Volume 762

17th International Workshop on Advanced Computing and Analysis Techniques in Physics Research (ACAT2016)

18–22 January 2016, Valparaíso, Chile

Accepted papers received: 28 September 2016
Published online: 21 November 2016

Preface

011001
OPEN ACCESS
17th International Workshop on Advanced Computing and Analysis Techniques in Physics Research (ACAT 2016)

011002
OPEN ACCESS
Peer review statement

Papers

T1 - Computing Technology for Physics Research

012001
OPEN ACCESS
A new type of smart pointer for data object reference both in memory and in root files

T Li and X T Huang.....1

012002
OPEN ACCESS
A scalable architecture for online anomaly detection of WLCG batch jobs

E Kuehn, M Fischer, M Giffels, C Jung and A Petzold.....6
The Run-2 ATLAS Trigger System

A Ruiz Martínez on behalf of the ATLAS Collaboration.....11

ATLAS EventIndex monitoring system using the Kibana analytics and visualization platform

ATLAS FTK a - very complex - custom super computer

N Kimura on behalf of the ATLAS Collaboration.....24

Automated Finite State Workflow for Distributed Data Production

L Hajdu, L Didenko, J Lauret, J Amol, W Betts, H J Jang and S Y Noh.....29

Belle II Software

T Kuhr, M Ritter for the Belle II Software Group.....36

Bringing Experiment Software to the Web with VISPA

M Erdmann, B Fischer, R Fischer, C Glaser, F Heidemann, G Müller, T Quast, M Rieger, M Urban, D van Asseldonk, R F von Cube and C Welling.....41
012009
OPEN ACCESS
CLARA: CLAS12 Reconstruction and Analysis Framework

V Gyurgyan, S Mancilla and R Oyarzún.....46

012010
OPEN ACCESS
Cluster Optimisation using Cgroups at a Tier-2

G Qin, G Roy, D Crooks, S C Skipsey, G P Stewart and D Britton.....51

012011
OPEN ACCESS
Data Locality via Coordinated Caching for Distributed Processing

M Fischer, E Kuehn, M Giffels and C Jung.....58

012012
OPEN ACCESS
Dynamic provisioning of a HEP computing infrastructure on a shared hybrid HPC system

Konrad Meier, Georg Fleig, Thomas Hauth, Michael Janczyk, Günter Quast, Dirk von Suchodoletz and Bernd Wiebelt.....63

012013
OPEN ACCESS
Elastic Extension of a CMS Computing Centre Resources on External Clouds

012014
OPEN ACCESS
Electromagnetic Physics Models for Parallel Computing Architectures

A P Kryukov and A P Demichev.....80

Federated data storage and management infrastructure

A Zarochentsev, A Kiryanov, A Klimentov, D Krasnopevtsev and P Hristov.....85

Evaluating non-relational storage technology for HEP metadata and meta-data catalog

M A Grigorieva, M V Golosova, M Y Gubin, A A Klimentov, V V Osipova and E A Ryabinkin.....94

Exploiting multicore compute resources in the CMS experiment

J E Ramírez, A Pérez-Calero Yzquierdo, J M Hernández on behalf of the CMS Collaboration.....99

GeantV: from CPU to accelerators

Hardware Demonstrator of a Level-1 Track Finding Algorithm with FPGAs for the Phase II CMS Experiment

D. Cieri on behalf of the CMS Collaboration and of the Time Multiplexed Track Trigger group.....112

Integration Of PanDA Workload Management System With Supercomputers for ATLAS and Data Intensive Science

A Klimentov, K De, S Jha, T Maeno, P Nilsson, D Oleynik, S Panitkin, J Wells and T Wenaus.....117

The impact of Moore's Law and loss of Dennard scaling: Are DSP SoCs an energy efficient alternative to x86 SoCs?

L Johnsson and G Netzer.....122

Simulations and study of a new scheduling approach for distributed data production

Dzmitry Makatun, Jérôme Lauret, Hana Rudová and Michal Šumbera.....144

Multi-threaded software framework development for the ATLAS experiment

G A Stewart, J Baines, T Bold, P Calafiura, A Dotti, S A Farrell, C Leggett, D Malon, E Ritsch, S Snyder, V Tsulaia, P Van Gemmeren, B M Wynne and for the ATLAS Experiment.....151

Performance and Advanced Data Placement Techniques with Ceph's Distributed Storage System

M D Poat and J Lauret.....156
OPEN ACCESS
Reducing power usage on demand

G Corbett and A Dewhurst.....163

OPEN ACCESS
Scaling up ATLAS Event Service to production levels on opportunistic computing platforms

D Benjamin, J Caballero, M Ernst, W Guan, J Hover, D Lesny, T Maeno, P Nilsson, V Tsulaia, P van Gemmeren, A Vaniaachine, F Wang, T Wenaus and on behalf of the ATLAS Collaboration.....168

OPEN ACCESS
The ATLAS EventIndex: data flow and inclusion of other metadata

D Barberis, S E Cárdenas Zárate, A Favareto, A Fernandez Casani, E J Gallas, C Garcia Montoro, S Gonzalez de la Hoz, J Hrivnac, D Malon, F Prokoshin, J Salt, J Sanchez, R Toebbicke, R Yuan on behalf of the ATLAS Collaboration.....173

OPEN ACCESS
The design and performance of the ATLAS Inner Detector trigger for Run 2 LHC Collisions at $\sqrt{s}=13$ TeV

C Kilby on behalf of the ATLAS Collaboration.....179

OPEN ACCESS
The software system for the Control and Data Acquisition for the Cherenkov Telescope Array

P Wegner, M FüBling, I Oya, L Hagge, U Schwanke, J Schwarz, G Tosti, V Conforti, E Lyard, R Walter, P Oliveira Antonino and A Morgenstern.....184
Using NERSC High-Performance Computing (HPC) systems for high-energy nuclear physics applications with ALICE

Markus Fasel.....189

T2 - Data Analysis - Algorithms and Tools

A new Riemann fit for circular tracks

R Frühwirth and A Strandlie.....194

A novel method for event reconstruction in Liquid Argon Time Projection Chamber

M Diwan, M Potekhin, B Viren, X Qian and C Zhang.....199

Experiments using machine learning to approximate likelihood ratios for mixture models

K Cranmer, J Pavez, G Louppe and W K Brooks.....204

Image Processing, Computer Vision, and Deep Learning: new approaches to the analysis and physics interpretation of LHC events

A. Schwartzman, M. Kagan, L Mackey, B. Nachman and L. De Oliveira.....209

Reweighting with Boosted Decision Trees

Alex Rogozhnikov.....219
Constrained fits with non-Gaussian distributions

R. Frühwirth and O. Cencic.....224

The CptnHook Profiler - A tool to investigate usage patterns of mathematical functions.

D. Piparo and V. Innocente.....229

Data Mining as a Service (DMaaS)

New data reduction protocol for Bragg reflections observed by TOF single-crystal neutron diffractometry for protein crystals with large unit cells

Katsuaki Tomoyori and Taro Tamada.....239

Deconvolving the detector in Fourier space

Joseph Boudreau, Carlos Escobar, James Mueller and Jun Su.....246

Density Estimation Trees as fast non-parametric modelling tools

Lucio Anderlini.....251

Development of Machine Learning Tools in ROOT

S. V. Gleyzer, L. Moneta and Omar A. Zapata.....256
012044
OPEN ACCESS
**GPUs for statistical data analysis in HEP: a performance study of GooFit on GPUs vs. RooFit on CPUs**

Alexis Pompili, Adriano Di Florio (on behalf of the CMS Collaboration).....263

012045
OPEN ACCESS
**Inclusive Flavour Tagging Algorithm**

Tatiana Likhomanenko, Denis Derkach and Alex Rogozhnikov.....268

012046
OPEN ACCESS
**Novel real-time alignment and calibration of LHCb detector for Run II and tracking for the upgrade.**

Renato Quagliani on behalf of the LHCb Collaboration.....273

012047
OPEN ACCESS
**Parallel 4-Dimensional Cellular Automaton Track Finder for the CBM Experiment**

Valentina Akishina and Ivan Kisel.....280

012048
OPEN ACCESS
**Predicting dataset popularity for the CMS experiment**

V. Kuznetsov, T. Li, L. Giommi, D. Bonacorsi and T. Wildish.....285

012049
OPEN ACCESS
**Ring-shaped Calorimetry Information for a Neural Egamma Identification with ATLAS Detector**

João Victor da Fonseca Pinto on behalf of the ATLAS Collaboration.....296
Segmentation of HER2 protein overexpression in immunohistochemically stained breast cancer images using Support Vector Machines

Raquel Pezoa, Luis Salinas, Claudio Torres, Steffen Härtel, Cristián Maureira-Fredes and Paola Arce.....301

Delphes 3: Latest Developments

Michele Selvaggi.....309

Support Vector Machines and Generalisation in HEP

A. Bethani, A. J. Bevan, J. Hays and T. J. Stevenson.....315

The Matrix Element Method at the LHC: status and prospects for Run II

Sébastien Wertz.....320

Upgrading the ATLAS fast calorimeter simulation

Z Hubacek on behalf of the ATLAS Collaboration.....326

Vertex finding by sparse model-based clustering

R Frühwirth, K Eckstein and S Frühwirth-Schnatter.....332
Alternative method of Reduction of the Feynman Diagrams to a set of Master Integrals
Julio Borja and Igor Kondrashuk.....337

Automating QCD amplitudes with on-shell methods
Simon Badger.....343

Automation of analytical calculations in high energy physics with Redberry CAS
Stanislav Poslavsky.....351

Automation of NLO processes and decays and POWHEG matching in WHIZARD
Jürgen Reuter, Bijan Chokoufé, André Hoang, Wolfgang Kilian, Maximilian Stahlhofen, Thomas Teubner and Christian Weiss.....356

Calculating four-loop massless propagators with Forcer
T Ueda, B Ruijl and J A M Vermaseren.....363

The Mathematica package TopoID and its application to the Higgs boson production cross section
Jens Hoff.....368
Computer system SANC: its development and applications

A Arbuzov, D Bardin, S Bondarenko, P Christova, L Kalinovskaya, R Sadykov, A Sapronov and T Riemann.....373

Mass of the bottom quark from Upsilon(1S) at NNNLO: an update

César Ayala, Gorazd Cvetič and Antonio Pineda.....381

FeynCalc 9

Vladyslav Shtabovenko.....387

FormCalc 9 and Extensions

T. Hahn, S. Paßehr and C. Schappacher.....392

Fun with higher-loop Feynman diagrams

Thomas Luthe and York Schröder.....400

Generalizations of polylogarithms for Feynman integrals

Christian Bogner.....405

Geometrical splitting and reduction of Feynman diagrams

Andrei I Davydychev.....413
OPEN ACCESS

Higgs Boson production in association with jets in gluon-gluon fusion
G Luisoni, N Greiner, S Höche, M Schönherr, J Winter and V Yundin.....419

OPEN ACCESS

High Performance and Increased Precision Techniques for Feynman Loop Integrals
K Kato, E de Doncker, T Ishikawa, J Kapenga, O Olagbemi and F Yuasa.....426

OPEN ACCESS

Making extreme computations possible with virtual machines
J Reuter, B Chokoufe Nejad and T Ohl.....431

OPEN ACCESS

Modelling the nuclear parton distributions
S A Kulagin.....437

OPEN ACCESS

Numerical multi-loop calculations: tools and applications

OPEN ACCESS

Search for Physics beyond Standard Model at the Precision Frontiers
A. Aleksejevs, S. Wu, S. Barkanova, Y. Bystritskiy and V. Zykunov.....452
Prediction of the higher-order terms based on Borel resummation with conformal mapping

M.V. Kompaniets.....457

SModelS: A Tool for Making Systematic Use of Simplified Models Results

Wolfgang Waltenberger (on behalf of the SModelS group).....462

Track 3: Computations in theoretical physics — techniques and methods

Gionata Luisoni, Stanislav Poslavsky and York Schröder.....467

From perturbative calculations of the QCD static potential towards four-loop pole-running heavy quarks masses relation

A. L. Kataev and V. S. Molokoedov.....477
