Contents

Welcome to the Workshops at the 24th IEEE International Requirements Engineering Conference ........ xi
Lin Liu and Krzysztof Wnuk
Donors and Sponsors ........................................................................................................................................... xii

Third International Workshop on Artificial Intelligence for Requirements Engineering (AIRE)

Welcome to the Third International Workshop on Artificial Intelligence for Requirements Engineering (AIRE'16)........................................................................................................................................... 1
Fabiano Dalpiaz, Henning Femmer, and Jin Guo

Requirements Specification-by-Example Using a Multi-objective Evolutionary Algorithm......................... 3
Lorijn van Rooijen and Heiko Hamann
University of Paderborn, Germany

Planning Optimal Agile Releases via Requirements Optimization ................................................................. 10
Joseph Gillain, Ivan Jureta, and Stéphane Faulkner
University of Namur, Belgium

Formal Understanding of Tradeoffs among Liveness and Safety Requirements............................................ 17
Ozgur Kafali, Nirav Ajmeri, and Munindar P. Singh
North Carolina State University, United States

Automated Extraction of Regulated Information Types Using Hyponymy Relations ................................... 19
Jaspreet Bhatia, Morgan Evans, Sudarshan Wadkar, and Travis D. Breaux
Carnegie Mellon University, United States; Bard College, United States

Toward Tool Mashups: Comparing and Combining NLP RE Tools............................................................... 26
Brian Arendse and Garm Lucassen
Utrecht University, Netherlands

The Reassessment of Preferences of Non-Functional Requirements for Better Informed Decision-Making in Self-Adaptation........................................................................................................... 32
Luis Hernan Garcia Paucar and Nelly Bencomo
Aston University, United Kingdom

Automatic Classification of Requirements Based on Convolutional Neural Networks ................................ 39
Jonas Winkler and Andreas Vogelsang
Technische Universität Berlin, Germany

Which One To Read? Factors Influencing the Usefulness of Online Reviews for RE................................ 46
Eya Ben Charrada
University of Zurich, Switzerland
Third Workshop on Evolving Security and Privacy Requirements Engineering (ESPRE)

Welcome to the Third Workshop on Evolving Security and Privacy Requirements Engineering (ESPRE) ...................................................................................................................................................... 53

Kristian Beckers, Shamal Faily, Seok-Won Lee, and Nancy Mead

Security and Privacy Requirements Engineering Revisited in the Big Data Era (Keynote) ....................... 55

Lin Liu
Tsinghua University, China

Security Requirements for Guidelines and Policies
A Framework for Generating User- and Domain-Tailored Security Policy Editors .............................................. 56

Manuel Rudolph, Cornelius Moucha, and Denis Feth
Fraunhofer IESE, Germany

Systematically Developing Prevention, Detection, and Response Patterns for Security Requirements .................. 62

Maria Riaz, Sarah Elder, and Laurie Williams
North Carolina State University, United States

Requirements Reconciliation for Scalable and Secure Microservice (De)composition .................................. 68

Mohsen Ahmadvand and Amjad Ibrahim
Technische Universität München, Germany

Tools and Technology Based Security and Privacy Requirements
ArgueSecure: Out-of-the-Box Security Risk Assessment .............................................................................. 74

Dan Ionita, Roeland Kegel, Andrei Baltuta, and Roel Wieringa
University of Twente, Netherlands

Security Guidelines: Requirements Engineering for Code Quality .............................................................. 80

Zeineb Zhioua, Yves Roudier, Stuart Short, and Rabea Boulifa Ameur
EURECOM, France; SAP, France; Telecom Paristech, France

Literature Survey on Technologies for Developing Privacy-aware Software ............................................. 86

Atsuo Hazeyama, Hironori Washizaki, Nobukazu Yoshioka, Haruhiko Kaiya, and Takao Okubo
Tokyo Gakugei University, Japan; Waseda University, Japan; NII, Japan; Kanagawa University, Japan; IISEC, Japan

First Workshop on Requirements Engineering for Investigating and Countering Crime (iRENIC)

Welcome to the First Workshop on Requirements Engineering for Investigating and Countering Crimes (iRENIC 2016) .................................................................................................................................................. 92

Dalal Alrajeh and Liliana Pasquale

Short Papers
Toward a More Structured Crime Scripting Method ........................................................................................ 94

Hashem Dehghanniri and Hervé Borrion
University College London, United Kingdom
Unified Profiling of Attackers via Domain Modeling ................................................................. 98
   Nesrin Hussein, Wentao Wang, Joseph Nedelec, Xuetao Wei, and Nan Niu
   University of Cincinnati, United States

Verifiable Limited Disclosure: Reporting and Handling Digital Evidence in Police Investigations .......................................................... 102
   Thein Than Tun, Blaine Price, Arosha Bandara, Yijun Yu, and Bashar Nuseibeh
   The Open University, United Kingdom

Long Papers
A Goal-Oriented Requirements Analysis for the Collection, Use and Exchange of Electronic Evidence across EU Countries .......................................................... 106
   Jean-Christophe Deprez and Christophe Ponsard
   CETIC, Belgium

Forensically-Sound Analysis of Security Risks of using Local Password Managers ......................... 114
   Joshua Gray, Virginia N. L. Franqueira, and Yijun Yu
   University of Derby, United Kingdom; The Open University, United Kingdom

Sixth International Workshop on Model-Driven Requirements Engineering (MoDRE)

Welcome to the Sixth International Workshop on Model-Driven Requirements Engineering (MoDRE) .............................................................................................................. 122
   Ana Moreira, Gunter Mussbacher, João Araújo, and Pablo Sánchez

Goal Modelling & Security
TimedGRL: Specifying Goal Models Over Time .................................................................................. 125
   Aprajita and Gunter Mussbacher
   McGill University, Canada

Goal Modelling in Clinical Decision Support .................................................................................... 135
   Liang Xiao and John Fox
   Hubei University of Technology, China; University of Oxford, United Kingdom

Towards Security Modeling of e-Voting Systems ........................................................................... 145
   Cristiano De Faveri, Ana Moreira, João Araújo, and Vasco Amaral
   Universidade Nova de Lisboa, Portugal

Maintaining Secure Business Processes in Light of Socio-Technical Systems’ Evolution .................. 155
   Mattia Salnitri, Elda Paja, and Paolo Giorgini
   University of Trento, Italy

Traceability and Synchronization
Visualization of Trace Links and Change Impact Analysis ............................................................. 165
   Stefan Kugele and Daniel Antkowiak
   Technische Universität München, Germany

A Framework to Synchronization Between Feature Configurations and Use Cases Based on Bidirectional Programming .............................................................................. 170
   Weize Zhao, Haiyan Zhao, Zhenjiang Hu
   Peking University, China; National Institute of Informatics, Japan
Privacy
Privacy Impacts of IoT Devices: A SmartTV Case Study ............................................................. 261
Richard L. Rutledge, Aaron K. Massey, and Annie I. Antón
Georgia Institute of Technology, United States; University of Maryland, Baltimore County, United States
Privacy Shielding by Design — A Strategies Case for Near-Compliance ..................................... 271
Michael Colesky and Sepideh Ghanavati
Radboud University Nijmegen, Netherlands

Sixth International Workshop on Requirements Patterns (RePa)
Welcome to the Sixth International Workshop on Requirements Patterns (RePa) ............................. 276
Lawrence Chung, Sylwia Kopezyńska, Julio Cesar Sampaio do Prado Leite, Sam Supakkul, and Liping Zhao
Capability Modeling as a Strategic Analysis Tool: Keynote Extended Abstract ............................. 278
Pericles Loucopoulos
University of Manchester, United Kingdom
Using Workflow Patterns to Model and Validate Service Requirements ........................................ 281
Ye Wang, Bo Jiang, and Ting Wang
Zhejiang Gongshang University, China; Zhejiang University of Technology, China
A Stakeholder Contribution Pattern in Requirements Decision-Making: An Empirical Study in Enterprise Development ............................................................. 289
Feng Chen, Norah Power, and J.J. Collins
University of Limerick, Ireland
Using Safety Requirements Patterns to Elicit Requirements for Railway Interlocking Systems .......... 296
Xiaohong Chen, Li Han, Jing Liu, and Haiying Sun
ECNU, China
Extracting Requirements Patterns from Software Repositories ......................................................... 304
Roxana Lisette Quintanilla Portugal and Julio Cesar Sampaio do Prado Leite
PUC-Rio, Brazil
An Approach for Creating Sentence Patterns for Quality Requirements ......................................... 308
Jonas Eckhardt, Andreas Vogelsang, and Henning Femmer
Technische Universität München, Germany; Technische Universität Berlin, Germany
An Analysis Pattern Driven Requirements Modeling Method ......................................................... 316
Jingjing Ji and Rong Peng
Wuhan University, China
Ninth International Workshop on Software Product Management (IWSPM)

Welcome to the Ninth International Workshop on Software Product Management (IWSPM 2016) .......... 320
Garm Lucassen, Farnaz Fotrousi, and Andrey Maglyas

A Process for Product and Service Definition .......................................................................................... 322
David Callele and Krzysztof Wnuk
University of Saskatchewan, Canada; Blekinge Institute of Technology, Sweden

Systematic Mapping of Technology-.Enabled Product Innovations .......................................................... 328
Samuel A. Fricker
FHNW, Switzerland

What Are Practitioners Asking About Requirements Engineering? An Exploratory Analysis of Social Q&A Sites .................................................................................................................................. 334
Zahra Shakeri Hossein Abad, Alex Shymka, Susant Pant, Ashley Currie, and Guenther Ruhe
University of Calgary, Canada

Requirements Analysis and Management for Benefiting Openness (RAMBO) ....................................... 344
Johan Linåker and Krzysztof Wnuk
Lund University, Sweden; Blekinge Institute of Technology, Sweden

Author Index ............................................................................................................................................. 350
