*Additive Manufacturing of Metals: Microstructure, Material Properties, and Product Performance*

- Characterization of Selective Laser Melted 304L
  - Wes Everhart, Paul Korinko, Marissa Reigel, Michael Morgan, and John Bobbitt

- Investigation of the Solidification Effects of Microstructures of Laser Melted Stainless Steel
  - E.F. Özel, H. Mozaffari-Jovein, and C. Müller

- The Effect of Beam Spot Size on Melt Pool Geometry in Direct Metal Additive Manufacturing Processes
  - Zachary Francis and Jack Beuth

- Effect of Hot Isostatic Pressing on Mechanical Properties and Dimensional Accuracy of Intentionally Porous Ti6Al4V Parts Made by Selective Laser Melting
  - Raya Mertens, Bart Boeckmans, Lore Thijs, Jan Van Humbeeck, and Jean-Pierre Kruth

- Analysis of Residual Stress Formation in Additive Manufacturing of Ti-6Al-4V
  - Mauritz Möller, Dirk Herzog, Tim Wischeropp, Claus Emmelmann, Christina Krywka, Peter Staron, and Maximilian Munsch

- Carbide Formation in Additive Manufacturing of Single-Crystal Superalloy René N5 Processed through Scanning Laser Epitaxy
  - Amrita Basak and Suman Das

- Effect of Heat Treatment on the Microstructures of MAR-M247 Fabricated through Scanning Laser Epitaxy
  - Amrita Basak and Suman Das

- Microstructure, Tensile Properties, and Fatigue Crack Growth Behavior in Inconel 718 Manufactured by Laser Engineered Net Shaping
  - Yuwei Zhai and Diana Lados

- Damage Development in Thin Walled Selective Laser Melted Structures
  - Jonas Saarimäki, Johan Moverare, and Håkan Brodin

- Reliability Estimation of Additive Manufacturing Process Parameters Using Surrogate Modeling
  - Azadeh Keshtgar, Kai Wing Kelvin Leung, and Nagaraja Iyyer

- A Partial Solution to Modeling the Anisotropic Material Properties of Fused Deposition Modeling ABS – Part 1 of 2
  - Ross M. Fischer, Keenan G. Jewkes, and Scott Kessler

- Microstructural Characterization of As-Manufactured and Heat Treated Electron Beam Melted Inconel 718
  - Dunyong Deng, Jonas Saarimäki, Hans Söderberg, Ru Lin Peng, Håkan Brodin, and Johan Moverare

---

*Additive Manufacturing: In-Situ Process Monitoring, Defect Detection and Control*

- In Situ Monitoring of Directed Energy Deposition
  - C.M. Knapp, T.J. Lienert, J.S. Carpenter, and D. Kovar
Advanced Coatings for Wear and Corrosion Protection

Parameters Control of 09Cr3NiMo3VNbr Carburizing Steel Diffusion Layer in the Process of Thermochemical Treatment .......................................................... 159
V. Mishchenko, O. Meniallo, O. Bagrichuk, and O. Bulakh

Laser Heating of NiCr-Al$_2$O$_3$ Composite Coating Made on Low Carbon Steel by Twin Gun Thermal Spray Process ........ 167
Manoj Rathod, Rohit Bardapurkar, and Shubham Mohod

Multilayer Ceramic Coating for Corrosion (C3) Resistance of Nuclear Fuel Cladding .................................................. 175
E. Alat, A.T. Motta, R.J. Comstock, J.M. Partezana, and D.E. Wolfe

Application Temperature Control Smooths Coating to Improve Corrosion Resistance ...................................................... 183
Michael R. Bonner

REACH Compliant Functional Trivalent Chromium Electroplating .......................................................... 195
Timothy D. Hall, Stephen T. Snyder, Maria Inman, and E.J. Taylor

Electrochemical and Performance Testing of Nano Engineered-Coatings Based on ANA Presence when Exposed to Corrosive Environment .................................................. 203
Tse-Ming Chiu, Emily M. Hunt, Benton Allen, and H. Castaneda

Advanced Materials for Oil and Gas Applications - Performance and Degradation

Hydrogen Induced Stress Cracking of Duplex Stainless Steel under Cathodic Protection in Seawater – Historical Overview and Lessons Learned .................................................. 213
Roy Johnsen

Hydrogen Induced Cracking in X70 Pipeline Steels .......................................................... 225
M.K. O’Brien, K.O. Findley, and J.G. Speer

AF955 (UNS N09955): A New Ni-Base Alloy for Oil and Gas Applications .................................................. 235
Luca Foroni, Stanley Gregory, Tom Grubach, and Carlo Malara

Heterogeneity during Plastic Deformation – Synergy between Experimental Investigation and Simulation

Designing Heterogeneous Nano-Microstructures to Improve Mechanical Properties .................................................. 245
Mehdi Hamid, Hao Lyu, Annie Ruimi, and Husseim M. Zbib
Light Metal Technology

Numerical Simulation and Experimental Validation of Hydroforming of Square Cups Using Cryorolled Aluminum Alloy Sheets .................................................. 255
Fitsum Taye and D. Ravi Kumar

Influence of Zirconium on the Growth of Al₃Ti and TiB₂ Particles in Aluminum Alloys .................................................. 263
Haibin Ma, Xingtao Liu, and Xiaoming Wang

Investigation of the Thermal Stability during Thermal Exposure of A201, 319S and 2618 Alloys ................................. 271
Junzhen Gao, Qiang Zhu, Daquan Li, and Yonglin Kang

Recrystallization Behavior and Texture Evolution during Hot Deformation of Extruded ZK60 Magnesium Alloy .......... 281
Amir Hadadzadeh, Sugrib Kumar Shaha, Mary A. Wells, Hamid Jahed, and Bruce W. Williams

Sliding Wear Characteristics of Sintered Ti6Al4V Alloy as a Function of Holding Time ........................................ 289
Adewale Oladapo Adegbenjo, Elsie Nsiah-Baafo, Mxolisi Brendon Shongwe, Mercy Ramakovkhu, Peter Apatu Obimbali, and Johannes Herman Potgieter

Hot Deformation Behavior of a High-Temperature Titanium Alloy with Initial Thick Lamellar Microstructure ........ 297
Hui Li, Zhanglong Zhao, Hongzhen Guo, Tianhong Mao, and Peng Zhang

Materials Tribology

High Temperature Solid Particle Erosion of Thermal Spray Barrier Coatings .................................................. 307
Anderson G.M. Pukasiewicz, Wellington Uczak de Goes, André Chicoski, Frederico Hackbart, Newton Reis de Moura, and Paulo Sérgio Brito de Souza

Modeling of Multi-Scale Phenomena in Materials Processing and Advanced Manufacturing

Thermal and Flow Behavior of Melt Pool during Selective Laser Melting of AlSi10Mg Powder in Point Exposure Laser Scan Pattern .......................................................... 317
Pingmei Tang, Xueping Ding, Dengfu Chen, Sheng Yu, Xuanming Duan, Mujun Long, and Huamei Duan

Secondary Steelmaking CAS-OB Process Kinetic Model .......................................................... 325
Fuzhong Ji, Andrew M. Smith, Alun H. Thomas, Zashu Li, and Wouter Tiekink

Numerical Simulation of Inclusion Aggregation and Removal in a Bottom Gas-Injected Ladle during Molten Steel Deoxidation .......................................................... 335
Yanbin Yin, Jiongming Zhang, Shaowu Lei, Shuxi Wang, and Qipeng Dong

Stochastic Modeling for Prediction of the Columnar to Equiaxed Transition during Solidification of Magnesium-Based Alloys .......................................................... 345
Ahmad Salman and Laurentiu Nastac

The Method for Determination of the Influence of the Stress-Strain State of Metal on the Structural Transformations in the Low-Alloy Steel .......................................................... 353
Sergey Shejko, Serhii Yechyn, and Nikita Demchenko

Thermal Non-Equilibrium Effects on Nickel Solid-Liquid Interface .......................................................... 359
Nicholas Brown, Enrique Martinez, and Jianmin Qu
Multi Scale Modeling of Microstructure Deformation in Material Processing

Modeling the ViscoPlastic Behavior of Commercial Aluminum Alloys as a Function of Recrystallized Grain Fractions and Texture ................................................................. 369

Khaled F.M. Adam and David P. Field

Modeling of Material Processing and Microstructure of Long Product .................................................. 377

Michael Kruse

A Molecular Dynamics Study of Defects Produced by Displacement Cascades in bcc-Fe .................................... 385

Maosheng Li, Chan Gao, and Hua Liang

Shaping and Forming of Composite Materials

Development of In-Situ Monitoring Systems for the Thermoforming of Pre-Preg Composite Laminates .................. 393

P. Land, D.T. Branson, R. Crossley, and S. Ratchev

Microstructure and Mechanical Properties of Ti/AZ31 Multi-Layered Materials Processed by Accumulative Roll Bonding ................................................................. 401

C.S. Hsu, N. Zou, and Q.Z. Li

Unedited Manuscripts

Advanced High Strength Steel Design / Technological Exploitation

Ultra-Fine-Grained Quenching and Partitioning (Q&P) Steel Produced by Near A$_{13}$ Austenitizing ...................... 413

Eun Jung Seo, Lawrence Cho, and Bruno C. De Cooman

Work Hardening Behavior in Medium Mn TRIP Steels ......................................................................................... 421

Michael Callahan and Jean-Hubert Schmitt

Annealing Temperature Dependence of the Tensile Behavior of 6Pt Mn Multi-Phase TWIP-TRIP Steel .................. 429

Seonjong Lee, Sunmi Shin, Minhyeok Kwon, and Bruno C. De Cooman

Dynamic and Static Recrystallization of V Micro-Alloyed TWIP Steel ............................................................ 439

Hojun Gwon, Sunmi Shin, and Bruno C. De Cooman

Composition and Property Designing of TRIP and TWIP Steels ........................................................................ 447

Lin Li, Hu Jiang, Tingdong Ren, Yanlin He, Wen Shi, and Mei Zhang

Research on Galvanisability of High Manganese Alloyed Steel Containing Vanadium ...................................... 459

Tingdong Ren, Hu Jiang, Nan Zou, and Wen Shi

The Effect of MA Dispersed Morphology on Ductile Fracture Behavior in Bainite-MA Dual Phase Steels ............ 467

Junji Shimamura and Shunsuke Toyoda

Hydrogen Embrittlement of Ultra-High Strength PHS and TWIP Steel Grades .................................................. 473

Lawrence Cho, Dimas Hand Sulistiyo, Eun Jung Seo, Kyoung Rae Cho, and Bruno C. De Cooman

DMAIC of Structural Steel Parts through FEM and DOE ..................................................................................... 481

Roberto Gonzalez, Maria Jose Quintana, and Luis Felipe Verdeja

Influence of Composition and Processing on the Strength and Torsional Ductility of High Strength Steel Wire ........ 491

C.M. Ciganik, J.G. Speer, K.O. Findley, and W. Van Raemdonck
Precipitation Strengthening by Induction Treatment in High Strength Low Carbon Microalloyed Hot Rolled Plates .......... 499
G. Larzabal, N. Isasti, B. Pereda, J.M. Rodriguez-Ibabe, and P. Uranga

Validation of an Indirect Technique to Quantify the Amount of Niobium in Solution Prior to Hot Rolling ....................... 509
G. Larzabal, L. Garcia-Sesma, B. Pereda, P. Uranga, M. Rebollato, B. López, and J.M. Rodriguez-Ibabe

Effect of Induction Hardening Case Depth on Residual Stresses, Microstructural Phases and Fatigue Strength of 38MnVS6 Micro Alloved Steel .............................................................................................................................................. 517
Dattaprasad Lomate, Asim Tewari, P.P. Date, Manoj Ukhande, Girish Shegavi, and Rajkumar Singh

A Study on the Viscous Behaviour with K₂O Additions on the Slags ................................................................. 525
Junqiang Yang, Jianliang Zhang, and Cui Wang

Effect of Magnesium Addition on Inclusion Size Distribution in OCTG Steel ......................................................... 533
Linzhu Wang, Jingshe Li, Shufeng Yang, Shuo Zhang, and Yang Wang

Effect of B₂O₃ on the Viscosity and Structure of the Aluminate-Based Melts .............................................................. 541
Chengjun Liu, Jie Qi, and Maofa Jiang

Effect of Iron on Combustion Characteristics of Coal Char Pyrolyzed by Lump Coal .................................................. 547
Haiyang Wang, Jian-liang Zhang, Guang-wei Wang, Run-sheng Xu, Si-yuan Liu, Teng-fei Song, and Ke Guo

Application of the EAF Steelmaking Combined Blowing Technology in 100T EAF .................................................... 555
Guohong Ma, Lingzi Yang, Rong Zhu, Zhizheng Li, Xueyi Wang, Guangsheng Wei, and Ting Cheng

Determination of Surface Tension of Commercial Steels and Mould Fluxes by Sessile Drop Method ...................... 565
Qiang Gao, Jian Luo, Yi Min, and Maofa Jiang

Effect of Cementite on Ductile Fracture in High Tensile Strength Steel Sheets .............................................................. 573
Mari Maeda, Junji Shimamura, and Shinsuke Suzuki

Investigation of Combustion Reaction Kinetic of Anthracite by Sectioning Method .................................................. 579
Ruiling Du, Keng Wu, Li Zhang, Xuanke Qin, and Bing Zhang

Research on the Generation Characteristics and Particle Size Distribution of Steelmaking Dust ............................... 587
Zhizheng Li, Rong Zhu, Guohong Ma, Xueliang Wang, and Yiqiang Zhu

Study on Chlorine Distribution between Bosh Gas and Slag in Blast Furnace .......................................................... 597

The Effect of Sodium and Zinc on Metallurgy Character of Sinter Ore in BF .............................................................. 609
Zhiwu Yan, Jianliang Zhang, Zhengjian Liu, Xiang Yuan, Bin Gao, and Heshun Zhang

Advanced Manufacturing Technologies

Finite Element Analysis and Simulation of the Manufacturing Process of Hot Formed Vessel Heads ............................. 619
Fátima Méndez-Medina, Roberto G. Ramirez-Galindo, Ricardo Araiza-González, and Miguel A. Quiñones-Salinas

Numerical Simulation and Experimental Validation of Hydroforming of Square Cups Using Cryorolled Aluminum Alloy Sheets .............................................................................................................. 629
Fitsum Taye and D. Ravi Kumar

Rapid Heat Treatment Process Using Microwaves – A Novel Approach ................................................................. 637
Swaminathan G, Prasanna Venkatesh P R, and Rajendra Prasad A
The Profile Correction Module: A Whole New Approach to Coil Coating ............................................................................ 645

Michael R. Bonner

Research on the Cutting Thermodynamic Behavior of High-Strength Large-Thickness Offshore Jack-Up Platform Leg Rack ................................................................................................................. 655

Zhou Hong

Diffusion Bonding in Advanced Manufacturing Process Chains ............................................................................................................................... 665

Simon Jahn, Felix Gemse, Steffen Dahms, Udo Broich, and Jan Pfeifer

Wear and Hardness Properties of Surface Modification of Copper Alloy Processed by Friction Stir Process .......................... 673

Kazeem O. Sanusi and Esther T. Akinlabi

Magnetic Field Assisted Assembly Machine Design & Implementation .......................................................................................... 679

Yan Liu and Nuggehalli M. Ravindra

The Novel Use of Acoustic Emission Monitoring during Proof-Testing of Ceramic Spinal Implants ........................................ 687

Darin A. Ray, Ramaswamy Lakshminarayan, Bryan J. McEntire, and Obdulia Ley

Numerical Analysis of Raceway Combustion under Different Operating Conditions in a Blast Furnace .......................... 705

Haibo Ma, Tyamo Okosun, Armin K. Silaen, Bin Wu, Guangwu Tang, and Chenn Q. Zhou

Repair Processes for Forging Dies and Their Testing and Impact .......................................................................................... 713

Pavel Podany and Michal Duchek

Microstructure and Mechanical Properties of the As-Cast and Extruded Al-Si-Fe-Cu-Mn Based Alloys Fabricated by Adding Grain Refiner .................................................................................................................. 721

Hyeon-Taek Son, Yong-Ho Kim, Hyo-Sang Yu, and Jung-Han Kim

Optimization of Filler Materials for Large Forging Dies ........................................................................................................ 727

Michal Duchek, Martina Koukolikova, Jana Niznanska, and Miroslav Majer

Influence of Water Quality on Rate of Quenching of Metals during Continuous Casting by Pneumatic and Hydraulic Sprays ............................................................................................................ 735

Umair Alam and Eckehard Specht

Comparison of Conventional Open-Cell Aluminum Foam and Its Additively Manufactured Twin ............................................. 745

Kristoffer Matheson, Kory Cross, Iman Javahery, Jayden Plumb, and Ashley Spear

Flow Field Research on Bottom Argon Blowing of 40-Ton Ladle .......................................................................................... 753

Tongjun Zhou, Junzhan Liu, and Hui Luo

Study on Vertical Continuous Casting of M2 High Speed Steel .................................................................................. 761

Zhigang Zhao, Shengtao Qiu, and Rong Zhu

Development of Medium-High Carbon Casing/Tubing for Direct Strip Production Complex (DSPC) ........................................ 769

Tihe Zhou, Peng Zhang, Kate Kuuskman, Erminio Cerilli, Kashif Rehman, Sang-Hyun Cho, and Dan Burella

Influence of Secondary Cooling Intensity Variation on Solidification Structure and Carbon Macro-Segregation for GCr15 Continuously-Cast Bloom ............................................................................. 777

Kun Dou, Zhenguo Yang, Qing Liu, Jung-Wook Cho, and Hongbiao Dong

Uneven Thermal Shrinkage of Wide-Thick Continuous Casting Slab and Its Influence on Caster Taper .................................. 785

Chen-hui Wu, Cheng Ji, and Miao-yong Zhu
Industrial Trial Practice of Slab Corners Microstructure Control ................................................................. Jingxin Song, Zhaozhen Cai, Miaoyong Zhu, and Nailiang Cheng

Advances in Zinc-Coated Sheet Steel Processing and Properties

Surface Selective Oxide Reduction during Continuous Annealing of Advanced High Strength and Ultra-High Strength Steel Grades .................................................. Lawrence Cho, Jong Han Oh, Eun Jung Seo, Myung Soo Kim, Ki Cheol Kang, and Bruno C. De Cooman

Evolution of Zn-Rich Phases during Austenitizing of Galvanized 22MnB5 Sheet Steel ........................................... Z.N. Ghanbari and J.G. Speer

Effect of Coating Thickness and Mg Content on Adhesion Strength and Corrosion Behavior of EML-PVD Alloy Coating on Steel Strip .................................................. Woo Sung Jung, Chan Wook Lee, and Bruno C. De Cooman

Corrosion Resistance and Mechanical Properties Zinc Coating Sheet Steels, Received in Conditions of Self-Propagating High Temperature Synthesis .................................. Borys Sereda and Dmytro Sereda

Art and Cultural Heritage: Discoveries and Education

STEAM Initiatives at the Carlos Museum: Bringing Science into the Galleries and Cultural Heritage into the Classroom ........................................................................................................... Renée Stein, Kathryn Etre, Emily Farek, and Julia Commander

Fracture on Marble-Adhesive Interfaces of Restored Art Structures ................................................................. Ting Tan, Nima Rahbar, Carolyn Riccardelli, George Wheeler, and Wole Soboyejo

Characterization of Native Copper Refining through Optical Metallography of the Copper Oxide Phase .................. Megan Godby, Karl Rundman, and Paul Sanders

Thermal Spray in Art & Architecture ..................................................................................................................... Peter Foy, Matt Napolitano, and Dale Moody

Non-Destructive Methods Using in Paintings on Traditional Temple Heritage in Taiwan ...................................... Chen-Fu Wang, Lin-Ya Kung, Chih-Ming Chou, and Chun-Yu Chen

Avant-Garde Developments in the Processing, Properties and Performance of Multifunctional Ceramic- and Metal-Matrix Composites

Development of Wear Resistant WC Metal Matrix Composites Consolidated via Laser-Assisted Cold Spray .......... A.M. Birt, J. Dallarosa, and D. Apelian

Microstructure and Mechanical Properties of Carbonized Rice Husk Nanoparticles Reinforced Al-Cu-Mg Alloy Composite ................................................................................ S.B. Hassan, J.O. Agunsoye, and V.S. Aigbodion

Properties of Microwave Sintered Al-Cu Metal Matrix Composites ................................................................ M. Penchal Reddy, F. Ubaid, R.A. Shakoor, and A.M.A. Mohamed

Sliding Friction Behavior of Aluminum Based Hybrid Composites ........................................................................ Tahir Ahmad, Maida Bashir, Muhammad Kamran, Rafiq Ahmad, and Muhammad Umar Manzoor

Bilayer Graded Al/SiC/Rice Husk Ash Composite: Thermal and Electrical Properties ............................................ A. Bahrami, M.I. Pech-Canul, S. Soltani, N. Soltani, C.A. Gutierrez, and Luis A. Gonzalez
Porous Silicon Oxycarbide Composites with Aligned Macro Porosity from Water-Based Slurry by Freeze-Casting Process ................................................................. 915

Thermal and Electrical Properties of Infiltrated High Volume Fraction Si₃N₄ and Si₃N₄-Coated SiO₂ Preforms by Al-Mg-Si Alloys as Heat Sink Materials in Electronic Packaging ................................................................................................. 921
N. Soltani, M.I. Pech-Canul, S. Soltani, A. Bahrami, and L.A. Gonzalez

Boron, Boron Coatings, Boron Compounds and Boron Nanomaterials: Structure, Properties, Processing, and Applications

Development of Protective Coatings Formulations Based on Boron for Units Operating at High Temperatures in Metallurgy .......................................................................................................................... 931
Borys Sereda and Dmytro Sereda

Nano-Mechanical Behaviour and Microstructure of Boride Layers Formed on Inconel 718 before and after Aging .................. 935
A. Khalili, M. Yari, and R.J. Klassen

Obtaining of Boride Coatings under SHS Conditions for Car Parts .................................................................................................................. 945
Borys Sereda and Dmytro Sereda

Emerging Interconnect and Pb-Free Materials for Advanced Packaging Technology

Fabrication of Cu@Sn Core-Shell Structure Preform and Application in High Temperature Bonding ................................................................. 951
Tianqi Hu and Hongtao Chen

Compound Growth during Reaction Diffusion between Liquid Sn-Base Alloys and Solid Fe ................................................. 957
Ryo Fukui, Minho O, and Masanori Kajihara

Kinetics of Reactive Diffusion between Sn-Ag Alloys and Ni at Solid-State Temperatures ........................................................................................................... 961
Misako Nakayama, Minho O, and Masanori Kajihara

Failure Analysis and Prevention

Extremely Low Cycle Fatigue Damage Mechanism, Fractographic Examination, and Life Prediction ................................. 967
Mohammed Algarni and Yuanli Bai

Inclusion Orientation Effect on Rolling Contact Fatigue Crack Paths Observed by Laminography Using Synchrotron Radiation X-Ray ........................................................................................................... 975
Y. Nakai, D. Shiozawa, S. Kikuchi, T. Obama, H. Saito, T. Makino, and Y. Neishi

The Challenges of Coiled Tubing Failure Analyses ............................................................................................................................... 983
Michael G. Burns, Kevin Elliott, Pankaj Kumar, Travis Graham-Wright, and Austin Sutch

Failure Analysis of Bolted Joints at Elevated Operating Temperatures in Gas Turbine: A Case Study of Creep of the Washers and Cracking of the Bolts .................................................................................. 993
Derek Dangguo Gong and Paul Flynn

Actuator Spring Failures in the Oil & Gas Industry ........................................................................................................................... 1001
Richard Marques, Herman E. Amaya, and Christian Silva

Study of the Stainless Steel Corrosion in Pharmaceutical Facilities: Development and Incidence ........................................ 1009
Fabienne Delaunois, François Tosar, and Frédéric Groulard
Scanning Electron Microscopy/Energy Dispersive X-Ray Spectrometry (SEM/EDS) Elemental Microanalysis: Accuracy and Precision beyond My Wildest Dreams ................................................................. 1017
  Dale E. Newbury and Nicholas W.M. Ritchie

SEM/EDS Elemental Microanalysis Can Be Remarkably Quantitative, but Easy to Break: Cautions in Using Analytical Software .................................................................................. 1025
  Dale E. Newbury and Nicholas W.M. Ritchie

**Gas/Metal Reactions, Diffusion and Phase Transformation during Heat Treatment of Steel**

The Effect of Hardenability on Deformation of Spiral Bevel Gear in Die Quenching Process ......................................................... 1033
  Yingtao Zhang, Gang Wang, Lin Yang, Wankai Shi, and Zhichao (Charlie) Li

Effect of Tempering Temperature on the Microstructure, Mechanical and Magnetic Properties of 26NiCrMoV11-5 Steel .......................................................................................................................... 1043
  Santosh Mane, N. Prabhu, Sagar Bapat, and R.K.P. Singh

Increased Strength Multi-Phase Steels as a Result of Heat Treatment of Automobile Wheels .......................................................... 1055
  Borys Sereda and Dmytro Sereda

A Study of Fishscale Resistance in Boron Microalloyed Low Carbon Al-Killed Enameling Steel Compact Strip Production (CSP) Steel Mill ................................................................................................. 1061
  Ranga Nikhil Yellakara

Multi-Phase Numerical Research on Oxygen Lance Blowing High Temperature Oxygen .......................................................................... 1069
  Shaoyan Hu, Rong Zhu, and Fuhai Liu

**ICME Accelerated Materials Discovery in Process & Product Development**

ICME Investigation of Electrical Conductivity of Al-Zn-Ni Alloys for Precipitation Hardening ......................................................... 1079
  Oladeji Fadayomi, Rachel Clarke, Violet Thole, Gregory Odegard, and Paul Sanders

**Joining of Advanced and Specialty Materials (JASM XVIII)**

Weldability of Titanium Alloy Using Transient Liquid Phase Diffusion Bonding Method ................................................................. 1089
  A.H.M.E. Rahman and Issam Abu-Mahfouz

To Design of Welding Procedure to Avoid Delayed Cracking Phenomenon in ASTM A335 P22 Material .......................................... 1097
  Fahad Riaz, Muhammad Kamran, Adil Ashraf, Nauman Aslam, and Tahir Ahmad

Room Temperature Molecular Dynamics Simulations on the Sintering of Cu-Ag Core-Shell Structures: Nanoparticles and Nanowires ........................................................................................................... 1103
  Jiaqi Wang and Seungha Shin

Fatigue Behaviour of AL6XN Super-Austenitic Stainless Steel Welds ................................................................................................. 1111
  I.S. Cortés-Cervantes, V.H. López-Morelos, Y. Miyashita, C.A. León, and A. Ruiz

**Materials Property Understanding through Characterization**

p-Silicon Based Microbolometer .................................................................................................................................................... 1121
  Asahel Banobre and N.M. Ravindra
Characterization of Porous Structure of Graphitic Cathode Materials with Different Graphitization Degree and Its Correlation to Air Permeability ............................................................................................................................................ 1133
Xiang Li, Shihao Song, Jilai Xue, and Ning Fang

Optical Properties of Passivation Layers on Black Silicon ............................................................................................................................................ 1141
Sita Rajyalaxmi Marthi and N M Ravindra

Optical Properties and Temperature Dependence of Energy Gap of Transition-Metal Dichalcogenides ............................................................................................................................................ 1153

Brian T. Skinn, Heather A. McCrabb, Stephen T. Snyder, and Maria E. Inman

Environmentally Friendly Chromium Stripping ..................................................................................................................... 1283
H. McCrabb, T. Hall, M. Inman, and E.J. Taylor

Symposium on Large Fluctuations and Collective Phenomena in Materials III

A Master Equation for Force Distributions in Dense Granular Materials ................................................................. 1293
Kuniyasu Saitoh and Fumiko Ogushi

Ultra High Performance Metals, Metal Alloys, Intermetallics, and Metal Matrix Composites for Aerospace, Defense, and Automotive Applications

Effect of Thermal Deformation on Forging Bar Microstructure and Properties of Inconel 718 Alloy .............................. 1303

Effect of Ni Content on Microstructure and Mechanical Properties of CoCrFeNi₃Ti₀.₃ High-Entropy Alloys .................. 1311
Tao-Tsung Shun, Che-Fu Lee, and Cheng-Ying Hsieh

Fabrication of Metal Matrix Syntactic Foams by a Laser Additive Manufacturing Process ........................................ 1319
M. Spratt, J.W. Newkirk, and K. Chandrashekhara

Optimization of Powder Metallurgy (P/M) Route for Fabrication of Metal Matrix Composites Reinforced by Ultra High Temperature Ceramics ................................................................. 1327
Babak Jahani, Mehdi Salimi Jazi, and Fardad Azarmi

Author Index ............................................................................................................................................................................. 1335
Subject Index ............................................................................................................................................................................. 1339
