CISIS 2016

Session 1: Cloud Computing and Power Management

OpenFlow Mesh Based Virtual Crossbar Network ................................................................. 1
Suguru Yasui and Minoru Uehara

Dynamic Approach to Scheduling Reconfigurable Scientific Workflows
in Heterogeneous HPC Environments .................................................................................. 7
Alexey Cheptsov

The Extended Power Consumption Model to Perform Computation Type
Application Processes on Virtual Machines ................................................................. 15
Tomoya Enokido and Makoto Takizawa
Workload Management for Power Efficiency in Heterogeneous Data Centers .........................................................23
  Pietro Ruiu, Alberto Scionti, Joel Nider, and Mike Rapoport

DrbCF: A Differentiated Ratio-Based Approach to Job Scheduling in Cloud Federation .........................................................31
  Phuong-Duy Nguyen and Nam Thoai

Accessing Cloud Services through Biometrics Authentication .........................................................................................38
  Pietro Ruiu, Giuseppe Caragnano, Giovanni L. Masala, and Enrico Grosso

Session 2: Fuzzy Systems and Soft Computing

Effects of Sustained Communication Time on Reliability of JXTA-overlay P2P Platform: A Comparison Study for Two Fuzzy-Based Systems .........................................................................................44
  Yi Liu, Shinji Sakamoto, Leonard Barolli, Evjola Spahox, Makoto Ikeda, and Fatos Xhafa

A Fuzzy-Based System for Improving Node Security in MANET Clusters ............................................................................53
  Mirjeta Alinci, Takaaki Inaba, Donald Elmazi, Evjola Spahox, Vladi Kolici, and Leonard Barolli

A Fuzzy-Based Approach for Classifying Students' Emotional States in Online Collaborative Work ...........................................................................................................................................61
  Marta Arguedas, Luis Casillas, Fatos Xhafa, Thanasis Daradoumis, Adriana Peña, and Santi Caballé

Performance Evaluation of a Fuzzy-Based Wireless Sensor and Actuator Network Testbed Considering Depth and RGB Sensors ......................................................................................................................69
  Keisuke Ebisu, Takaaki Inaba, Donald Elmazi, Makoto Ikeda, Elis Kulla, and Leonard Barolli

A Survey on Fuzzy Logic Applications in Wireless and Mobile Communication for LTE Networks ...........................................................................................................................................76
  Ahmad Mudassir, Saleem Akhtar, Hesham Kamel, and Nadeem Javaid

A Study on Determination of the Variance Faults of a Process Using Soft Computational Approaches ...........................................................................................................................................83
  Yuehjen E. Shao and Shih-Chieh Lin

Session 3: Multimedia and e-Learning Systems

Analysis and Design of an eLearning Platform Featuring Learning Analytics and Gamification ...........................................................................................................................................87
  David Gañán, Santi Caballé, Robert Clarísó, and Jordi Conesa

Intelligent Tutoring System for Learning Digital Systems on MOOC Environments ...........................................................................................................................................95
  David Baneres and Joaquin Saíz
Session 4: Complex and Scalable Systems

A Centrality-Based History Prediction Routing Protocol for Opportunistic Networks

Amarpreet Bamrah, Isaac Woungang, Leonard Barolli, Sanjay Kumar Dhurandher, Glaucio H. S. Carvalho, and Makoto Takizawa

Dense 3D Mapping Using Volume Registration from Monocular View

Luke Lincoln and Ruben Gonzalez

Scalable Group Communication Protocols in the Peer-to-Peer Model of Topic-Based Publish/Subscribe Systems

Hiroki Nakayama, Shigenari Nakamura, Tomoya Enokido, and Makoto Takizawa

DEAC: Depth and Energy Aware Cooperative Routing Protocol for Underwater Wireless Sensor Networks

Khayyam Pervaiz, Abdul Wahid, Mahin Sajid, Malik Khizar, Zahoor Ali Khan, Umar Qasim, and Nadeem Javaid

A Model for Migration of Virtual Machines to Reduce Electric Energy Consumption

Dilawaer Duolikun, Ryo Watanabe, Tomoya Enokido, and Makoto Takizawa

Information Flow Control Models in Peer-to-Peer Publish/Subscribe Systems

Shigenari Nakamura, Tomoya Enokido, and Makoto Takizawa
Session 5: Wireless Communication Systems and Classification Techniques

Experimental Results of a Raspberry Pi Based Wireless Mesh Network
Testbed Considering TCP and LoS Scenario .................................................................................................. 175
  Tetsuya Oda, Masafumi Yamada, Ryoichiro Obukata, Leonard Barolli, Isaac Woungang, and Makoto Takizawa
Influences of 3D Aircraft Model to ILS Localizer ..................................................................................... 180
  Junichi Honda, Hisashi Yokoyama, Hirohisa Tajima, and Takuya Otsuyama
Numerical Analysis of Transmission Spectrum of X-shaped Photonic Crystal Waveguide for WDM System ...................................................................................................................... 186
  Hiroshi Maeda, Michael Cada, Yuting Bao, Jianming Jin, and Kazuya Tomiura
Implementation and Evaluation of Never Die Network System for Disaster Prevention Based on OpenFlow and Cognitive Wireless Technology ......................................................... 190
  Goshi Sato, Noriki Uchida, Norio Shiratori, and Yoshitaka Shibata
A Study of Malicious PDF Detection Technique ......................................................................................... 197
  Mai Iwamoto, Shunsuke Oshima, and Takuo Nakashima
A Fast Classification Method of Isomorphic Polygons in Design Data of Large Scale Integrated Circuit ................................................................................................................................. 204
  Shuji Shoji and Akio Koyama

Session 6: Bioinformatics and Intelligent Computing

Biological Pathway Analysis for De Novo Transcriptomes through Multiple Reference Species Selections ........................................................................................................................................... 210
  Chun-Cheng Liu, Chien-Ming Chen, Cin-Han Yang, Tun-Wen Pai, Phaik-Eem Lim, Siew-Moi Phang, Sze-Wan Poong, and Kok-Keong Lee
Gene Ontology Based Clustering Analysis for Functionally Linked Genes and Cross-Species Comparison for SSR Biomarkers ............................................................................................................. 215
  Yang-Chun Chang, Chien-Ming Chen, Tun-Wen Pai, Ronshan Cheng, and Ming-Hsiung Chiu
Application of the Artificial Neural Network in Predicting the Direction of Stock Market Index ................................................................................................................................................. 219
  Qiu Mingyue, Li Cheng, and Song Yu
Investigation of Fitness Function Weight-Coefficients for Optimization in WMN-PSO Simulation System ........................................................................................................................................... 224
  Shinji Sakamoto, Tetsuya Oda, Makoto Ikeda, Leonard Barolli, Fatos Xhafa, and Isaac Woungang
A System for Phylogenetic Analyses over Alignments of Next Generation Sequence Data .................................................................................................................................................. 230
  Yuki Nishimura, Toshiyuki Amagasa, Yuji Inagaki, Tetsuo Hashimoto, and Hiroyuki Kitagawa

Performance Analysis of WMN-GA System for Different WMN Architectures and TCP Congestion-Avoidance Algorithms ........................................................................................................... 238
  Ilir Shinko, Tetsuya Oda, Admir Barolli, Vladi Kolici, Leonard Barolli, and Fatos Xhafa

Session 7: Wireless Sensor Networks and VANETs

A Reliable and Interference-Aware Routing Protocol for Underwater Wireless Sensor Networks ........................................................................................................................................ 246
  Abdul Majid, Irfan Azam, Tanveer Khan, Sangeen, Zahoor Ali Khan, Umar Qasim, and Nadeem Javaid

SMIC: Sink Mobility with Incremental Cooperative Routing Protocol for Underwater Wireless Sensor Networks ................................................................................................................................. 256
  Mahin Sajid, Abdul Wahid, Khayyam Pervaiz, Malik Khizar, Zahoor Ali Khan, Umar Qasim, and Nadeem Javaid

EEIRA: An Energy Efficient Interference and Route Aware Protocol for Underwater WSNs ................................................................................................................................................ 264
  Anwar Khan, Nadeem Javaid, Hasan Mahmood, Sangeen, Zahoor Ali Khan, and Umar Qasim

Comparative Analysis of Energy Management Solutions Focusing Practical Implementation ........................................................................................................................................ 271
  Danish Mahmood, Nadeem Javaid, Umar Nouman, Afaq Urrahman, Zahoor Ali Khan, and Umar Qasim

Estimation of Communication Range Using Wi-Fi for V2X Communication Environment ....................................................................................................................................... 278
  Kenta Ito, Go Hirakawa, and Yoshitaka Shibata

Evaluation of Single-Copy and Multiple-Copy Routing Protocols in a Realistic VDTN Scenario ........................................................................................................................................... 284
  Evjola Spaho, Leonard Barolli, Vladi Kolici, and Algenti Lala

ADiS 2016

Session 1: Autonomic Distributed Systems

Real-Time Processing of Heterogeneous Data in Sensor-Based Systems ................................................................................................................................................ 290
  Andrei Dincu, Elena Apostol, Cătălin Leordeanu, Mariana Mocanu, and Dan Huru

Distributed Platform for the Analysis of Cryptographic Algorithms ................................................................................................................................................ 296
  Vlad-Cosmin Ozunu, Cezar-Costin Pirvu, Cătălin Leordeanu, and Valentin Cristea
Integrated Cloud Framework for Farm Management
Cristian Radu, Elena Apostol, Cătălin Leordeanu, and Mariana Mocanu

Energy-Aware Algorithms to Select Servers in Scalable Clusters
Hiroki Kataoka, Atsuhiro Sawada, Dilawaer Duolikun, Tomoya Enokido, and Makoto Takizawa

ECDS 2016

Session 1: Distributed Systems and Applications
A Dependable Small World Communication Processor
Hideki Mori

Development of Operations Support Mechanism for Wide-Area Distributed Agent Repositories
Yoshitaka Kato, Takahiro Uchiya, Ichih Takumi, and Tetsuo Kinoshita

Development of Distributed Backup System among Individuals by Introducing Deduplication
Hiroaki Ishida, Takahiro Uchiya, Ichih Takumi, and Tetsuo Kinoshita

Tourism Local Community System Using LOD
Toshihiko Wakahara, Toshitaka Maki, Kazuki Takahashi, Akihiro Yamaguchi, Shinichiro Kimoto, Akinori Takagi, Yu Ichifuji, and Noboru Sonehara

Proposal of Algorithm for Designating the Person in Charge of Page Turn of PEANUTS Considering the Concert Program
Yasue Iijima, Shigeru Fujita, and Susumu Konno

Avoiding Energy Holes in Underwater Wireless Sensor Networks with Balanced Load Distribution
Irfan Azam, Abdul Majid, Tanveer Khan, Sajjad, Zahoor Ali Khan, Umar Qasim, and Nadeem Javaid

ePaMus 2016

Session 1: Parallel, Networking and Multi-core Systems
Enhancing Data Reuse in Cache Contention Aware Thread Scheduling on GPGPU
Chin-Fu Lu, Hsien-Kai Kuo, and Bo-Cheng Charles Lai

Core Point Paradigm and Evolution with Water Ripple Model
Zhibing Yu, Kun Ma, and Bo Yang

Hybrid Analysis for Mining Network Protocol's Hidden Behavior
Yan-Jing Hu and Xu An Wang
Toward a Semantic Cache Supporting Version-Based Consistency ...................................................... 367
Zhe Yang, Kun Ma, and Jialin Zhong

FCISIS 2016

Session 1: Robotics and Support Systems

Approaches to Understanding Hand Skill Acquisition ........................................................................... 373
Hiroki Taniguchi, Changshuai Liu, Tetsuya Morizono, and Tatsushi Tokuyasu

Design of an Omnidirectional Wheelchair for Playing Tennis .............................................................. 377
Keita Matsuo and Leonard Barolli

Improvement of Mesh Free Deforming Analysis for Maxillofacial Palpation on a Virtual Training System ........................................................................................................................................ 382
Kenji Yoshitomi, Tatsushi Tokuyasu, Kazuhiko Toshimitsu, Takaaki Nakayama, Kazutoshi Okamura, and Kazunori Yoshiura

Development of Design Support System of a Lane for Cyclists and Pedestrians .................................. 385
Shota Okamoto, Sen Takematsu, Shimpei Matsumoto, Takako Otabe, Takanori Tanaka, and Tatsushi Tokuyasu

A Study on Evaluating Wearing Mobility of Wearable Robot Mechanisms ........................................ 389
Tetsuya Morizono, Shuhei Oda, Takashi Motomura, Kazuya Sakamoto, Shutaro Takeshita, and Hiroyuki Matsubara

Session 2: Complex and Scalable Systems

Heuristic Algorithm Based Energy Management System in Smart Grid .................................................. 396
Naveed Ur Rehman, Hassan Rahim, Adnan Ahmad, Zahoor Ali Khan, Umar Qasim, and Nadeem Javaid

Simulation of Optical Pulse Propagation in Nonlinear and Dispersive Medium by Constrained Interpolated Profile Method ........................................................................................................... 403
Hiroshi Maeda, Michael Cada, Jianming Jin, and Kazuya Tomiura

Toward an Integrated Tool for Complex Environmental Systems Modeling: A Cellular Automata Approach ........................................................................................................................................... 408
Mustapha Ouardouz, Abdes-Samed Bemoussi, and Mina Amharref

A Web Service for C Programming Learning and Teaching ....................................................................... 414
Yu Yan, Hiroto Nakano, Kohei Hara, Takenobu Kazuma, and Aiguo He
HCCIEA 2016

Session 1: Hybrid/Cloud Computing Infrastructure for e-Science Application

BUSSOLA: A Cloud Collaborative Platform of Oriented Services to Passengers ................................................................. 420
  Lorenzo Mossucca, Klodiana Goga, Gianluca Spoto, Thomas Bolognesi, and Giuseppe Caragnano

DemoGRAPE: Managing Scientific Applications in a Cloud-Federated Environment .............................................. 426
  Alberto Scionti, Pietro Ruiu, Olivier Terzo, Luca Spogli, Lucilla Alfonsi, and Vincenzo Romano

QoS Requirements for a Scientific Opportunistic Cloud ......................................................................................... 432
  Harold Castro and Juan D. Osorio

  Luca Pilosu, Pietro Ruiu, Klodiana Goga, and Marcello A. Budroni

ICLS 2016

Session 1: Intelligent and Secure Networking Systems

A Multi-replica Associated Deleting Scheme in Cloud ............................................................................................... 444
  Yuanyuan Zhang, Jinbo Xiong, Xuan Li, Biao Jin, Suping Li, and Xu An Wang

Fully Detection of Illegal Memory Access Defects ................................................................................................. 449
  Yukun Dong

Design and Implementation of an Extensible Network Device Management System ................................................... 456
  Jianan Lin, Qiaoduo Zhang, Lingcui Zhang, and Fenghua Li

Extensible Command Parsing Method for Network Device ...................................................................................... 462
  Ning Li, Lingcui Zhang, Qiaoduo Zhang, and Fenghua Li

An ID-based Dynamic Authenticated Group Key Agreement Scheme with Optimal Round Complexity from Pairings .................................................................................... 468
  Fei Li, Dongqing Xie, Wei Gao, Xu An Wang, and Jianhua Yan

Implementation of Positioning Management System for Improtant Equipments Based on Internet of Things ................................................. 473
  Yan Yang
IINIC 2016

Session 1: Intelligent and Natural Inspired Computing

A Neural Network Based User Identification for Tor Networks: Comparison
Analysis of Activation Function Using Friedman Test

Tetsuya Oda, Ryoichiro Obukata, Masafumi Yamada, Taro Ishitaki,
Masahiro Hiyama, and Leonard Barolli

Performance Evaluation of an Ambient Intelligence Testbed for Improving
Quality of Life: Evaluation Using Clustering Approach

Ryoichiro Obukata, Tetsuya Oda, Donald Elmazi, Leonard Barolli,
Keita Matsuo, and Isaac Woungang

Neuro-Adaptive Learning Fuzzy-Based System for Actor Selection
in Wireless Sensor and Actor Networks

Elis Kulla, Donald Elmazi, and Leonard Barolli

Demand Side Management Using Hybrid Bacterial Foraging and Genetic
Algorithm Optimization Techniques

Adia Khalid, Nadeem Javaid, Abdul Mateen, Bilal Khalid, Zahoor Ali Khan,
and Umar Qasim

Design and Implementation of Meal Information Collection System Using IoT
Wireless Tags

Kohei Kaiya and Akio Koyama

Application of Fuzzy Logic for Secure Handover in Wireless Cellular Networks

Takaaki Inaba, Donald Elmazi, Shinji Sakamoto, Tetsuya Oda, Makoto Ikeda,
and Leonard Barolli

MC2 2016

Session 1: Motion Capture and Classification

Design of Sketch-Based Image Search UI for Finger Gesture

Takayuki Kasai and Kosuke Takano

Real-Time Motion Capture: An Overview

Xudong Zhu and Kin Fun Li

A Posture Detection System Using Consumer Wearable Sensors

Masatoshi Matsumoto and Kosuke Takano

Motion Retrieval Based on Semantic Code and Dynamic Bayesian Network
Inference

Qinkun Xiao, Kin Fun Li, and Ren Song
SWISM 2016

Session 1: Semantic, Cloud and Agent-Based Computing

Automatic Production of an Ontology with NLP: Comparison between a Prolog Based Approach and a Cloud Approach Based on Bluemix Watson Service .................................................................537

Beniamino di Martino, Antonio Esposito, Salvatore D’Angelo,
Alessandro Marrazzo, and Angelo Capasso

Towards a Uniform Semantic Representation of Business Processes, UML Artefacts and Software Assets ..................................................................................................................543

Beniamino di Martino, Antonio Esposito, Stefania Nacchia,
and Salvatore Augusto Maisto

A Security SLA-driven Methodology to Set-Up Security Capabilities on Top of Cloud Services ..........................................................................................................................549

Valentina Casola, Alessandra de Benedictis, Mădălina Erașcu,
Massimiliano Rak, and Umberto Villano

An Agent-Based Model for Autonomous Planning ..............................................................555

Flora Amato and Francesco Moscato

VENOA 2016

Session 1: Innovative Systems and Applications

A Proposal of Coding Rule Learning Function in Java Programming Learning Assistant System ..........................................................................................................................561

Nobuo Funabiki, Takuya Ogawa, Nobuya Ishihara, Minoru Kuribayashi,
and Wen-Chung Kao

Practice of Programming Education Using Scratch and NanoBoardAG for High School Students ..........................................................................................................................567

Kazuaki Yoshihara and Kenzi Watanabe

Flexible Screen Sharing System between PC and Tablet for Collaborative Activities ..........................................................................................................................569

Hiroyuki Masaki, Hitoshi Habe, and Nobukazu Iguchi

Proposed of Automatic Collection System on Farm Work Recode by RFID ..................................................572

Yukikazu Murakami, Mizuki Ando, Miyuu Miyamoto,
and Slamet Kristanto Tirto Utomo

Parameters of Noise Suppression Based on Wavelet Transform for Phonocardiographic Signals ..........................................................578

Shinya Kudo, Keisuke Nishijima, Shingo Uenohara, and Ken’ichi Furuya
A Study on the Optimum Number of Training Data in Snore Activity Detection Using SVM .................................................................582
  Keisuke Nishijima, Shingo Uenohara, and Ken‘ichi Furuya

Session 2: Basic Network Services and Applications

Experimental Verification of Docker-Based Distributed Cloud Applications for Secured Mobile VoIP ........................................................585
  ByungRae Cha, Sun Park, and JongWon Kim

A Content Searching Scheme Using Popularity and Link Degree of Nodes in Unstructured P2P Networks with Cache Routers ........................590
  Daiki Takeda and Shinji Sugawara

A System for Supporting Migration to Overlay OpenFlow Network Using OpenStack ........................................................................595
  Keita Nomura, Yoshiaki Taniguchi, Nobukazu Iguchi, and Kenzi Watanabe

Study on Cross-Cutting and Systematic Regional Community Networks .................................................................599
  Eiji Aoki, Zenjiro Oba, and Ritsuko Watanabe

Proposal of a Malicious Communication Control Method Using OpenFlow .........................................................605
  Minoru Ikebe, Daiki Shimokawa, and Kazuyuki Yoshida

Session 3: Virtual Reality Systems and Applications

3D Model Generation of Cattle by Shape-from-Silhouette Method for ICT Agriculture .................................................................611
  Yu Xiang, Shohei Nakamura, Hiroki Tamari, Shigeru Takano, and Yoshihiro Okada

3D Model Data Retrieval System Using KAZE Feature for Accepting 2D Image as Query .................................................................617
  Hideki Sagara, Shigeru Takano, and Yoshihiro Okada

Creating Method for Real-Time CG Animation of Cooperative Motion of Both Hands for Mirror Box Therapy Support System ..................................623
  Masato Tanaka, Makoto Fujimura, Toshio Higashi, and Toru Kobayashi

Evaluating a Multimedia e-Learning System for CAD Drawing Course ..................................................................................628
  Dahlan Nariman

A Desktop 3D Modeling System Controllable by Mid-air Interactions ........................................................................633
  Kanako Nakazato, Hiroaki Nishino, and Toshitada Kodama

Author Index ..................................................................................................................638
