# TABLE OF CONTENTS

**GRAPHENE AS A TUNABLE PLASMONIC METASURFACE WITH TRANSFORMATION OPTICS** .................................................. 14  
Paloma A. Huidobro ; M. Kraft ; S. A. Maier ; J. B. Pendry

**INTEGRATED OPTICAL DEVICE DESIGN BASED ON TRANSFORMATION OPTICS** ..................................................... 16  
Shuyi Li ; Dingqian Guo

**CONFORMAL TRANSPARENCY** ................................................................. 17  
Lin Xu ; Zhan Xiong ; Huifeng Kan ; Huanyang Chen

**CONFORMAL MAPPING IN HYPERBOLIC METAMATERIAL: APPLICATION OF TWO-DIMENSIONAL CLIFFORD ALGEBRA** ................................................................. 18  
Shahram Dehdashti ; Lian Shen ; Hongsheng Chen

**OPTOELECTRONIC DESIGN ON THE HOT-CARRIER PHOTODETECTORS** ................................................................. 19  
Yaobai Zhan ; Cheng Zhang ; Kai Wu ; Xiaofeng Li

**BOOSTING WIRELESS TRANSMISSION OF POWER WITH MAGNETIC METAMATERIALS** ..................................................... 20  
Jordi Prat-Camps ; Carlos Navau ; Alvaro Sanchez

**ULTRADIRECTIONAL SCATTERING OF RADIALY ANISOTROPIC NANOPARTICLES** ..................................................... 21  
Wei Liu

**ROBUST AND ULTRACOMPACT ROOM TEMPERATURE OPERATED SURFACE PLASMON POLARITON NANOLASERS** ........................................................................................................ 25  
Tien-Chang Lu

**VERTICAL RADIATION AND DIRECTIONAL EMISSION FOR METAL-CONFINED NANOCYLINDER RESONATORS** ........................................................................................................ 26  
Yue-De Yang ; Jin-Long Xiao ; Yong-Zhen Huang

**PLASMON LASERS FOR SENSING** ........................................................... 27  
Renmin Ma

**CONTROLLING THE SPONTANEOUS EMISSION RATE OF QUANTUM WELLS IN ROLLED-UP HYPERBOLIC METAMATERIALS** ........................................................................................................ 29  
Marvin Schulz ; Hoan Vu ; Stephan Schweitzer ; Andreas Rottler ; Tobias Korn ; David Sonnenberg ; Tobias Kipp ; Stefan Mundach

**GENERATING INTENSE OPTICAL FIELDS WITH HYBRID-GAP PLASMON LASERS** ................................................................. 31  
Michael P. Nielsen ; Lucas Lafone ; Ngoc Nguyen ; Themistoklis P. H. Sidirooulos ; Edmund Clarke ; Paul Fry ; Stefan A. Maier ; Rupert F. Oulton

**ULTRAFAST AND QUANTUM DYNAMICS OF PLASMONIC NANOSENSORS** .................................................................................. 32  
Otswin Hess

**SEMICONDUCTOR NANOROD PLASMONIC LASERS: SINGLE-NANOROD AND ENSEMBLE MEASUREMENTS** ........................................................................................................ 33  
Yu-Jung Lu ; Chun-Yuan Wang ; Hung-Ying Chen ; Shangju Gwo

**ACTIVE HYPERBOLIC METASURFACES AT TELECOMMUNICATION FREQUENCIES** ................................................................. 34  
Joseph S. T. Smalley ; Felipe Vallini ; Lorenzo Ferrari ; Shiva Shahin ; Conor T. Riley ; Boubacar Kante ; Eric E. Fullerton ; Vitaly Zhuravlev ; Yevgeniy Zheludev ; Thanasis Podridis

**SURFACE PLASMON DISTRIBUTED FEEDBACK LASERS AND PARITY-TIME SYMMETRIC GRATINGS** ........................................................................................................ 36  
Elham Karami Keshmarzi ; Choloong Hahn ; Seok Ho Song ; Cha Hwan Oh ; R. Niall Tait ; Pierre Berini

**GEOMETRIC PHASES, SYMMETRIC GAUGE FLUX AND WEYL POINTS IN 3D HYPERSURFACES** ........................................................................................................ 38  
Meng Xiao ; C. T. Chan

**DUAL-BAND NEGATIVE INDEX ULTRASONIC METAFLUIDS** ................................................................................................. 39  
B. Mascaro ; S. Raffy ; J. Leng ; O. Mondain-Monval ; O. Poncelet ; C. Aristégui ; T. Brunet

**MANIPULATION OF ORBITAL ANGULAR MOMENTUM FOR ACoustIC WAVES** .................................................................................. 40  
Jian-Chun Cheng ; Bin Liang

**VALLEY VORTEX STATES IN SONIC CRYSTALS** ........................................................................................................ 41  
Jiayang Lu ; Chunyi Qiu ; Manzhu Ke ; Zhengyou Liu

**POLYGON ACOUSTIC CLOAK DESIGNED WITH COORDINATE TRANSFORMATION** .................................................................................. 44  
Rongrong Zhu ; Bin Zheng ; Hongsheng Chen

**BIFUNCTIONAL ACOUSTIC LENS** ........................................................... 45  
Jinlong Zhu ; Yiyun Hu ; Rongrong Zhu ; Hongsheng Chen

**DIRECT LASER WRITING OF OPTICAL FIELD CONCENTRATOR STRUCTURES** .................................................................................. 49  
I. Fanyucai ; V. Meziulis

**MECHANICAL PROPERTIES OF POLYMER MICRO/NANO STRUCTURES FABRICATED BY TWO-PHOTON LITHOGRAPHY** ................................................................................................. 50  
Satoru Shoji

**3D PRINTING AND INTEGRATION: FROM PHOTONIC ELEMENTS TO DEVICES** .................................................................................. 51  
S. Jou et al.

**LAYERED 2D SEMICONDUCTORS FOR ULTRAFAST PHOTONIC APPLICATIONS** .................................................................................. 53  
Jun Wang

**SUPER-RESOLUTION IMAGING USING MICROSPHERES SUPPORTED BY A GOLD NANOWIRE ARRAY IN TRANSMISSION MODE** .................................................................................. 56  
Jinlong Zhu ; Lynford L. Goddard
FREQUENCY-SELECTIVE FLEXIBLE METAMATERIAL ABSORBER WITH WIDEBAND ABSORPTION .................................................................373
Wei Shi ; Bo-Sheng Zheng ; Zi-Xiao Zhang

FREQUENCY SPLITTER BASED ON GRAPHENE PLASMONIC WAVEGUIDE ..........................................................................................377
Yize Shen ; Yongjiao Lu ; Yihang Xu ; Rang Chu ; Gilberto Brambilla ; Chunying Guan

TRI-BAND ULTRA-THIN ABSORBER FOR WIDE ANGLE OF INCIDENCE BASED ON FREQUENCY SELECTIVE SURFACE ...........................................381
Tao Zhong ; Hou Zhang

LOW SIDELOBE LEAKY-WAVE ANTENNA BASED ON SPOOF PLASMONIC WAVEGUIDE ..........................................................386
Gu Sheng Kong ; Meng Wang ; Hui Feng Ma

ANTENNA BEAM STEERING USING PHASE GRADIENT METASURFACE RADOME ..............................................................................390
Yongfeng Li ; Jieqiu Zhang ; Mingde Feng ; Yongqiang Pang ; Hongyu Chen

THE PROPAGATION CHARACTERISTICS OF THE DIFFRACTION FIELD BY AN ANULAR APERTURE OF BESSEL-GAUSS BEAM BASED ON SURFACE PLASMON POLARITONS .....................................................391
Yue Hu ; Yunping Qi

THE LIGHT SPLITTER BASED ON THE OCTAGONAL PHOTONIC QUASICRYSTALS ........................................................................397
Zi-Yu Wang ; Xiao-Peng Shen ; Kai Han

SPECTRALLY SELECTIVE TiO2/Ag/TiO2/(SiO2/TiO2)3 FILM FOR ENERGY-EFFICIENT WINDOWS ..........................................................401
Dong Qi ; Xian Wang ; Fang Wang ; Yongchi Cheng ; Yan Nie ; Rongzhou Gong

TiO2 NANOPLARTICLES LOADING ON THE MICROWAVE AND OPTICAL PROPERTIES OF THE ELECTRO-OPTIC POLYMER PMMA-DR1 FOR OPTIMIZATION OF MICROWAVE PHOTONIC COMPONENTS ...........................................................404
D. Palessonga ; M. El Gibari ; S. Ginestar ; H. Terrisse ; B. Guiffard ; A. Kassiba ; H. W. Li

TRANSMISSION PROPERTIES OF PHOTONIC CRYSTAL NEAR DIRAC POINT ............................................................406
Guan Dong

MAGNETICALLY TUNABLE FERRITE-LOADED WAVEGUIDE ISOLATOR BASED ON MAGNETIC PHOTONIC CRYSTALS ..................409
Weiwei Tong ; Jiafu Wang ; Tianzhao Qiu ; Zhaotang Liu ; Wenjie Wang ; Shaobo Su

COMSOL MULTIPHYSICS® BASED SIMULATION OF DPSS LASER DICING IN WIDE-GAP THIN SUBSTRATE ........................................413
Guillaume Sarriaume ; Nadjih Semmar

A BEAM-STEERING DUAL-POLARIZATION RECONFIGURABLE ANTENNA .........................................................................................414
Xiaolong Zhang ; Feng Yang ; Peng Yang

A NOVEL MICROSTRIP ANTENNA WITH PRE-CONTROLLABLE RESONANT FREQUENCY AND IMPEDANCE MATCHING ..................418
X. Li ; C. -J. Zou ; P. Yu ; M. -Y. Fu ; Q. -Y. Xiang

THE STUDY OF PLASMONIC NANOANTENNAS WITH DIFFERENT ELLIPTICAL METAL RODS EMBEDDED IN A TWO-ARM GRATING ............................................422
Yen-Hsiang Wu ; W.-H. Shih ; Li-Hsiang Wang

THE DESIGN OF PUSH-BROOM SCANNING SATELLITE ANTENNA .................................................................................................426
Bingbing Qi ; Xiaoming Liu ; Hai Wang ; Junsheng Yu ; Xiaodong Chen ; Yuan Yao ; Limei Qi ; Zhijiao Chen

FULL METAL CASE ANTENNA DESIGN AND MEASUREMENT .............................................................................................................430
Ming-Jhih Tsai ; Jwo-Shiun Sun ; Guan-Yu Chen

CHARACTERIZATION OF ULTRA-WIDE BAND DIAMOND SHAPED MONOPOLE USING SINGULARITY EXPANSION METHOD ............431
Rensheng Xie ; Jie Cao ; Rongwei Wang ; Xi Wang ; Zhi Xu ; Shouzheng Zhu

A NOVEL LOW PROFILE UWB MONOPOLE ANTENNA ..................................................................................................................435
Dingyi Luo ; Xiaolin Zhou ; Jianying Li ; Xiaobo Xuan

RESONANT FREQUENCY LOWERING OF SQUARE PATCH ANTENNA USING ANISOTROPIC ARTIFICIAL DIELECTRIC MATERIAL .................................................................440
Achmad Munir

IMPLEMENTATION OF A MULTI-WAVEBAND, HIGH-PRECISION, WIDEBAND WAVEFORM GENERATOR BASED ON DDWS FOR ANTENNA CHANNEL CHARACTERISTICS TEST .................................................................444
Yongqiao Zhao ; Jiong Yang ; Yue Zhang ; Qiangqiang Lin ; Zengqing Chen

A NOVEL MINIORIZED MICROSTRIP ANTENNA USING INTERDIGITAL CAPACITOR BASED ON DEFECTED GROUND STRUCTURE .............................................450
Rongwei Wang ; Jiazhao Wang ; Rensheng Xie ; Xi Wang ; Zhi Xu ; Shouzheng Zhu

A STUDY OF DIELECTRIC RESONANT ANTENNA ARRAY APPLIED TO 5G COMMUNICATION SYSTEM ..................................................454
Rensheng Xie ; Jie Cao ; Rongwei Wang ; Xi Wang ; Zhi Xu ; Shouzheng Zhu

LOW COST PHASE CALIBRATION IN MILLIMETER WAVE IMAGING SYSTEM .................................................................................458
Y. Meng ; C. Zhang ; J. F. Zhang ; C. Lin ; D. Cao ; A. Qing

WLAN BAND-NOTCHED PLANAR UWB ANTENNA LOADED BY CSRR ............................................................................................459
Hangying Yuan ; Shaobo Qu ; Jieqiu Zhang ; Jiafu Wang ; Yongfeng Li ; Yajuan Han ; Zhaotang Liu ; Hang Zhou

THE CALCULATION AND CALIBRATION OF ELEMENT MUTUAL COUPLING IN ADAPTIVE ANTI-INTERFERENCE ANTENNA ARRAY ................................462
Ying Zhao ; Jihun Liu ; Qihui Zhou

AN IMPROVED METHOD OF DIAGNOSIS OF FAILED ELEMENTS IN ARRAYS BASED ON FAR-FIELD RADIATION PATTERN ...........................................467
Jing Miao ; Bo Chen ; Xiaolin Zhang ; Yang Chen
DUAL-BAND (2.4/5 GHz) ANTENNA DESIGN FOR DIGITAL SIGNAGE ................................................................. 472
Ho-Jun Lee ; Je So Yeon

DESIGNING OF SMART ANTENNA FOR IMPROVED DIRECTIVITY AND GAIN AT TERAHERTZ
FREQUENCY RANGE .................................................................................................................................................. 473
Ayodele S. Olowol ; Viranjay M. Srivastava

ANALYSIS OF SMART ANTENNA WITH IMPROVED SIGNAL QUALITY AND SPATIAL PROCESSING .......... 474
Ayodele S. Olowol ; Viranjay M. Srivastava

PERFORMANCE ANALYSIS OF SMART ANTENNA BANDWIDTH AT TERAHERTZ FREQUENCY
RANGE ......................................................................................................................................................................... 475
Ayodele S. Olowol ; Viranjay M. Srivastava

DESIGN OF A V-BAND LOW SIDELOBE AND WIDEBAND LINEAR DRA ARRAY ........................................ 477
Wenhui Shen ; Jiuhong Lin ; Kang Yang

A NOVEL MINIORIZED AND WIDEBAND MICROSTRIP ANTENNA BASED ON METAMATERIALS .......... 481
Yahao Liu ; Yong Zhi Cheng ; Yan Nie ; Xian Wang ; Rongzhou Gong

A NOVEL DUAL-BAND ANTENNA FOR WLAN APPLICATION ............................................................................... 484
Hui Liu ; Luokai Zhang ; Jiwu Pan ; Cheng Liu ; Zhoufei Lin

DESIGN OF SLEEVE BROADBAND ANTENNA FOR MOBILE TERMINALS ....................................................... 487
Zhoufei Lin ; Hui Liu ; Cheng Liu

DESIGN OF MULTI-BAND ANTENNA FOR 4G MOBILE TERMINALS ................................................................. 491
Youhuang Guo ; Hui Liu ; Xin Dai ; Zhoufei Lin

LOCALISATION SYSTEM FOR NETWORK PLANNING IN 2-TIER HETEROGENEOUS NETWORKS .................. 494
Dorothy O. Abonyi ; Jonathan M. Ridgesford

ELECTRON DENSITY MEASUREMENT IN SPACE PLASMA, COMPARISON BETWEEN TWO
TECHNIQUES: SOUNDER BY RELAXATION AND MUTUAL IMPEDANCE PROBE ................................................ 495
J. L. Rauch ; P. Henri ; J. P. Lebreton ; X. Vallières ; O. Le Duff ; F. Colin ; D. Lagoutte

THE FORMATION OF HIGH-RESOLUTION FMCW SAR VIDEO .............................................................................. 496
Chengfei Gu ; Wenge Chang ; Xiangyang Li ; Xinqun Luan

SIMULATION OF THE INFRARED SIGNATURE OF EXO-ATMOSPHERE MICRO-MOTION OBJECT .................. 500
Y. B. Wu ; H. Z. Lu ; F. Zhao ; Z. Y. Zhang

A SIGNAL MODEL FOR THE IR SIGNATURE OF EXO-ATMOSPHERE MICRO-MOTION TARGETS ................. 505
Y. B. Wu ; H. Z. Lu ; F. Zhao ; Z. Y. Zhang

T/V CALIBRATION FOR MICROWAVE HUMIDITY AND TEMPERATURE SOUNDER ONBOARD ................. 510
Jiying He ; Zhenghan Wang ; Shengwei Zhang

A DEBLURRING METHOD FOR DYNAMIC TARGET OBSERVATION OF THE GEOSTATIONARY
INTERFEROMETRIC MICROWAVE SOUNDER (GIMS) .......................................................................................... 515
Ying Zhang ; Hao Liu ; Jh Wu ; Cheng Zhang ; Jiying He

HUMAN TRACKING USING RANGE AND VELOCITY MEASUREMENTS BY MULTISTATIC RADAR ............... 520
J. Zhang ; T. Jin ; Y. He ; L. Qiu ; Z. Zhou

APPLICATION AND FPGA IMPLEMENTATION OF WIDEBAND REAL-TIME SPECTRUM ANALYSIS IN
SPACEBORNE ELECTRONIC RECONNAISSANCE ................................................................................................. 526
Tao Li ; Minghui Li ; Xiaolei Fan ; Zengqing Chen ; Yurong Wan

DESIGN OF WIDEBAND RADAR SIGNAL RECONNAISSANCE REAL-TIME PROCESSING SYSTEM
BASED ON MULTI-DSP ........................................................................................................................................... 532
Xiaolei Fan ; Yabai Wu ; Tao Li ; Zengping Chen

A WAY OF CABLE FORCE MEASUREMENT BASED ON INTERFERENCE RADAR ........................................... 537
Heng Dong ; Jian Wang ; Qian Song

THE CORRECTION OF BROADBAND CHANNELS BASED ON ADAPTIVE FILTER ........................................ 542
Bo Sheng ; Qiong-Long Bao ; Zeng-Ping Chen

A NOVEL DETECTION METHOD BASED ON FRFT FOR PASSIVE RADAR ......................................................... 548
Qionglong Bao ; Yuting Quo ; Zengping Chen

IMPLEMENTATION OF LARGE POINTS PULSE COMPRESSION USING MULTICORE DSP .............................. 554
Shulei Nie ; Qionglong Bao ; Zengping Chen

A DETECTION ALGORITHM FOR RADAR WEAK TARGETS UNDER THE INTERFERENCE OF STRONG
TARGETS .................................................................................................................................................................... 560
Rui-Qi Tian ; Zhong-Ping Fan ; Cai-Yong Lin ; Qing-Long Bao ; Zeng-Ping Chen

GIANT MAGNETORESISTANCE (GMR) SENSORS BASED ON CO/CU MULTILAYERS FOR
BIOMATERIAL DETECTION APPLICATIONS ................................................................................................................... 566
Edi Subarayoda ; Indra Parule ; Feruani A. Haubuam

RHYTHMIC SPONTANEOUS UP IN SEEDLINGS — OVERVIEW ................................................................................. 573
Cristiano M. Gallep

ASYMMETRIC ELECTROMAGNETIC ANALYSIS AND DESIGN OF A PERMAGNET BIASED AXIAL
MAGNETIC BEARINGS ............................................................................................................................................ 574
Xiaoqian Ren ; Yun Le ; Bangchong Han

EVALUATION OF ALGEBRAIC RECONSTRUCTION TECHNIQUE ALGORITHM FOR MICROWAVE
IMAGING ..................................................................................................................................................................... 587
Dhani Elevant ; Rifqi Ramadhun ; Diti Tessa Purastika ; Basari

TOWARDS A BIOPHYSICAL APPROACH TO DIFFERENT LEVELS OF LOW BACK PAIN .................................. 592
Alberto Folletti ; Paolo Baron
SEVEN-CORE FIBER SPR SENSOR ..........................................................596
Yuping Han ; Zhenxing Liu ; Shengyong Feng ; Yuan Zhang

SHARED RISK LINK GROUPS (SRLG)-AWARE VIRTUAL NETWORK MAPPING IN SPACE DIVISION MULTIPLEXING (SDM) OPTICAL NETWORKS WITH MULTI-MODE FIBERS ..............................................................................................................................597
Chenbei Yu ; Yinxu Song ; Xiasong Yu ; Yongli Zhao ; Jie Zhang

ON THE PERFORMANCE COMPARISONS OF SEVERAL SPARSE RECONSTRUCTION ALGORITHMS ..........................................................598
Dou Sun ; Shiqi Xing ; Yongshen Li ; Dahuai Dai ; Bo Pang

AN ON-SITE FAST TEST SYSTEM BASED ON A NOVEL MINIATURIZED GTEM CELL ..............................................................603
Guangchao Shi ; Yi Liao ; Xiaojun Ying ; Yuan Zhang

WIDERBAND LOW NOISE AMPLIFIER USING A NOVEL EQUALIZATION .................................................................609
Juncal Lv ; Yongjiang Bao ; Jiurong Huang

0.13-μM CMOS LOAD MODULATOR FOR MIMO SYSTEM .................................................615
Jin-Sug Kim ; Seok-Chul Lee

TWO-STAGE CASCADED COAXIAL LEMP AND NEMP PROTECTION MODULES WITH HIGH POWER HANDLING CAPABILITY AND FAST RESPONSE FOR HF/VHF APPLICATIONS ..............................................................616

SIMULATION METHOD OF CHARGE COLLECTION MECHANISM IN CVD DIAMOND DETECTOR ..........................................................621
Yong Li ; Jinguo Wang ; Haiyan Xie ; Linyue Liu ; Jianfu Zhang ; Chun Xuan

ANALYTICAL STUDY OF TRANSMISSION CHARACTERISTICS OF MSL BONDED NSS BY DIELECTRIC ADHESIVE WITH DIFFERENT THICKNESS ..............................................................................................................627
Y. Tomizuka ; G. Ichihara ; Y. Uchida ; K. Ejiri ; H. Sato ; T. Ohno ; K. Tantii ; M. Uehara

EXPERIMENTAL STUDY ON RELATIVE POSITION BETWEEN NSS PLACED ON METAL FILM AND TRANSMISSION LINE ..........................................................................................................................628
Y. Tomizuka ; A. Hashi ; Y. Tomizuka ; K. Ejiri ; T. Ohno ; K. Tantii ; M. Uehara

EFFECT OF ELECTROMAGNETIC INTERFERENCE (EMI) ON THE PERFORMANCE OF ELECTRON Y-BRANCH SWITCH (YBS) BASED INVERTING AMPFICER ..............................................................................................................629
Muhammad Taher Abuemla’atti

EFFECT OF ELECTROMAGNETIC INTERFERENCE (EMI) ON THE PERFORMANCE OF CLASS-AB CMOS TRANSCONDUCTANCE STAGE .....................................................................................................................635
Muhammad Taher Abuemla’atti ; Ali M. T. Abuemla’atti

EFFECT OF ELECTROMAGNETIC INTERFERENCE (EMI) ON THE PERFORMANCE OF NMOSFET CURRENT MIRROR ..........................................................................................................................640
Muhammad Taher Abuemla’atti ; Ali M. T. Abuemla’atti

ALTERNATIVE HARDWARE AND SOFTWARE DEVELOPMENT FOR PHOTON PULSE COUNTING ..............................................................646
Kevin Nogueira Moreira ; Pedro Henrique Silva E Oliveira ; Cristiano De Mello Gallep

ELECTROMAGNETIC INTERFERENCE SHIELDING EFFECTIVENESS AND MICROWAVE ABSORPTION OF FERRITE-POLYMER COMPOSITE USING Ni₃₋₅Cu₄₋₅Zn₅₋₇Fe₃₋₅O₇ FERRITE ..........................................................................................................................647
Wangchun Li ; Cheng Li ; Liang Quan ; Jianping Zhen ; Yao Ying ; Liang Yu ; Liqiang Jiang ; Shenglei Che

A DIGITAL COMPENSATION METHOD FOR PIEZORESISTIVE PRESSURE SENSOR ..........................................................................................654
J. X. Wan ; L. Y. Tang ; W. J. Chen ; M. S. Tong

ASYMMETRIC TRANSMISSION OF LINEARLY POLARIZED WAVE IN ALL-DIELECTRIC CHIRAL METAMATERIAL ..........................................................................................................................658
Hui Ma ; Rui-Xin Wu

PROBING SURFACE EVANESCENT WAVES WITH AN ULTRA-HIGH SENSITIVE TERAHERTZ NEAR-FIELD MICROSCOPE ..........................................................................................................................662
Qian Wang ; Le Yang ; Zhenghou An ; Pengqing Chen ; Bo Zhang ; Siyuan Komiyama ; Zhiqiang Zhu ; Wei Lu

EFFECTS OF HYDROGEN BONDS AND VOLATILIZATION ON ABSORPTION PROPERTIES FOR A MICROWAVE ABSORBING COATING ...........................................................................................................663
Zhenjiang Song ; Jingshi Shen ; Hongyan Xu ; Xiujun Huang ; Dele Shi ; Mingrui Xin ; Xiaolong Weng ; Jianliang Xie

DYADIC GREEN’S FUNCTION OF THE MAGNETIC VECTOR POTENTIAL FOR UNBOUNDED UNIAXIAL ANISOTROPIC MEDIA .....................................................................................................................668
Jiajun Shi ; Xiaohao Guo ; Lu Ye ; Q. H. Liu

THREE-DIMENSIONAL RECONSTRUCTING OF OBJECTS BURIED IN SPHERICALLY MULTILAYED MEDIUM USING BORN ITERATIVE METHODS .........................................................................................................669
Y. Chen ; F. Han ; N. Liu ; Y. Liu ; Q. H. Liu

INVERSE SCATTERING FROM INHOMOGENESE DISTURBED REGION IN PLANARLY LAYERED DISPERSIVE PLASMA MEDIUM ..........................................................................................................................670
P. Wen ; F. Han ; N. Liu ; H. Liu ; Q. H. Liu

3D IMAGING SYSTEM BASED ON A MIMO APPROACH AT 360GHZ FOR SECURITY SCREENING ..........................................................................................................................671
S. Novokh ; R. Hershel ; R. Zimmermann ; A. Shykhterbrad ; S. A. Lang ; N. Pohl

SPECIAL DARK CHAMBER FOR SPECTRUM ANALYSIS OF ULTRAWAVE LIGHT EMISSION BY IORGANISMS ..........................................................................................................................676
J. F. Viana ; C. M. Gallep

A STUDY ON UNIFORM HEATING OF FOOD IN MICROWAVE OVEN BY USING PHASE DIFFERENCE OF POWER OUTPUT FROM TWO PORTS ..............................................................................................................677
Y. Tomizuka ; Y. Uchida ; T. Ohno ; K. Tantii ; M. Uehara

VERIFICATION OF FDTD CODE USING THE METHOD OF EXACT SOLUTIONS ..........................................................................................................................679
Yong Li ; Haiyan Xie ; Yonghui Guo ; Chun Xuan
EFFICIENT ANALYSIS OF EM SCATTERING FROM OBJECTS WITHIN A HALF SPACE USING HIGHER ORDER BASIS FUNCTIONS ACCELERATED BY ACA .................................................................686
Yu Wang ; Zaiping Nie ; Xin Qi

EFFICIENT NUMERICAL MODELING OF MONOSTATION RCS FOR ELECTRICALLY EXTREME LARGE PEC TARGETS .............................................................691
Yu Wang ; Zaiping Nie ; Xin Qi

INTERPOLATION AND EXTRAPOLATION TECHNIQUES BASED NEURAL NETWORK IN ESTIMATING THE MISSING IONOSPHERIC TEC DATA ........................................695
V. Jayapal ; A. F. M. Zain

CONTINUOUS DUAL-BAND RECONFIGURABLE FSS BASED ON PIN DIODE SWITCHES ...............................................................................................................................700
Zhan Bo Lu ; Jian Jian She ; Xuequan Yan

ELECTRICALLY SWITCHABLE METAMATERIALS ..............................................................................................................................704
Hou-Tong Chen

THEORETICAL AND EXPERIMENTAL DETERMINATION OF SURFACE SUSCEPTIBILITY OF SWITCHABLE TERAHERTZ METASURFACES ........................................706
N. Karl ; M. S. Heinbecker ; H. O. Eweritt ; H. -T. Chen ; A. J. Taylor ; A. Benz ; J. L. Reno ; I. Brener ; R. Mendis ; D. M. Mittelman

ANALYSIS OF KU-BAND STEERABLE METAMATERIALS REFLECTARRAY WITH TUNABLE VARACTOR DIODES ........................................................................................................709
Jing Nie ; Yan-Qing Yan ; Chun-Lin Ji ; Ruo-Peng Liu

TUNABLE METAMATERIALS CONTAINING HYBRID CO- AND FE-BASED FERROMAGNETIC MICROWIRES ..................................................................................715
Vu. Pham ; A. S. ZComputions ; M. S. Carstensen ; C. Vannahme ; E. Hojlund-Nielsen ; N. A. Mortensen ; A. Kristensen

SPLIT RING RESONATOR BASED THz EMITTER AND PHOTO-IMPRINTED THz DIFFRACTION GRATINGS ........................................................................................................719
Lei Shao ; Robin Ogier ; Mikael Svedendahl ; Mikael Käll

DYNAMICALLY SWITCHABLE METASURFACES BASED ON GRAPHENE AND ORIGAMI ..................................................................................................................720
Yongmin Liu ; Zuoju Wang ; Liqiao Jing ; Hongsheng Chen

BOUNDARY STRESS INDUCED BY ELECTROMAGNETIC WAVE .................................................................................................................................723
Chen Wang ; C. T. Chan

CONTROLLED MOTION OF JANUS PARTICLES IN POINT, CIRCULAR AND LINEAR OPTICAL TRAPS .....................................................................................................................724
Jing Liu ; Hongkuan Guo ; Zhi-Yuan Li

EFFECTS OF NONLINEAR POLARIZATION IN OPTICAL TRAPPING .................................................................................................................................726
H. Okamoto ; Y. Jiang ; T. Narushima

NEAR INFRARED PLASMONIC OPTICAL TRAPPING BASED ON HYBRID METAL NANOROD ........................................................................................................727
Zhiyan Li ; Zhiyan Wang ; Penglei Cao ; Yongji Guan ; Lin Cheng ; Linshan Chen

A RELATIVISTIC TREATMENT OF THE KINETIC AND CANONICAL ELECTROMAGNETIC SYSTEMS ..................................................................................................733
C. J. Sheppard ; B. A. Kemp

OPTICAL TRAPPING WITH PLASMONIC AND PHOTONIC NANOSTRUCTURES .........................................................................................................................734
Kenneth B. Crozier

BROWNIAN DYNAMICS OF OPTICALLY TRAPPED SEMICONDUCTOR NANOWIRES ..................................................................................................................736
P. J. Reece

PLASMONIC NANORING DEVICES FOR MICRO- AND NANOPIECE TRAPPING AND DETECTION USING LOW INCIDENT LASER POWERS ........................................................................737
Viet Giang Truong ; Xue Han ; Marijn Sengers ; Sile Nic Chormaic

MANIPULATING PLASMONIC NANOPARTICLES WITH TAILORED OPTICAL FOCAL FIELD ..............................................................................................................738
Guanghao Rui ; Bing Gu ; Qibwen Zhan ; Yiping Cui

MULTIPLE PARTICLE TRAPPING AND SELF-ORGANIZATION IN THE EVANESCENT FIELDS OF OPTICAL MICRO- AND NANOFIBRES ................................................................................740
Viet Giang Truong ; Ali Mainma ; Mark Daly ; Sile Nic Chormaic

FABRICATION OF CONTINUOUS GRADIENT PLASMONIC NANOSTRUCTURES .....................................................................................................................743
Lei Shao ; Robin Ogier ; Mikael Svedendahl ; Mikael Käll

DESIGN AND FABRICATION OF RESONANT NANOSCALE COLOR PIXELS .................................................................................................................................746
Joel K. W. Yang

PLASMONIC NANOANTENNAS WITH SUB-NANOMETER GAPS: FABRICATION AND OBSERVATION OF QUANTUM MECHANICAL EFFECTS ........................................................................747
Kenneth B. Crozier

MAGNETOPLASMONICS IN SPLIT RING-RING STRUCTURES FABRICATED WITH HOLE-MASK COLLOIDAL LITHOGRAPHY ................................................................................................751
Hua Yu Feng ; Feng Luo ; Raul Arenal ; Fernando Garcia ; Gaspar Armelles ; Alfonso Cebollada

PLASMONIC LASER PRINTING FOR FUNCTIONAL METASURFACES .................................................................................................................................752
X. Zhu ; M. S. Carstensen ; C. Vannahme ; E. Hojlund-Nielsen ; N. A. Mortensen ; A. Kristensen

OPTICAL CHARACTERIZATION AND EMISSION PROPERTIES OF PERIODIC ARRAYS OF TITANIUM NITRIDE NANOPARTICLES ........................................................................755
Byosuke Kanakura ; Shunsuke Murata ; Koji Fujita ; Katuhiro Tanaka

FABRICATION OF THREE-DIMENSIONAL PLASMONIC STRUCTURE AND MULTILAYER METAMATERIALS BY FEMTOSECOND LASER-INDUCED FORWARD TRANSFER ........................................................................758
Cheng Hung Chu ; Ming Lun Tseng ; Hui Jun Wu ; Pin Chieh Wu ; Wei-Yi Tsai ; Mu-Ka Chen ; Hung-J Lin ; Hsiang-Chu Wang ; Ching-Fu Chen ; Jia-Wern Chen ; Ting-Yu Chen ; Yi-Hao Chen ; Pei Ru Wu ; Din Ping Tsai
DESIGNER MATERIALS FOR MOLECULAR AND SUPRAMOLECULAR OPTOELECTRONICS ...................................................... 761
See Young Park

EXPLOITING PLASMONIC COUPLING FOR HIGH PERFORMANCE PHOTODETECTORS, PHOTOVOLTAICS AND SENSORS .................................................................................................................. 763
Dong Ha Kim

PLASMONIC COLOR FILTER OF CORRUGATED METALLIC THIN FILM ........................................................................ 764
Atsushi Ono ; Atsutaka Miyamichi

LOCAL SURFACE POTENTIAL CHARACTERIZATION OF NANOSTRUCTURES: UNDERSTANDING INTERPLAY AMONG CHARGES, PHOTONS, AND SURFACE PLASMONS ............................................ 765
Dong-Wook Kim

WAVEGUIDE LASERS BASED ON PLATFORMS OF OPTICAL DIELECTRIC CRYSTALS ................................................................. 766
Yang Tan ; Feng Chen

HIGH PERFORMANCE ORGANIC ELECTRO-OPTIC MATERIALS ENABLING EFFICIENT OPTICAL MODULATION FOR ADVANCED PHOTONIC DEVICES .............................................................................. 767
Jongdong Luo ; Alex K.-Y. Jen

SINGLE-ELEMENT NANOSCALE VISIBLE FILTERS .................................................................................................................. 768
Jerome K. Hynes

REALIZATION OF LARGE REFLECTIVE SURFACE OF SILICA-WAVEGUIDE TURNING CORNER WITH STRATEGIC DEEP-TRENCHING ...................................................................................................... 769
De Gui Sun ; Jia Yi ; Jun Wang ; Peng Liu ; Trevor J. Hall

MAGNETO-OPTICAL LIGHT MODULATOR WITH LOCAL DOMAIN WALL MANIPULATION .................................................. 773
N. E. Khokhlov ; A. E. Khramova ; E. P. Nikolaeva ; T. B. Kasykh ; A. V. Nikolaev ; A. P. Pyatakov ; V. I. Belotelov

PHOTOTHERMAL EFFECT OF CONDUCTING POLYMER FILMS FOR HARVESTING OF ELECTRICAL ENERGY FROM SUPERFLUOUS HEAT ............................................................................. 774
Eunyoung Kim

SUPER-RESOLUTION OPTICAL FAR-FIELD MICROSCOPE WITH ARRAYS OF NEAR-FIELD PROBES ............................ 775
Xiang-Dong Chen ; Fang-Wen Sun

ON-CHIP OPTICAL PULSE SHAPING USING CASCADED CO-DIRECTIONAL COUPLERS ...................................................... 778
Hamed Pishvai Bazargani ; José Azábal

HYBRID III–V-ON-SI MOS MICROWAVE RESONATOR ........................................................................................................... 780
Gero Kaeckel ; Li Liang ; N. Qin Huang ; Marco Ferriente ; Raymond Beausoleil

SILICON NITRIDE WAVEGUIDE INTEGRATION PLATFORM FOR MEDICAL DIAGNOSTIC APPLICATIONS ............................. 781
Rainer Hainberger ; Paul Muelner ; Eva Melnik ; Giorgio Mutinati ; Moritz Eggeling ; Alejandro Maese-Novo ; Florian Vogelbacher ; Jochen Kraft ; Guenter Kopittsch ; Gerald Meinhardt ; Franz Schrank

RECENT PROGRESS ON HIGH-Q PHOTONIC CRYSTAL NANOCAVITIES: PHOTOLITHOGRAPHY AND RECONFIGURABLE SYSTEM .............................................................................................................. 782
Takahashi Tanabe ; Tomohiro Tetsutomo ; Yuta Ooka ; Nural Ashikin Binti Daud

ENABLING EFFICIENT TOLERANCE ANALYSIS IN SILICON PHOTONIC INTEGRATED CIRCUITS .............................................. 783
Mahdi Nikdast ; Gabriela Nicosencu ; Jelena Trajkovic ; Odile Libiron-Ladouceur

PRINCIPLES AND DESIGN OF A PLANAR WAVEGUIDE FOURIER TRANSFORM SPECTROMETER FOR REMOTE-SENSING APPLICATIONS ............................................................................. 784
K. Podmore ; P. Cheben ; A. Scott ; R. Lee

BRAGG GRATINGS IN ULTRA-THIN SILICON WAVEGUIDES AND HYBRID PLASMONIC WAVEGUIDES .................................................. 785
Lingjie Zhou ; Zhi Zou ; Sheng Liu ; Jiafeng Chen

FIGURES OF MERIT FOR PASSIVE AND ACTIVE PLASMONIC CIRCUITS ............................................................................... 786
A. V. Krasavin ; A. V. Zayats

INTEGRATED POLARIZATION CONTROLLERS .......................................................................................................................... 787
C. Alonso-Ramos ; J. D. Sarmiento-Merenguel ; R. Halir ; X. Le Roux ; L. Vivien ; P. Cheben ; E. Durán-Valdecéspedes ; I. Molina-Fernández ; D. Marić-Morini ; D. -X. Xu ; J. H. Schmid ; S. Jane ; A. Ortega-Moñux

SUBWAVELENGTH ENGINEERING IN SILICON PHOTONICS .................................................................................................... 788
J. H. Schmid ; P. Cheben ; D. -X. Xu ; S. Jane ; J. Lapointe ; M. Bahin ; S. Wang ; M. Vachon ; R. Halir ; A. Ortega-Moñux ; G. Wangiernert-Pérez ; I. Molina-Fernández ; J. Pond ; D. Benedikovic ; M. Dado ; W. N. Ye ; M. Pápe ; V. Vašinek

MID-IR SILICON PHOTONICS ..................................................................................................................................................... 789

HIGHLY-SENSITIVE OPTICAL BIOSENSORS BASED ON SILICON-ON-INSULATOR NANOWIRE WAVEGUIDE ................................................................. 1615
Jian-Jun He

OPTICAL NANOWAVEGUIDES BASED ON ZINC OXIDE PLASMONIC MATERIALS ....................................................................................... 1616
A. M. Lerer ; P. E. Timoshenko ; V. F. Zemyakov ; E. M. Kaidashev ; A. S. Puzanov

ADVANCED OPTICAL CHARACTERIZATION OF NANOSTRUCTURES AND NANOMATERIALS IN THE X-RAY RANGE ......................................................... 1621
Eva Majkova ; Peter Siffalovic ; Karol Vegso ; Matej Jergel ; Stefan Ludy

LOW PUMP POWER SPONTANEOUS FOUR-WAVE MIXING SOURCE USING TRIPELE PHOTONIC CRYSTAL MICROCAVITIES IN SILICON ............................................................................. 1623
Ellen Schlewe ; Jeff F. Young

CARBON NANOTUBES INTEGRATION ON SILICON ........................................ 1625
E. Duran-Yaligolestias ; W. Zhang ; H. C. Huang ; C. Alonso-Ramos ; S. Serna ; X. Le Roux ; E. Cassan ; L. Vivien ; F. Sarri ; U. Torrisi ; M. Gurioli ; M. Ballestrieri ; A. Kettu ; A. Filoramo ; H. Yang ; V. Bezugly ; G. Cumberi

HETERO-CORE FIBER OPTIC SURFACE PLASMON RESONANCE SENSOR BASED ON AU/TA2O5/PD MULTI-LAYER FILMS FOR HYDROGEN SENSING ................................................................. 1628
A. Houshi ; Michiko Nishiyama ; Hirotaka Igarashi ; Kazuhiro Watanabe

RAMAN SCATTERING IN HYDROGENATED AMORPHOUS SILICON WAVEGUIDES AT TELECOMMUNICATION WAVELENGTHS .................................................................................... 1629
Ken Itaniwata ; Satoshi Suda ; Yoichi Sakakibara ; Toshihiro Kamei ; Ryoouhe Takei ; Hitoshi Kwashima ; Shu Namiki ; Masakazu Morii ; Hiroshi Ishikawa

1200°C HIGH-TEMPERATURE DISTRIBUTED OPTICAL FIBER SENSING BY USING BRILLOUIN OPTICAL TIME DOMAIN ANALYSIS ...................................................................................... 1630
Penghai Xu ; Yongkang Dong ; Dengwang Zhou ; Cheng Fu ; Juwang Zhang ; Hongying Zhang ; Zhiwei Li ; Liang Chen ; Xiaoyi Bao ; Lei Teng

CHARACTERIZATION OF BRILLIUSN SCATTERING IN POLARIS OPTICAL FIBERS FOR SENSING APPLICATIONS ......................................................................................... 1631
Jian-Dai ; Xingyuan Xu ; Kan Xu

ALL-OPTICAL PULSE COMPRESSION BASED ON STIMULATED BRILLIUSN SCATTERING IN OPTICAL FIBERS ........................................................................ 1632
Xin Long ; Weiwen Zou ; Jiaqing Chen

DISTRIBUTED SENSORS BASED ON BRILLIUSN DYNAMIC GRATING IN SPECIALTY FIBERS ..................................................................................... 1633
Kwang Yong Song ; Yong Hyan Kim

MULTI-FREQUENCY OPTOELECTRONIC OSCILLATORS: REALIZATION AND APPLICATIONS ................................................................................ 1634
Fangcheng Zhang ; Pei Zhou ; Zhongdong Guo ; Shilong Fan

WIDE-RANGE FREQUENCY DRIFT COMPENSATION FOR TUNABLE OPTOELECTRONIC OSCILLATOR ........................................................................ 1635
Jian Dai ; Xingyuan Xu ; Kun Xu

MICROWAVE PHOTONICS FOR MULTI-TARGET DETECTION ............................................................................................................................. 1636
Ming Li ; Ruai Nuan Shi

A NEW ALGORITHM FOR RADAR IMAGING OF THE TARGETS BURIED IN LAYERED MEDIA ......................................................................................... 1640
Zhijie Xie ; Yan Lir ; Hui Yao

HALF-SPACE GREENS FUNCTION AND RAY TRACING METHOD FOR EM SCATTERING FROM THE LARGE OBJECT ON A GROUND ............................................................................. 1646
Wei Yang ; Chao-Fu Wang

STATISTICAL DISTRIBUTIONS OF STOKES PARAMETERS FROM RANDOM DOUBLE-LAYERED SASTRUGI SURFACES .............................................................................................................. 1647
Peng Xu ; Kun-Shan Chen ; Rui Jiang

AN APPROXIMATE METHOD TO CALCULATE THE REFLECTION COEFFICIENT OF A RECTANGULAR OPEN-ENDED WAVEGUIDE .................................................................................. 1648
Luotong Li ; Pu Tang ; Bo Chen ; Pingyong Wang ; Shenghang He

ELECTROMAGNETIC MODELING FOR FINTE FSS WITH LAYERED DIELECTRIC SUBSTRATE USING SED METHOD ......................................................................................... 1653
Yanqin Hu ; Quanquan Wang ; Jian Zhu

MATRIX FRIENDLY FORMULATION FOR LAYERED DOUBLY PERIODIC STRUCTURE AND ITS COMPUTATION ................................................................................................. 1654
Kun Chen ; Zhiwei Liu ; Jiming Song

STUDY ON CALCULATION AND VERIFICATION OF RADIOWAVE PROPAGATION USING PARABOLIC EQUATION FOR THE ANTENNA NEAR THE GROUND .................................................................. 1655
Chengyong Yin ; Jie Zho ; Qiaofei Wei

EFFECTIVE MEDIUM MODEL FOR MULTILAYERED ANISOTROPIC MEDIA WITH DIFFERENT ORIENTATIONS ......................................................................................................................... 1661
Yang Bao ; Jiming Song

A MULTILAYER EFFECTIVE MEDIUM MODEL FOR PLASMONIC PERFECT ABSORBER ................................................................................................. 1662
Khagendra Bhattarai ; Simbaro Silva ; Jiseon Jeon ; Jun Oh Kim ; Kun Song ; Sang Jun Lee ; Zhiyuan Ku ; Jiangfeng Zhou

A UNIQUE WIDE BAND RECEIVER, WARM ELECTRONICS, FOR THE FAST TELESCOPE .................................................................................... 1666
Stephen Smith ; Sander Weizhang

DEVELOPMENT OF THE L-BAND PHASED ARRAY FEED FOR THE FIVE-HUNDRED-METER APERTURE SPHERICAL RADIO TELESCOPE ....................................................................................... 1667
Y. Wu ; C. Jin ; J. Fan ; X. Zhao ; L. Yu ; B. Du
STRONG SECOND-HARMONIC GENERATION FROM BILAYER-GRAPHENE EMBEDDED IN ONE-DIMENSIONAL PHOTONIC CRYSTALS .......................................................... 1830
Shichao Zhang ; Xiangdong Zhang

SINGLE AND BILAYER FILMS OF SILVER AND GOLD FOR ACTIVE PLASMONICS: STRUCTURAL PROPERTIES, DIELECTRIC PERMITTIVITIES AND RADIATION RESISTANCE ............................. 1831
G. M. Yankovskii ; A. V. Komarov ; P. N. Tanaanov ; I. V. Bykov ; A. V. Baryshev ; K. N. Afamazeyev ; I. A. Boginskaya ; I. V. Trefilov ; I. A. Rodionov ; I. A. Ryzhkov

LOCALIZED SURFACE PLASMON RESONANCE ARISING FROM THE DIFFUSIVE ELECTRONS IN A SEMICONDUCTOR CORE-SHELL STRUCTURE ................................................. 1837
Yu Gu ; Haibo Zeng

ANALYSIS OF SHIELDING EFFECTIVENESS IN DIFFERENT KINDS OF ELECTROMAGNETIC SHIELDING FABRIC IN THE WIDE FREQUENCY OF 1GHz ~ 18GHz ......................................................... 1838
Yaping Li ; Xiuchen Wang ; Zhen Pan ; Ying Su ; Zhe Liu

THZ LEAKY MODE PROPERTIES EXHIBITED IN A PLASMONIC WAVEGUIDE WITH PERIODIC SUBWAVELENGTH CORRUGATED METALLIC WIRE STRUCTURE ........................................... 1843
Jin Jet Wu ; Tsong-Jer Yang ; Chien-Jung Wu ; Her-Lih Chiueh ; In-Hung Chung ; Jain Qi Shen ; Chengchi Yuan ; Pin Jung

EXCITON EMISSION FROM PLASMONIC-ORGANIC-III-V-SEMICONDUCTOR NANOWIRES AND NANORODS .................................................................................................................. 1847
Hans Peter Wagner ; Masoud Kaveh ; Fatemehsattat Mohammadi ; Heidrun Schmitzer ; Qiang Gao ; Chennupati Jagadish ; Gerd Kunert ; Derfel Hammel ; Jiaozun Ge ; Gerold Duscher

TERAHERTZ MULTICHANNEL FILTERS BASED ON THE USE OF TRIADIC-CANTOR-SET SEMICONDUCTOR PHOTONIC CRYSTAL .............................................................................. 1849
Tsu-Chyang King ; Chi-Chung Liu ; Chien-Jung Wu

SCANNING ANTENNA CONSTRUCTED BY A PLASMONIC WAVEGUIDE WITH PERIODIC SUBWAVELENGTH METALLIC HOLLOW BLOCKS ......................................................... 1850
Her-Lih Chiueh ; Tsong-Jer Yang ; Jin Jet Wu ; Chien-Jang Wu ; Du Jun Hou ; Jain Qi Shen ; Yuli Lin ; Yuxiang Kao ; Wen Chen Lo

LARGE-AREA METASURFACES PRODUCED WITH NM PRECISION BY UV NANOIMPRINT LITHOGRAPHY ........................................................................................................... 1857
Masanobu Iwanaga

3D FABRICATION FOR OPTICAL METAMATERIALS AND METASURFACES .............................................................................................................................. 1863
Zi Jing Wang ; Xiang Zhang

MULTISHELL NANOWIRES FOR NEXT-GENERATION PHOTOVOLTAICS .............................................................................................................................. 1864
Hong-Gyu Park ; Sun-Kyung Kim ; Kyung-Deok Song ; Thomas J. Kempa ; Charles M. Lieber

SPECTRAL MODULATION OF MOLECULAR/INTERMOLECULAR VIBRATIONAL MODE BY INFRARED PLASMON .................................................................................. 1865
Kosei Ueno

SHORT-RANGE SURFACE PLASMONICS AND ITS (SUB)-FEMTOSECOND DYNAMICS .................................................................................................................. 1866
Harald Giessen

NOVEL APPLICATIONS OF PLASMONIC METAMATERIALS .............................................................................................................................. 1867
Jiahua Zhu ; Chongyi Fan ; Sudan Han ; Xiaotao Huang ; Haibo Zeng ; Shengqi Liu ; Wei Wang ; Guo-Yu Wang

MULTI-LOOK HRR-ATR BASED ON JOINT SPARSE REPRESENTATION .............................................................................................................................. 1876
Qinglin Zhai ; Jiemin Hu ; Wenxia Ding ; Shengui Liu ; Wei Wang

A ROBUST PREPROCESSING METHOD FOR NOISY BLIND SOURCE SEPARATION .................................................................................................................. 1887
Shan-Shan Lu ; Wei Wang ; Zhao-Yu Gu ; Guo-Yu Wang

DOUBLY-V-CHIRP WAVEFORM SCHEME FOR FALSE TARGETS SUPPRESSION IN NONLINEAR PROCESSING OF DELAY-DOPPLER MAPS ............................................................................ 1894
Tzu-Chyang King ; Chi-Chung Liu ; Chien-Jang Wu

A KIND OF METHOD OF ANTI-CORNER REFLECTOR INTERFERENCE FOR MILLIMETER WAVE HIGH RESOLUTION RADAR SYSTEM ............................................................................. 1900
Din Ping Tsai ; Hong-Gyu Park ; Sun-Kyung Kim ; Kyung-Deok Song ; Charles M. Lieber

EXPERIMENTAL STUDIES AND COMPUTER SIMULATIONS OF MAGNETOPLASTIC EFFECT .................................................................................................................. 1907
Y. I. Alshits ; E. V. Doroshinaya ; M. F. Koldaeva ; R. K. Kotowski ; E. A. Petrzhik ; P. K. Tronczyk

EQUIVALENT CIRCUIT METHOD ANALYSIS METAMATERIAL .................................................................................................................. 1908
Hans Peter Wagner ; Masoud Kaveh ; Fatemehsattat Mohammadi ; Heidrun Schmitzer ; Qiang Gao ; Chennupati Jagadish ; Gerd Kunert ; Derfel Hammel ; Jiaozun Ge ; Gerold Duscher

HIGH-PERFORMANCE BROADBAND CIRCULAR POLARIZER USING SELF-SIMILAR PATTERNS .................................................................................................................. 1909
Wenxia Ding ; Shengqi Liu ; Wei Wang ; Guo-Yu Wang

A COMPACT AND POLARIZATION-INSENSITIVE PERFECT METAMATERIAL ABSORBER FOR ELECTROMAGNETIC ENERGY HARVESTING APPLICATION ........................................................................ 1910
Yaping Li ; Xiuchen Wang ; Zhen Pan ; Ying Su ; Zhe Liu

MAGNETIC RESPONSE AT VISIBLE AND NEAR-INFRARED FREQUENCIES FROM BLACK PHOSPHORUS SHEET ARRAYS .................................................................................. 1915
Tiecheng Wang ; Xiangdong Zhang

A NOVEL BROADBAND ABSORBER WITH HONEYCOMB LATTICES BASED ON THE FLEXIBLE METAMATERIAL .................................................................................................................. 1916
Yue-Hong Hu ; Hai-Feng Zhang ; Ling-Ling Wang ; Wei Shi ; Chen-Yang Mao

A BROADBAND FLEXIBLE METAMATERIAL ABSORBER WITH A TRANSSPARENT WINDOW .................................................................................................................. 1919
Ling-Ling Wang ; Hai-Feng Zhang ; Xiang-Kun Kong ; Bo-Rui Bian

Chan ; Xinhua Hu ; Yuan Li ; Weiwei Liu ; Haitao Jiang ; Hong Chen ; Gang Yong Song ; Qing Cheng ; Bei Huang ; Tie Jun Cui ; Ji Long Liu ; Wei Bing Lu ; Jian Wang ; Xiao Bing Li ; Zhen Guo Liu ; Wu Yang ; Ya Fan ; Yang Shen ; Fei Yu ; Jiafu Wang ; Yongfeng Li ; Yongqiang Pang ; Qian Duan ; Sucheng Li ; Jianfeng Yang ; Weixin Li ; Bo Hou ; Xiaolan Liu ; Guizhen Lu ; Wei Jia ; Yi-Rong Ma ; Qing Zhao ; Mo-Lin Ge ; Young Jin Lee ; Kihawn Moon ; Soon-Hong Kwon

METHODS FOR THE MEASUREMENT AND ULTRA-LOW-FREQUENCY EVALUATION OF GEOMETRIC AND IONOSPHERIC CHANGES .................................................................3037
M. Hanzelka ; P. Fiala ; P. Dohnal ; M. Friedl ; J. Sliž

COMPARING THE RESPONSES OF A LAYERED MATERIAL TO EMG WAVES FROM A PULSE SOURCE .................................................................3041
R. Kadlec ; P. Fiala

EXTRACTION OF INDUCTANCE PARAMETER FOR NONUNIFORM TRANSMISSION LINE IN ANISOTROPIC DIELECTRIC .................................................................3046
Xiaoshan Liu ; Guochen Lu

MODELING OF CONTACT RESISTANCE USING FUZZY SYSTEM .................................................................................................................................3051
Jianyong Zhong ; Shengwu Tan ; Gang Wang ; Zhijun Wang

BASED ON AC AND DC COUPLING OF THE DC WALL BUSHING ELECTRIC FIELD ANALYSIS .................................................................3055
Shengwu Tan ; Yapei Liu ; Shengjun Lin ; Zhijun Wang ; Bo Zhang ; Gang Wang ; Hao Zhang ; Chuangy Ba ; Guan Wang

A NEW METHOD OF ELECTROMAGNETIC RADIANT SOURCES BASED ON SUPPORT VECTOR MACHINE .................................................................................................................................3060
Yang Sun ; Xinyuan Hu ; Shoudlin Yin ; Jie Liu

SIMULATION OF WU-YANG MONOPOLE IN SUPERFLUID .................................................................................................................................3064
Wei Jia ; Yi-Rong Ma ; Qing Zhao ; Mo-Lin Ge

A NOVEL BROADBAND EBG USING MULTI-VIA AND DOUBLE-LAYER STRUCTURE .................................................................................................................................3065
Xiaoshan Liu ; Guochen Lu

PARALLEL SHOOTING AND BOUNCING RAY METHOD WITH VIRTUAL DIVERGENCE FACTOR FOR FAST ANALYSIS OF SCATTERING FROM COMPLEX TARGETS .................................................................................................................................3070
P. C. Guo ; Z. C. Liang ; X. Y. He ; X. B. Wang

REAL TIME HIGH PRECISION HARDWARE CORRELATOR .................................................................................................................................................................3075
Zhijun Xu ; Jiantao Lai

A NOVEL THREE-DIMENSION FAST RADAR IMAGING METHOD BASED ON FAR-FIELD- APPROXIMATION .................................................................................................................................................................3080
Long Gang Wang ; Lianlin Li ; Tie Jun Cui

RESEARCH ON CHATTER SUPPRESSION BASED ON MRF IN TURNING .................................................................................................................................................................3081
Chunrui Tang ; Dandan Liu ; Quigen Xiao ; Jie Wang

A BROADBAND AND POLARIZATION-INSSENSITIVE METAMATERIAL ABSORBER .................................................................................................................................................................3084
Xin-Yan Ling ; Zhong-Yin Xiao ; Xiao-Xia Zheng ; Jing-Yao Tang ; Kai-Kai Xu

ULTRATHIN AND BROADBAND METAMATERIAL ABSORBER BASED ON NEW FOUR L STRUCTURE IN INFRARED AND VISIBLE REGION .................................................................................................................................................................3088
Jingyao Tang ; Zhongyin Xiao ; Kuikai Xu ; Xinyang Ling ; Xiaoxia Zheng

PRINTING COLOR USING RESONANT SCATTERING OF SI NANOPARTICLE ARRAY .................................................................................................................................................................3092
Seokhyeon Hong ; Young Jin Lee ; Soon-Hong Kwon

ENHANCEMENT OF WAVELENGTH CONVERSION IN SUBWAVELENGTH THICKNESS LAYER BASED ON METAMATERIAL MIRROR .................................................................................................................................................................3093
Young Jin Lee ; Kihawn Moon ; Soon-Hong Kwon

SPLITTER FEEDING NETWORK FOR ARRAY RADIATIONS OF SPOOF SURFACE PLASMON POLARITONS .................................................................................................................................................................3096
T. Kadlec ; P. Fiala ; P. Dohnal ; M. Friedl ; J. Sliž

MICROWAVE ANALOG OF OPTICAL THEOREM FOR TRANSFORMATION MEDIA APPLICATION .................................................................................................................................................................3097
Qian Duan ; Sucheng Li ; Jianfeng Yang ; Weixin Li ; Bo Hou

IN-PLANE FOCUS REFLECTOR ANTENNAS BASED ON PHASE GRADIENT METASURFACE .................................................................................................................................................................3101
Ya Fan ; Yang Shen ; Fei Yu ; Jiafu Wang ; Yongfeng Li ; Yongqiang Pang

TWO-DIMENSIONAL GRAPHENE METASURFACES FOR WAVEFRONT MANIPULATION .................................................................................................................................................................3107
Ji Long Liu ; Wei Bing Lu ; Jian Wang ; Xiao Bing Li ; Zhen Guo Liu ; Wu Tang

BROADBAND FRAC TAL ACOUSTIC METAMATERIALS .................................................................................................................................................................3115
Gang Yong Song ; Qing Cheng ; Bei Huang ; Tie Jun Cui

ZERO-INDEX METAMATERIALS BASED ON TWO-DIMENSIONAL TRANSMISSION LINES .................................................................................................................................................................3116
Yuan Li ; Weiwei Liu ; Haitao Jiang ; Hong Chen

BROADBAND FOCUSING AND COLLIMATION OF WATER WAVES BY ZERO REFRACTIVE INDEX .................................................................................................................................................................3117
Chi Zhang ; C. T. Chan ; Xinhua Hu

ZERO-REFRACTIVE INDEX AND PSEUDO-SPIN PHYSICS IN PHOTONIC SYSTEMS .................................................................................................................................................................3119
C. T. Chan

ACOUSTIC EXTRODINARY TRANSMISSION BASED ON DENSITY-NEAR-ZERO METAMATERIALS .................................................................................................................................................................3121
Y. Cheng ; Y. Gu ; C. Zhou ; B. G. Yuan ; X. J. Liu

CONICAL DISPERSIONS INDUCED INTERFACE STATES IN TWO-DIMENSIONAL PHOTONIC CRYSTALS .................................................................................................................................................................3122
Xueqin Huang ; M. Xiao ; Z. Q. Zhang ; C. T. Chan

REALIZATION OF COMPLEMENTARY MEDIUM USING PHOTONIC CRYSTALS .................................................................................................................................................................3123
Ainan Fang ; Zhong Xiăng

COUPLING EFFECTS IN PLASMONIC NANOPARTICLE ARRAYS: THE WEAK AND THE STRONG COUPLING REGIME AND THE EFFECTS OF SPIN-ORBIT COUPLING .................................................................................................................................................................3126
T. K. Hakala ; M. Kataja ; L. Shi ; A. Julku ; H. T. Bekola ; M. J. Huttunen ; J. -P. Martikainen ; R. J. Moerland ; S. Van Dijken ; P. Törmä
MID-INFRARED PULSED FIBER LASERS BY USING BLACK PHOSPHORUS AS SATURABLE ABSORBER ........................................ 3177
J. F. Li

THE STABILITY OF WSe2 Q-SWITCHED FIBER LASER .................................................................................................................. 3178
Liping Hou ; Hui Liu ; Ruoyuan Qu ; Chaoshi Guo ; Bohua Chen ; Kan Wu ; Weiwen Zou ; Jianping Chen

WIDELY TUNABLE PULSED ERBIUM-DOPED ZBLAN FIBER LASER .................................................................................................. 3182
C. J. Zhao ; B. Huang ; J. Liu ; P. H. Tang ; S. C. Wen

LOW-FREQUENCY INTENSITY NOISE DRAMATICALLY SUPPRESSED FREQUENCY-STABILIZED SINGLE-FREQUENCY FIBER LASER AT 1083NM ........................................................................................................... 3183
Shandui Xu ; Qiwei Zhao ; Zhenming Yang

DIRAC PHYSICS IN SILICON VIA ‘PHOTONIC BORON NITRIDE’ ............................................................................................................. 3186
Matthew Collins ; Jack Zhang ; Richard Boiko ; Lukas Chrostowski ; Mikael C. Rechtsman

GRATING ASSISTED TUNNELING IN PHOTONIC LATTICES: THE HARPER-HOFSTADTER HAMILTONIAN .................................................. 3187
T. Dubcek ; R. Lelas ; Dario Jukic ; R. Pezer ; Marin Soljacic ; H. Buljan

FLAT BAND AND DIPOLAR DISCRETE OPTICS .............................................................................................................................. 3189

CONTROL OF LIGHT IN COMPLEX APERIODIC AND RANDOM PHOTONIC LATTICES ........................................................................ 3190
Alessandro Zannotti ; Falko Diebel ; Martin Bogdanowicz ; Cornelia Donz

PHOTONIC QUANTUM WALKS IN WAVEGUIDE LATTICES .................................................................................................................. 3191
Markus Gräfe ; Armando Perez-Leija ; Maxime Lebugle ; Steffen Weimann ; René Heilmann ; Alexander Szameit

ANOMALOUS TOPOLOGICAL PHASES, UNPAIRED DIRAC CONES, AND WEAK ANTILOCALIZATION IN HELICAL PHOTONIC LATTICES ............................................................................................................................ 3192
M. Lezec ; M. C. Rechtsman ; Y. D. Chong

WATCHING PYTHAGOREAN NUMBERS: LOCALIZATION-DELOCALIZATION TRANSITION IN TWO-DIMENSIONAL APERIODIC POTENTIALS ............................................................................................................................... 3193
Changming Huang ; Fangwei Ye ; Xianfeng Chen ; Yaroslav V. Kartashov ; Vladimir V. Konotop ; Lluis Torner

COMPUTATION OF SCATTERED FIELDS FROM INHOMOGENEOUS OBJECTS BY VOLUME INTEGRAL EQUATION METHODS .......................................................................................................................... 3196
L. E. Sun

DISCUSSION ON MULTIPLE ELECTROMAGNETIC STRATEGIES FOR SURFACE WITH DIFFERENT SCALE OF ROUGHNESS COMBINED WITH DIFFERENT ENVIRONMENTAL FACTORS ...................................................................................................... 3197
Yu Liang ; Xiang Hua Zeng ; Li Xin Guo ; Zhen Sen Wu

REVIEW ON THE PRE-STUDY ABOUT SPECIFIC TARGET AND ROUGH SOIL SURFACE COMPOSITE ELECTROMAGNETIC SCATTERING BASING ON AN EFFICIENT NUMERICAL STRATEGY ........................................................................................................... 3198
Yu Liang ; Xiang Hua Zeng ; Li Xin Guo ; Zhen Sen Wu

FREQUENCY SELECTIVE SURFACE IN MILLIMETER-WAVE AUTOMOTIVE RADAR RADOME APPLICATIONS .............................................................................................................................. 3199
Huaxi Chen ; Libo Huang ; Metisong Tong

A NYSTRÖM SCHEME BASED ON CUBOID ELEMENTS FOR SOLVING VOLUME INTEGRAL EQUATIONS ........................................................................................................................... 3203
Z. G. Zhou ; M. S. Tong

TRANSIENT ANALYSIS FOR ELECTROMAGNETIC SCATTERING BY DIELECTRIC OBJECTS BASED ON PMCHWT EQUATIONS .......................................................................................................................... 3204
P. C. Wang ; M. S. Tong

A MICROWAVE IMAGING CHAMBER USING BOWTIE ANTENNAS FOR BIOMEDICAL APPLICATIONS ........................................................................ 3208
Muhammad Hassan Khalil ; Maokun Li ; Fan Yang ; Shenheng Xu

NUMERICAL MODELING OF THE INTERACTION OF LASER BEAMS WITH PLASMA AT THE ENTRANCE HOLE OF ICF HOHLRAUM .......................................................................................................................... 3209
Zhili Lin ; Jixiong Pu

HYBRID T-MATRIX MODELING OF ELECTROMAGNETIC SCATTERING FROM SIMPLIFIED LEAF STRUCTURES .......................................................................................................................... 3210
Paul Jason ; Jun-Ichi Takada

STATISTICAL MOMENTS OF SCATTERED ORDINARY AND EXTRAORDINARY WAVES IN THE TURBULENT PLASMA .......................................................................................................................... 3211
G. V. Jandieri ; Zh. M. Diasamidze ; M. R. Diasamidze ; I. Nemsadze

A DUAL-BAND BALANCED AMPLIFIER WITH CRLH TRANSMISSION LINES FULLY IMPLEMENTED ........................................................................ 3218
Jongik Lim ; Qi Wang ; Yongchae Jeong

RF/MICROWAVE PROCESSING IN RF SYSTEMS .............................................................................................................................. 3220

A DESIGN OF PHASE SHIFTER WITH CONSTANT INSERTION LOSS ...................................................................................................... 3221
Seungho Jeong ; Boram An ; Phirun Kim ; Yongchae Jeong ; Jongik Lim

LOW NOISE FIGURE CMOS 2-PORT ACTIVE INDUCTOR USING LC RESONATOR ......................................................................................... 3222
Jageon Koo ; Seungwook Lee ; Junhyung Jeong ; Girdhari Chandhary ; Yongchae Jeong

A NOVEL DUAL-BAND FILTERING POWER DIVIDER WITH U-SECTION LOADED RESONATOR ........................................................................ 3223
Min-Hong Yang ; Yun-Long Lu ; Kai Li

THE COMPACT WAVEGUIDE FILTERS WITH COMPLEX APERTURE RESONANT DIAPHRAGMS ........................................................................ 3224
Y. V. Zemlyakov ; S. V. Krutiev ; A. B. Kleshchenkov

UNDERSTANDING STABILITY OF RATE CONTROL SCHEMES ON DYNAMIC COMMUNICATION NETWORKS .................................................. 3230
Saumay Pushp ; Priya Ranjan ; Malay Ranjan Tripathy ; Junehwa Song
DESIGN PARAMETER OPTIMIZATION OF ULTRA-WIDEBAND ANTENNA USING QUANTUM-BEHAVED PARTICLE SWARM OPTIMIZATION ................................................................. 3235

Wen Dong ; Guofeng Wang

BEAMFORMING CONTROL SYSTEM DESIGN FOR BROADBAND WIRELESS ACCESS ANTENNA ................................................................. 3242

Yusron A Rahman ; Eko Tjipto Rahardjo ; Fitri Yuli ZulkiUNDLE

SCATTERING OF AN ELECTROMAGNETIC VORTEX BESSEL BEAM BY A GYROTROPIC CYLINDER PERPENDICULAR TO THE BEAM SYMMETRY AXIS ................................................................. 3246

V. A. El'Kin ; A. V. Kuklin ; L. L. Popova

CALCULATION OF THE ELECTROSTATIC FIELD IN A DIELECTRIC-LOADED WAVEGUIDE DUE TO AN ARBITRARY CHARGE DISTRIBUTION ON THE DIELECTRIC LAYER ......................................................... 3251

A. Berenguer ; A. Coves ; F. Mesa ; E. Bronchalo ; R. Gimeno ; V. Boria

EVALUATION OF VARIANCES IN HYBRID MTL SYSTEMS WITH STOCHASTIC PARAMETERS VIA SDAE APPROACH ................................................................. 3256

Labomir Bruncik ; Edita Kolarova

FARADAY SHIELDING OF ONE-TURN PLANAR ICP ANTENNAS ................................................................................................................................. 3257

I. P. Ganachev ; M. Muratova ; D. Ovgora ; E. Nakamura

MODELLING OF LARGE TWO- AND THREE-DIMENSIONAL RESONANT NANO-PATTERENDED STRUCTURES ................................................................................................................................. 3261

E. Popov ; P. Chaumet ; G. Deméty ; A. Sentenac ; A.-L. Fehrembach

COMPLEX ANALYSIS OF THE TRANSMISSION LINE THEORY: ANALYTICAL CHARACTERIZATION AND EXAMPLES OF USE ................................................................. 3262

P. Vidal-Garcia ; E. Gago-Ribas

SOME ZEROS OF THE REAL KUMMER FUNCTION AND THEIR APPLICATION TO THE THEORY OF WAVEGUIDES ................................................................................................................................. 3267

Georgi Nikolov Georgiev ; Mariana Nikolova Georgieva-Grosse

A GAUGE-POTENTIAL FORMULATION FOR ELECTROMAGNETIC FIELD IN ARBITRARY ANISOTROPIC MEDIA ................................................................................................................................. 3275

HIGH-PERFORMANCE MOM PARALLEL COMPUTATION OF ELECTRICALLY LARGE ANTENNA ARRAY USED FOR TARGET LOCATION ............................................................. 4046
Wen Wang ; Shengjian Lai

FAST COMPUTATION OF ELECTROMAGNETIC SCATTERING FROM MULTIPLE CAVITIES EMBEDDED IN INFINITE GROUND PLANE ........................................................................... 4050
H. K. Lin ; J. S. Luo ; Y. Li

NUMERICAL ANALYSIS OF THE PLANE WAVE SCATTERING BY A DIELECTRIC GRATING ................................................................. 4056
Y. Y. Pang ; A. Q. Wang ; T. Q. Liao

PLASMON EXCITATION ON A THIN METAL-FILM GRATING: PROFILE EFFECT AND APPLICATIONS ................................................................. 4057
Benwen Chen ; Bai Gong ; Yoichi Okano ; Xun Xu

RESOLUTION OF A GRATING-BASED PLASMON INDEX SENSOR WITH EFFICIENCY-ALONE INTERROGATION .......................................................... 4062
Bai Gong ; Benwen Chen ; Xun Xu ; Yoichi Okano

COMPARATIVE SIMULATIONS OF HYBRID SYSTEMS WITH NONUNIFORM MTLS VIA WENDROFF AND NILT BASED TECHNIQUES ........................................................................... 4067
Lubomir Brancik ; Nawfel Al-Zubaidi R-Smith

EXTRACTION OF INCIDENT FIELD FROM TOTAL FIELD DATA ........................................................................... 4073
R. Yang ; Z. Q. Meng ; T. Takenaka

ENERGY DISTRIBUTION OF DIELECTRIC WAVEGUIDES WITH ARBITRARY SHAPE OF DIELECTRIC CONSTANT — THE INFLUENCE OF DIELECTRIC STRUCTURES ALONG A MIDDLE LAYER ........................................................................... 4078
Ryosuke Ozaki ; Tsunehi Yamashita

SAR COMPUTATION FOR MULTIPLE WEARABLE ANTENNAS ........................................................................... 4080
L. O. Harris

EXPERIMENTAL STUDY ON THE PHASE STATISTICS OF GBSAR IMAGERY ........................................................................... 4086
Chee-Siong Lim ; Voon-Cheet Koo ; Yee-Kit Chan ; Cheng-Yen Chiang ; Chih-Tien Wang ; Chih-Yuen Chu

IMAGING FROM RANDOM TARGETS BY IN-DOOR SAR EXPERIMENTS ........................................................................... 4087
Ming Jin ; Chiang-Shen Ku ; Kan-Shan Chen ; Peng Xu

EFFICIENT SIMULATION OF AIRBORNE STRIPMAP SAR RAW SIGNAL OF EXTENDED SCENES ................................................................. 4088
Yuhua Guo ; Qinhuo Liu ; Bo Zhong

SAR IMAGING OF RANDOMLY CORRUGATED SURFACES WITH IRREGULAR GROOVES ................................................................. 4089
Chiang-Shen Ku ; Kan-Shan Chen ; Peng Xu ; Pao-Chi Chang ; Yang-Lung Chang

RADAR BACKSCATTERING FROM DIELECTRIC RANDOM ROUGH SURFACES USING 3D NUMERICAL SIMULATION OF MAXWELL’S EQUATION ........................................................................... 4090
Tai Qiao ; Tian-Hao Liao ; Leung Tsang ; Douglas Vandemark ; Simon Yueh

A NEW CLIENT-SERVER ARCHITECTURE FOR REAL-TIME MICRO-MOVEMENT GROUND BASED SAR SYSTEM ........................................................................... 4092
Chih-Yuan Chu ; Chih-Tien Wang ; Voon-Cheet Koo ; Yee-Kit Chan ; Yang-Lung Chang

EFFECTS OF LAYERED MEDIA WITH RANDOM PERMITTIVITIES AND ROUGHNESS ON ICESHEET EMISSIONS FROM 0.5–2.0 GHZ ........................................................................... 4094
Leung Tsang ; Shurun Tan ; Haoxui Xu ; Tianlin Wang ; Mohammadreza Sanamzadeh ; Joel Johnson ; Kenneth Jezek
THE POTENTIAL OF ESTIMATING SNOW DEPTH FROM QUIKSCAT SCATTEROMETER DATA AND SNOW PHYSICAL MODEL ..........................................................4096
Chuan Xuong ; Jiancheng Shi ; Zhihong Cui

NUMERICAL SIMULATION OF MAXWELL’S EQUATION IN 3D (MM3D) APPLIED TO ACTIVE AND PASSIVE REMOTE SENSING OF TERRESTRIAL SNOW AND SNOW ON SEA ICE ....................................................4097
Shurun Tan ; Jiye Zheng ; Leung Tsang ; Son V. Nghiem

THE SPATIOTEMPORAL HETEROGENEITY OF SNOW PARAMETERS IN A PASSIVE MICROWAVE REMOTE SENSING PIXEL AND ITS EFFECT ON THE INVERSION OF THE OPERATIONAL SNOW PARAMETERS ......................................................................................................................4099
Yuqun Cui ; Chuan Xiong ; Jiancheng Shi

ESTIMATION OF SNOW WATER EQUIVALENT USING X-BAND AND KU-BAND BACKSCATTERING .................................................4105
Yuqun Cui ; Chuan Xiong ; Jiancheng Shi

UNIAXIAL EFFECTIVE PERMITTIVITY EXTRACTED FROM ANISOTROPIC BICONTINUOUS MEDIA USING NUMERICAL SOLUTION OF MAXWELL EQUATION IN 3D AND STRONG PERMITTIVITY FLUCTUATIONS ..................................................................................................................4106

USING A LINEAR UNMIXING METHOD TO IMPROVE PASSIVE MICROWAVE SNOW DEPTH RETRIEVAL .........................................................................................4107
Xiaojing Liu ; Lingmei Jiang ; Gongxue Wang ; Zheng Lu

SNOW PARAMETER ANALYSIS OF SALINE-ALKALI LAND IN THE WESTERN JILIN PROVINCE OF CHINA BASED ON REMOTE SENSING DATA ........................................4108
Lingjiao Gu ; Mingbo Sun ; Ruihu Ren

THE FIRST-ORDER DIFFERENCE: A POTENTIAL METHODOLOGY TO EVALUATE FRACTIONAL SNOW COVER TIME SERIES ..........................................................4114
Gong-Xue Wang ; Ling-Mei Jiang

DESIGN OF DUAL-BAND FREQUENCY SELECTIVE SURFACE FOR ANTENNA RCS REDUCTION .................................................................4116
Pengyou Wang ; Pu Tang ; Xuqi Long ; Ziyuan He ; Late Lin Li ; Senhong He

ORBITAL ANGULAR MOMENTUM GENERATION USING A BI-LAYERED COMPLEMENTARY METASURFACE WITH A HIGH CONVERSION EFFICIENCY .............................................................4120
M. L. N. Chen ; L. J. Jiang ; W. E. I. Sha

NEW METHOD FOR GENERATING ORBITAL ANGULAR MOMENTUM VORTEX BEAMS IN THE RADIO FREQUENCY DOMAIN ........................................................................4121
Shixing Yu ; Long Li

DESIGN OF A DUAL-POLARIZED MIMO ANTENNA WITH HIGH ISOLATION .......................................................................................4122
Hao Zhou ; Daizhi Piao

RADIO-FREQUENCY SOURCE ESTIMATION USING FIELD DISTRIBUTION MEASURED ON METAMATERIAL ABSORBER SURFACE .........................................................4123

SURFACE WAVEGUIDE TOPOLOGIES SUPPORTING BOTH TM- AND TE-MODE WITH THE SAME PHASE VELOCITY ..................................................................................4124
Mei Li ; Shuoqi Xiao ; Jiang Long ; Dan Sievenpiper

A MICROWAVE RCS REDUCTION STRUCTURE BY ANTARAFACIAL REFLECTION DESIGN OF GRADIENT METASURFACE .................................................................................................................4126
Yang Zhao ; Guorui Zhang ; Feihong Zhou ; Haiyan Chen ; Jianliang Xie ; Longjiang Deng

EFFECT OF DIMENSION, SPACING, PERIODICITY AND SHAPE OF RIS ON RESONANT FREQUENCY AND BANDWIDTH OF 2 × 2 ANTENNA ARRAY ................................................................................................................................4132
Nayana Chakhar ; Sneha Dalvi ; Sandip Rathod ; Anjali A. Chaudhari ; Rajit K. Gupta

STUDY OF FINITE PLANAR FREQUENCY SELECTIVE SURFACES BASED ON Babinet Principle ................................................................................4137
Bing Liu ; Zai-Ping Nie ; Jun Tan

INTERBAND CASCADE LASERS FOR GAS SENSING .................................................................................................................................4144
S. Hoffling ; R. Weih ; A. Schade ; M. Kamp

RECENT ADVANCES OF THE QUARTZ-ENHANCED PHOTOACOUSTIC TRACE GAS DETECTION TECHNIQUE ..................................................................................................................4146
V. Spagnolo ; P. Putimisico ; A. Sampaolo ; M. Giglio ; L. Dong ; F. K. Tittel

NEW SPECTROPHONE DESIGNS BASED ON A QUARTZ TUNING FORK ........................................................................................................4147
L. Dong ; H. Zheng ; H. Wu ; V. Spagnolo ; S. Jia ; F. K. Tittel

BROADBAND QUANTUM CASCADE LASER BASED MULTI-HETERODYNE SPECTROSCOPY FOR CHEMICAL DETECTION ..................................................................................4148
Gerard Wosniok

A QCL-BASED QEPAS SENSOR FOR SENSITIVE C2H4 DETECTION ........................................................................................................4149
Zhen Wang ; Wei Ren

THZ QUANTUM CASCADE AMPLIFIER FOR REMOTE SENSING APPLICATIONS ..................................................................................4151
J. Darmo ; D. Bachmann ; K. Unterrainer ; M. Rösch ; G. Scallari ; M. Beck ; J. Faist

RECENT ADVANCES OF LASER ABSORPTION SPECTROSCOPY BASED TECHNOLOGIES FOR SENSING OF ATMOSPHERE ........................................................................4152
Ding-Liu Chen ; Guishu Wang ; Lei Wang ; Weidong Chen ; Xiaoming Gao

EXPLORATION OF THE SHORT-WAVELENGTH OPTICAL PROPERTIES OF PARTICLES USING BROADBAND OPTICAL CAVITY SPECTROSCOPY ..................................................................................4153
Dean S. Venable ; Donovan P. Fullam ; Jun Chen
MECHANISM ON BUBBLE SIZE FORMATION BY TWO-STAGE MICROWAVE IRRADIATION ......................................................... 4211
Shunyue Nishijima ; Ryunosuke Nakata ; Shogo Matsumura ; Yosuke Asakuma

STUDY ON METAL REFINING PROCESS OF SC METAL USING BY MICROWAVE IRRADIATION .................................................. 4216
Satoshi Fujii ; Shuntaro Tsukuki ; Eichi Suzuki ; Satoshi Chonan ; Mihoko Fukui ; Yuki Wada

ANALYTICAL PREDICTION OF RUNAWAY OCCURRENCE AND THE TEMPERATURE DISTRIBUTION INDUCED BY MICROWAVE HEATING ................................................................. 4217
Aki Fujita

THEORETICAL VERIFICATION OF MICROWAVE-INDUCED CHEMISTRY ON THE BASIS OF DENSITY-FUNCTIONAL-THEORY-BASED MOLECULAR MODELING .......................................................... 4222
Shoyo Yanagida ; Takeko Matsumura

TUNABLE TRI-BAND BANDPASS FILTER USING VARACTOR-TUNED STUB-LOADED RESONATORS ............................................. 4228
Xiang Zhang ; Chang Chen ; Minghang Li ; Weidong Chen ; Jian Cai

RAIN ATTENUATION PREDICTION FOR TERRESTRIAL LINKS AT MICROWAVE AND MILLIMETER BANDS OVER RWANDA ......................................................................................................................... 4233
Djuma Sambir ; Thomas J. O. Afiallo ; A. Alonge

A NOVEL METHOD OF ELIMINATING MEASUREMENTS WITH SIGNIFICANT ERRORS IN THE MULTISTATIC RADAR SYSTEM ............................................................................................................. 4237
Kewei Wu ; Chongyang Fan ; Jun Zhang ; Xiaotao Huang ; Xiangyang Li

OPTIMAL POWER ALLOCATION FOR ENERGY EFFICIENCY MAXIMIZATION IN 5G DOWNLINK MULTISYSTEMS .......................................................... 4243
Y. Ma ; X. Wang ; Y. T. Guo ; M. Zhao

QUALITY OF SERVICE MEASUREMENTS REFERENCES INVESTIGATION FOR THE MOBILE INTERNET SERVICES IN THE CONTEXT OF NET NEUTRALITY FRAMEWORK ................................................................................. 4248
Hai Liu ; Yuxian Zhang ; Zhijun Long ; Yuanyou Xia ; Qing Huo Liu

EVALUATION OF LTE 700 AND DVB-T AND DVB-T2 ELECTROMAGNETIC COMPATIBILITY FOR CO-CHANNEL CASE ......................................................................................................................... 4253
G. Ancans ; E. Stankevicius ; V. Bobrovs

ANTENNAS UTILIZED FOR INTRA-VEHICLE 3–11GHZ AND 55–65GHZ CHANNEL MEASUREMENT ............................................ 4258
T. Mikulasek ; J. Blumenstein ; A. Prokes

EXPERIMENTAL STUDY ON ANTENNA — IC INTERCONNECTIONS FOR ELECTRO-TEXTILE RFID TAGS ..................................................................................................................................................... 4263

A KIND OF SEEKING-COMMON AND TESTING REVERSE ANALYSIS METHOD BASED ON SET THEORY .......................................................... 4267
Wenhan Liu ; Guangming Liang ; Xingyu Li

LIMITED FACTORS AND CALCULATION METHOD OF VOLTE CAPACITY ..................................................................................... 4271
Na Liu ; Nan Li ; Jiangbo Dong ; Yangli Chen ; Wei Liu ; Yanbo Han ; Jiebing Ren

MIMO OTA TESTING ON WIFI DEVICES AND 3D CHANNEL MODELING IN MULTI-PROBE ANECHOIC CHAMBER SYSTEMS ................................................................................................................... 4275
Xingfeng Wu ; Zheng Liu ; Zhuhua Zhang ; Chao-Huixiang Liao ; Zhi Quan

RESEARCH OF TIME DOMAIN ALGORITHM FOR UWB RADAR ISAR IMAGING ............................................................................ 4282
Xiaqin Zhang ; Liang Wang ; Yong Wang

A NOVEL METHOD FOR WIDEBAND PULSED ELECTROMAGNETIC WAVE PROPAGATION CHARACTERISTIC ANALYSIS IN LAYERED MEDIUM ............................................................................. 4287
J. Zeng ; Kai Feng Li ; Xing-Ming Zhao ; Tao Liang

MULTI-PATH COUPLINGS MEASUREMENTS AND SIMULATIONS OF TYPICAL OBJECTS IN COMPLEX NEAR-FILED CONDITION ................................................................................................................. 4292
Liangshuai Guo ; Zichang Liang ; Xiaobing Wang ; Jia Yong Dai

A SINGULAR SPECTRUM ANALYSIS BASED HUMAN LIFE SIGNAL DETECTION ............................................................................ 4295
Lei Qu ; Tian Jin ; Jun Zhang ; Biyong Lu ; Zhimin Zhou

GROUND PENETRATING RADAR INSPECTION OF ASPHALT PAVEMENT WITH AN OFF-GROUND ANTENNA ARRAY ............................................................................................................................... 4299
Hai Liu ; Yuxin Zhang ; Zhijun Long ; Yuanyou Xia ; Qing Huo Liu

COMPARISON AMONG THREE BOWTIE ANTENNAS FOR SUBSURFACE IMAGING USING GROUND PENETRATING RADAR ...................................................................................................................... 4300
Hai Liu ; Jing Xue ; Tian Lan ; Qing Huo Liu

THE EFFECTS OF BACK SCATTERING FROM A DEFECT ZONE ON GUIDED WAVE DISPERSION IN COAST DYKES ............................................................................................................................. 4301

NONCONTACT DETECTION OF STATIC HUMANS USING DUAL-CHANNEL SFCW BIORADAR ........................................................................ 4302
Fang-Lai Liang ; Zhuo-Ran Zhang ; Qian An ; Fu-Gui Qi ; Zhao Li ; Hui-Jun Xue ; Juan-Qi Wang

SAR IMAGING CONDITIONS OF TOPOGRAPHY-INDUCED CURRENT FRONT IN A TIDAL CHANNEL ................................................................................................................................. 4306
X. Wang ; H. Zhang ; B. Fu ; W. Guan ; A. Shi

DATA FUSION ANALYSIS OF SEA SURFACE TEMPERATURE FROM HY-2A SATELLITE RAIDOMETER .................................................................................. 4312
X. Li ; J. Yang ; G. Zheng ; G. Han ; L. Ren ; J. Wang

FOR UPDATED MONITORING OF NATURAL ENVIRONMENT OF AFRICAN EQUATORIAL ZONE .................................................................................. 4316
Shigeishita Nakamura

SURVEY FOR SUSTAINABILITY OF BIOLOGICAL LIVING IN AFRICAN EQUATORIAL ZONE .................................................................................. 4318
Shigeishita Nakamura
MONITORING OF THE RIFT VALLEY ON AFRICAN PLATE IN ELASTIC CREEPING OVER MAGMA MOTION .................................................................4320
Shigehisa Nakamura
POLARIMETRIC SAR TARGET DECOMPOSITION BASED ON SPARSE NMF .................................................................4323
Qian Song ; Feng Xu
REAL-TIME ORTHOGONAL VECTOR PROJECTION ALGORITHM BASED ON GPU .................................................................4326
Meiping Song ; Ping Wu ; Jibai An ; Chien-J Chang
STUDY ON MODELING ELECTROMAGNETIC SCATTERING FROM NEAR SEA AREA .................................................................4330
Zhiwei Liu ; Zhihong Liang ; Peng Cheng Guo ; Fei Dai
USING ADAPTIVE CROSS APPROXIMATION TO ACCELERATE SIMULATION OF B-SCAN GPR FOR DETECTING UNDERGROUND PIPES .................................................................4335
Zhong Peng Xie ; Xi Ming Li ; Yang Xian Yao ; Jing Jing Yang ; Ming Huang
MILLIMETRE WAVE SCATTERING BY SEA FOAM USING SPLIT-STEP FOURIER TRANSFORM .................................................................4339
A. K. Benjamin ; D. H. O. Bebbington
INVESTIGATION ON THE CHARACTERISTICS OF SPECKLE PRODUCED BY RADIALLY POLARIZED VORTEX BEAMS THROUGH SCATTERING MEDIUM .................................................................4340
Zheng Peng Xie ; Xi Ming Li ; Yong Xian Yao ; Jing Jing Yang ; Ming Huang
ELECTROMAGNETIC SCATTERING MODELING OF ANISOTROPIC COATING TARGET BASED ON POINT SOURCE EXCITATION .................................................................4341
Jingjing He ; Jintao Xiang ; Guoqiang Zhu
SPARSE REGULARIZATION BASED IMAGING METHOD FOR INVERSE SYNTHETIC APERTURE RADAR .................................................................4348
Xiaochen Ren ; Lihong Qiao ; Yao Qin ; Pengpeng Li
RESEARCH ON FOUR STAGE RELUCTANCE ELECTROMAGNETIC LAUNCHER .................................................................4352
Xuesong Jiu ; Tongqing Liao ; Baomi Jing
MACHINE AND INVERTER LOSS MINIMIZATION OF HYBRID EXCITED PERMANENT MAGNET SYNCHRONOUS MACHINES FOR ELECTRIC VEHICLES .................................................................4356
R. Palka ; M. Bonislawski ; M. Holab
DESIGN OF LIFE TEST METHOD FOR CHIP-TYPE METAL INDUCTOR .........................................................................................4361
Soon-Mi Hwang ; Chul-Hee Kim ; Kwan-Hun Lee
DESIGN OF ELECTRONIC STATIC DISCHARGE PROTECTION FOR RED-GREEN-BLUE LED CONTROL SYSTEM IN AUTOMOBILES .................................................................4362
G. C. Wan ; Q. Gu ; K. Xue ; M. S. Tong
AN ESD PROTECTION DESIGN FOR CAMERA MODULES .........................................................................................4366
G. C. Wan ; Q. Gu ; L. Y. Tang ; X. D. Yu ; M. S. Tong
DESIGN OF A DATA PLAYBACK MODULE FOR VERY LONG BASELINE INTERFEROMETRY .................................................................4370
Jin Zhang ; Hua Chen ; Zebin Fan
A NEW DESIGN OF TEM HORN ANTENNA BASED ON ULTRA-WIDE BAND BROKEN LINE .........................................................................................4375
Shoulin Yin ; Yang Sun ; Peng Li
A COMPACT HIGHLY ISOLATED TWO PORTS MICROSTRIP ANTENNA BASED ON DEFECTED GROUND STRUCTURE FOR WLAN/WIMAX APPLICATIONS .........................................................................................4380
Muhammed Khaled Khan ; Muhammad Irshad Khan ; Hikhar Ahmad ; Mohammad Saleem
A NOVEL TRIPLEXER ANTENNA WITH HIGH ISOLATION FOR FREQUENCY DIVERSITY USED IN 3G/4G APPLICATIONS .........................................................................................4386
Sara Mahmoud ; W. Swelam ; Mohamed H. Abd El Azeem
A DUAL NOTCHED BAND PRINTED MONOPOLE ANTENNA FOR ULTRA-WIDE BAND APPLICATIONS .........................................................................................4390
Muhammad Irshad Khan ; Sadeq Ur Rahman ; Muhammad Kabir Khan ; Mohammad Saleem
DESIGN OF A PRINTED MONOPOLE ANTENNA WITH RIDGED GROUND FOR ULTRA WIDEBAND APPLICATIONS .........................................................................................4394
Jin Zhang ; Hua Chen ; Zebin Fan
PLANAR DIPOLE ANTENNA FOR TRI-BAND PCS AND WLAN COMMUNICATIONS .........................................................................................4397
Jun Gu ; Zichang Liang ; Pengcheng Gao ; Fei Dai
RECENT ADVANCES OF THE MULTIPACTOR RF BREAKDOWN IN RF SATELLITE MICROWAVE PASSIVE DEVICES .........................................................................................4401
D. González-Iglesias ; A. M. Pérez ; O. Monerris ; S. Antza ; J. Vague ; B. Gimeno ; V. E. Borja ; A. Gomez ; A. Vegas ; E. Díaz ; D. Baboua ; A. Coves
EM INVERSE SCATTERING ANALYSIS OF PLASMA FREQUENCY AND ELECTRON COLLISION FREQUENCY BASED ON GENETIC ALGORITHM .........................................................................................4406
Haoshuan Deng ; Liang Man ; Xiaowei Wei ; Hongcheng Yin
MICROWAVE SENSOR BASED ON SQUARE STEREO-COMPLEMENTARY ASYMMETRIC SINGLE SPLIT RECTANGULAR RESONATOR .........................................................................................4411
Zhong Peng Xie ; Xi Ming Li ; Yang Xian Yao ; Jing Jing Yang ; Ming Huang
SIMULATION AND ANALYSIS OF A MICROSTRIP SENSOR BASED ON DUAL-D SHAPE COMPLEMENTARY SPLIT RESONATOR .........................................................................................4415
Xi Ming Li ; Zhong Peng Xie ; Mei Xia Yang ; Jing Jing Yang ; Ming Huang
THE STUDY FOR WPT USING SILVER NANO PARTICLE .........................................................................................4419
Takashi Yoshikawa ; Arata Sakai
PARTICLE-IN-CELL (PIC) SIMULATION OF A 250GHZ GYROTRON ..........................................................4423
Bajana Kamar Singh ; M. Thota

SHAPING MICROWAVE FIELD OF ARBITRARY INTENSITY PATTERNS IN BOUNDED AREA BY TIME

REVERSAL MIRROR ...........................................................................................................................................4428
Deshuang Zhao

OPTIMIZING GROWTH PARAMETERS FOR HIGHLY LUMINESCENT ER:AL2O3 THIN FILMS THAT
ACT AS A BASE TO FABRICATE A PT LASER .................................................................................................4431
Priyanka Nayyar ; Xue-Yi Zhu ; Ming-Hui Lu ; Xiao-Ping Liu

A NOVEL BROADBAND CIRCULARLY POLARIZED PLANAR ANTENNA BASED ON OFF-CENTERED
COPLANAR WAVEGUIDE FEEDING METHOD .................................................................................................4432
Wang He ; Bo Xu

A HIGH-TEMPERATURE NARROWBAND SELECTIVE EMITTER FOR SOLAR
THERMOPHOTOVOLTAIC SYSTEMS ..................................................................................................................4437
Zhigeng Hu ; Fen Liu ; Yuan Zhang ; Sailing He

NEURAL CORRELATES OF STEREOSCOPIC DEPTH PERCEPTION: A FNIRS STUDY ...........................................4442
Huijin Zhu ; Tingting Cai ; Jie Xu ; Shijing Wu ; Xing Li ; Sailing He

AN H-SHAPE DIELECTRIC RESONATOR ANTENNA WITH U-SLOT ON THE PATCH ........................................4447
Zhi Xu ; Shoucheng Zhu ; Rongwei Wang ; Rensheng Xie

SENSITIVE SERS MEASUREMENT WITH A SINGLE NANOSHELL-PLANE JUNCTION UNDER
RADIALY POLARIZED FOCUSED EXCITATION .................................................................................................4451
Xiaoman Wang ; Jing Long ; Xiaolong Jin ; Jian Ye ; Tian Yang

INVESTIGATION OF PULSE SHORTENING SUPPRESSIONS ON THE COAXIAL VIRCATOR .................................4455
Hao Sun ; Hao Shao ; Zhimin Song ; Xiaowei Zhang

AN X BAND 5-WAY MULTIPLEXER FOR HIGH POWER MICROWAVE COMBINATION .....................................4459
Juwei Li ; Wenhua Huang ; Xiaolong Wu ; Qi Zhu

ANALYSIS OF ORBITAL ANGULAR MOMENTUM MODES FOR LOW-FREQUENCY RADIO
COMMUNICATIONS .................................................................................................................................................4462
Li-An Bian ; Guosheng Li ; Peiguo Liu

AN OFFSET-FED FLAT REFLECTARRAY ANTENNA WITH IMPROVED BANDWIDTH PROPERTY .........................4468
Haotong Li ; Xinyu Hou ; Yongche Xie ; Yongfeng Wang ; Kaimin Qi

A METHOD FOR CALIBRATION OF AIRBORNE POLARIMETRIC SAR ...............................................................4475
Yang-Ge Lu ; Zhi-Ming Xu ; Jing-Ping Yao ; Hai-Tong Li

WIDE BAND CAVITY FILTER LOADED BOTH DIELECTRIC PUCKS AND METALLIC POSTS ................................4479
Anil Kamma ; Jayanta Mukherjee ; Stephen Bila ; Nicolas Delhote

BAND NOTCH UWB BAND PASS FILTER WITH ADDITIONAL GSM 1800 BAND .............................................4481
Anil Kamma ; G. Shrikanth Reddy ; Jayanta Mukherjee

DESIGN OF DUAL BAND-NOTCH UWB BANDPASS FILTER BASED ON T-SHAPED RESONATOR .....................4482
Anil Kamma ; Xue-Yi Zhu ; Ming-Hui Lu ; Xiao-Ping Liu ; Tao Jiang

RESEARCH ON A SIMPLIFIED AIR-GROUND PROPAGATION MODEL BASED ON ITU-R P.618 AND
P.676 ..................................................................................................................................................................4487
Xianfeng Yang ; Tao Jiang ; Tianzha Han

A NOVEL DESIGN OF QUAD-BAND COMBINATION OF CIRCULARLY POLARIZED MICROSTRIP
ANTENNA ............................................................................................................................................................4490
Wei Wang ; Mengjiang Xing ; Xueyuan Guo

A COMBINATION OF MICROPLASMAS IN AN ARRAY OF POLYMERIC CHANNELS FOR OPTICAL
AMPLIFICATION IN ARUXE GAS MIXTURES .........................................................................................................4496
Jimmy Heng Kan Ni ; Yin Huang ; Shenyuan Zhong ; Sung-Jin Park ; James Gary Eden

ANALYSIS OF SILANE AND NITROUS OXIDE PRODUCED PLASMA ENHANCED CHEMICAL VAPOR
DEPOSITION SIMULATION ...................................................................................................................................4498
Zheng Li ; Yian Yang ; Bo Kong ; Yuce Luo

WIDE TRIPLE BAND MICROWAVE FILTER BASED ON EDGE GROOVE CYLINDRICAL
CAPACITIVELY-LOADED CAVITY RESONATORS ...............................................................................................4499
Anil Kamma ; Jayanta Mukherjee ; Stephen Bila ; Nicolas Delhote

METAL-INSULATOR-METAL WAVEGUIDES FOR SPOOF PLASMON ................................................................4500
Bo Huang ; Zhi Luo ; Xia Wu ; Huidong Yang

STUDY OF NEPEHOMETER CORRECTION FACTORS IN WINTER SHANGHAI ..................................................4504
Yumei Gao ; Ravi Varma ; Jun Chen ; Shengrong Lou ; Dean Venables

AMMONIA MONITORING IN EXHAUST GAS BASED ON WAVELENGTH MODULATED TDLAS NEAR
1.5 μM ...............................................................................................................................................................4508
Jun Chen ; Zhengpeng Yang ; Yanfeng Zhang

INVESTIGATIONS OF SPIN DYNAMICS FOR ZNCR2Se4 AND COCR2O4 CHROMIUM SPINELS IN
TERAHERTZ REGION ............................................................................................................................................4510
Fuhai Su ; Peng Zhang ; Hongying Mei ; Shile Zhang ; Xuliang Chen ; Xuan Luo ; Zhaorong Yang ; Jianming Dai ; Li Pi

NEAR FIELD FOCUSED MODES CARRYING OAMS .........................................................................................4511
Ju Yeoong

SIMULATIVE STUDY ON THE TEMPORAL EVOLUTION OF THE AXIAL CATHODE PLASMA
EXPANSION VELOCITY IN PULSED MAGNETICALLY INSULATED COAXIAL DIODE THROUGH
VOLTAGE-AMPERE CHARACTERISTICS ........................................................................................................4512
Danni Zhu ; Jun Zhang ; Huihuang Zhong
SPIN HALL EFFECT IN SUBWAVELENGTH GRATINGS ................................................................. 4516
Kadi Wu ; Guo Peng Wang
LINEAR DEPENDENCE OF ABBORANCE OF CdTe QUANTUM DOTS ON THE RATIO OF TE:CD IN
THE AQUEOUS PHASE SYNTHESIS ...................................................................................... 4517
Chunlin Tan ; Jianxin Yang ; Debin Zhu ; Kechang Shi ; Jiaogeng Zheng ; Xiang Cai ; Xiaoqiao Xing ; Sailing He
AN IMPROVED ONE-POT AQUEOUS PHASE SYNTHESIS OF CdTe QDs ................................ 4521
Chunlin Tan ; Kechang Shi ; Debin Zhu ; Jianxin Yang ; Xiang Cai ; Sailing He ; Xiaoqiao Xing
A FULLY CONSTRAINT ABBORANCE ESTIMATION ALGORITHM WITH HIGH ACCURATENESS .... 4524
Meiping Song ; Qiaoli Ma ; Juxue An ; Chein-I Chang
AN IMPROVED NMF ALGORITHM BASED ON SPATIAL AND ABBORANCE CONSTRAINTS ... 4532
Meiping Song ; Qiaoli Ma ; Juxue An ; Chein-I Chang
NUMERICAL ANALYSIS AND SIMULATION OF ABBORANCE FLUX AND FORCE IN A THREE-COIL
SYSTEM ...................................................................................................................................... 4541
Yujie Huang ; Xiaotao Han ; Quanliang Cao ; Zhipeng Lai ; Hong Cai ; Liang Li
ELECTRICALLY SMALL ANTENNAS MADE OF MULTIPLE SPLIT-RING RESONATORS ... 4543
Tengyu Li ; Liang Peng ; Gaofeng Wang
ELECTROMAGNETIC RESPONSE OF BIANSOTROPIC METAMATERIAL COMPOSED OF
UNBALANCED SPLIT-RING RESONATORS .............................................................................. 4551
Hai Fang ; Liang Peng ; Gaofeng Wang
AN ULTRA-WIDEBAND SHIELDING MATERIALS BASED ON SINGLE NEGATIVE METAMATERIAL . 4553
Jiurong Huang ; Yongfeng Bao ; Bo Chen ; Lei Xiao
IN-PLANE HOLOGRAPHY FOR INDEFINITE PLASMONIC BEAM ENGINEERING .................. 4558
Tao Li ; J Chen ; Lin Li ; S. N. Zhu
TAILOR THE FUNCTIONALITIES OF METASURFACES BASED ON A COMPLETE PHASE DIAGRAM.. 4559
Che Qu ; Shangjie Ma ; Jianming Hao ; Meng Qiu ; Xin Li ; Shiyi Xiao ; Qi Zhang ; Ning Dai ; Qiong He ; Shulin San ; Lei Zhou
RECONFIGURABLE MICROWAVE METAMATERIAL ABSORBERS USING SPLIT LOOPS WITH
VARACTORS .............................................................................................................................. 4560
Shuang Yan ; Jinfeng Zhu ; Delong Li ; Yunqiang Bai ; Qinghao Liu
A PETAL-SHAPED LEFT-HANDED METAMATERIAL BASED ON SPLIT RING AND SEMICIRCULAR
RESONATOR ............................................................................................................................. 4561
Brightiang You ; Yixuan Qi ; Wansheng Jin ; Jianhua Zhou
MODAL ANALYSIS OF WAVE GUIDANCE BY A PERIODIC CHAIN OF CIRCULAR RODS ............. 4568
Dan Zhang ; Yacheng Jandieri ; Kyotoshi Yasumoto
NONRECIPROCAL TRANSMISSION OF EM WAVES BY A CHAIN OF FERRITE RODS ............... 4569
Cheng Je ; Chaon Xiao ; Hai Ma ; Bao Xiu Wu
DEFECT MODES OF ONE-DIMENSIONAL GRAPHENE BASED PHOTONIC CRYSTALS .... 4570
Yizhe Li ; Liming Qi ; Xiaobin Wang ; Junsheng Yu ; Yuan Yan ; Xiaoming Liu ; Zhijiao Chen
HYBRID STATES FORMED BY THE OPTICAL TAMM AND DEFECT MODES IN A ONE-DIMENSIONAL
PHOTONIC CRYSTAL ............................................................................................................... 4571
P. S. Pankin ; S. Ya. Vetrov ; I. V. Timofeev
TUNABLE FANO FILTERING BASED ON SILICON ONE-DIMENSIONAL PHOTONIC CRYSTAL
CAVITIES .................................................................................................................................. 4575
R. F. Jao ; M. C. Lin
PHOTON DENSITY OF STATES OF A MULTLAYER HETEROSTRUCTURE IN A RECTANGULAR
WAVEGUIDE ........................................................................................................................... 4576
ANALYSIS OF 1-D MAGNETIZED PLASMA PHOTONIC CRYSTAL BAND GAP CHARACTERISTIC FOR
VARIABLE PLASMA PARAMETERS ......................................................................................... 4577
Tanwi Mitra ; Rama Pratap Yadav ; Abhinav Jain
DESIGN AND SIMULATION STUDIES OF A METAL PGB CAVITY FOR MILLIMETRE WAVE
GYROTRONS ................................................................................................................................... 4582
Rajnish Kumar Singh ; M. Thottappan
FABRY-PÉROT-LIKE RESONANCE OF A SUBWAVELENGTH SINGLE SLIT FOR MEASUREMENT OF
PERMITTIVITIES OF MICROCRYSTALLINE LIQUIDS/GASES ............................................. 4583
Yuning Qi ; Yulong Bai ; Bingzhou Mi
BINARY QUASI-PERIODIC HOLE ARRAY WITH THE COMPLETELY SUPPRESSION OF HIGH ORDER
DIFFRACTIONS ........................................................................................................................... 4587
X. Zhu ; C. Vannahme ; E. Holstholm-Nielsen ; N. A. Mortensen ; A. Kristensen
PLASMONIC LASER PRINTING FOR INK-FREE COLOR DECORATION ..................................... 4590
X. Zhu ; C. Vannahme ; E. Holstholm-Nielsen ; N. A. Mortensen ; A. Kristensen
ANGULAR-MODULATED SINGLE PIXEL PLASMONIC COLOR FILTER .......................................................................................................................... 4592
M. S. Dawar; T. Xu; W. Zhu; J. K. Lee; Henry J. Lezec; A. Agrawal

HIGH-EFFICIENCY OPTICAL SWITCHING USING AN ELECTROCHROMIC NANOPLASMONIC DEVICE ................................................................................................................ 4594
A. Agrawal; T. Xu; E. Walter; W. Zhu; C. Bohn; J. Velmurugan; A. Alec Talin; Henry J. Lezec

GRAPHENE PLASMONS, QUANTUM EMITTERS, AND LIGHT MODULATION AT THE NANO SCALE ........................................................................................................ 4598
F. Javier Garcia De Abajo

VIVIDLY COLORED SILICON METASURFACE, WITH APPLICATIONS IN SENSING AND LIGHTING ................................................................................... 4599
Wuchua Song; Shiqiang Li; Kenneth Creager

USING SIMULATIONS TO GUIDE EXPERIMENTS .......................................................................................................................... 4602
Jeremy N. Munday

A COMPREHENSIVE MULTIPHYSICS MODEL FOR ORGANIC PHOTOVOLTAICS .................................................. 4604
Zi Shuai Wang; Wei E. I. Sha; Wallace C. H. Choy

SIMPLE MODELS FOR COMPLEX DEVICES .................................................................................................................. 4606
A. Medior; A. Rivera; N. P. Hylton; D. Alonso-Alvarez; D. Chemisana; S. A. Maier; N. J. Elkins-Daukes

OPTOELECTRONIC AND THERMODYNAMIC SIMULATION OF SOLAR CELLS .............................................................................................................. 4609

ADVANCED OPTOELECTRONIC SIMULATIONS FOR ULTRATHIN CRYSTALLINE SILICON SOLAR CELLS WITH RATIONALLY DESIGNED NANOPATTERNINGS ........................................................................................................... 4610
Zhenhai Yang; Penggi Guo; Jian He; Sujiong Zhou; Jichun Ye

HOT-CARRIER SOLAR CELL BASED ON PLASMONIC NONFOCUSBING ................................................................................................. 4611
Liu Yang; Mengchu Fu; Sailing He

LINEAR AND NONLINEAR ELECTRO-OPTIC MODULATIONS OF BATO3-CRYSTAL THIN-FILM WAVEGUIDES FOR 100GHZ MODULATORS .................................................................................................................. 4615

OPTICAL SPRING SENSING OF SINGLE MOLECULES .............................................................................................................. 4623
Wenyan Yu; Wei Jiang; Qiang Lin; Tao Lu

CALCULATING GRADIENT FORCE AND SCATTERING FORCE IN OPTICAL TWEEZERS USING FOURIER TRANSFORM .............................................................................................................. 4625

COMPARISON OF A BIORADAR AND PIEZOELECTRIC SENSOR IN ESTIMATION OF RODENTS’ RESPIRATION VARIABILITY .............................................................................................. 4630
I. N. Antichchenko; A. B. Tataruaitz; E. M. Butskova

EXPERIMENTAL MODELING OF BREAST CANCER DETECTION BY USING RADAR AIDS ..................................................... 4635
I. L. Alborosa; L. N. Antichchenko

MICROWAVE IMAGING OF BIOLOGICAL TISSUE PHANTOM IN DIFFERENT FREQUENCY RANGES .............................................................. 4639
L. N. Antichchenko; I. L. Alborosa; M. A. Chizh; A. V. Zhuravlev

DEEP TRANSCRANIAL MAGNETIC STIMULATION USING THE SEMI-HALO COIL .................................................................................................................. 4644
Mai Lo; Shogo Ueno; Xu-Wei Dong

COMPARISON OF THREE UWB MICROWAVE ANTENNAS INTENDED FOR BRAIN STROKE DETECTION SYSTEM .............................................................................................................. 4648
O. Fiser; J. Merunka; D. Vrba; J. Vrba

VIRUS DETECTION BY MONITORING ITS RADIO FREQUENCY RESPONSE VERSUS TEMPERATURE .............................................................................................. 4649
Mahmoud Al Ahmad; Tahur A. Rizi

NOVEL COMPACT BROADBAND RAT-RACE COUPLER COMBINED FRACTAL GEOMETRY WITH COMPOSITE RIGHT/LEFT HANDED TRANSMISSION LINE .............................................................................................................. 4658
Jian-Gang Liang; Tang-Jing Li; Ya-Qiao Liu

A WRL5 FREQUENCY MULTIPLIER USING CMOS ACCUMULATION MODE VARACTOR DEVICE .............................................................................................................. 4666
S. H. Choi; C. Yi; M. Kim

DEVELOPMENT OF 65-NM CMOS SWITCH MODULATOR FOR ON-OFF KEYING COMMUNICATION SYSTEMS AT 300GHZ ............................................................... 4670
C. Yi; K. M. Lee; M. Kim

A SIMPLIFICATION TECHNIQUE FOR S-PARAMETER CALCULATIONS WITHIN PARTIALLY LOADED RESONANT CAVITIES .............................................................................................................. 4673
Jonathan M. Rigelsford; Michal Cerveny

DESIGN OF AN X-BAND STRIPLINE-FED CO-APERTURE MICROSTRIP MULTILAYER TRANSCEIVER ARRAY ANTENNA .............................................................................................................. 4676
Senhang He; Pu Tang; Bo Chen; Pingyu Wang

AN EFFECTIVE HYBRID OPTIMIZATION ALGORITHM FOR THE SYNTHESIS OF 4-D LINEAR ANTENNA ARRAYS .............................................................................................................. 4682
Feng Yang; Shihyen Yang; Jixin Guo; Yikai Chen

SYNTHESIS OF A SPARSE LINEAR ARRAY WITH MULTIPLE SIMULTANEOUS FREQUENCY-IN Variant Focused Beams .............................................................................................................. 4687
Jian Cheng; Yue Tang; Bo Chen; Pingyu Wang

SUB-WAVELENGTH UWB ANTENNA ARRAY DESIGN FOR SUPER-RESOLUTION FOCUSING BASED ON TIME REVERSAL TECHNIQUE .............................................................................................................. 4688
Ran Zhang; Wei Shao; Xiao-Kan Wei
DESIGN OF A ROTATED FEEDING WIDE-ANGLE SCANNING PHASED ARRAY WITH CIRCULAR POLARIZATION ........................................................................................................................................................................4689

Tayyab Shabbir ; Rashid Saleem ; Amin Qudus ; Sabih Ur Rehman ; M. Farhan Shafique 4690

COMPARISON OF BEAMFORMING ALGORITHMS VIA WORST-CASE SINR MAXIMIZATION .................................................................4695

Jinhua Su ; Joo-hwan Chan

A SINGLE LAYER REFLECTARRAY WITH OCTAGONAL-RING DELAY LINE FOR X-BAND APPLICATIONS ..........................................................................................................................4700

Mohammad M. Omar ; Amira Zaki ; Wael A. E. Ali ; Ashraf A. M. Fata

THEORETICAL ANALYSIS AND SIMULATION OF INVERTED F ANTENNAS ON A FINITE GROUND PLANE FOR SATELLITE APPLICATIONS .......................................................................................4704

T. Rajavardhan ; H. Ramachandran

A DISCONTINUOUS GALERKIN AUGMENTED ELECTRIC FIELD INTEGRAL EQUATION METHOD FOR MULTISCALE STRUCTURE MODELING .............................................................................4708

Diego M. Solis ; José M. Taboada ; Fernando Obelleiro ; Luis Landesa

LARGE-SCALE NANOPHASIC MODELING; IMPROVING CONVERGENCE ...........................................................................................4712

B. Karasuomanoglou ; A. Yilmaz ; O. Ergül

DEVELOPMENT AND APPLICATION OF A BROADBAND MULTILEVEL FAST MULTIPOLE ALGORITHM FOR CHALLENGING MULTISCALE PROBLEMS ..........................................................................................................................4713

A. S. S. Zaidi ; R. A. H. S. Rana ; M. A. El-Ghazaly

GEOMETRY-AWARE DOMAIN DECOMPOSITION PRECONDITIONING FOR HYBRID FINITE ELEMENT-BOUNDARY INTEGRAL METHOD ..................................................................................4717

Huang-Wen Guo ; Zhen Peng ; Xin-Qing Sheng

A PARALLELED FAST MULTIPOLAR ALGORITHM BASED ON NYSTROM DISCRETIZATION ........................................................................4718

Z. G. Zhou ; Q. L. Li ; M. S. Tong

FPGA ARCHITECTURE FOR 3-D FDTD ACCELERATION USING OPEN CL .........................................................................................................4719

H. M. Watdehya; M. Harriyama ; Y. Ohtera

THE EFFICIENT MIXED FEM WITH ITBC FOR COMPUTING GRAPHEENE PLASMONIC WAVEGUIDE MODES ..................................................................................................................................................4722

Na Liu ; Guangqiong Cai ; Qing Hua Liu

RESEARCH ON FSV IN MEMBERSHIP FUNCTION CREDIBILITY VERIFICATION — FOR SYSTEM PERFORMANCE EVALUATION ..........................................................................................................................4723

Yifang Geng ; Tao Jiang ; Xiaowei Zhang

APPLICATION OF THE RIGGED HILBERT SPACES INTO THE GENERALIZED SIGNALS AND SYSTEMS THEORY: PRACTICAL EXAMPLE .................................................................................................4728

J. Heredia-Juesas ; E. Gago-Ribas ; P. Vidal-García

A STUDY OF ELECTROMAGNETIC SHIELDING EFFECTIVENESS ON MULTILAYER FABRIC ..........................................................................................................................4734

Zhen Pan ; Zhe Liu ; Ying Su ; Yaping Li ; Xichen Wang

DCT TRIGGER FOR A DETECTION OF VERY INCLINED AIR-SHOWERS IN AUGERPRIME WITH 120MHZ SAMPLING ........................................................................................................................................4739

Zhigstew Szudowski

STUDY ON THE ELECTRICAL CONDUCTIVITY OF HIGH VOLTAGE ELECTROMAGNETIC SHIELDING CLOTHING ........................................................................................................................................4744

Jingying He ; Shengwei Zhang

CLOUD ICE SIMULATIONS BASED ON MILLIMETER WAVE LIMB SOUNDER .................................................................................................4750

Yifang Geng ; Tao Jiang ; Xiaowei Zhang

TEMPERATURE AND TEXTURE DEPENDENT SPECTROSCOPIC DIELECTRIC MODEL FOR FROZEN MINERAL SOILS AT 0.1–15GHZ ........................................................................................................................................4754

V. L. Mironov ; A. Y. Karavaysky ; I. P. Molostov ; Y. I. Lukin ; L. G. Kovalapova

PRE-SEISMIC THERMAL ANOMALIES OF THE 2015 MW = 7.8 GORKHA (NEPAL) EARTHQUAKE FROM MODIS SURFACE TEMPERATURE .........................................................................................4755

Muhammad Shah ; Shunghgen Jin

LONG-TERM VARIATIONS OF THERMOSPHERIC AIR MASS DENSITY DERIVED FROM GRACE ACCELEROMETERS ..................4759

Andres Calabria ; Shunghgen Jin

STUDY OF COASTAL UPWELLING AROUND ZHOUHAIN ISLANDS BASED ON SATELLITE MEASUREMENTS AND NUMERICAL MODEL ........................................................................................................................................4764

Qingyu Zhang ; Qiong Xu ; Shunghgen Jin

GEOLOGICAL CHARACTERISTICS OF HYDRATED MINERALS ON MARS FROM MRO CRISM IMAGES .........................................................................................................................................................................4770

Yi Yang ; Shunghgen Jin

A LONG-DISTANCE SEA WAVE HEIGHT MEASUREMENT BASED ON 3D IMAGE MEASUREMENT TECHNIQUE .................................................................................................................................4774

Hao Yi ; Lei Yan ; Kazuhiro Tsumino ; Cunwei Lu

ICE MASS BALANCE AND GIA EFFECTS IN TIBET ESTIMATED FROM GRACE AND ICESAT MEASUREMENTS ........................................................................................................................................4780

Tengyu Zhang ; Shunghgen Jin

DESIGN AND PIC SIMULATION OF A MEGA-WATT CLASS GYRO-TWYSTRON .........................................................................................4786

Anshu Sharan Singh ; M. Thottappan
MILLIMETER-WAVE AND TERAHERTZ RECONFIGURABLE RADIO-OVER-FIBER SYSTEMS ................................................................. 4871
J. J. Vega Omela

SPECTRALLY EFFICIENT FREE-SPACE OPTICAL COMMUNICATIONS EMPLOYING ORBITAL ANGULAR MOMENTUM MULTIPLEXING ................................................................. 4873
Fan Zhang ; Yixiao Zhu

DSP FOR HIGH SPEED SHORT REACH TRANSMISSION SYSTEMS .......................................................................................... 4874
Kangming Zhong ; Xian Zhou ; Changyuan Yu ; Alan Pak Tao Lau ; Chao Lu

OPTICAL NETWORKING FOR HYBRID COMPUTING COMBINING CLOUD AND FOG ................................................................. 4875

PREDICTION OF ASYNCHRONOUS IMPULSIVE NOISE VOLATILITY FOR INDOOR POWERLINE COMMUNICATION SYSTEMS USING GARCH MODELS ................................................. 4876
M. Mosalaarsi ; T. J. O. Afullo

A HIGH LINEARIZED MICROWAVE PHOTONIC LINK UNDER DUAL-TONE MODULATION ......................................................................... 4883
Wei Jiang ; Jinggui Yan ; Dong Liang ; Xiaojun Li ; Zhongbo Zhu

HUGE SOLITON EXPLOSIONS IN AN ULTRAFAST FIBER LASER ........................................................................................................ 4889

A LOW LOSS AND HIGH BIREFRINGENCE SUSPENDED HOLLOW-CORE THz FIBER .............................................................................. 4890
Yuan-Feng Zhu ; Hua Wang

FIBER-INTEGRATED TUNGSTEN DISULFIDE SATURABLE ABSORBER MIRRORS BY MAGNETRON SPUTTERING TECHNIQUE .............................................................................................. 4891
Hao Chen ; Shuangchen Ruan ; Yuan Guo ; Peiguang Yan

A CONSTANT-PRESSURE FIBER ATTENUATED TOTAL REFLECTION PROBE FOR INFRA-RED SPECTRUM ANALYSIS ............................................................................................... 4895

RESEARCH OF A SINGLE-POLARIZATION SUSPENDED-CORE MICRO-STRUCTURED FIBER ........................................................................ 4898
Hua Wang ; Yuan-Feng Zhu ; Ping-Ping Fu ; Ning Zhou

APPLICATION RESEARCH OF DISTRIBUTED OPTICAL FIBER SENSING TECHNOLOGY USED IN SAFETY MONITORING OF COALBED METHANE PIPELINES ........................................... 4903
Baoli Fan ; Yu Wang ; Yuncarui Wang ; Dong Wang

RESEARCH ON THE LEAKAGE MONITORING OF OIL PIPELINE USING BOTDR .................................................................................. 4907
Feng Wang ; Zhongliang Sun ; Feng Zhu ; Chenghao Wang ; Yan Pan ; Jiawen Dong ; Xiuqian Zhang ; Li Guo

MULTI-POINT DETECTION FOR POLARIZATION-SENSITIVE OPTICAL TIME DOMAIN REFLECTOMETRY AND ITS APPLICATIONS IN ELECTRIC POWER INDUSTRY .............................................. 4912
Huixuan Wu ; Jingwu Luo ; Jiang Wu ; Jun Liu ; Lidong Lv ; Yunjiang Rao ; Xiaoyan Sun ; David Aituba

HIGH-SENSITIVITY DISTRIBUTED STATIC PRESSURE SENSOR BASED ON BRILLOUIN DYNAMIC GRATING .......................................................................................................................... 4919
Lei Teng ; Yongkang Dong ; Hongxing Zhang ; Taofei Jiang ; Denglou Zhou

RECENT ADVANCES IN COHERENT BOTDA SENSOR .......................................................................................................................... 4920
Li Yang Zhao ; Zongli Li ; Lianxian Yan

FEMTOSECOND-PULSE INSCRIPTION OF FIBER BRAVG GRATINGS WITH SPECIAL CHARACTERISTICS AND THEIR CHARACTERIZATION .......................................................................... 4921
A. V. Dostovalov ; A. A. Wolf ; A. V. Parygin ; M. I. Skvortsov ; S. S. Yakushin ; S. A. Babin

SYMMETRY AND ENERGY CONSERVATION RELATIONS IN THE IN-PLANE TRANSMISSION AND REFLECTION OF SURFACE PLASMON POLARITONS ........................................................................ 4928
Haitao Liu

VECTOR BEAM GENERATION VIA MICROMETER-SCALE PHOTONIC INTEGRATED CIRCUITS AND PLASMONIC NANO-ANTENNA ARRAYS ............................................................................. 4930
Yi-Zhi Sun ; Renaud Bachelot ; Sylvain Blaize ; Wei Ding

OPTIMAL REGIMES OF THERMOCHEMICAL LIPPS FORMATION ON SURFACES OF DIFFERENT METALS ......................................................................................................................... 4932
A. V. Dostovalov ; Y. P. Korolkov ; V. S. Terentyev ; K. A. Okstrub ; F. N. Dulsiev ; S. A. Babin

TRANSMISSION OF PLASMONIC WAVEGUIDE MODULATED BY SIDE-COUPLED RESONATORS: THEORETICAL ANALYSIS AND NUMERICAL SIMULATION .................................................. 4937
Zhen Zhen Liu ; Jun Jun Xiao

LIGHT RADIATING-MANIPULATION IN TOROIDAL METAMATERIAL BY THE GAIN IN QUANTUM DOTS ........................................................................................................................................... 4938
Jie Li ; Zheng-Gao Dong

POLARIZATION INSENSITIVE WIDE-ANGLE TRIPLE-BAND METAMATERIAL BANDPASS FILTER ................................................................................. 4939
Peihong Zhou ; Nan Zhang ; Song Hao ; Xiaolong Wang ; Longjiang Deng

MODES COUPLING ANALYSIS OF SURFACE-PLASMON-POLARITONS IN INFRARED METAMATERIAL ABSORBER ............................................................................................................. 4942
Guoshuai Zhen ; Peihong Zhou ; Haiyan Chen ; Jianliang Xie ; Longjiang Deng

A BROADBAND AND HIGH-GAIN ANTENNA USING OPTIMIZED METAMATERIAL SUPERSTRADES ................................................................................................. 4943
Tiansuo Yan ; Dongling Li

PERFECT LENSING WITH LOSSY METAMATERIALS; MAINTAINING A SINGULAR FOCUS BY AVOIDING FEEDBACK ................................................................................................................ 4946
G. Rosenblatt ; M. Orenstein
SUM RATE IMPROVED INTERFERENCE ALIGNMENT IN LOW TO MODERATE SNR ENVIRONMENT ..................................................4947
Yibing Li ; Xueying Diao ; Quanhai Dong

RESONANT VISIBLE LIGHT MODULATION WITH GRAPHENE ..................................................................................4952
Renwen Yu ; Valerio Pruneri ; F. Javier Garcia De Abajo

PREDICTION OF LONG-RANGE DEPENDENCE IN CYCLOSTATIONARY NOISE IN LOW-VOLTAGE PLC NETWORKS ............................................................4954
M. O. Arayo ; T. J. Afullo

WMSN POSITIONING ALGORITHM BASED ON MULTI PLANE ANTENNAS ..................................................................4959
Changying Chen ; Ratneshwar ; Liang Liu ; Liangxian Wu

ANALYSIS OF MOVING OBJECT WAKE DETECTION BASED ON POLARIZATION CHARACTERISTICS ..................4962
Shuang Gao ; Xiaojun Wang ; Nan Bi ; Tao Jiang

TIME MATCHING OF ATTENUATION-PRECIPITATION EVENTS ON A SLANT PATH LINK ............................................4967
Babajide O. Afolayan ; Thomas J. Afullo ; Akintunde Akintunde

AN IMPROVED CHANNEL ESTIMATION ALGORITHM BASED ON COMPRESSED SENSING FOR LTE-A ..........4971
Fang Fe ; Han Yu ; Ling Wang

THERMOSPHERIC MASS DENSITY VARIATIONS DURING THE MARCH 2015 GEOMAGNETIC STORM
FROM GRACE ACCELEROMETERS .................................................................................................................................................4976
Andres Calabia ; Shaunggen Jin

AN IMPROVED ESTIMATION ALGORITHM OF THE SOURCE NUMBER WITH FEWER SENSORS THAN SOURCES ........................................................................4981
Yibing Li ; Chuan Liu

EVALUATION OF 3-D IONOSPHERIC TOMOGRAPHY FROM DENSER GNSS OBSERVATIONS IN JAPAN .............4986
Shuanggen Jin ; Guanxin Zheng ; Andres Calabia

TIME SERIES RAINFALL SPIKE MODELLING FROM MARKOV CHAINS AND QUEUING THEORY
APPROACH FOR RAINFALL ATTENUATION OVER TERRESTRIAL AND EARTH-SPACE RADIO WAVE PROPAGATION IN JIMMA, ETHIOPIA .........................................................4991
Feysa D. Diba ; Thomas J. Afullo ; Akintunde A. Alonge

A BLIND SOURCE SEPARATION ALGORITHM OF NON-STATIONARY SIGNALS BASED ON LOCAL POLYNOMIAL FOURIER TRANSFORM .................................................................4996
Wet Nse ; Yibing Li ; Dandan Liu

AN IMPROVED ZERO-ATTRACTING NORMALIZED LEAST MEAN SQUARE ALGORITHM FOR SPARSE CHANNEL ESTIMATION ..............................................................................................................5001
Yingsong Li ; Yanyang Wang ; Zhan Jin

SARS INDUCED IN HUMAN BODIES DUE TO A LTE FEMTOCELL IN AN OFFICE ..................................................5008
Hsing-Yi Chen ; Shu-Huan Wen

AROUSAL EFFECT OF ELF SMALL MAGNETIC FIELD STIMULATION ON CAR DRIVER'S SPINE FOR
PREVENTION OF DROWSY DRIVING WITHOUT SLEEP REBOUND ..................................................................................5009
Yoshiyuki Mohri ; Muneo Yamada ; Tomaoki Nakano

MAGNETIC EFFECT ON HYSTERESIS LOOP AREA REDUCTION OF ELECTRIC CONDUCTIVITY
TEMPERATURE CHARACTERISTICS OF WATER AND RINGER'S SOLUTION ........................................................................5013
Yoshiyuki Mohri ; Kanee Mohri ; Muneo Yamada ; Tomaoki Nakano

FOOD FLAVOR ENGINEERING USING ELF SMALL MAGNETIC FIELD ...........................................................................5017
Yoshiyuki Mohri ; Kanee Mohri ; Taka Mohri ; Shinsuke Nakayama ; Masanori Fukashima

AGE-DEPENDENT OF ELECTROMAGNETIC ABSORPTION IN HUMAN ENDOCRINE GLANDS FOR USING MOBILE PHONES ........................................................................................................5021
Mai Ma ; Xiaoyan Wu

ANALYSIS OF M-ARY PSK BIO-DEGRADABLE TAG ........................................................................................................5026
Baraa F. Al-Azzawi ; Jonathan M. Rigelsford

IMPACT OF ELECTROMAGNETIC FIELD GENERATED BY MOBILE PHONE ON PROXIDANT-
ANTIOXIDANT BALANCE IN TESTES OF RATS ........................................................................................................5027
E. Mazur ; K. Sieron-Stolinny ; G. Cielar ; A. Sieron ; P. Sowa

CHILDHOOD ACUTE LEUKAEMIA AND THEIR ASSOCIATION WITH THE HIGH VOLTAGE NETWORK IN GUADALAJARA, MEXICO ................................................................................5032
Leonardo Soto-Sumuno ; Alberto Llaciulo-Parrav ; Roberto Garbaldi-Covarrubias ; Hugo Romo-Rubio ; Jesus Arriaga-Davida

THE ROLE OF SPIN BIOCHEMISTRY IN BIOENERGETICS AND REACTIVE OXYGEN SPECIES
PRODUCT CHANNELING ..........................................................................................................................................................5033
Cristina Chavarriaga ; Ivan McClure ; Pablo Castello ; Maria Procopio ; Robert J. Usselman ; Carlos F. Martino

DESIGN OF LANGE-FERRITE CIRCULATOR FOR X-BAND RADAR ..................................................................................5036
Derh Yusufan ; Firdi Yufi Zulkifli ; Eko Tjipto Rahardjo

DUAL BAND FREQUENCY SELECTIVE SURFACE FOR X-BAND APPLICATIONS .............................................................5039
Sarika ; Malay Ranjan Tripathy ; Daniel Ronnow

GAP COUPLED HALF CIRCULAR DISK PATCH ANTENNA USING DGS FOR DUAL-WIDEBAND APPLICATION .................................................................................................5043
N. P. Yadav ; Xuefeng Liu ; M. R. Tripathy

DESIGN OF A HIGH GAIN AND LOW NOISE CMOS FOLDED MIXER FOR 5GHZ WITH LOW POWER CONSUMPTION ..................................................................................................................5049
Yi Li ; Chuanhui Wang

NOVEL SINGLE LAYER PROXIMITY FED MICROSTRIP PATCH ARRAY WITH GAP COUPLED RESONATORS .............................................5050
Jacob Abraham ; Thomaskutty Mathew
