TABLE OF CONTENTS

PARAMETER ESTIMATION OF AN ELECTROCHEMICAL SUPERCAPACITOR MODEL .......................................................... 1
Ross Drummond ; David A. Howey ; Stephen R. Duncan

MODELING AND CONTROL OF A TWO-TANK MOLTEN SALT THERMAL STORAGE FOR A CONCENTRATED SOLAR PLANT ............................................................................................................. 7
Jessica Leo ; Frans Davolaar ; Gildas Besançon ; Alina Voda

POINTWISE THÉVENIN EQUivalents OF A SOLAR MODULE ........................................................................................... 13
Rafael F. Q. Magossi ; Vílma A. Oliveira ; Ricardo Q. Machado ; Shankar P. Bhattacharyya

CONTROL OF A SOLAR FURNACE USING ACTIVE COOLING............................................................................................. 19
Bertinho A. Costa ; João M. Lemos ; Emmanuel Guilhot

ABSORPTION HEAT PUMP PARAMETER IDENTIFICATION USING A MICRO GENETIC ALGORITHM ............................................. 25
Kasper Vinter ; Tom S. Pedersen ; Kirsten M. Nielsen

MODELING AND SIMULATION OF PARABOLIC THROUGH SOLAR FIELDS WITH PARTIAL RADIATION........................... 31
Sergio J. Navas ; Francisco R. Rubio ; Pedro Ollero ; Manuel G. Ortega

CONTROL CONFIGURATIONS IN DISTILLATION COLUMNS: A COMPARATIVE STUDY ....................................................... 37
Max Thone ; Max Potters ; Simone Baldi

STEADY-STATE PARAMETER ESTIMATION OF AN EXPERIMENTAL VAPOUR COMPRESSION REFRIGERATION PLANT .................................................................................................................. 43
David Rodriguez ; Jose A. Aljuya ; Guillermo Bejarano ; Manuel G. Ortega ; P. Castalho

STEPWISE COMMISSIONING OF A STEAM BOILER WITH STABILITY GUARANTEES .......................................................... 49
Simon Vestergaard Johansen ; Carsten Skovmose Kallese ; Jan Dimon Bendtsen ; Palle Andersen

SELF CALIBRATING FLOW ESTIMATION IN WASTE WATER PUMPING STATIONS .............................................................. 55
Carsten Skovmose Kallese ; Torben Knudsen

CLOSED LOOP CONTROL OF AN ELECTROMAGNETIC STIRRER IN THE CONTINUOUS CASTING PROCESS .......................................................... 61
Kevin Dekeemele ; Clara-Mihauela Ionenciuc ; Michael De Doncker ; Robin De Keyser

GAIN-SCHEDULED COMPOSITE NONLINEAR FEEDBACK CONTROL OF AN EXOTHERMIC CHEMICAL REACTOR ...................................................................................................................... 67
V. P. Pyrhonen ; H. J. Koivisto

BLENDED CONTROL ALLOCATION AND LATERAL-DIRECTIONAL STABILITY OF THE REUSABLE LAUNCH VEHICLES ........................................................................................................ 74
Huang Huang

ENHANCED NONLINEAR MODEL AND CONTROL DESIGN FOR A FLEXIBLE WING ........................................................................ 80
Rafael F. Q. Magossi ; Vilma A. Oliveira ; Ricardo Q. Machado ; Shankar P. Bhattacharyya

STATE AGGREGATION APPROXIMATE DYNAMIC PROGRAMMING FOR MODEL-BASED SPACECRAFT AUTONOMY ...................................................................................................................... 86
Massimino Tipaldi ; Luigi Gielmo

ALTERNATIVE REPRESENTATIONS OF FREQUENCY-DOMAIN CONSTRAINTS FOR IMPROVED PERFORMANCE IN ON-BLADE CONTROL SYSTEMS ......................................................... 92
Rafael M. Morales

COMPENSATING ACTUATOR FAILURES IN NEAR SPACE VEHICLES USING ADAPTIVE FINITE TIME DISTURBANCE OBSERVER BASED BACKSTEPPING CONTROLLER .............................................. 98
Arghya Chakravarty ; Chitralaksha Mahanta

CIRCULAR ORBIT SPACECRAFT CONTROL AT THE L4 POINT USING LYAPUNOV FUNCTIONS ................................................ 104
R. Agrawal ; R. N. Banavar

MULTI-OBJECTIVE CO-DESIGN FOR MODEL PREDICTIVE CONTROL WITH AN FPGA .......................................................... 110
B. Khusainov ; E. C. Kerrigan ; G. A. Constantinides

FURTHER RESULTS ON THE EXPLORATION OF COMBINATORIAL TREE IN MULTI-PARAMETRIC QUADRATIC PROGRAMMING ........................................................................................................ 116
Parisa Ahmadi-Toshkhenani ; Sorin Olaru ; Tor Arne Johansen

A PARAMETRIC AUGMENTED LAGRANGIAN ALGORITHM FOR REAL-TIM ECONOMIC NMPC ...................................................................................................................... 123
Jean-Hubert Hours ; Harsh Shukla ; Colin N. Jones

HIGH-SPEED DIRECT MODEL PREDICTIVE CONTROL FOR POWER ELECTRONICS ................................................................. 129
Bartolomeo Stellato ; Paul J. Goulart

NONLINEAR MPC FOR SURVEILLANCE CONTROL OF HYBRID ELECTRIC VEHICLES ........................................................................ 135
Johannes Buerger ; Mark Cannon

TIME-OPTIMAL RACE CAR DRIVING USING AN ONLINE EXACT HESSIAN BASED NONLINEAR MPC ALGORITHM ...................................................................................................................... 141
Robin Verschueren ; Mario Zanon ; Rien Quirynen ; Moritz Diehl

FINAL-STATE CONSTRAINED OPTIMAL CONTROL VIA A PROJECTION OPERATOR APPROACH ............................................. 148
Ivano Notarnicola ; Florian A. Bayer ; Giuseppe Notarstefano ; Frank Allgower

STOCHASTIC GRADIENT METHODS FOR STOCHASTIC MODEL PREDICTIVE CONTROL ...................................................................................................................... 154
Andreas Themelis ; Silvia Villa ; Panagiotis Pitsillos ; Alberto Bemporad
