani, Chisa Takano, and Masaki Aida

Making TCP/NC Adjustable to Time Varying Loss Rates ................................................................. 457
Nguyen Viet Ha, Kazumi Kumazoe, and Masato Tsuru

The Price of Unfairness ................................................................. 463
Mario Köeppen and Kaori Yoshida

Second Workshop on Security and Privacy in Systems and Communication Networks (SecureSysComm 2016)

Session 1: Security and Privacy in Systems and Communication Networks

Cloud Security: From Per-Provider to Per-Service Security SLAs ................................................................. 469
Alessandra De Benedictis, Valentina Casola, Massimiliano Rak, and Umberto Villano

Certificateless Multi-signcryption Scheme in Standard Model ................................................................. 475
Xuguang Wu, Minqing Zhang, and Shuaishuai Zhu

A Multi-sensor Data Fusion Approach for Detecting Direct Debit Frauds ................................................................. 480
Ferdinando Campanile, Gianfranco Cerullo, Salvatore D’Antonio, Giovanni Mazzeo, Gaetano Papale, and Luigi Sgaglione

Data Leakage Detection Using System Call Provenance ........................................................................ 486
Abir Awad, Sara Kadry, Gururaj Maddodi, Saul Gill, and Brian Lee

Fully Detection of Illegal Value Use Defects ......................................................................................... 492
Yukun Dong and Yalan Wang

Intrusion Detection Techniques Based on Cutting-Based Real-Valued Negative Selection ........................................... 498
Yang Lei, Xu’an Wang, and Hongyan Yin

Second International Workshop for Collaborative e-Business Systems (IWCBS-2016)

Session 1: Collaborative e-Business Systems

Using Topic Model for Intelligent Computer-Aided Diagnosis in Traditional Chinese Medicine ................................................................. 504
Jialin Ma and Yongjun Zhang

Research on the Job Stress Structure of Coal Miners Based on Textual Analysis ................................................................. 508
Hongxia Li and Hongxi Di

Data Security and Privacy Information Challenges in Cloud Computing ................................................................. 512
Weiwei Kong, Yang Lei, and Jing Ma
Session 2: Intelligent Secure Collaborative e-Business Systems

An Exact Method for Solving Selective Maintenance Problems Considering Imperfect Maintenance .................................................................522
  Wenbin Cao, Wenyuan Song, Qiwei Hu, and Yinxia Du

Some Practical Properties of AP14 ...........................................................................................................................................................................527
  Tanping Zhou, Xiaoyuan Yang, Xu'an Wang, and Yiliang Han

Damage Effectiveness Evaluation on the Time Sensitive Group Targets for Trajectory Correction Missile Carrying with Terminal-Sensitive Projectiles ...........................................................................................................................................................532
  Jie Li and Hong Zhang

A Review of the Research Literature on Civil-Military Integration Equipment Support Reform in the United States and Its Enlightenment .............................................................................................................................538
  Yan-Fei Zhang, Jun-Yan Wu, Jie Li, and Wan-Yi Liu

The Infrared and Visible Light Image Fusion Based on the Non-subsample Shearlet Transform and Heat Source Concentration Ratio ......................................................................................................................................................................544
  Jie Luo and Weiwei Kong

Challenges in Efficient Customer Recognition in Contact Centre: State-of-the-Art Survey by Focusing on Big Data Techniques Applicability ......................................................................................................................................548
  Morteza Saberi, Anne Karduck, Omar Khadeer Hussain, and Elizabeth Chang

Author Index ..................................................................................................................................................................................................555
