Nanoscale Science and Engineering Forum 2016

Core Programming Area at the 2016 AIChE Annual Meeting

San Francisco, California, USA
13-18 November 2016

# TABLE OF CONTENTS

<table>
<thead>
<tr>

</tbody>
</table>
(20g) Sustained Transgene Expression Via Substrate-Mediated Gene Transfer Results from Multiple Transfection Events .............................................................. 37
Norman Truong, Tatiana Segura

(21a) Injectable Hydrogel Beads for Delivery of High Concentration Mab Formulations .............................................................. 38
P. Douglas Godfrin, Ramesh S. Kashi, Patrick S. Doyle

(21b) Development and Physicochemical Characterization of Tacrolimus-Loaded Nanocomposite Microparticles for the Treatment of Pulmonary Hypertension .............................................................. 39
Zimeng Wang, Julie Cuddigan, Samantha A. Meenach

(21c) Nanoparticle-Mediated Inhibition of DNA Repair Sensitizes Brain Tumors to Radiotherapy .............................................................. 40
Forrest Kievit, Kai Wang, John Silver, Richard Ellenbogen, Miqin Zhang

(21d) Theranostic Nanoparticles for Traumatic Brain Injury .......................................................................................... 41
Forrest Kievit, Peter Chiarelli, Patrick S. Stayton, Anthony J. Convertine, Pierre Mourad, Donghoon Lee

(21e) Design, Synthesis, and Biological Evaluation of Novel Lipid Nanoparticle Materials for the In Vivo Delivery of Messenger RNA .................................................................................................................................. 42
Owen Fenton, Daniel G. Anderson

(21g) Engineering Polymer Drug Conjugates to Synergistically Schedule Chemotherapeutics .............................................................................................. 43
Douglas R. Vogus, Michael A. Evans, Stefano Menegatti, Samir Mitragotri

(21h) Hybrid Nanoparticles for Sequential and Controlled Delivery .............................................................................................. 44
Zilan Zhou, Carly Kennell, Joo-Yoop Lee

(41b) Solvent-Dependent Conductivity Enhancement of Carbon Nanotube Structures through Iodine Monobromide (IBr) Doping .................................................................................................................................. 45
Andrew R. Bucossi, Quintina Frink, Jamie E. Rossi, Brian J. Landi

(41d) Surface Hydrogen Enables Sub-Eutectic Vapor-Liquid-Solid Semiconductor Nanowire Growth .................................................................................................................................. 46
Ho Yee Hui, Saujan V. Sivaram, Maria De La Mata, Jordi Arbiol, Michael A. Filler

(41e) Bsmv As a Novel Biotemplate for Palladium Nanomaterial Synthesis and Mechanistic Comparisons .................................................................................................................................. 47
Olwwamayowa Adigun, Shohreh Hemmati, Erin Retzlaff-Roberts, Gloria Novikova, Miller Jeffrey, L. Sue Loesch-Fries, Michael T. Harris

(41f) A Computational Investigation of the Surfactant-Mediated Carbon Nanotube Stabilization in a Liquid Epoxy Resin .................................................................................................................................. 48
Farzin Rahmani, Susan Nowarian, Mina Mahdavi

(41g) Nanoporous Graphene for Energy Storage Applications ............................................................................................................. 49
Rohit Kanango, James G. Radich

(41h) Novel Energy Sources Based on Excess Thermopower and Carbon Nanotube Fibers .................................................................................................................................. 50
Albert Tianxiang Liu, Yuichiro Kunai, Amir Kaplan, Anton Cottrill, Jamila S. Smith-Dell, Michael Strano

(75a) NSEF Forum Award Lecture - Toward a Distributed Renewable Electrochemical Energy and Mobility System (DREEMS): Electrocatalysis for Automotive Fuel Cells .................................................................................................................................. 51
Yushan Yue

(75b) NSEF Young Investigator Award Lecture - Nanostructured Composite Materials for Thermoelectric Applications .................................................................................................................................. 52
Yue Wu

(168a) Water-in-Water Emulsion Based Synthesis of Hydrogel Nanospheres with Tunable Release Properties .................................................................................................................................. 53
Derya Aydin, Seda Kizilel, Pelin Erkoc

(168b) A Pharmacokinetic Model of a Tissue Implantable Insulin Sensor .................................................................................................................................. 54
Gili Bisker, Nicole Iverson, Jiyoung Ahn, Michael Strano

(168c) Liposome-Encapsulated Synergistic Drug Combinations for Low Dose Chemotherapy .................................................................................................................................. 55
Kathryn M. Camacho, Stefano Menegatti, Douglas R. Vogus, Anusha Pusuluri, Zoe Fuchs, Maria Jarvis, Michael Zakreswky, Michael Evans, Renwei Chen, Samir Mitragotri

(168d) Photoexcited Quantum Dots Potentiate Antibiotic Activity in Multidrug-Resistant Bacteria .................................................................................................................................. 56
Colleen Courtney, Samuel Goodman, Feifei Li, Nancy Madinger, Prashant Nagpal, Anushree Chatterjee

(168e) Evaluation of the Cancer-Preventive Effect of Resveratrol-Loaded Nanoparticles on the Formation of Tumor Spheroids .................................................................................................................................. 57
Elisa A. Torrico-Guzmán, Samantha A. Meenach

(168f) Preparation, Characterization and in Vitro Validation of a Novel Paclitaxel Transport System to Target HER2-Positive Breast Cancer .................................................................................................................................. 58
Celia Nieto Jiménez, Jesus Rodriguez-Rodriguez, Miguel A. Gálán, Eva M. Martin Del Valles

(168g) Adsorption, Stabilization and Recovery of Polyphenolic Flavonoids by TiO2 Functionalized Mesoporous Silica Nanoparticles .................................................................................................................................. 59
M. Arif Khan, William T. Wallace, Stephen E. Rankin, John M. Littleton, Barbara L. Knutson

(168h) Degradation Kinetics of PLGA and PLGA Conjugated with Alendronate Nanoparticles .................................................................................................................................. 60
Ruth Lancheros, Ruben Godoy-Silva, Carlos Arturo Guerrero
(168i) Confinement Facilitated Protein-Protein Stacking: As Investigated By Neutron Scattering ......................................................... 61
Justin Siefer, Margarita Kratueva, Ralf Biehl, Marc-Oliver Coppens

(176a) Energy Innovation - Challenges to Commercialization of New Energy Technology ......................................................... 62
Nick Tillmann

(176b) Energy and Nanomaterials: Interfacial Intersection ......................................................................................................................... 63
Randy L. Vander Wal

(176c) Carbon Nanotubes in Real World Applications – A Perspective on Translational Challenges and Industry Progress .................. 64
Amy Heutz

(176d) Solution Processed Inorganic Solar Cells ................................................................................................................................. 65
Rakesh Agrawal

(176e) Processing as Viable Strategy for Forming High Performance Lithium Ion Battery Electrodes ............................................. 66
Yazi Zhang, Brett Lucht, Ari J. Rose

(176f) Nanostructured Block Copolymers for Lithium Batteries and Biofuels Purification ............................................................... 67
Nitash Balsara

(203a) Bone Target N Acetylcysteine Loaded in PLGA-ALE Nanoparticle to Osteoporosis Treatment. an in Vitro Test .................. 68
Ruth Lancheros, Ruben Godoy-Silva, Carlos Arturo Guerrero

(203b) Inexpensive and Rapid Synthesis Unilamellar Liposomal Drugs for Targeted Delivery ......................................................... 69
Steven Roberts, Ryan Blowen, Nitin Agrawal

(203c) Fabrication and Characterization of Fluorescently Labeled Polymeric Nanoparticles for Biodistribution Studies of Drug Delivery ........................................................................................................................................ 70
Richey M. Davis, Ami Jo, Sanem Kayandani, Judy S. Riffle, Irving Allen, Dylan McDaniel

(203d) Polyelectrolyte Multilayer Films As Templates for Surface Modification to Design Liposomes Mediated Local and Sustained Therapeutic Delivery ........................................................................................................................................ 71
Stephen L. Hayward, David Francis, Matthew Sis, Srivatsan Kidambi

(203e) Recognitive Methacrylated Alginate Nanoparticles for Protein Therapeutics ........................................................................ 72
Nicholas A. Peppas, Julia Vela Ramirez

(203f) Gold Nanoconjugates for Spinal Cord Injury Treatment: Recovery and Biodistribution ................................................................. 73
Fangchao Liu, Janelle Buttry, Zeljka Minic, Harry G. Goshgarian, Guangzhao Mao

(203g) Development of Drug Delivery Systems Based on a Fructose Polymer and 5-Fluorouracil .................................................... 74
Álvaro González-Garcinuño, Antonio Tabernero, Miguel Ángel Galán, Eva M. Martín Del Valle

(204b) Synthesis, Gas Permeation and Selectivity of Highly Elastic Poly(dimethyldisiloxane)/Graphene Oxide Composite Elastomer Membranes ......................................................................................................................... 75
Heonjoo Ha, Jaesung Park, Benny D. Freeman, Christopher J. Ellison

(204c) A Molecular Dynamics Study on the Influence of Charge on the Transport of Water and Ions through Carbon Nanotubes (Award submission) ......................................................................................................................... 76
Michelle Aranha, Brian J. Edwards

(204d) High-Fidelity Single-Column Selective Desorption of Swcnts through the Modulation of Co-Surfactant States Around Carbon Nanotubes ......................................................................................................................... 77
Yang Zhao, Justin G. Clar, Jia Xu, Jean-Claude J. Banzongo, Kirk J. Ziegler

(204e) Novel Energy Sources Based on Excess Thermopower and Carbon Nanotube Fibers (for graduate student award) ................................................................................................................................. 78
Albert Tianxiang Liu, Yuichiro Kunai, Amir Kaplan, Anton Cottrill, Jamila S. Smith-Dell, Michael Strano

(204f) Crumpled Graphene Nanosheets and Their Assembly into Crosslinked Networks ................................................................................................................................. 79
Dorsa Parviz, Morgan Plummer, Micah Green

(204g) Optical Nanosensors for High Spatial and Temporal Studies of Neurotransmitter Imaging in the Brain ........................................ 80
Abraham Beyene, Travis Del Bonis-O’Donnell, Lela Yukovic, Markita Landry

Morphology of Carbon Nanotube Liquid Crystal Solution ......................................................................................................................... 81
Vida Jamali

Award: Material and Toxicity Evaluations of Nanoclays throughout Their Life Cycle ................................................................................................................................. 82
Alessandra Wagner

(260a) Effect of Washing and Drying Process on Particle Growth of Cerium Oxide Nanoparticles ................................................ 83
Won-Su Son, Giyoung Hong, Jebin Ryu, Hee Suk Woo, Youn-Woo Lee

(260ax) Dual-Responsive Plasmonic Behavior of Gold Nanorods@PANI Core/Shell Nanostructures ........................................ 84
Ja-Won Jeon, Jing Zhou, Jeffrey Geldmeier, James Ponder, Mahmoud A. Mahmoud, Mostafa El-Sayed, John Reynolds, Vladimir V. Tskrak

(260l) Adsorption Mechanisms of Palladium (II) Trichloro-Hydroxy Complex on the Tobacco Mosaic Virus Surface ................................................................................................................................. 85
Gloria Novikova, Ohuwamayowa Adigan, Michael T. Harris
(260av) Discrete Element Model of Nanoparticle Deposition during Electrospraying .......................................................... 86
Anna Zitkova, Martin Kroupa, Juraj Kosek

(260aw) How Protein Corona Affects Cellular Uptake of Nanoparticles ................................................................. 87
Ke Huang, Yang Hu, Rena Boerhan, Guoqiang Jiang

Bijentimala Keihamo, Arron Cole, Phong Nguyen, Ankil Melka, Vikas Berry

(260ar) Correlating Solid-Binding Peptide Structure with Biomimetic Function .......................................................... 89
Brittney Hellen, Francois Baneys, Harley Pyles, Arushi Prakash, Jim Pfaendtner

(260at) Catalytic CVD Growth of Carbon Nanotube Carpets on Metallic Substrates ..................................................... 90
Xu Li, Haider Almkhelfe, Nolan Gaede, Tyler Harris, Montgomery Baker-Fales, Placidus B. Amama

(260au) Engineering Supraparticle Assemblies for Catalysis ......................................................................................... 95
Naomi S. Ramesar, Nicholas A. Kotov

(260av) Tumor-Penetrating Aerosol Nanocomposite Microparticles for the Treatment of Lung Cancer .................... 96
Elisa A. Torrico-Guzmán, Samantha A. Meenach

(260aw) High-Fidelity Single Column Separation of Semiconducting Swcnts Using Agarose Gel .............................. 93
Yang Zhao, Justin G. Clor, Jia Xu, Jean-Claude J. Bonzongo, Kirk J. Ziegler

Xiaoyu Hu, Xiao Kang, Diannan Lu, Zheng Liu, Jianzhong Wu

(260ay) Material and Toxicity Evaluations of Nanoclays throughout Their Life Cycle .................................................. 100
Alixandra Wagner, Andrew White, Reem Eldawud, Sushant Agarwal, Todd Stueckle, Konstantinos Sierras, Ton Rojanasakul, Rakesh K. Gupta, Cerasela Zocita Dinu

(260az) Ordered Nanoporous Titania Thin Films for Energy Conversion and Storage ................................................... 101
Syed Z. Islam, Allen Reed, Namal Wanninayake, Doo Young Kim, Stephen E. Rankin

(260ba) Precursor Ion-Ion Aggregation in the Brust-Schiffirn Synthesis of Alkanethiol Nanoparticles ......................... 102
Trent Graham, Ryan Benslow, Niranjan Govind, Steven R. Saunders

(260bb) Langmuir-Blodgett Deposition of Anisotropic Nanoparticles ............................................................................. 103
William Ivanic, John Juchnowski, Jessica Buckel, Christopher Wirth

(260bc) Assessment of the Exposure of Human Lung Epithelial Cells to Nanoclays ..................................................... 105
Andrew White, Todd Stueckle, Rakesh K. Gupta, Sushant Agarwal, Alixandra Wagner, Ton Rojanasakul, Cerasela Zocita Dinu

(260bd) Nanoparticles As Biomolecular Cargo Transporters in Plant Systems .............................................................. 106
Gozde Sultan Demirer, Markita Landry

(260be) Optimization of Aerosol Nanocomposite Microparticles (nCmP) for Deep Lung Delivery of Therapeutics .......... 107
Zimeng Wang, Samantha A. Meenach

(260bf) Novel Photovoltaic Applications of Photosystem I Multilayer Films .............................................................. 108
Maxwell Robinson, Faustine Mwambutsa, Marie Armbruster, David Cliffel, G. Kane Jennings

(260bg) Characterization of Hydrogel Porous Structure By Using the Differential Scanning Calorimetry Technique .... 109
J. Robby Sanders, Joseph J. Biernacki, Anjil Haris, Pedro E. Arce

(260bh) Application of Nanofluidics in Understanding Fluid Flow in Tight Rocks ......................................................... 110
Manas Pathak, Milind Deo

(260bi) The Effect of Binder on Volume Variation in Electrodes of Lithium Ion Batteries ........................................... 111
Wenduo Zeng, Junheng Xiong, Mark Cheng, K. Y. Simon Ng
(260p) Fabrication of Enzyme-Based Coatings on Intact Multi-Walled Carbon Nanotubes As Highly Effective Electrodes in Biofuel Cells ................................................................. 112
Inseon Lee, Byoung Chan Kim, Seok-Joon Kwon, Su Ha, Jonathan S. Dordick, Jungbae Kim
(260n) Conversion of Glycerol to Dihydroxyacetone Using Highly Stabilized Glycerol Dehydrogenase ........................................................................................................ 113
Youngho Wee, Gudi Satheesh Kumar, Xueyun Zhao, Shunxiang Xia, Ping Wang, Jungbae Kim
(260k) Antibody-Conjugated Nanoscale Enzyme Reactors for Highly Sensitive Immunoassay ............................................................................................................. 114
Youngjun Ju, Ji Young Eam, Sang Youn Hwang, Jungbae Kim
(260f) Chitosan Nanoparticles with Immobilized Glucose Oxidase As Efficient Antimicrobial Agents ......................................................................................... 115
Jeung You, Manab Deb Adhikari, Seok-Joon Kwon, Sung-Gil Hong, Warayuth Sajomsang, Jonathan S. Dordick, Jungbae Kim
(260e) Efficient Protein Digestion Using Highly-Stable Enzyme Coatings on Magnetic Nanofibers ................................................................................................. 117
Hyeonil Kim, Byoungsoo Lee, Byoung Chan Kim, Han Sol Kim, Jungbae Kim
(260d) Locked Nucleic Acid-Wrapped Single-Walled Carbon Nanotubes Based Optical Sensor for microRNAs Detection ................................................................. 118
Justyna Kupis-Rozmyslowicz
(260b) Enzyme Precipitate Coating of Glucose Oxidase on Electrospun Polymer Nanofibers with Efficient Antibacterial Activity .................................................... 119
Manab Deb Adhikari, Jahyun Nam, Seok-Joon Kwon, Inseon Lee, Seong H. Kim, Jonathan S. Dordick, Jungbae Kim
(260bb) Interaction of Single-Walled Carbon Nanotubes with Photosynthetic Systems ........................................................................................................... 120
Nils Schurgers
(277a) Biomaterials for Human Pluripotent Stem Cell Derived Midbrain Dopaminergic Neuron Generation and Transplantation to Treat Parkinson’s Disease ................................................................................................................. 121
Maroof M. Adil, Gonçalo M. C. Rodrigues, David V. Schafer
(277b) Engineering an Electroactive Hydrogel for Tissue Engineering Applications ............................................................................................................. 122
Andrew Spencer
(277d) Modulation of Inflammatory Response for Accelerated Tissue Vascularization and Bone Regeneration ............................................................................................................. 125
Ehsan Jabbarzadeh, Katy Rutledge, Maria Yanez
(277e) The Impact of Decellularization Agents on Renal Tissue Extracellular Matrix ......................................................................................................................... 126
Nafiseh Poornejad, Lara Schaumann, Travis Neuberger, Sarah Chamber, Beverly L. Roeder, Alonso Cook
(277g) Electrospun Silk with Selenium Nanoparticles for Antibacterial Skin Applications ............................................................................................................. 127
Stanley Chung, Thomas J. Webster
(277h) Engineered Cellulose-Based Cell Culture Platforms to Improve Human Health ................................................................................................................................. 128
Golden Camci-Unal
(279a) Award Submission _ Photo-Electrochemical Characterizations of Photosystem I (PS I) Assembly Under Bio-Mimetic Membrane Confinement ................................................................. 129
Hanich Niroomand, Bamim Khomami, Dibyendu Mukherjee
(279b) Award Submission: DNA-Programmable Assembly of Enzyme Superlattices ......................................................................................................................... 130
Mary Wang, Chad A. Mirkin
(279c) Award Submission: Bio-Inspired Nanomachines for Biomedical Applications ..................................................................................................................... 131
Jinxing Li, Joseph Wang
(279d) Award Submission: Development and Physicochemical Characterization of Tacrolimus-Loaded Nanocomposite Microparticles for the Treatment of Pulmonary Hypertension ................................................................................................................................. 132
Zimeng Wang, Julie Cuddigan, Samantha A. Meenach
(279e) Award Submission: Photoexcited Quantum Dots Potentiate Antibiotic Activity in Multidrug-Resistant Bacteria ............................................................................................................. 133
Colleen Courtney, Samuel Goodwin, Feifei Li, Nancy Madinger, Prashant Nagpal, Anushree Chatterjee
(279f) Award Session: Silk-Gold Nanorod Nanocomposite Films for Rapid Tissue Repair ..................................................................................................................... 134
Russell Urte, Mitzi Thelakkaden, Chengchen Guo, Michael Jaffe, Jeff Yarger, Kaushal Rege
(279g) Award Submission: Evaluation of the Cancer-Preventive Effect of Resveratrol-Loaded Nanoparticles on the Formation of Tumor Spheroids ................................................................................................................................. 135
Elisa A. Torrico-Guzmán, Samantha A. Meenach
(316a) Single-Step Synthesis of Aligned High Aspect Ratio Mwcnts Impregnated with Al2O3 Particles in an Ultrasonic Atomization Head CVD Reactor ................................................................................................................................. 136
Zuhair Omar Malalibari, Fahad Ali Rabbi, Muataz Ateih
(316b) Growth of Single-Walled Carbon Nanotubes with Rh and Cu Catalysts ......................................................................................................................... 137
Behnaz Rahnani, Jose L. Gomez-Ballesteros, Perla B. Balbuena
(316c) Gaseous Product Mixture from Fischer-Tropsch Synthesis As an Efficient Carbon Source for Low Temperature CVD Growth of Carbon Nanotube Carpets
Haider Almehed, Jennifer Carpena-Núñez, Tyson C. Back, Placidus B. Amama
.................................................................................................................... 138

(316d) Preparation of Polyacrylonitrile and Polyacrylonitrile/Carbon Nanostructures
Vahid Alizadeh
............................................................................................................................... 139

(316e) Hollow Carbon Nanobubbles: Graphene Related Nanocapsules That Form Stable Dispersions in Water and Can Incorporate a Cargo
Corinne Hofer, Robert N. Gruss, Martin Zeltner, Carlos A. Mora, Wendelin J. Stark
.................................................................................................................... 140

(316f) Janus Buckypapers: Bilayer Films of Pristine Graphene Stabilized By Pyrene-Functional Copolymers
Dorsa Parviz, Zhizhu Yu, Ronald Hedden, Micah Green
.................................................................................................................... 141

(316g) Mechanism of Direct Growth of Graphene on Si-Based Dielectric Substrates Via Cu Grain Boundaries
Phong Nguyen, Sanjay Behura, Rousan Debbarma, Michael Seacrist, Vikas Berry
.................................................................................................................... 142

(316h) An Experimental and Computational Study of the Surface Chemistry Effects in the TiO2 Grafting of Graphene Oxide
Mina Mahdavi, Sasan Nouranian, Farzin Rahmani
.................................................................................................................... 143

(316i) Effects of Shear on Carbon Nanotube Suspensions That Are Stabilized with Surfactants Using DPD Simulations
Minh Vo, Dimitrios V. Papavassiliou
.................................................................................................................... 144

(331a) Controlling Hybrid Structure Assembly, Solid Interactions and Inorganic Mineralization with Solid Binding Proteins
Francois Baneyx
.................................................................................................................... 145

(331b) Programmable, Chemically Mediated Control of Hydrogel Patterning and Chemomechanical Response
Rebecca Schulman
.................................................................................................................... 146

(331c) Lipid Nanoemulsions Impact Transport Across Mucosal Surfaces
Rebecca L. Carrier
.................................................................................................................... 147

(357a) Observation of Extreme Phase Transition Temperatures of Water Confined inside Isolated Carbon Nanotube Nanopores
Kumar Varoon Agarwal, Steven Shimizu, Lee Drahushuk, Michael S. Strano
.................................................................................................................... 148

(357b) A Molecular Dynamics Study of the Influence of Charge on the Transport of Water and Ions through Carbon Nanotubes
Michelle Arianha, Brian J Edwards
.................................................................................................................... 149

(357c) Electrical Transport and Network Percolation in Graphene and Boron Nitride Mixed-Platelet Structures
Rousan Debbarma, Sanjay Behura, Phong Nguyen, Sreeprasad Sreenivasan, Vikas Berry
.................................................................................................................... 150

(357d) Modulation of Thermodynamically-Stable Surfactant Structures for Selective Desorption of Single-Wall Carbon Nanotubes
Yang Zhao, Justin G. Clar, Xia Yu, Jean-Claude J. Bonzongo, Kirk J. Ziegler
.................................................................................................................... 151

(357e) Scaling the Separation of Single-Wall Carbon Nanotubes through Countercurrent Chromatography
Jason K. Streit, Jeffrey A. Fagan, Ming Zheng
.................................................................................................................... 152

(357f) Ultra-Breathable Carbon Nanotube Pores
Ngoc Bui, Eric Meshot, Sangil Kim, Jose Pena, Chiatai Chen, Phillip Gibson, Kuang Jen Wu, Francesco Fornasiero
.................................................................................................................... 153

(357g) Nucleation and Growth of Spontaneously Aligned Regions in Carbon Nanotube Thin Films: A Morphological Analysis
Benjamin King, Robert W. Cohn, Balaji Panchapakesan, Stuart J. Williams
.................................................................................................................... 154

(357h) Understanding the Intrinsic Water Wettability of Graphitic Carbon
Andy Kozbial, Lei Li
.................................................................................................................... 155

(357i) Wrapped up in Nanotubes: Probing Photoluminescence Dynamics of Wrapped Single-Walled Carbon Nanotubes (SWCNTs) for Sensing Applications
Ardenis A. Boghossian
.................................................................................................................... 156

(392a) Unlocking Intracellular Therapeutic Targets through Novel Nanostructured Biomaterials
Millicent O. Sullivan
.................................................................................................................... 157

(392b) Improving Selective Targeting to Macrophage Subpopulations through Modifying Liposomes with Arginine Based Materials
Kaitlin M. Brattle
.................................................................................................................... 158

(392c) Harnessing Biomaterials to Study and Engineer Lymph Node Function
Christopher M. Jewell
.................................................................................................................... 159

Particulate Matter Exposure: Results from Ambient Samples and Chamber Experiments

Synthesis of Micellar Nanocomposites

Atomistic, Coarse-Grained, and Statistical Mechanical Modeling of Dynamic DNA

Metal Organic Framework Composites for Chemical Protection

Disinfection of Water Using Silver and Copper Nanoparticle Impregnated Activated Carbon

Real Life PM Emissions from Traffic and Human Exposure Implications

Dose-Dependent Intracellular Reactive Oxygen and Nitrogen Species Production from Particulate Matter Exposure: Results from Ambient Samples and Chamber Experiments

Biofilm and Reference Diesel Particles: Differences in Inflammatory and Oxidative Effects

Real Life PM Emissions from Traffic and Human Exposure Implications

Disinfection of Water Using Silver and Copper Nanoparticle Impregnated Activated Carbon

Metal Organic Framework Composites for Chemical Protection

Atomistic, Coarse-Grained, and Statistical Mechanical Modeling of Dynamic DNA Nanostructures
(556b) Self-Assembled Collagen-Mimetic Triple Helices with Antimicrobial Peptide Amphiphiles As Novel Antibacterial Agents .......................................................... 215
Kanny (Run) Chang, Linbin Sun, Thomas J. Webster

(556c) Design of 3-Helix Micelles with Tailorable Sizes and Shapes ................................... 217
Dan Ma, Sinan Keten

(556d) Bioactive DNA-Peptide Nanotubes As Artificial Extracellular Matrices for Bone Tissue Engineering .............................................................. 218
Gujie Mo, Di Shi, Thomas J. Webster

(556e) Colloidal Directed Assembly of Pi-Conjugated Oligopeptides for Supramolecular Electronics .............................................................. 221
Bo Li, Songgong Li, Yuecheng Zhou, William Wilson, Charles M. Schroeder

(556f) A Self-Assembled pH-Responsive Multi-Component Platform for Oral Vaccination ...... 222
Lindsey A. Sharpe, Julia Yela-Ramirez, Nicholas A. Peppas

(556g) Filomicelles Self-Assembled from Degradable Di-Block Copolymers Deliver Retinoids and Chemotherapeutics in Durable Control of Carcinoma Cell Fate ........................................ 223
Praful R. Nair, Kyle Spinkler, Mohammed Vakili, Afshaneh Lavasanifar, Dennis E. Ediger

(571a) Construction of Graphene Oxide (GO) Framework on Hollow Fiber Membranes Via Layer-By-Layer Approach for Heavy Metal Removal ..................................... 224
Yu Zhang, Sui Zhang, Jie Gao, Tai-Shung Chang

(571b) Analysis of Graphene Membranes and Time-Varying, Stochastic Gas Transport ........ 225
Lee Drahushuk, Luda Wang, Steven P. Koenig, Kumar Varoon Agrawal, J. Scott Bunch, Michael S. Strano

(571c) Graphene and Graphene Oxide Nanoplatelets As Fillers to Reduce Ageing and Improve Permeability of PTMSP Membranes .................................................. 226
Silvia Meneguzzo, Luca Olivieri, Simone Ligi, Maria Grazia De Angelis, Andrea Sacconi, Loris Giorgini, Giorgio Cucca, Alberto Pettinai

(571d) Chitosan-Graphene Oxide Composite Membranes for Water Filtration .................... 227
Mojtaba Abolhassani, Jose Mattei-Sosa, Chris Griggs, Lauren F. Greenlee

(571e) Reduced Graphene Oxide (rGO) Membranes for Water Treatment Applications .......... 228
Ashish Aher, Mainak Majumder, Dibakar Bhattacharyya

(571f) Dynamic Microstructure and Compaction of Graphene Oxide Thin Film Membranes in Nanofiltration .............................................................. 229
Jeng Yi Chong, Norfarah Diana Abu, Bo Wang, Cecelia Mattevi, Kang Li

(571g) Tuning the Gas Barrier Properties and Selectivity By Means of Graphene-Based Coatings on Polymeric Film ................................................................. 230
Davide Pierleoni, Matteo Minelli, Simone Ligi, Vincenzo Palermo, Vittorio Morandi, Ferruccio Doghieri

(571h) Multiscale Graphene Topographies Programmed By Sequential Mechanical Deformation ................................................................. 231
Po-Yen Chen, Ian Wong, Robert Hart

(584a) In-Vitro Dosimetry Model for Toxicity Ranking of Metal Oxide Nanoparticles ............ 232
Rong Liu, H. Haven Liu, Zhaoxia Ji, Chong H Chang, Tian Xia, Andre E. Nel, Yoram Cohen

(584b) Amorphous Silicon Dioxide Nanoparticle Interactions with Pulmonary Epithelial Cells with and without a Pre-Existing Protein Corona ....................................... 233
Brittany E. Givens, Vicki H. Grassian, Jennifer Fiegel

(584c) Physicochemical Properties of Nanoparticles Determine Their In Vitro Cytotoxicity .......... 234
Alexander L. Kelly, Kyle D. Paul, Robert D. Arnold, Allan E. David

(584d) The Impact of Titanium Dioxide Nanoparticles on the Lysosome-Autophagy System and Cellular Clearance .............................................................. 235
Lauren Popp, Vinh Tran, Risha Patel, Laura Segatori

(584e) Potential Impact of Sublethal Levels of Nanomaterials on Interactive Behavior of Environmental Bacteria ...................................................................................... 236
Anee Mohanty, Bin Cao

(606a) Dissipative Particle Dynamics (DPD) Simulations of Star Polymer Microdroplets with Tunable Hhowness and Porosity Controlled By Nanoscale Block Architecture ............................................................. 237
Ryan L. Marson, Zhanpeng Zhang, Peter Ma, Sharon C. Glotzer

(606b) Theoretical and Experimental Investigation of Microphase Separation in Mixed Thiol Monolayers on Silver Nanoparticles .................................................. 238
Steven Merz, Zachary Farrell, Sergei A. Egorov, David Green

(606c) The Response of Anisotropic Colloidal Particles to a Nearby Electrode ...................... 239
Sri Harsha Nuthalapati, Cornelius Obasanjo, Christopher Wirth

(606d) Locally Glassy Dynamics in Colloidal Systems with Competing Interactions ............. 240
P. Douglas Godfrin, Steven D. Hudson, Kunlan Hong, Lionel Porcar, Peter Falus, Norman J. Wagner, Yun Liu

(606e) Development and Self-Assembly of Coarse-Grained Skin Lipid Models Derived Via Multistate Iterative Boltzmann Inversion .................................................. 241
Timothy C. Moore, Christopher R. Iacovella, Remco Hartkamp, Clare McCabe
(606f) Designing Interactions That Stabilize Assemblies to Changes in Density or Temperature:
Application to Square, Snub Square and Kagome Lattices ................................................................. 242
William D. Pihleros, Michael Baldea, Thomas M. Truskett

(606g) Small Angle X-Ray Scattering Determination of PS-b-PMMA Bulk Phase Diagram .................. 243
Caleb Brearex, Benjamin Nation, Peter Ludovice, Clifford L. Henderson

(606h) Polymer-Mediated Polymeric Control over Open Colloidal Crystals ......................................... 244
Nathan A. Mahnyoki, Lorenzo Rovigatti, Cristos N. Likos, Athanasios Z. Panagiotopoulos

(607b) The Design of Micelles for Molecular Diagnostics ........................................................................ 245
Sing Pil You, Matthew V. Terrell, Eun Ji Chung

(607c) Controlled, Self-Directed Assembly of Novel in-Situ Forming Biodegradable Nanostructures
for the Delivery of Ocular Therapeutics .................................................................................................. 246
Mark E. Byrne, Mindy George-Weinstein, Laura L. Osborn

(607d) Molecular Gel Formation As a First Order Phase Transition ....................................................... 247
Nikola Dukovic, Charles F. Zukoski

(607e) DNA-Programmable Assembly of Enzyme Superlattices ............................................................ 248
Mary Wang, Jeffrey D. Brodin, Chad A. Mirkin, Byeongdu Lee, Jaime Millan, Monica Olivera De La Cruz

(607f) Micromoreactors As a Tool for Producing Polymer Nanoparticles By a Self-Assembled Process 249
Antonio Tabernerio, Álvaro González-Garcinuño, Miguel A. Galan, Eva M. Martin Del Valle

(607g) Polymer-Induced Liposome Aggregation: Toward the Application of Naked-Eye Bio-Detection 250
Yan Xia, Hyun-Sook Jung, Zhiquan Shen, Chenlu Yu, Naomi Tennakoon, Ying Li, Mus Nieh

(607h) Information-Directed Assembly of Dynamic Covalent Molecular Ladders ................................. 251
Timothy F. Scott, Megan Dunn, Joseph Furgal, Jae Hwan Jung, Tao Wei

(639a) Microwell Arrays for Screening Interactions Between Root-Associated Microbes ...................... 252

(639b) Effect of Size and Charge of Metal IONS on Hydrogen Peroxide Stability in Silica Hydrogels .... 253
Ezgi Melis Dogan, Fulya Sudur-Zalluhoglu, Nese Orbey

(639c) UV-Assisted Synthesis of Carbon Nanotube-TiO2 Nanocomposites for Enhanced
Photocatalytic Air Purification .................................................................................................................. 260
Haider Almkhelfe, Patrick O’Connor, Montgomery Baker-Fales, Xu Li, Placidus B. Amama

(639d) NOVEL Magnetic Nanocomposite Materials for RAPID Removal of Polychlorinated Biphenyls
from Contaminated Water Sources .......................................................................................................... 261
Angela M. Gutierrez, Rohit Bhandari, Thomas Dziubla, J. Zach Hilt

(639e) Influence of Silica-Based Nanoparticles Embedded in Sand Bed Filtration for Cleaning-up
Industrial Wastewater ............................................................................................................................... 262
Afif Hethnawi, Nasaat N. Nassar, Marwan Shamel, Gerardo Vitale, Amjad El-Qarni, Suraj Gurung

(639f) Inactivation of E. coli. Using a Novel TiO2 Nanotube Electrode ...................................................... 263
Amir Ahmadi, Tingting Wu

(639g) Metal Organic Framework Derived Nanoporous Carbon As a Novel Adsorbent for Water
Treatment .................................................................................................................................................. 264
Zahra Dhabai, Ezzatollah Shamsaei, Soo Kwan Leong, Bradley Ladewig, Xiaoyang Zhang, Huaning Wang

(650a) Interfacial Assembly and Engineering of Ordered Functional Mesoporous Materials for
Applications .................................................................................................................................................. 265
Dongyuan Zhao

(650b) High-Energy Density Metal-Free Biobatteries Powered By Soft Drinks ......................................... 266
Zhiguang Zhu

(650c) Lego-like Micropillar/Microwell Chip for High-Throughput Functional Analysis of Genes
Encoding Pathogen-Specific Antimicrobial Enzymes ............................................................................. 267
Seek-Joon Kwon, Domoyoung Kim, Inseon Lee, Jungbae Kim, Jonathan S. Dordick

(650d) Chaperonin-Inspired Enzyme Protection By Mesoporous Silica .................................................. 268
Michele Lynch, Michael M. Nigra, Marc-Olivier Coppens

(650e) Intermediate Channeling Via Nanoscale Confinement .................................................................. 269
Kanchan Chavan, Scott Calabrese Barton

(650f) Engineering Ultrastable Protein Scaffolds for the Controlled Assembly of Multifunctional
Nanobiomaterials ....................................................................................................................................... 270
Samuel Lim, Dominic Glover, Nancy Sloan, Douglas S. Clark

(650g) Concanavalin A Enabled High Performance Enzyme Cascades on Magnetic Nanoparticles ......... 271
You Yong, Jun Ge, Zheng Liu

(650h) Design of a Heterogeneous Biocatalyst for Cofactor Regeneration and Improved Catalytic
Characteristics .............................................................................................................................................. 272
Adam A. Caparco, Andreas S. Bommarius, Julie A. Champion

(650i) Concanavalin a Coated Activated Carbon for Enzyme Immobilization ......................................... 273
Weina Xu, You Yong, Guoqiang Jiang, Zheng Liu
(652a) Tunable Synthesis of Au and Ag Hybrid Asymmetric Nanofingerails with Circular Dichroic Response
Roger Chang, Paulina Librizzi, Matthew Moocarne, Luat Young, Iona Kretzschmar

(652b) Non-Standard Amino Acid Labeling of the Extracellular Matrix of Probiotics for In Vivo Imaging of the Gut...
Noémie-Maunelle Dorval Courchesne, Pichet Praveschotinunt, Anna Duraj-Thatte, Alexix J. Rowner, George M. Church, Neel Joshi

(652c) Corona Phase Molecular Recognition for Protein Targets
Gili Bisker, Jayao Dong, Hoyoung Park, Nicole Iverson, Jiyoungh Ahn, Justin Nelson, Markita Landry, Sebastian Kruss, Michael S. Strano

(652d) Probing Sub-Cellular Organelle Contents with Carbon Nanotube Optical Reporters
Daniel Roxbury, Prakrit Jena, Thomas Galassi, Daniel Heller

(652f) Selective Capture and Release of Biomolecules in Complex Solutions Using Gold Nanoparticles and Electromagnetic Fields
Akanksha Sharma, Joel L. Plawsky, Pankaj Karande

(652g) Theranostic Multibranched Gold Nanoantennas for Breast Cancer Diagnostics and Therapeutics

(652h) Colorimetric Detection of Therapeutic Levels of Ionizing Radiation Using Plasmonic Nanoparticle Gels
Karthik Pushpanavanam, Sahil Inamdar, John Chang, Stephen Saparreto, Kaushal Rege

(652i) Carbon Nanotube-Based Microdevices for Tracking Single Macrophages By Raman Scattering
Zhibin Wang, Junfie Xi, Li Sun, Phong Tran, Sida Luo, Yi Ren, Tao Liu, Jingjiao Guan

(686a) Study of TL Response of Silver Nanoparticles in Borate Glasses Containing Dy3+ and Eu3+ Ions for UV and Gamma Dosimetry
Miguel Vallejo, Alejandro Arredondo, Modesto Sosa, Ricardo Navarro, Luis Díaz-Torres

(686b) Effects in Morphology and Thermoluminescent Characteristics of LiF Crystals Synthesized By Using Nonionic and Cationic Surfactants
Senthil Kumar, Swarnapriya Thiagarajan, Miguel Vallejo, Juan Azorin, Esteban Rivera, Ricardo Navarro, Boobalan Kasilingam, Luis Díaz-Torres, Jayaramakrishnan Velusamy, Modesto Sosa

(686c) Thermoluminescent Dosimetric Analysis of Ag and Cu Doped LiB3O5
Senthil Kumar, Swarnapriya Thiagarajan, Miguel Vallejo, Juan Azorin, Esteban Rivera, Ricardo Navarro, Boobalan Kasilingam, Luis Díaz-Torres, Jayaramakrishnan Velusamy

(686d) Effect of Thermal Treatment on the Characteristics of PES/PVA Nanocomposite Membranes Modified with TiO2 Nanoparticles: a Comparative Study Between 1-Step and 2-Step Thermal Treatment
Sara Pourjafar, Mohsen Jahanshahi, Ahmad Rahimpour

(686e) Synthesis, Structural and Morphological Characterization of Cu and Ag-Doped Li2B4O7
Swarnapriya Thiagarajan, Modesto Sosa, Miguel Vallejo, Senthil Kumar, Jayaramakrishnan Velusamy

(686f) Enhancement of Heat Transfer Coefficient By Using Fe2O3 –Water Nanofluids
Nasser Zouli, Muthanna Al-Dahan

(686g) Eco-Friendly Dyeing of Electrospun Cellulose Nanofibers with Reactive Dye Using Ultrasonic Energy
Soudabeh Hajahmadi

(686h) Combined Quartz Crystal Microbalance with Dissipation and Generalized Ellipsometry to Characterize the Deposition of Titanium Dioxide Nanoparticles on Model Rough Surfaces
Keith B. Rodenhousen, Negin Kananizadeh, Charles Rice, Jaewoong Lee, Derek Sekora, Mathias Schubert, Eva Schubert, Shannon Bartell-Hunt, Yusong Li

(699a) Adaptive, Point-to-Point Assembly of DNA Nanotubes Between Molecular Landmarks
Rebecca Schulman, Abdul M. Mohammed, John Zenk, Petr Sali

(699b) Photo-Triggered Self-Assembly and Actuation of DNA Nanostructures and Machines Using Photocaged Nucleotides
Nicholas Stephanopoulos

(699c) Biological Self-Recognition and Self-Assembly for the Next Generation of Hybrid Wires
Xiao Hu, Chenbo Dong, Biga Su, Quan Xu, Cerasela Zoica Dinu

(699d) pH Sensing through Silicon Nanoribbon/Carbon Nanotube Porin Hybrid Sensor
Huanan Zhang, Ramya Tunanguntla, Scott Dluhy, Aleksandr Noy

(699f) Design of Membrane-Embedded Amphiphilic Nanoparticles from Atomistic Molecular Dynamics Simulations
Reid Van Lehn, Alfredo Alexander-Katz

(699g) Photo-Electrochemical Characterizations of Photosystem I (PS I) Assembly Under Bio-Mimetic Membrane Confinement
Hanieh Niroomand, Dihyenda Mukherjee, Bamin Khomami
(699h) Modeling Protein Folding/Aggregation on Nanoparticle Based Biosensors in Complex Solvent Environments By a Coarse Grained Simulation System ................................................................. 300
Shuai Wei, Charles L. Brooks III

(699i) Aggregation-Induced Emission of Hydrophobically-Modified Metal Clusters in Lipid Nanodiscs ................................................................. 301
Armin Tahmasbi Rad, Justin Letendre, Elena Dormidontova, Flavio Maran, T. J. Mountziaris, Mu-Ping Nieh

(699j) Delta- and Proteorhodopsin-Based Bionanoelectronic Devices for Light-Controlled Conversion of Protonic to Electronic Currents ................................................................. 302
Jessica Soto-Rodríguez, Zahra Hemmatian, Erik E. Josberger, Marco Rolandi, François Baneyx

(699k) Self-Assembly of Protein Nano-Shapes Using Synthetic Coiled Coils ................................................................. 303
Won Min Park, Mostafa Bedewy, Karl K. Berggren, Amy E. Keating

(700a) Investigations of the Effect of Overhang and Strand Length on DNA Hybridization at the Solid-Liquid Interface ................................................................. 304
Jeremiah Traeger, Daniel Schwartz

(700b) Nitroaromatic Detection and Infrared Communication from Wild-Type Plants Using Plant Nanobionics ................................................................. 305

(700c) Multiplexed Detection of Protein Biomarkers Using Recognitive Polymers in a Localized Surface Plasmon Resonance Sensor Array ................................................................. 306
Heidi Culver, Ishna Sharma, Nicholas A. Peppas

(700d) Development of a Metal Tungstate-Based Nanoparticle Platform for CT-Guided Chemo/Radio Therapy ................................................................. 307
Jaewon Lee, Seulgi Choi, You-Yeon Won, Hock Gan Heng, Sandra E. Torregrosa-Allen, Benjamin S. Ramsey, Bennett D. Elzey

(700e) DNA Functionalized, Fluorescent Nanomaterials for the Specific, Ratiometric Detection of Dopamine for In Vivo Sensing ................................................................. 308
Jackson Travis Del Bonis-O’Donnell, Ami Thakrar, Jeremy Wain-Hirschberg, Deborah K Fygenson, Sumita Pennathur, Markita Landry

Ruoxue Yan, Songyon Kim, Yangzi Zhu

(700g) Multifunctional Theranostic Silica-Gold Core-Shell Nanoparticles for Breast Cancer Applications ................................................................. 310
Derek Vandyke, Prakash Rai

(700h) Nanostructured Polymeric Membranes for Overcoming Obstacles Associated with the Use of Exhaled Breath Acetone As a Non-Invasive Biomarker for Diabetes ................................................................. 311
Anastasios Angelopoulos, Jonathan A. Bernstein
