2016 IEEE 21st International Workshop on Computer Aided Modelling and Design of Communication Links and Networks (CAMAD 2016)

Toronto, Ontario, Canada
23-25 October 2016
# Table of Contents

## 2016 IEEE 21st International Workshop on Computer Aided Modelling and Design of Communication Links and Networks (CAMAD)

### Regular Session 1

<table>
<thead>
<tr>
<th>Title</th>
<th>Authors</th>
</tr>
</thead>
<tbody>
<tr>
<td>Variable Step-Size Strategy for Distributed Parameter Estimation of Compressible Systems in WSNs</td>
<td>Muhammad Omer Bin Saeed (College of E&amp;ME, NUST, Pakistan), Azzedine Zerguine (KFUPM, Saudi Arabia), Muhammad S. Sohail (Hong Kong University of Science and Technology, Hong Kong), Saad Rehman (NUST COLLEGE OF EME, Pakistan), Waleed Ejaz (Ryerson University, Canada), Alagan Anpalagan (Ryerson University, Canada)</td>
</tr>
<tr>
<td>On the Performance of Vehicular Communications with a Measurement-Based Radio Propagation Model</td>
<td>Saeed Bastani (Lund University, Sweden), Daniel Tomás (UPC, Spain), Mehmet Karaca (Lund University, Sweden)</td>
</tr>
<tr>
<td>Procedure-Based Development Platform for Communication Protocol Stack Software</td>
<td>Taeil Eom (Samsung Electronics Co., Ltd., Korea), Woo-Yong Lee (Samsung Electronics Co., Ltd., Korea), Do-Young Lee (Samsung Electronics Co., Ltd., Korea), Jong-Han Kim (Samsung Electronics Co., Ltd., Korea), Woon-Haing Hur (Samsung Electronics Co., Ltd., Korea)</td>
</tr>
<tr>
<td>Q-Learning Enhanced Gradient Based Routing for Balancing Energy Consumption in WSNs</td>
<td>Bazyli Debowski (University of Guelph, Canada), Petros Spachos (University of Guelph, Canada), Shawki Areibi (University of Guelph, Canada)</td>
</tr>
<tr>
<td>Efficient Algorithm Selection for Packet Classification using Machine Learning</td>
<td>Mohammed Elmahgiubi (University of Guelph, Canada), Omar F. Ahmed (Advanced Micro Devices &amp; AMD, Canada), Shawki Areibi (University of Guelph, Canada), Gary Grewal (University of Guelph, Canada)</td>
</tr>
</tbody>
</table>

### Regular Session 2

<table>
<thead>
<tr>
<th>Title</th>
<th>Authors</th>
</tr>
</thead>
<tbody>
<tr>
<td>On the Upper Bound for the Time to Rendezvous in Multi-hop Cognitive Radio Networks</td>
<td>Vitalio Alfonso Reguera (Universidad Central de Las Villas, Cuba), Erik Ortiz Guerra (Universidad Central Marta Abreu de Las Villas, Cuba), Carlos Manuel Garcia Algora (VUB, Belgium), Ann Nowé (Vrije Universiteit Brussel, Belgium), Kris Steenhaut (Vrije Universiteit Brussel, Belgium)</td>
</tr>
<tr>
<td>Latency-Aware Segmentation and Trust System Placement in Smart Grid SCADA Networks</td>
<td>Md Mahmud Hasan (University of Ottawa, Canada), Hussein T. Mouftah (University of Ottawa, Canada)</td>
</tr>
<tr>
<td>On the Performance of a Dual-hop Network with a Mobile Relay in a Nakagami Fading Environment</td>
<td>Constantine Mukasa (Florida Atlantic University, USA), Valentine Aalo (Florida Atlantic University, USA), George Efthymoglou (University of Piraeus, Greece)</td>
</tr>
<tr>
<td>Coverage Probability of the Downlink in HetNets Considering User Clustering and Dependence</td>
<td>Chao Li (University of Ottawa, Canada), Abbas Yongacoglu (University of Ottawa, Canada), Claude D’Amours (University of Ottawa, Canada)</td>
</tr>
<tr>
<td>Least Square Optimization of Pilot Sequence Length for Massive MIMO Systems</td>
<td>Noha Hassan (Ryerson University, Canada), Kaamran Raahemifar (Ryerson University, Canada), Xavier N. Fernando (Ryerson University, Canada)</td>
</tr>
</tbody>
</table>
An Efficient Method for Mobile Big Data Transfer Over HetNet in Emerging 5G Systems
Richa Siddavaatam (Ryerson University, Canada), Isaac Woungang (Ryerson University, Canada), Glauco Carvalho (Ryerson University & DABNEL, Canada), Alagan Anpalagan (Ryerson University, Canada) ................................................................. 59

Dynamic Traffic Steering of Multi-Tenant Virtualized Network Functions in SDN enabled Data Centers
Aris Leivadeas (Carleton University, Canada), Matthias Falkner (Cisco, Germany), Ioannis Lambadaris (Carleton University, Canada), George Kesidis (Pennsylvania State University, USA) ........................................................................................................ 65

Performance Analysis of Virtualized Network Functions on Virtualized Systems Architectures
Matthias Falkner (Cisco, Germany), Aris Leivadeas (Carleton University, Canada), Ioannis Lambadaris (Carleton University, Canada), George Kesidis (Pennsylvania State University, USA) ........................................................................................................ 71

A Novel SDN Controller for Traffic Recovery and Load Balancing in Data Centers
Davide Adami (CNIT Pisa Research Unit, University of Pisa, Italy), Stefano Giordano (University of Pisa, Italy), Michele Pagano (University of Pisa, Italy), Giuseppe Portaluri (University of Pisa, Italy) ........................................................................................................ 77

Bayesian Workload Scheduling in Multimedia Cloud Networks
Lilatul Ferdouse (Ryerson University, Canada), Mushu Li (Ryerson University, Canada), Ling Guan (Ryerson University, Canada), Alagan Anpalagan (Ryerson University, Canada) ........................................... 83

Regular Session 4

Optimal Charging Framework for Electric Vehicles on the Wireless Charging Highway
Cuiyu Kong (North Carolina State University, USA), Michael Devetsikiotis (University of New Mexico, USA) ........................................................................................................ 89

Tuning of LTE/LTE-A DRX parameters
Hawar Ramazanali (Halmstad University & Saab Training & Simulation, Sweden), Alexey Vinel (Halmstad University, Sweden) ........................................................................................................ 95

Regular Session 5

Impact of Orientation and Wire Placement on Received Signal Strengths
Nicholas M. Boers (MacEwan University, Canada), Derek Mak (MacEwan University, Canada) .......... 101

Detection of M-ary OFDM Systems with CPM Mapper over Multipath Channels
Emammer Shafter (University of Western Ontario, Canada) ................................................................. 107

On SC-FDMA Resource Allocation with Power Control
Ghafour Ahani (Komar University of Science and Technology, Iraq), Di Yuan (Linköping University, Sweden), Wei Ding (Ranplan Wireless Network Design Ltd., United Kingdom) ........................................ 112

Joint Uplink-Downlink Carrier Aggregation Scheme in LTE-A
Nizar Zorba (Qatar University, Qatar), Christos Verikoukis (CTTC & UB, Spain) .................................. 117

Dynamic Power Adjustment and Resource Allocation Framework for LTE Networks
Gökhan Seçinti (Istanbul Technical University, Turkey), Muge Erel Özçevik (Istanbul Technical University, Turkey), Kaushik Chowdhury (Northeastern University, USA), Berk Canberk (Istanbul Technical University, Turkey) .................................................................................. 122
Regular Session 6

On the Classification of Mobile Broadband Applications
I-Ching Hsieh (National Chiao Tung University, Taiwan), Li-Ping Tung (National Chiao Tung University, Taiwan), Bao-Shuh Lin (National Chiao Tung University, Taiwan) .................................................. 128

Using Mobile Environment Sensors for Wellness Monitoring
Madison McCarthy (University of Guelph, Canada), Petros Spachos (University of Guelph, Canada) .................................................................................................................................................. 135

Network Coding in Internet of Things
Farzad Amirjavid (University of Toronto, Canada), Petros Spachos (University of Guelph, Canada), Liang Song (OMESH Networks Inc., Canada), Konstantinos Plataniotis (University of Toronto, Canada) ........................................................................................................ 140

IEEE CAMAD 2016 - Demo Track: IEEE 21st International Workshop on Computer Aided Modelling and Design of Communication Links and Networks (CAMAD): Demo Track

Demo Session

Madison McCarthy (University of Guelph, Canada), Petros Spachos (University of Guelph, Canada) .................................................................................................................................................. 146

A Mobile Platform for Sociability-based Continuous Identification
Fazel Anjomshoa (Clarkson University, USA), Burak Kantarci (University of Ottawa, Canada), Melike Erol-Kantarci (University of Ottawa, Canada), Stephanie Schuckers (Clarkson University, USA) .................................................................................................................................................. 149

Monitoring Colluding Behavior in MANETs using Game Theory
Laurent Njilla (Air Force Research Laboratory, USA), Harold Ouete (University of Douala, Cameroon), Dean Doungwa (University of Douala, Cameroon) ........................................................................................................ 152

overload-states downlink resource scheduling and its challenges towards 5G networks
Nasim Ferdosian (Universiti Putra Malaysia, Malaysia), Mohamed Othman (Universiti Putra Malaysia, Malaysia), Borhanuddin M Ali (Faculty of Engineering & Universiti Putra Malaysia, Malaysia), Kweh Yeah Lun (Universiti Putra Malaysia (UPM), Malaysia) ........................................................................................................ 154

3D Simulation Software Platform For 5G Channel Modeling and Analysis
Florian Letourneux (Siradel, Canada), Yves Lostanlen (SIRADEL & University of Toronto, Canada), Yoann Corre (SIRADEL, France) .................................................................................................................................................. 157

Regular Session 7

On QoE-awareness through Virtualized Probes in 5G Networks
Christos Tselios (University of Patras & Citrix Inc., Greece), George Tsolis (Citrix Systems Inc., Greece) .................................................................................................................................................. 159

Simulation Tools for the Design of Mesh Backhaul and Small-cell Networks in Millimeter-wave Band
Yoann Corre (SIRADEL, France), Laurent Mavriel (SIRADEL, France), Yves Lostanlen (SIRADEL & University of Toronto, Canada) .................................................................................................................................................. 165
A Study on Energy Used to Deliver H.264/AVC and H.265/HEVC Video Content
Mohammadhassan Safavi (Lund University, Sweden), Saeed Bastani (Lund University, Sweden), Zhi Zhang (Lund University, Sweden), Martti Forsell (VTT, Finland), Olli Mämmelä (VTT Technical Research Centre of Finland, Finland), Bjorn Landfeldt (Lund University, Sweden) ................................................................. 170

Priority based VM2M communications over LTE
Nargis Khan (Ryerson University, Canada), Jelena Mišić (Ryerson University, Canada), Vojislav B. Mišić (Ryerson University, Canada) ................................................................. 177

Special Session 1

Side cooperative secret key generation in peer-to-peer systems
Shuangshaung Zhu (University of Shanghai for Science and Technolgy, P.R. China), Ya Liu (University of Shanghai for Science and Technology, P.R. China), Liang Song (OMESH Networks Inc., Canada) .................................................................................................................. 183

Cloud-based Smart Waste Management for Smart Cities
Mohammad Aazam (Carleton University, Canada), Marc St-Hilaire (Carleton University, Canada), Chung-Horng Lung (Carleton University, Canada), Ioannis Lambadaris (Carleton University, Canada) .................................................................................................................. 188

Wireless Infrastructure Deployment Model for Sudden-Onset Disasters through real-time monitoring
Eyal Berliner (Ariel University Center, Israel), Boaz Benmoshe (Ariel University Center, Israel), Yuval Hadas (Bar Ilan University, Israel), Amit Dvir (Ariel University Center of Samaria, Israel) .................................................................................................................. 194

Power Management Modelling of a Photovoltaic System for a Wireless Sensor Network
Ahmed H. Shaltout (University of Guelph, Canada), Petros Spachos (University of Guelph, Canada), Stefano Gregori (University of Guelph, Canada) ................................................................. 201

Special Session 3

A Novel 2D Non-Stationary Wideband Massive MIMO Channel Model
Carlos F Lopez (Heriot-Watt University, United Kingdom), Chengxiang Wang (Heriot-Watt University, United Kingdom), Rui Feng (Shandong University, P.R. China) ................................................................. 207

Assessing the Performance of a 60-GHz Dense Small-Cell Network Deployment from Ray-Based Simulations
Yoann Corre (SIRADEL, France), Romain Charbonnier (SIRADEL, France), Mohammed Zahid Aslam (SIRADEL, France), Yves Lostanlen (SIRADEL & University of Toronto, Canada) ................................................................. 213

Analysis of Downlink and Uplink Decoupling in Dense Cellular Networks
Alexis I. Aravanis (Universitat Politècnica de Catalunya, Greece), Olga Muñoz-Medina (Technical University of Catalonia, Spain), Antonio Pascual-Iserte (Universitat Politècnica de Catalunya, Spain), Josep Vidal (Universitat Politècnica de Catalunya, Spain) ................................................................. 219

Special Session 2

On the Performance of Cell-Free Massive MIMO with Short-Term Power Constraints
Giovanni Interdonato (Linköping University, Ericsson, Sweden), Hien Ngo (Linköping University, Sweden), Erik G. Larsson (Linköping University, Sweden), Pål Frenger (Ericsson Research, Ericsson AB, Sweden) .................................................................................................................. 225

Multi-Cell Massive MIMO Performance with Double Scattering Channels
Trinh Van Chien (Linköping University, Sweden), Emil Björnson (Linköping University, Sweden), Erik G. Larsson (Linköping University, Sweden) .................................................................................................................. 231

LED Beam Steering for Visible Light Li-Fi Communications
Christopher Mekhiel (Ryerson University, Canada), Xavier N. Fernando (Ryerson University, Canada) .................................................................................................................. 237

Smart Street Lighting over Narrowband PLC in a Smart City: The Triangulum Case Study
Augustine Ikpehai (Manchester Metropolitan University, United Kingdom), Bamidele Adebisi (Manchester Metropolitan University, United Kingdom), Rupak Kharel (Manchester Metropolitan University, United Kingdom) .................................................................................................................. 242

Collision Resolution MAC Algorithm for Vehicular Ad Hoc Networks
Muhammed Nur Avcil (Marmara University, Turkey), Mesut Gurle (Marmara University, Turkey), Mujdat Soyturk (Marmara University, Turkey) .................................................................................................................. 248
