2013 32nd International Conference of the Chilean Computer Science Society (SCCC 2013)

Temuco, Cautin, Chile
11 – 15 November 2013
Table of Contents

Foreword .................................................................................................................................................... viii
Conference Organization ........................................................................................................................... ix
Program Committee ..................................................................................................................................... x

Algorithms and Efficiency

Parallel Lepp-Bisection Algorithm over Distributed Memory Systems ......................................................... 1
Pedro A. Rodríguez and Maria Cecilia Rivara

Analysis of Cost-Aware Policies for Intersection Caching in Search Nodes ............................................... 4
Esteban Feuerstein and Gabriel Tolosa

Programming Languages

A Case-Based Reasoning Approach to Find Good Compiler Optimization Sequences ........................................ 8
Ewerton Daniel de Lima, Anderson Faustino da Silva, and Carlos Herrera

Software Engineering

An Overview of Syntactic and Semantic Issues in Software Product Lines .................................................... 11
Samuel Sepúlveda, Carlos Cares, and Cristina Cachero

A Conceptual Framework to Develop Mobile Recommender Systems of Points of Interest ........................................ 16
Gonzalo Rojas and Claudio Uribe

Exploring the Trust and Knowledge Obsolescence Relation ........................................................................ 21
Pablo Cruz and Hernán Astudillo

Implementing HOTs that Generate Transformations with Two Input Models .............................................. 26
Luis Silvestre, Maria Cecilia Bastarrica, and Sergio F. Ochoa

Mobile Application Monitoring .................................................................................................................. 30
Sebastian Vasquez and Jocelyn Simmonds
Computational Intelligence and Pattern Recognition

Tape Mbo’e (TME): A Service-Oriented Method .................................................................33
Ilse Grau, Luca Cernuzzi, and Adolfo Villafiorita

Toward a more Generalized Quantum-Inspired Evolutionary Algorithm for Combinatorial Optimization Problems .................................................................38
Julio Manuel Alegria Reymer and Yván Jesús Túpac Valdivia

Wind Speed Forecast under a Distributed Learning Approach ........................................44
Héctor Allende-Cid, Héctor Allende, Raúl Monge, and Claudio Moraga

New Version of Davies-Bouldin Index for Clustering Validation Based on Cylindrical Distance .............................................................................................................49
Juan Carlos Rojas Thomas, Matilde Santos Peñas, and Marco Mora

Combining Techniques to Find the Number of Bins for Discretization .........................54
Miguel A. Álvarez Carmona, Jesús Ariel Carrasco Ochoa, and José Fco. Martínez Trinidad

Information Retrieval Based on a Query Document Using Maximal Frequent Sequences ..................................................................................................................58

Anomaly Detection Using Forecasting Methods ARIMA and HWDS ............................63
Eduardo H. M. Pena, Marcos V. O. de Assis, and Mario Lemes Proença

A Descriptor for Handwritten Strokes Off-Line Analysis: A Preliminary Study .............67
Verónica Aubin and Marco Mora

OVMMSOM: A Variation of MMSOM and VMSOM as a Clustering Technique ............72
Franco Sánchez Huertas, Raquel Patiño Escarcina, and Yván Jesús Túpac Valdivia

Digital Image Processing by a Parallel Selective Model ..................................................76
Henrique Shishido, Ronaldo Augusto de Lara Gonçalves, and Anderson Faustino da Silva

Combining Descriptors Obtained through Different Sampling Techniques in Image Retrieval .............................................................................................................81
Tomás Mardones, Héctor Allende, and Claudio Moraga

Networking and Distributed Systems

Testing MapReduce Programs: A Mapping Study ..............................................................85
Luiz Carlos Camargo and Silvia Regina Vergilio
