2016 International Conference on Learning and Teaching in Computing and Engineering (LaTiCE 2016)

Mumbai, India
31 March – 3 April 2016
# Table of Contents

Message from Conference Chairs ........................................................................................................... ix
Message from Publication Chair ............................................................................................................. x
Conference Organization ........................................................................................................................ xi
Program Committee ................................................................................................................................... xii

## Computing Education Research I

A Competency Structure Model of Object-Oriented Programming ....................................................... 1
   *Matthias Kramer, Peter Hubwieser, and Torsten Brinda*

Building Inclusiveness in a PBL Based Online Robotics Competition:
Challenges and Outcomes ......................................................................................................................... 9
   *Saraswathi Krithivasan, Saurav Shandilya, Sanam Shakya, Kavi Arya, and Krishna Lala*

Different Perceptions of Computer Science ........................................................................................... 14
   *Alexandra Funke, Marc Berges, and Peter Hubwieser*

Towards Deriving Programming Competencies from Student Errors ................................................... 19
   *Marc Berges, Michael Striewe, Philipp Shah, Michael Goedicke, and Peter Hubwieser*

Case-Based Instruction in STEM: Analysis of Student Confidence ....................................................... 24
   *Aman Yadav, Vivian Alexander, and Swati Mehta*

## Instructional Media I

Design and Implementation of MobileEdu M-learning Application for Computing Education in Nigeria:
A Design Research Approach .................................................................................................................... 27
   *Solomon Sunday Oyelere and Jarkko Suhonen*

Generating DFA Construction Problems Automatically ......................................................................... 32
   *Varun Shenoy, Ullas Aparanji, K. Sripradha, and Viraj Kumar*

How Does a Program Run? A Visual Model Based on Annotating Abstract Syntax Trees ....................... 38
   *Venkatesh Choppella, Garima Ahuja, and Aditi Mavalankar*
DSAdvisor: Facilitating Deeper Inquiry in the Data Structures Course ...........................................43
K. V. Sandeep, Shailja Agarwala, R. Sharath, and Viraj Kumar

Instructional Media II
Frame-Based Editing: Combining the Best of Blocks and Text Programming .....................................47
Neil C. C. Brown, Amjad Altadmri, and Michael Kölling
Novis: A Notional Machine Implementation for Teaching Introductory Programming ..................................54
Michael Berry and Michael Kölling
Learning Automation Made Easy through Virtual Labs .................................................................60
Geetha Narayanan and Anjali Deshpande

Computing Education Research II
A Foundation Programme Preparing Students for Future Study in Computing and Engineering Degrees .................................................................66
Kerri Spooner and Tony Clear
Creating a Supportive Learning Environment for Better Student Engagement ......................................71
Gayatri Venugopal-Wairagade
Remote Computer Laboratories: Opportunities for South African Universities ........................................76
Robert Hans

Professional Development
T10kT: Scaling up Professional Development of Teachers: Evidences and Recommendations from Large Scale Implementation .............................................81
Mukta Atrey, Mahendra Parmar, Rachana Shiriskar, and Kanan Dhebar
Sustaining Faculty Professional Development: Evidences from a Localized Professional Learning Community .................................................................89
Shashikant A. Halkude, Manisha A. Nirgude, Dipali A. Awasekar, Satishkumar S. Kashid, Vivek D. Sathe, Mahesh M. Mahant, and Ganesh B. Agalave
Enhancing IT Education: Education Technology for Teacher Training ..................................................94
Sandhya Kode and Kesav Vitthal Nori
A Qualitative Analysis of Synchronous Distance Mode Teacher Training Workshop .................................................99
Kalpana Kannan and K. Narayanan
## Course Design

**APIT: Evidences of Aligning Project Based Learning with Various Instructional Strategies for Enhancing Knowledge in Automobile Engineering** .......................................................... 107  
*Roohshad D. Mistry, Shashikant A. Halkude, and Dipali D. Awasekar*

**Innovative Pedagogical Practices in the Craft of Computing** .............................................................. 115  
*James H. Davenport, Alan Hayes, Rachid Hourizi, and Tom Crick*

**Connecting OOMD Course to Capstone Project Design** ................................................................. 120  
*Suvarna G. Kanakaraddi, Jayalaxmi G. Naragund, and Ashok K. Chikaraddi*

**An Experiential Learning in Web Technology Course** ................................................................. 125  
*Vijaykumar Bhajantri, C. Sujatha, Y. Shilpa, and Manjula Pawar*

## Exhibitions and Posters

**Annotating the Domain Ontology of a Course with ITS Syllabus and Learning Objectives** ................................................................. 130  
*Rekha Ramesh, Sasikumar M., and Sridhar Iyer*

**Realistic Experience without Risk Using Virtual Electrical Machines Laboratory** ................................................................. 132  
*Geetha Narayanan, Anjali Deshpande, and Anagha Narayanan*

**Philosophy of Data Structures in Engineering Education** ................................................................. 134  
*Jayalakshmi G Naragund, Prakash A Kotre, Suvarna Kanakaraddi, and C. Sujata*

## Computing Education Research III

**DiCS-Index: Predicting Student Performance in Computer Science by Analyzing Learning Behaviors** ................................................................. 136  
*Dino Capovilla, Peter Hubwieser, and Philipp Shah*

**Study of a Pedagogy Adopted to Generate Interest in Students Taking a Programming Course** ................................................................. 141  
*Gayatri Venugopal-Wairagade*

**A Culturally Relevant Pedagogical Approach to Computer Science Education to Increase Participation of Underrepresented Populations** ................................................................. 147  
*Timothy Yuen, Maria Arreguin-Anderson, Guadalupe Carmona, and Matthew Gibson*

**Large Programming Task vs Questions-and-Answers Examination in Java Introductory Courses** ................................................................. 154  
*Åse Jevinger and Kristina Von Hausswolff*
Teaching and Learning I
Experience with an Incremental Approach to Teaching Single Processor Operating Systems .................................................................162
    Abhijat Vichare
Enhancing the Cognitive Level of Novice Learners Using Effective Program Writing Skills ..........................................................................................................................167
    Pratibha S. Yalagi, Trupti S. Indi, and Manisha A. Nirgude
DISCERN: Discovery Learning with Student Defined Problems ..........................................................172
    Vijay T. Raisinghani

Teaching and Learning II
Teaching and Learning of Divergent and Convergent Thinking through Open-Problem Solving in a Data Structures Course .................................................................178
    Patil Deepti Reddy, Sridhar Iyer, and M. Sasikumar
Efficacy of a Flipped Method in an Undergraduate Class at IIT Bombay ........................................186
    Kannan M. Moudgalya, Kiran Kumar Eranki, Sohinee Ganguly, Shamika Mohanan, and Durga Raja
Use of Java Exception Stack Trace to Improve Bug Fixing Skills of Intermediate Java Learners .................................................................................................................................194
    Trupti S. Indi, Pratibha S. Yalagi, and Manisha A. Nirgude

Author Index ..................................................................................................................................199
