TABLE OF CONTENTS

An Integrated System for Drilling Real Time Data Analytics .......................................................... 1
A. Alsalama, J. Canlas, S. Gharbi

The Internet of Things IoT and Security : A Practical Strategy to Secure an OT and IT Integrated
Process Control Domain .................................................................................................................. 12
R. Irons-McLean, J. Greengrass

Maximizing Drilling Performance with Real-Time Drilling Vibration Mitigation in the Deep Wells ........ 29
M. Cai, G. Wang, H. Ge, X. Chen, H. Guo

O&G Mergers and Acquisitions in the Digital Age ........................................................................ 41
A. Prakash

Improving Operational Cost with SAP .......................................................................................... 46
J. Taylor

Human Factors in Control Room Design & Effective Operator Participation ................................. 55
R. Pikalaar, N. Groot, E. Malder, B. Remijn

ESP Health Monitoring KPI: A Real-Time Predictive Analytics Application ............................... 66
S. Gupta, M. Nikolau, L. Sapatelii, C. Bravo

Securing the Future: A Structured Approach for Early Engagement With Major Capital Projects to
Embed IE Solutions and Add Value ............................................................................................... 76
J. Gillenwater, H. Gilman, C. Lakehart

Leveraging RFID Technology for Deepwater Drilling and Completions Challenges ....................... 95
Ghaempanah, D. Reajins

Prescriptive-Based Decision Support System for Online Real-Time Electrical Submersible Pump
Operations Management .............................................................................................................. 124
M. Adesunvo, T. Denney, S. Lazarus, O. Bello

Natural Language Processing Techniques on Oil and Gas Drilling Data ........................................ 142
M. Antoniak, J. Dalgliesh, M. Verkruyse, J. Lo

Automatic Performance Analysis and Estimation of Risk Level Embedded in Drilling Operation
Plans ........................................................................................................................................... 148
E. Cayeux, B. Daureaux, M. Balov, S. Haavardstein, L. Stokland, A. Saasen

Automated Procedures - A New Way of Improving Efficiency and Safety ..................................... 181
M. Wilkins

Risk-Based Prioritization Abandonment Strategy for Inactive Subsea Wells ................................. 190
A. Oladipo, A. Houlbrook

The Use of Well Integrity Management Systems & Software to Increase Organisational
Understanding ................................................................................................................................. 198
S. Conn, K. Cornelissen

Recovery Factor Prediction for Deepwater Gulf of Mexico Oilfields by Integration of Dimensionless
Numbers with Data Mining Techniques .......................................................................................... 206
P. Srivastava, X. Wu, A. Amiralatif, D. Devegowda

A Dynamic Data-Driven Inversion Based Method for Multi-Layer Flow and Formation Properties
Estimation ...................................................................................................................................... 222
O. Bello, M. Ji, T. Denney, S. Lazarus, C. Vettical

Enhancing Well Delivery Performance through Discipline Integration ......................................... 237
R. Davies, J. Bruland, I. Busto, M. Williamsen

Using RealTime Data for Well Design Optimization, Not Just Drilling Optimization ....................... 252
O. Andersen

Electrical Submersible Pump Operation Optimization with Time Series Production Data Analysis ....... 260
D. Zhu, S. Alyamkin, L. Sesack, J. Bridges, J. Letzige

Drawdown Control: A Platform for Safeguarding and Optimising Production ................................ 277
P. Calvert

Looking Back 2006 - 2016 - Ten Years of Data Driven Well Rate Estimates for Real-Time
Surveillance and Optimization ....................................................................................................... 284
J. Briers, K. Goh, A. Sniers, D. Schotanus, J. Hofland, D. Adon

Collaborative IE Inside and Across Functional Silos - A Software Solution that Really Works ............. 296
R. Fjelthein, H. Lohme, S. Siversten, A. Solberg, T. Thorsen

Enhanced Well Control Implementing Human Factors ................................................................... 304
Real Time Decision Making - Incorporating Dynamic Risk Management
A. Hartigan, T. Thrasher, R. Adlam .......................................................... 313

Big Data Analytics for Prognostic Foresight
M. Plate ........................................................................................................ 324

Improving Data Quality in WITSML Data
I. Svensson, M. Wooley, T. Halland ......................................................... 330

Improving Weight to Weight Connection Time to Lower Well Construction Cost
I. Svensson, K. Mobley, A. Aming ............................................................ 335

Drilling Process Simulation: Status, Outlooks and Comparisons to Other Industries
Y. Bhardwaj, O. Bello, R. Aragall, J. Oppelt ........................................... 343

The Smart Digital Platform for Effective Well Control Management
S. Jose, T. Sookdeo, I. Says, Y. Carreno, R. Ferrero .................................. 356

Monitoring Through Analyzing Real Time Build-Up Data from an Intelligent Field
B. Al-Welhaihi, M. Issaka, A. Abuhashson ............................................. 369

Using a Forensic Tool to Save Bed Space With Visual Planning
J. Little, C. Fleming, B. Donnelly ............................................................... 381

Business Models and KPIs as Drivers for Drilling Automation
F. Iversen, J. Thorogood, J. Macpherson, R. Macmillan ......................... 393

Smart Oilfield Safety Net: An Integrated System for Prediction of Asset Integrity Opportunities

Reservoir Uncertainty Analysis: The Trends from Probability to Algorithms and Machine Learning
M. Ani, G. Olayemi, A. Petrovski, S. Rezaei-Gomari ................................ 414

Using Nudge Techniques to Influence Behaviour in an Engineering Office
M. Healey, K. Parker, L. Saldin ................................................................. 426

The Internet of Things in Upstream Oil and Gas - How Can Decisions Be Made in Real-Time and Safely Manage Risk?
B. Crockett ................................................................................................ 435

Data to Language - Leveraging Software to Understanding and Communicate Well Integrity Risk Throughout the Organisation
G. Mundie, S. Wilson, S. Copping ............................................................... 442

Integrated Planning to Optimize Field Development Strategies and Real Time Decision Making During Project Execution for Large Scale Shale Resource Projects
M. Mitschanek, M. Prohaska, G. Thonhauser ........................................... 449

Enabling Real-Time Distributed Sensor Data for Broader Use by the Big Data Infrastructures
D. Yang, T. Demney, O. Bello, S. Lazarus, C. Vettical .............................. 455

Novel Solutions and Interpretation Methods for Transient, Sandface Temperature in Vertical, Dry Gas Producing Wells
A. Dada, K. Muradov, D. Davies ............................................................... 469

Enhancing Real Time Decision Making Through Virtual Metering by Integrating Third Party Simulation Software with Live Data
G. Filsell, A. Rohnean .............................................................................. 484

Efficient Optimization Strategies for Developing Intelligent Well Business Cases
A. Vasper, J. Mios, T. Duong ..................................................................... 491

Real-Time Interactive Remote Display of DTS and DAS Data for Well Treatment Optimization

CiSoft and Smart Oilfield Technologies

Intelligent Monitoring and Control: Essential Guidance for Critical Infrastructure Security
A. Tarter ........................................................................................................ 537

A Case on Remotely Operated Intelligent Bridge Plugs for Plug and Abandonment Operations
Z. Arackakudiyil, B. Thomson, C. Fordre ........................................................................................................ 545

Integration of Petroleum and Reservoir Engineering Workflows in Production Database Management Systems
D. Talbot, P. Jeffs, A. Hyde, A. Kohok, D. Rossi ........................................ 553

Smart and Automated Workover Candidate Selection
G. Zangl, L. Neuhofer, D. Zabel, P. Tippel, V. Kremarik, L. Krenn, B. Hackmoller ................................................................. 566

Risk Based Management of Wells Safety-Related Software Systems
D. Reed, J. Turnbull ................................................................................... 575
A Step by Step Approach to Improving Data Quality in Drilling Operations: Field Trials in North America ................................................................. 588

P. Ashok, A. Ambrus, D. Ramos, J. Lutteringer, M. Behounek, Y. Yang, T. Theford, T. Weaver

Surface Management of Gas Breakthrough in Thin Oil Rim Waxy Reservoir: A Case Study ................................................................. 603

A. Agrawal, P. Leeuwen, B. Demirbas, J. Hajj

How Can We Turn Intelligent Energy into Profitable Operations? .................................................................................................. 628

J. Crompton

Robust Derivative Estimation for Decline Analysis from Noisy Production Data ................................................................. 644

N. Subrahmanya, S. Wøe, W. Liu, A. Tewari, A. El-Bakry, D. Paus

Leveraging Data-driven Exception Based Surveillance to Maximize Returns in Times of Low Oil Prices ................................................................................................. 655

A. Agrawal, J. Lie, P. Leesoven, D. Adun, J. Briers, P. Pei-Huey, A. Snekers, R. Ems

Collaborative Working - Harvesting Value and Evolving with New Technologies .................................................................................. 672

F. Berg, C. Weiss, J. Dijk, R. Tulalian, M. Amos, S. Alharthy, M. Avohadejo

Advanced Decision Support for Deepwater Offshore Drilling Incorporating Insights from Nuclear Power and Aerospace ................................................................. 686

W. Nelson

Leveraging Change Agent Networks to Enable Successful Transformation ................................................................................ 697

M. Mortman, A. Zeringue

IT and OT Convergence - Opportunities and Challenges ................................................................................................. 703

S. Kamal, S. Mubarak, B. Scodova, P. Naik, P. Flichy, G. Coffin

A New Communications Protocol for Real-Time Decision Making ................................................................................................. 713

Automated Real-Time Process Data Analysis Using Online Wavelet Transforms: Fault Detection, Data Cleansing and Compression ........................................................................... 722

A. Deshpande, S. Qin, L. Bresnkhelle

How Do We Accelerate Uptake and Fulfill the Value Potential of Intelligent Energy? ................................................................. 735

H. Gilman, T. Lilleng, J. Nordvedt, T. Unneland

Results of Real-Time Production Optimization of a Maturing North Sea Gas Asset with Production Constraints ...................................................................................... 752

J. Boer, R. Lindén, W. Renes

Workflow Automation for Gas Lift Surveillance and Optimization, Gulf of Mexico ...................................................................................... 760

Z. Borden, A. El-Bakry, P. Xu

Distributed Acoustic Sensing for Day-To-Day Well, Reservoir and Facility Management .................................................................................. 771

WITSML v2.0: Paving the Way for Big Data Analytics Through Improved Data Assurance and Data Organization ................................................................................................. 778

Operations Excellence Maximizes the Value of the Digital Oilfield Implementations ...................................................................................... 790

G. Coffin, F. Florez, M. Salim

B. Bahbahani, R. Jayannathan, K. Heshmat, A. Mohamed

The Man, Technology and Organisation MTO Function Allocation Method Used for Optimal O&M Staffing in a Greenfield Project ................................................................................................. 808

A. Droivoldsmo, E. Nystad

Real-Time Production Surveillance and Optimization at a Mature Subsea Asset ................................................................................................. 820

A Simple Data-Driven Approach to Production Estimation and Optimization ...................................................................................... 836

B. Grimstad, V. Gunnerud, A. Sandes, S. Shamlok, I. Skrondal, V. Uglane, S. Ursin-Holm, B. Foss

Driving to Top Quartile Well, Reservoir and Facility Management Through Process Standardization and System Integration ................................................................................................. 842

Standardized D&C Rig IT Solutions Using a Software-Defined Data Center Approach ...................................................................................... 854

C. Milliet

Deploying the Industrial Internet in Oil & Gas: Challenges and Opportunities ................................................................................................. 861

C. Baudoin

Monitoring of Non-Technical Barriers .................................................................................................................................................. 872

S. Naess, H. Flotaker, M. Kaarstad, A. Droivoldsmo
Optimal Field Development and Control Yields Accelerated, More Reliable, Production: A North Sea Case Study
M. Sefat, K. Muradov, D. Davies

Optique: Simple, Oil & Gas-oriented Access to Big Data in Exploration
M. Skjaeveland, D. Cameron, M. Giese, D. Hovland, A. Waaler, E. Bjorge, K. Tungland

Planning for Safe and Effective Execution of Work: Late Risk Identification
S. Sarshar, S. Haugen, A. Skjerve

Application of Artificial Intelligence in Oilfield Operation and Intervention
L. Akanji, I. Ofi

Author Index
