SPE/ICoTA Coiled Tubing and Well Intervention Conference and Exhibition 2016

Houston, Texas, USA
22 - 23 March 2016

# TABLE OF CONTENTS

Advancements in Fatigue Testing and Analysis ................................................................. 1
    Reichert, B.; Nguyen, T.; Rolovic, R.; Newman, K.

Agitating Explosives in Extended Reach Wells: A Good Idea? ....................................... 12
    Daly, Kerry G.; Kollé, Jack J.

Coiled Tubing Friction in Extended Reach Wells ............................................................. 26
    Livescu, Silviu; Craig, Steven; Aitken, Bill

CT Fatigue Modeling Update ......................................................................................... 42
    Newman, Ken; Kelleher, Patrick

CT100+ Bias Weld Fatigue Life Estimations - Are Adjustments Required? .................... 54
    Padron, Tomas; Aitken, Bill

Deepwater Riserless Operations with Coiled Tubing in the Gulf of Mexico: An Innovative, Safe, and Efficient Plug-and-Abandonment Technique .................................................. 73
    Ottolina, Renny; Torres, Carlos; Rudnik, Alexander

Defining Operational Limits of a Riser-less CT Intervention System ............................ 91
    Kelleher, P.; Newman, K.; Crawford, N.

Design, Development, and Field Use of a Large-Diameter Coil Tubing Downline Solution for Deepwater Pipeline Commissioning Applications ............................................ 105
    Turner, Alan; Gillings, Richard; Cooper, Stewart; Lawson, Kevin; Donald, Gordon

Downhole Machining with Electric Wireline Technology .................................................. 117
    Bermovan, Iwan; Primasari, Indah; Rahmon, Risal; Rachman, Ramadhan; Carolina, Vera; Aldebaran, Rigel

Dynamic CT Modeling Software – Benefits Delivered to the Bottomline ..................... 123
    Yeung, John; Opel, Steve; Smalley, Ed; Leggett, Shawn

Electric Line Deployment of a Stackable Straddle System for Gas Zone Shutoff in a Highly Deviated Extended Reach Borehole .......................................................... 138
    Agayev, F.; Gathman, B.; Bonnett, T.; Osugo, L.; Bjorn, B.

Field Performance of New Coiled Tubing Manufacturing Technology and Comparisons With Laboratory Performance ................................................................. 151
    Rolovic, Radovan; Nguyen, Thu-Ha; Grimaldo, Carmen; Reichert, Bruce

First Use of Multiple Set and Release Barrier Plug Technology on E-Line ...................... 170
    Langaker, Hein Andre; Johansen, Thomas Bergan; Robertsen, Sveinung; Skretting, Per Kristian

Fishing Slickline and Wireline With Coiled Tubing in HP/HT Well: Case History ............ 180
    Diaz, Hector; Duncan, Alan; Ortiz, Jose; Arias, Ruben; Ramirez, Merced

Fishing Slickline Using Wireline-Deployed Robotic Technology for Mechanical Intervention: A Case History ................................................................. 194
    Champagne, Adam; Bueno, Demis; Mosorov, Daniela L.; Batocchio, Marcelo

High-Strength Coiled Tubing can be Used Successfully in Sour Environments if Properly Managed .................................................................................. 201
    Graham-Wright, T.; Elliott, K.; Spoering, R.; Hampson, R.

High-Strength Coiled Tubing Intervention to Set Sand Plugs in an Extended Reach Well in the Dutch North Sea .............................................................................. 214
    Maxwell, Peter; Savenkova, Anna; Hampson, Richard; van Wonderen, Marc

A Hybrid Approach of Coiled Tubing Fatigue Assessment Considering Effects of Localized Damage Based on Magnetic Flux Leakage Measurements .......................... 227
    Liu, Zhanke; Kenison, Mike; Campbell, Greg

Implementing a Multipurpose Tool Solution to Successfully Stimulate an Extended Reach Horizontal Power Water Injector ......................................................... 241
    Eissa, M. A.; Melmood, S.; Jassem, H. M.; Barkat, S.; Bal, M.; Rivadeneira, E. V.; Bragaw, T.; O'Neal, E.

Improved CT Well Cleanout and Milling Procedures Utilizing Only Non-Viscous Cleanout Fluids .............................................................................. 256
    Cano, Valeriano; Cardona, Walther Garcia; Murphy, Christopher; de Araujo, Marcio

Increasing Production Through Selective Acid Stimulation With Coiled Tubing and Self-Aligning Dynamic Divergent Tool: Mexico Offshore Region Case History .................. 282
    Steffani, Michelle Octavia; Inda, David A.; Ramirez, Marcos; Gonzalez, Julian Javier; Vazquez, Jorge; Hernandez, Jovanny Alberto; Sors, Pedro Alfredo; Narvaez, Ivan Ernesto

Localized Extreme Coiled Tubing Wall Loss - Causes and Remediation Practices .......... 301
    Craig, Steven; Padron, Tomas; Smith, Simon; Pinero, Luis; Herald, Joshua

Multiple Tubing Cuts in One Run Improve Operational Efficiency ............................... 320
    MacLeod, Anthony
New Method for Milling Flapper Valves on E-line in Dry Environments .......................................................... 326
Dulic, Almir

Novel Abrasive Perforating with Acid Soluble Material and Subsequent Hydrauljet Assisted Stimulation Provides Outstanding Results in Carbonate Gas Well .......................................................... 333
Chacon, Alejandro; Fadul, Jose Camilo Jimenez; Noguera, Jose

A Novel Method to Control Tool Transport in Well Intervention and Pumpdown Operations in Oil and Gas Services .................................................................................................................................................. 349
Viassolo, Daniel; Coles, Randy; Hill, Jim; Seshadri, Muralidhar

Operational Improvements with the Expansion of an Intelligent Coiled Tubing System to Include Real-Time Tension, Compression, and Torque Data Monitoring .................................................................................. 360
Garner, Louis; Vaci I, Lubos; Livessi, Silvia; Blanco, Diego

Optimization of Coiled Tubing (CT) Performance with the Use of Rapid Tapered Section ........................................ 371
Lee, J.; Yeung, J.; Williams, C.; Graham-Wright, T.; Elliott, K.

Optimization of Single Trip Milling Using 2-Inch Coiled Tubing .............................................................................. 382
Snyder, Elizabeth; Noland, Justin

Optimizing Bridge Plug Milling Efficiency Utilizing Weight-On-Bit to Control Debris Size: A Comparative Study of the Debris Size vs Weight-On-Bit Utilizing Five Bladed Carbide Mill, Tri-Cone and PDC Bits ................................................................. 396
Yeung, John; Fraser, Ted; Thiessen, Kevin; Medvedev, Oleg

Predicting Coiled Tubing Life Should Consider Diameter Growth in Addition to Low-Cycle Fatigue ................ 410
Hampson, Richard; Jantz, Eric; Seidler, Tyler

Predicting the Extended Reach Capabilities of a Water-Hammer Tool with Variable Bypass Control ............. 434
Kolle, Jack J.; Theimer, Anthony R.; Fraser, Andrew W.; Fletcher, Scott

Pushing the Limits of Tractor Technology to Rejuvenate Steam Injection Wells in Canada .................................................. 450
Feliu, Rodrigo; Giem, Greg

Removing Settled Barites From a Wellbore Using an Electrically Powered Well Cleanout System .................. 455
Kleppan, T.; Dahlke, K. O.; Tinnen, B.; Brankovic, M.; Osugo, L.; Danielsen, R.

Reviving Oil Production in a Mature Offshore Field Through a Downhole Coiled Tubing Completion .......... 469
Ramondenc, P.; Franco Delgado, E.; Molero, N.; Almiron de Trujillo, M. D.

Shiftable Multistage Fracture Completion System Allows for More Options While Increasing Efficiency and Reducing Wellbore Interactions ............................................................................................................. 480
Krupala, C. T.; Young, D. A.; Merron, M. J.

Successful Core Drilling Project Using Coiled Tubing From a Riserless Light Well Intervention Vessel in a Norwegian Fjord .......................................................................................................................... 491
Rojas, Susana; Taggart, Michael; Buset, Per

Twenty Years of Successful Coiled Tubing Re-Entry Drilling With E-Line BHA Systems - Improving Efficiency and Economics in Maturing Fields Worldwide ........................................................................ 503
Krueger, Stefan; Pridat, Lars

The Use of Coiled Tubing for Deployment of Electrical Heaters in Downhole Applications .......................... 521
Sandberg, Chet; Thomas, Keith; Penny, Scott

Validation of Injection and Production Rates in a Gas Cavern Obtained from Memory Data Collected Simultaneously at Several Points Over 275-m Distance .................................................................................. 528
Babin, Jacques; Martens, Gézinus; Spark, Grant

A Vibratory Tool Study on Extended Reach Horizontals During Coiled Tubing Drillout in the Eagle Ford Shale ................................................................................................................................................................. 539
McIntosh, T.; Baros, K. J.; Gervais, J. G.; Schultz, R.; Whitworth, J.

Well Surveillance Operation and Data Analysis in Thermal Viscous Crude Project in Kuwait- A Case Study ................................................................................................................................................................ 547
Al-Ballam, Shaitkah; Al-Dashti, Hussain; Pandey, Dharmesh C.; Al-Ballam, Abdulla; Al-Khamees, Waleed K.

Wireline Tractors and Mechanical Services Tools: Comparative Study of Technical Solutions .................. 556
Sheiretov, Todor

Author Index
