2016 IEEE 2nd International Conference on Collaboration and Internet Computing (CIC 2016)

Pittsburgh, Pennsylvania, USA
1-3 November 2016
Table of Contents

Message from the General Chairs ................................................................. xii
Message from the Program Chairs ........................................................... xiv
Organizing Committee ............................................................................ xvi
Steering Committee ................................................................................ xvii
Technical Program Committee ............................................................... xviii
External Reviewers .................................................................................. xix
Keynotes .................................................................................................. xx
Tutorials ................................................................................................... xxxi

Session 1: Collaboration

Discovering Opinion Changes in Online Reviews via Learning Fine-Grained
Sentiments .................................................................................................. 1
  Zihang Liu, Yu-Ru Lin, Maoquan Wang, and Zhao Lu

Business Process Tasks-Assignment and Resource Allocation
in Crowdsourcing Context ........................................................................ 11
  Kahina Bessai and François Charoy

Why Is It Difficult for Welfare Recipients to Return to Work? A Case Study
through a Collaborative Online Community ............................................ 19
  Surya Nepal and Cécile Paris

Social-PPM: Personal Experience Sharing and Recommendation .................. 29
  Anne H.H. Ngu, Shawn Fang, and Helen Paik
Session 2: Access Control

An Attribute-Based Access Control Extension for OpenStack and Its Enforcement Utilizing the Policy Machine
Smriti Bhatt, Farhan Patwa, and Ravi Sandhu

A Patient-Centric Attribute Based Access Control Scheme for Secure Sharing of Personal Health Records Using Cloud Computing
Harsha S. Gardiyawasam Pussewalage and Vladimir Oleschuk

Capturing Policies for Fine-Grained Access Control on Mobile Devices
Prajit Kumar Das, Anupam Joshi, and Tim Finin

An Administrative Model for Collaborative Management of ABAC Systems and Its Security Analysis
Sadhana Jha, Shamik Sural, Vijayalakshmi Atluri, and Jaideep Vaidya

Session 3: Privacy

RahasNym: Pseudonymous Identity Management System for Protecting against Linkability
Hasini Gunasinghe and Elisa Bertino

Big Data Privacy Risk: Connecting Many Large Data Sets
Star Ying and Tyrone Grandison

Collaborative Differentially Private Outlier Detection for Categorical Data
Hafiz Asif, Tanay Talukdar, Jaideep Vaidya, Basit Shafiq, and Nabil Adam

Brain Computer Interface (BCI) Applications: Privacy Threats and Countermeasures
Hassan Takabi, Anuj Bhalotiya, and Manar Alohaly

Session 4: Data Security

Towards a Science for Adaptive Defense: Revisit Server Protection
Zhisheng Hu, Ping Chen, Yang Lu, Minghui Zhu, and Peng Liu

Smart Moving Target Defense for Linux Container Resiliency
Mohamed Azab, Bassem M. Mokhtar, Amr S. Abed, and Mohamed Eltoweissy

QL-SimP: Query Language for Secure Interoperable Multi-Granular Provenance Framework
Amani Abu Jabal and Elisa Bertino

Software Security Professionals: Expertise Indicators
Mortada Al-Banna, Boualem Benatallah, and Moshe Chai Barukh
Session 5: Cloud and Internet

Modeling Data-Plane Power Consumption of Future Internet Architectures ...........................................149
Chen Chen, David Barrera, and Adrian Perrig

The Flip-Flop SLA Negotiation Strategy Using Concession Extrapolation
and 3D Utility Function ......................................................................................................................................159
Waheed Aslam Ghumman, Alexander Schill, and Jörg Lässig

A Programming Language and System for Heterogeneous Cloud of Things ......................................169
Robert Wenger, Xiru Zhu, Jayanth Krishnamurthy, and Muthucumaru Maheswaran

Information Fusion Architecture for Variable-Load Scheduling in a Cloud-Assisted CPS 178
Brijesh Kashyap Chejerla and Sanjay Madria

Session 6: Web Security and Privacy

On the Imminent Advent of Botnet Powered Cracking ....................................................................................188
Jega Anish Dev

Hardening the OAuth-WebView Implementations in Android Applications by Re-Factoring the Chromium Library ...................................................................................................................196
Fadi Mohsen and Mohamed Shehab

Invited Paper: A Model of Paradoxical Privacy Behavior in Online Users ................................................206
Christopher Griffin, Sarah Rajtmajer, and Anna Squicciarini

Differentially Private Distributed Data Analysis ..........................................................................................212
Hassan Takabi, Samir Koppikar, and Saman Taghavi Zargar

Session 7: Distributed Processing

Collaborative Scientific Workflow Composition as a Service: An Infrastructure Supporting Collaborative Data Analytics Workflow Design and Management .........................................................219
Jia Zhang, Qihao Bao, Xiaoyi Duan, Shiyong Lu, Lijun Xue, Runyu Shi, and Pingbo Tang

Statistical Verification of Process Conformance Based on Log Equality Test ........................................229
Hyerim Bae, Sung-Hyun Sim, Yulim Choi, and Ling Liu

A Transaction Model with Multilevel Consistency for Shared Data in Distributed Groupware Systems ..................................................................................................................................236
Anand Tripathi

Application of Bloom Filter for Duplicate URL Detection in a Web Crawler .......................................246
Aveksha Kapoor and Vinay Arora
Session 8: Twitter and Sentiments

TweetRipple: Understanding Your Twitter Audience and the Impact of Your Tweets .................................................................
Amanda Dennett, Surya Nepal, Cecile Paris, and Bella Robinson ............................ 256

Measuring Quality of Collaboratively Edited Documents: The Case of Wikipedia .............................................................
Quang-Vinh Dang and Claudia-Lavinia Ignat ................................................ 266

Gathering High Quality Information on Landslides from Twitter by Relevance Ranking of Users and Tweets .................................................................
Aibek Musaev and Qixuan Hou ................................................................. 276

Integrating Multiple Data Sources to Enhance Sentiment Prediction .............................................................
Brian Heredia, Taghi M. Khoshgoftaar, Joseph Prusa, and Michael Crawford ................................ 285

Session 9: Data Processing

Constructing the Three Graphs for the Large-Scale Heterogeneous Information System .............................................................
Bing Li ................. 292

Compacted Bloom Filter ........................................................................
Negar Mosharraf, Anura P. Jayasumana, and Indrakshi Ray ................. 304

Information Diffusion Analysis of Rumor Dynamics over a Social-Interaction Based Model .............................................................
De Wang, Aibek Musaev, and Calton Pu ................................................................. 312

Feature-Based Adaptation and Its Implementation .............................................................
Anne Marie Amja, Abdel Obaid, Hafedh Mili, and Zahi Jarir ................................ 321

Session 10: Mining

Detecting Discrimination in a Black-Box Classifier .............................................................
Yasmeen Alufaisan, Murat Kantarcioğlu, and Yan Zhou ............................ 329

Inferred Awareness to Support Mixed-Activity Collaboration .............................................................
Prasun Dewan ................. 339

Differentiating Non-Isomorphic Graphlets for Graph Analytics .............................................................
John Calvin Alumbaugh, Qinghua Li, and Vincent Hu ................................................................. 349

The Roles of Information Seeking Dynamics in Sustaining the Community Participation .............................................................
Xidao Wen, Di Lu, Yu-Ru Lin, and Claudia López ................................ 357
Session 11: Online Social Networks

DLSAS: Distributed Large-Scale Anti-Spam Framework for Decentralized Online Social Networks .................................................................363
   Amira Soliman and Sarunas Girdzijauskas

Distributed Large-Scale Data Collection in Online Social Networks .................................................................373
   Hariton Efstathiades, Demetris Antoniades, George Pallis, and Marios D. Dikaiakos

Session 12: Citizens and Society

Trip Route Planning for Bicycle-Sharing Systems ..................................................................................381
   Jiawei Zhang and Philip S. Yu

CyanoTRACKER: A Citizen Science Project for Reporting Harmful Algal Blooms .................................................................391
   Michael D. Scott, Lakshmish Ramaswamy, and Victor Lawson

Can a Government Use Social Media to Support Disadvantaged Citizens? ........................................398
   Cecile Paris and Surya Nepal

Session 13: Data Security 2

Towards Automated Threat Intelligence Fusion ....................................................................................408
   Ajay Modi, Zhibo Sun, Anupam Panwar, Tejas Khairnar, Ziming Zhao,
   Adam Doupé, Gail-Joon Ahn, and Paul Black

Enabling Attribute Based Encryption as an Internet Service .................................................................417
   Runhua Xu and James B.D. Joshi

Workshop: ISCBD and TrustCol 2016

Characteristics and Requirements of Big Data Analytics Applications ..............................................426
   Jameela Al-Jaroodi and Nader Mohamed

Knowledge Graph-Based Query Rewriting in a Relational Data Harmonization Framework .................................................................433
   Neda Abolhassani, Teresa Tung, Karthik Gomadam, and Lakshmish Ramaswamy

Image-Based Seed Generation ..............................................................................................................439
   Nader Nassar and Li-Chiou Chen

TrustZone Explained: Architectural Features and Use Cases ...............................................................445
   Bernard Ngabonziza, Daniel Martin, Anna Bailey, Haehyun Cho, and Sarah Martin

Cloud Security: A Review of Current Issues and Proposed Solutions ..............................................452
   Napoleon C. Paxton
Workshop: CIC-DM 2016

Using Biased Social Samples for Disaster Response: Extended Abstract ..................................................456
Fred Morstatter

Monitoring Collective Attention During Disasters ..........................................................................................458
Xingsheng He and Yu-Ru Lin

"Our Hearts Go Out": Social Support and Gratitude after Disaster ..........................................................463
Kimberly Glasgow, Clay Fink, Jessika Vitak, and Yla Tausczik

Data Driven Approaches to Define Acute Care Referral Regions and Resources ...........................................470
David J. Wallace

Little Data, Big Stories: Taking the Pulse of Large-Scaled Events on Twitter ..............................................474
Patrick M. Dudas, Samantha Weirman, and Christopher Griffin

Social Safety Guard Based on Internet of Things ..........................................................................................483
Jae-gun Moon, Jinseong Kim, Im Y. Jung, and Su-an Eom

Using the Social Network Internet of Things to Mitigate Public Mass Shootings ......................................486
Irena Gao

Crowdsourcing-Based Disaster Management Using Fog Computing in Internet of Things Paradigm ...............490
Ashish Rauniyar, Paal Engelstad, Boning Feng, and Do Van Thanh

Tracking Disaster Response and Relief Following the 2015 Nepal Earthquake ...........................................495
Yue Su, Ziyi Lan, Yu-Ru Lin, Louise K. Comfort, and James Joshi

Probing Construct Validity in Data-Driven Disaster Analysis ........................................................................500
Wen-Ting Chung and Yu-Ru Lin

Workshop: PiCSoC 2016

Privacy by Socio-Technical Design: A Collaborative Approach for Privacy
Friendly System Design ...............................................................................................................................502
Martin Degeling, Christopher Lentzsch, Alexander Nolte, Thomas Herrmann, and Kai-Uwe Loser

Using Transfer Learning to Identify Privacy Leaks in Tweets ......................................................................506
Saul Ricardo Medrano Castillo and Zhiyuan Chen

Privacy Settings Recommender for Online Social Network ........................................................................514
Davide Alberto Albertini, Barbara Carminati, and Elena Ferrari

Towards Measuring Knowledge Exposure in Online Social Networks ......................................................522
Amirreza Masoumzadeh and Andrew Cortese

Access Control Models for Cloud-Enabled Internet of Things: A Proposed Architecture and Research Agenda ..........................................................................................................................530
Asma Alshehri and Ravi Sandhu
If You Can't Measure It, You Can't Manage It: Towards Quantification of Privacy Policies .................................................................539
  Manar Alohaly and Hassan Takabi

The Listening Patterns to System Events by Benign and Malicious Android Apps .............................................................................546
  Fadi Mohsen and Mohamed Shehab

A Dynamic Privacy Aware Access Control Model for Location Based Services .................................................................554
  Leila Karimi, Balaji Palanisamy, and James Joshi

Author Index ..............................................................................................................................................................................558
