2016 13th Web Information Systems and Applications Conference (WISA 2016)

Wuhan, China
23-25 September 2016
# Table of Contents

Message from the Chairs ............................................................................................................................................ ix
Message from the Program Committee
Chairs ......................................................................................................................................................................... x
Organizing Committee ............................................................................................................................................... xi
Program Committee ................................................................................................................................................... xiii
Reviewers .................................................................................................................................................................. xv

---

**Session 1A: Web Information Management I**

File Sharing Strategy Based on WebRTC .................................................................................................................... 3
   Duan Quanfeng and Liang Zhenghe

Location-Based Two-Phase Clustering for Web Service QoS Prediction ................................................................. 7
   Yuan Yuan, Weishi Zhang, and Xiuguo Zhang

Augmented Reality in IT Operation Management of Power System ........................................................................ 12
   Li Li, Wang Xing-zhi, and Xu Yao-qiang

DQFIRD: Towards Data Quality-Based Filtering and Ranking of Datasets for Data Portals ................................. 18
   Wenze Xia, Zhuoming Xu, Jie Wei, and Haimei Tian

DQAF: Towards DQV-Based Dataset Quality Annotation Using the Web Annotation Data Model ...................... 24
   Jie Wei, Zhuoming Xu, and Wenze Xia

Efficient Subgraph Matching in Large Graph with Partitioning Scheme ............................................................. 28
   Xiaofang Xie, Zhongwei Li, and Haiwei Zhang

Some Nonlocal Variational Models Along with Their Fast Algorithms ............................................................... 34
   Shixiu Zheng, Zhengkuan Pan, Jinming Duan, Wenqi Lu, and Cunliang Liu
Session 1B: Web Search and Data Mining I

A New Method of K-Means Clustering Algorithm with Events Based on Variable Time Granularity .................................................................41
  Mengxing Huang and Hongjing Lin

An Efficient Algorithm for XML Keyword Search Based on Interval Encoding ..........................................................45
  Hao Kun, Zhang Xiaolin, Liu Lixin, and Zhang Huanxiang

A Multilayer Collaborative Filtering Recommendation Method in Electricity Market ..................................................................................................................51
  Li Tao, Minghai Jiao, Yong Dai, and Chuncheng Gao

Recommendation Based on Bipartite Network of Two-Step Model .................................................................56
  Liting Wei and Yun Li

Sentiment Analysis of Chinese Micro-Blog Based on Classification and Rich Features .................................................................61
  Jiayuan Ding, Yongquan Dong, Tongfei Gao, Zichen Zhang, and Yali Liu

Differential Evolution-Based Fusion and Its Properties for Web Search ..................................................................................67
  Jinsong Xia, Chunlin Xu, and Shengli Wu

Combining Influence and Sensitivity to Factorize Matrix for Multi-Context Recommendation ..................................................71
  Qingna Zhao, Yue Kou, Derong Shen, Tiezhen Nie, and Ge Yu

Session 2A: Cloud and Big Data Management

Research on Multi-Objective Dynamic Cloud Service Strategy .................................................................................79
  Chun-Yan Liu and Cheng-Ming Zou

Research of Clinical Decision Support System Based on Distributed Environment ...............................................................................................................83
  Yiming Yang, Liang Xiao, and Jingbai Tian

Instant Traveling Companion Discovery Based on Traffic-Monitoring Streaming Data ..................................................89
  Xiongbin Wang, Chen Liu, and Meiling Zhu

MOSTER: A Novel Truth Discovery Method for Multiple Conflicting Information ...................................................95
  Kehui Song, Zhifan Yang, Yumei Liu, Fan Zhang, and Ying Zhang

Research on Cloud Resource Optimization Model Based on Users' Satisfaction ..................................................99
  Zhi-guang Ao, Ming-hai Jiao, Ke-ning Gao, and Xing-wei Wang

Active Customization-Oriented Adaptive SOA with Runtime Exception Handling ................................................103
  Bin Wen, Ziqiang Luo, and Yazhi Wen
A Recommendation System Algorithm Based on Large Scale Internet Environment ................................................................. 108
  Xifeng Liu, Zhijian Wang, and Feng Ye

Session 2B: Web Search and Data Mining II

A Case Study of Mining and Correlation Analysis of Public Security Events in Heterogeneous and Unstructured Web Messages ......................................................... 115
  Yinghui Wang, Bo Wang, and Xuelun Li

Study on Short Text Classification with Integrated Algorithm ................................................................. 121
  Dexin Zhao, Nana Du, and Liangliang Qin

An Educational Resource Retrieval Mechanism Based on Lucene and Topic Index ................................................................. 125
  Xiaomei Chen and Lizhen Xu

Research on Optimization of Clustering by Fast Search and Find of Density Peaks ................................................................. 129
  Jinlong Zheng, Hao Sun, Mingxin Zhang, and Guohai Zhang

Group Detection for Specific Topic on Micro-Blog ........................................................................... 134
  Xiaolei Fu, Ming Gao, Qiang Liu, and Hongmei Liu

A Hybrid Method Based on Cuckoo Search and Krill Herd Optimization with Differential Evolution ................................................................. 138
  Zichen Zhang, Yongquan Dong, and Tongfei Gao

Answer Quality Prediction Joint Textual and Non-Textual Features ................................................................. 144
  Hongmei Liu, Jiuming Huang, Chao An, and Xiaolei Fu

A Density-Based Seed-Centric Community Detection Algorithm ................................................................. 149
  Wei Liu, Mei Chen, Kun Liu, Yang Zhou, and Xiaoyun Chen

Session 3A: Web Information Management II

The Implementation of Database Partitioning Based on Streaming Framework ................................................................. 157
  Mengyu Guo and Hong Kang

Towards Interactive Gathering of DUV-Based Dataset Usage Information ................................................................. 163
  Xiutao Xia, Zhuoming Xu, and Zhaoheng Liu

Towards Systematic Analysis and Summary of DUV-Based Dataset Usage Information ................................................................. 169
  Zhaoheng Liu, Zhuoming Xu, and Xiutao Xia

A Health QA with Enhanced User Interfaces ................................................................. 173
  Jie Li, Hongxia Liu, Yong Zhang, and Chunxiao Xing

An Improved Flower Pollination Algorithm ................................................................. 179
  Mingxin Zhang, Jiao Dai, Jinlong Zheng, and Guohai Zhang
On the Performance of Intel SGX .................................................................184
ChongChong Zhao, Daniyaer Sailuding, Hongliang Tian, Yong Zhang,
and ChunXiao Xing

An Intelligent Test Paper Generation Method Based on Genetic Particle
Swarm Optimization ..................................................................................188
Zhenfeng Hu and Chunxiao Xing

Session 3B: Web Application and Security
A Method to Identify Exercises from Web Resources ........................................197
XiangDong Che, Yukun Li, and XinZeng Zhang

Enhancing Data Secrecy with Segmentation Based Isolation ..............................203
Chi Zhang, Hui He, Xiaoguang Wang, Yichen Li, Xin Gao, and Yong Qi

Space Disturbing Based Uncertainty Trajectory Anonymous Algorithm
in Trajectory Databases Publication ............................................................209
Fengyun Li, Peng Li, and Jinhua Yang

Effective Privacy Preservation over Composite Events with Markov
Correlations ...............................................................................................215
Fangfang Li, Ning Wang, Yu Gu, and Zhe Chen

Provable Secure Node Authentication Protocol for Wireless Sensor Networks ........221
Liu Zhimeng and Zhao Yanli

Hybrid Intrusion Detection Method Based on Improved Bisecting K-Means
in Cloud Computing ...................................................................................225
Xinlong Zhao and Weishi Zhang

Research on Android Access Control Based on Isolation Mechanism ....................231
Ying Peng, Mingxin Zhang, Jinlong Zheng, and Zhenjiang Qian

Author Index ..................................................................................................236
