2016 IEEE 16th International Conference on Bioinformatics and Bioengineering (BIBE 2016)

Taichung, Taiwan
31 October – 2 November 2016
# Table of Contents

## Message from the BIBE 2016 General Co-Chairs ...........................................................................................................xii

## Message from the BIBE 2016 Program Chairs ..................................................................................................................xiv

## Conference Organization ..........................................................................................................................................................xv

## Technical Program Committee ................................................................................................................................................xvii

## BIBE: Genomics and Proteomics, Biological Network Analysis

CASP3, TP53, and MYC Targeted by Triptolide towards Ovary Induce Female Reproductive Toxicity ..........................................................................................................................1

*Guang Zheng, Xue Yan, Yun Yang, He Zhang, Hongtao Guo, Junping Zhan, and Xiaojuan He*

Host-Pathogen Protein Interaction Prediction Based on Local Topology Structures of a Protein Interaction Network ..............................................................................................................7

*Jira Jindalertudomdee, Morihiro Hayashida, Jiangning Song, and Tatsuya Akutsu*

An Ensemble Based in Silico Prediction of Saccharomyces Cerevisiae Proteins under Mitochondrion Organization ........................................................................................................13

*Dinithi Sumanaweera and Amal Shehan Perera*

Identifying Protein Complexes Method Based on Time-Sequenced Association and Ant Colony Clustering in Dynamic PPI Networks ........................................................................................................21

*Cuicui Yang, Junzhong Ji, and Jiawei Lv*

GReMLIN: A Graph Mining Strategy to Infer Protein-Ligand Interaction Patterns .............................................................................28

*Charles A. Santana, Fabio R. Cerqueira, Carlos H. da Silveira, Alexandre V. Fassio, Raquel C. de Melo-Minardi, and Sabrina de A. Silveira*

## BIBE: Medical Informatics and Healthcare Applications

CRDT: Correlation Ratio Based Decision Tree Model for Healthcare Data Mining .....................................................................................36

*Smita Roy, Samrat Mondal, Asif Ekbal, and Maunendra Sankar Desarkar*

Navigating Health Literacy Using Interactive Data Visualisation .................................................................................................44

*Enjie Liu, Youbing Zhao, Hui Wei, Stefanos Roumeliotis, and Eleni Kaldoudi*
HL7 FHIR Compliant Data Access Model for Maternal Health Information System .......................................................... 51
Saadia Ismail, Majed Alshmari, Usman Qamar, Wasi Haider Butt, Khalid Latif, and Hafiz Farooq Ahmad

**BIBE: Gene Expression and MicroRNA**
Finding Influential Genes Using Gene Expression Data and Boolean Models of Metabolic Networks .............................................................................................................. 57
Takeyuki Tamura, Tatsuya Akutsu, Chun-Yu Lin, and Jinn-Moon Yang
Inference of Gene Regulatory Networks Using Coefficient of Determination, Tsallis Entropy and Biological Prior Knowledge ............................................................................................................................. 64
Camila Y. Koike and Carlos H. A. Higa
microRNA-mRNA Interaction Identification in Wilms Tumor Using Principal Component Analysis Based Unsupervised Feature Extraction ........................................................................................................ 71
Y-H. Taguchi
Statistical Principle-Based Approach for Detecting miRNA-Target Gene Interaction

**BIBE: Biological Sequence Analysis**
ENSPART: An Ensemble Framework Based on Data Partitioning for DNA Motif Analysis ........................................................................................................................................................................ 87
Nung Kion Lee, Allen Chieng Hoon Choong, and Norshafrina Omar
Identification and Analysis of Palindromes for RNA Sequences ................................................................................................................ 95
Chien-Hung Huang, Sheng-Jia Weng, Praveen Kumar Korla, Jywe-Fei Fang, Jeffrey J. P. Tsai, Nilubon Karubanjerdjit, and Ka-Lok Ng
Using Deep Learning with Position Specific Scoring Matrices to Identify Efflux Proteins in Membrane and Transport Proteins .................................................................................................................. 101
Semmy Wellem Taju, Nguyen-Quoc-Khanh Le, and Yu-Yen Ou
Fine Classification of Human Gut Microbiota by Using Hierarchical Clustering Approach ........................................................................................................................ 109
Tzu-Fan Chen, Rong-Ming Chen, Jeffrey J. P. Tsai, and Rouh-Mei Hu

**BIBE: Recent Advancement in Biotechnology**
A Self-Confined Single-Cell Loading Platform Combining PDMS Mesh and Patterned Cytop for Non-invasive Studies of Single Cell Secretions .......................................................................................................................... 113
Yu-Jui Chiu, Wei Cai, Yuesong Shi, and Yu-Hwa Lo
Detecting Cell Growth and Drug Response in Heterogeneous Populations: A Dynamic Imaging Approach ........................................................................................................................................................................ 121
Chao Sima, Jianping Hua, Rosana Lopes, Aniruddha Datta, and Michael L. Bittner
Computation of Pharmacologic Therapy Effects on Cognitive Abilities of Alzheimer’s Disease Patients .................................................................................................................................................................................. 129
Aydin Saribudak, Adarsha A. Subick, and M. Ümit Uyar

Effect of Chitosan on Motility of Bacteria-Driven Liposomal Microrobots .......................................................... 137
Van Du Nguyen, Jiwon Han, Shaohui Zheng, Viet Ha Le, Seung Yoon Song, Jong-Oh Park, and Sukho Park

BIBE: Biological Sensor and Data Analysis
A Vision Based Method for Real-Time Respiration Rate Estimation Using a Recursive Fourier Analysis .................................................................................................................................................................................................................................................................. 143
Avishek Chatterjee, A. P. Prathosh, Pragathi Praveena, and Vidyadhar Upadhya

Wide-Locking Range Divide-by-4 Injection-Locked Frequency Divider Using Dual-Resonance RLC Resonator for Biomedical Sensor Applications .............................................................................................................................. 150
Wen-Cheng Lai, Sheng-Lyang Jang, Ho Chang Lee, and Shih-Jie Jian

Real-Time Visual Respiration Rate Estimation with Dynamic Scene Adaptation .......................................................................................... 154
Avishek Chatterjee, A. P. Prathosh, Pragathi Praveena, and Vidyadhar Upadhya

Dual Wavelength Silicon-Based-Photodetector for Biomedical Sensing System Applications .................................................................................................................................................................................................................................................................. 161
Yao-Chin Wang, Zu-Po Yang, and Bor-Shyh Lin

Respiration Monitoring through Thoraco-Abdominal Video with an LSTM .......................................................................................... 165
Vidyadhar Upadhya, Avishek Chatterjee, A. P. Prathosh, and Pragathi Praveena

Non-contact Instantaneous Heart Rate Monitoring Using Microwave Doppler Sensor and Time-Frequency Domain Analysis .................................................................................................................................................................................................................................................................. 172
Daichi Matsunaga, Shintaro Izumi, Hiroshi Kawaguchi, and Masahiko Yoshimoto

Workload Induces Changes in Hemodynamics, Respiratory Rate and Heart Rate Variability .................................................................................................................................................................................................................................................................. 176
Taishi Nagasawa and Hiroshi Hagiwara

DNA Biosensor Applications for Poly-Silicon Nanowire Field-Effect Transistors .......................................................................................... 182
Shao-Wei Lu, Chia-Hsien Li, Aanand, Syed Sarwar Imam, Shao-Ming Yang, Ming-Jen Fan, and Gene Sheu

BIBE: Biological Systems, Modeling and Computational Fluid Dynamics
Multiscale Meshfree Analysis of the Effects of Thermal Treatments on Deformability of Red Blood Cell Membrane .................................................................................................................................................................................................................................................................. 186
A. S. Ademiloye, L. W. Zhang, and K. M. Liew

Improved Nephron Model for Pressure-Diuresis and Pressure-Natriuresis .......................................................................................... 192
Siva Manohar Reddy Kesu and Haritharan Ramasangu
Velopharyngeal Closure Function Strategy in Articulation: Mechanical Dynamics
Modeling of Air Flow in the Vocal Tract .................................................................198
Kazunori Nozaki, Hiroo Tamagawa, Chihiro Sugiyama, Kanji Nohara,
Takayoshi Sakai, Kohei Hatanaka, Machiko Nakagawa, Koichi Satoh,
Makoto Kariyasu, Takashi Yamashiro, and Mikihiko Kogo
Stent Design for Compensating Wall Shear Stress via Computational Modeling
and Fluid Dynamics ........................................................................................................204
Chun-Ming Chang, Wei Shin Wong, and Jeffrey J. P. Tsai

BIBE: Healthcare Systems and Methodology
Framework for Rapid Development of Embedded Human-in-the-Loop Cyber-Physical
Systems ..........................................................................................................................208
Shen Feng, Fernando Quivira, and Gunar Schirner
Comparison of Motion Sickness-Induced Cardiorespiratory Responses
between Susceptible and Non-susceptible Subjects and the Factors Associated
with Symptom Severity .................................................................................................216
Chien-Liang Chen, Ping-Chia Li, Chia-Chang Chuang, Chi-Wen Lung, and Jing-Shia Tang

BIBE: Medical Imaging Analysis and Applications
Fluorescence Microscopy Image Processing and Visualization for Analyzing Cell
Kinematics, Proliferation and Attachment in Mouse Embryonic Stem Cell Culture ....222
Yuan-Hsiang Chang, Hideo Yokota, Kuniya Abe, Chih-Cheng Li, and Ming-Dar Tsai
2D Adaptive Grid-Based Image Analysis Approach for Biological Networks ..........230
Haifa F. Alhasson and Boguslaw Obara
Physical Model-Based Contrast Enhancement of Computed Tomography Images:
Contrast Enhancement of Computed Tomography ......................................................238
Yi-Wen Chen, Cheng-Ting Shih, Hsin-Hon Lin, and Keh-Shih Chuang
Diagnostic Support for Alzheimers Disease through Feature-Based Brain MRI
Retrieval and Unsupervised Distance Learning ..........................................................242
Bruno T. Padovese, Denis H. P. Salvador, and Daniel C. G. Pedronette
Automatic Brain Extraction for T1-Weighted Magnetic Resonance Images Using
Region Growing ...........................................................................................................250
Yu-Lung Ho, Wei-Yang Lin, Chia-Ling Tsai, Cheng-Chia Lee, and Chih-Yang Lin

BIBE: Medical and Physiological Signal Analysis
Psycho-Physiological Response in 3D Multiple Object Tracking .................................254
Shuichi Satake and Hiroshi Hagiwara
Effects of Individualized Respiratory Cycle-Based Vibration Stimuli on Nervous
System after Mental or Physical Load ..........................................................................258
Naoto Iwamoto and Hiroshi Hagiwara
Validity of the Mind Monitoring System as a Mental Health Indicator ................................................................. 262
Naoki Hagiwara, Yasuhiro Omiya, Shuji Shinohara, Mitsuteru Nakamura,
Masakazu Higuchi, Hideo Yasunaga, Shunji Mitsuyoshi, and Shinichi Tokuno

Simple and Robust Ideal Mid-Sagittal Line (iML) Extraction Method for Brain CT Images ............................................. 266
Wenbo Li, Haiwei Pan, Xiaoqin Xie, Zhiqiang Zhang, and Qilong Han

Heart Rate Variability Signal Features for Emotion Recognition by Using Principal Component Analysis and Support Vectors Machine .................................................. 274
Han-Wen Guo, Yu-Shun Huang, Chien-Hung Lin, Jen-Chien Chien, Koichi Haraikawa, and Jiann-Shing Shieh

**BIBE: Postural Control**

The Balance Ability of Fallers and Non-Fallers in Psychiatric Patients at a Long Term Care Unit ................................................................. 278
San-Ping Wang, Jen-Suh Chern, Jer-Hao Chang, Bo-Jian Wu, Hsiao-Ju Sun, and Jiunn-Ying Liou

Dynamic and Static Balance in Persons with Different Arch Height and Impacts of an Arch Support ................................................................. 282
Yi-Ting Chen, Jun-Ding Zhu, and Jen-Suh Chern

Recognition of Cortical Modulation Mechanism in Elderly Postural Control under the Computerized Dynamic Posturography ................................. 286
Chun-Ju Chang, Jen-Suh Chern, Tsui-Fen Yang, and Sai-Wei Yang

**BIBE: Clinical and Forensic Bioinformatics**

Influence of Induced Altitude Acclimatization on Development of Acute Mountain Sickness Associated with a Subsequent Rapid Ascent to High Altitude ................................................................. 289
Xiaomin Luo, Lei Wang, and Lei Yang

Identifying Obstructive Sleep Apnea by Exploiting Fine-Grained BCG Features Based on Event Phase Segmentation ................................................................. 293
Fan Liu, Xingshe Zhou, Zhu Wang, Tianben Wang, Hongbo Ni, and Jun Yang

Automatic Lesion Detection System (ALDS) for Skin Cancer Classification Using SVM and Neural Classifiers ................................................................. 301
Muhammad Ali Farooq, Muhammad Aatif Moeen Azhar, and Rana Hammad Raza

Location-Aware Fall Detection System for Dementia Care on Nursing Service in Evergreen Inn of Jianan Hospital ................................................................. 309
Ping Wang, Chin-Shan Chen, and Chi-Chi Chuan

Analyzing Retinal Optical Coherence Tomography Images Using Differential Spatial Pyramid Matching ................................................................. 316
Parvathi Chundi, Mahadevan Subramaniam, Keivan Sabet, and Eyal Margalit
Dynamic programming for clinical baseline matching and its application to anti-hepatitis B research

Kung-Hao Liang

**Workshop: Integrated Computational Life Sciences towards Personalized and Preventive Medicine**

Comparative Analysis of Transformation Methods for Gene Expression Profiles in Breast Cancer Datasets

Yoshiaki Sota, Shigeto Seno, Yoichi Takenaka, Shinzaburo Noguchi, and Hideo Matsuda

Patient-Specific Blood Flows Simulation on Cerebral Aneurysm Based on Physically Consistency Feedback Control

Mohd Azrul Hisham Mohd Adib, Satoshi Ii, Yoshiyuki Watanabe, and Shigeo Wada

Development of Multi-scale Musculo-Skeletal Simulator

Naoto Yamamura, Shu Takagi, and Taishin Nomura

A Computational Approach for Blood Flow Analysis in the Densely Coiled Cerebral Aneurysm

Tomohiro Otani, Satoshi Ii, Tomoyoshi Shigematsu, Toshiyuki Fujinaka, Masayuki Hirata, Tomohiko Ozaki, and Shigeo Wada

**Workshop: Mathematical Methods in BioInformatics and Biomedical Engineering**

Feature Selection with Non-Linear Dependence Based on Multi-objective Strategy

Chun-Liang Lu, Wei-Chun Tang, Yu-Shuen Tsai, Nikhil R. Pal, and I-Fang Chung

Comparing Programming Language Comprehension between Novice and Expert Programmers Using EEG Analysis

SeolHwa Lee, Andrew Matteson, Danial Hooshyar, SongHyun Kim, JaeBum Jung, GiChun Nam, and HeuiSeok Lim

A Comparison Study of Reverse Engineering Gene Regulatory Network Modeling

Charles C. N. Wang, Pei-Chun Chang, Phillip C. Y. Sheu, and Jeffrey J. P. Tsai

Application of Latent Semantic Analysis to Clustering of Cardiovascular Gene Ontology

Charles C. N. Wang, Yu-Liang Lee, Phillip C. Y. Sheu, and Jeffrey J. P. Tsai

Deep Learning for Risk Analysis of Specific Cardiovascular Diseases Using Environmental Data and Outpatient Records

Han C. W. Hsiao, Sean H. F. Chen, and Jeffrey J. P. Tsai

Neural Oscillations in Temporoparietal Lobes under Inhibitory Control in a Naturalistic Situation

Li-Wei Ko, Rupesh Kumar Chikara, Yi-Cheng Shih, and Erik C. Chang
Workshop: Bioinformatics Disease Analysis and Database

Genome-Wide Functional Identification of Maximal Consensus Patterns Derived from Multiple Species piRNAs ................................................................. 377
   Wen-Ling Chan, Mei-Chun Yeh, Jing-Doo Wang, Jan-Gowth Chang, and Jeffrey J. P. Tsai

piRNAtarget: The Integrated Database for Mining Functionality of piRNA and Its Targets ................................................................. 382
   Bing-Rong Jiang, Wan-Ye Wu, Ching-Hsuan Chien, Jeffrey J. P. Tsai, and Wen-Ling Chan

An Integrative Analysis for Cancer Studies ................................................................. 387
   Hsi-Yuan Huang, Chien-Yu Lin, Chin-An Yang, Cheng-Mao Ho, Ya-Sian Chang,
   and Jan-Gowth Chang

Establish Reporting Format of Gene Related Rare-Diseases by Exome Sequencing in the Clinical Medical Laboratory ................................................................. 390
   Cheng-Mao Ho, Hsi-Yuan Huang, Chin-An Yang, Ya-Sian Chang, Chien-Yu Lin,
   and Jan-Gowth Chang

Author Index ........................................................................................................ 393
