Reviewers ....................................................................................................................................................................................................................xi
Keynotes ...................................................................................................................................................................................................................xii

ICECCS 2016

Fostering Software Architect and Programmer Collaboration ..................................................................................................................3
  Van Cam Pham, Shuai Li, Ansgar Radermacher, Sébastien Gérard, and Chokri Mraidha
Formally Describing the Architectural Behavior of Software-Intensive
Systems-of-Systems with SosADL .................................................................................................................................13
  Flavio Oquendo
TORUS: Tracing Complex Requirements for Large Cyber-Physical Systems ........................................................................................................23
  Barry Dowdeswell, Roopak Sinha, and Enrico Haemmerle
A Spatial Logic for Modeling and Verification of Collision-Free Control
of Vehicles ........................................................................................................................................................................................................33
  Bingqing Xu and Qin Li
Stepwise Formal Modeling and Verification of Self-Adaptive Systems
with Event-B. The Automatic Rover Protection Case Study ..............................................................................................................43
  Neeraj Kumar Singh, Yamine Aït-Ameur, Marc Pantel, Arnaud Dieumegard, and Eric Jenn
Verification of Nash-Equilibrium for Probabilistic BAR Systems ........................................................................................................53
  Dileepa Fernando, Naipeng Dong, Cyrille Jegourel, and Jin Song Dong
A Semantic Approach for Managing Trust and Uncertainty in Distributed
Systems Environments ..............................................................................................................................................................................63
  Fano Ramparany, Ravi Mondi, and Yves Demazeau
Semantic Technologies for Realising Decentralised Applications for the Web of Things 

*Felix Leif Keppmann, Maria Maleshkova, and Andreas Harth*

Engineering Socially-Aware Systems and Applications

*Muhammad Ashad Kabir, Jun Han, Alan Colman, Naif R. Aljohani, Mohammed Basheri, Zhenchang Xing, and Shang-Wei Lin*

Pareto Optimal Scheduling for Synchronous Data Flow Graphs on Heterogeneous Multiprocessor

*Yu-Lei Gu, Xue-Yang Zhu, Guangquan Zhang, and Yifan He*

Improving Quality of Use Case Documents through Learning and User Interaction

*Shuang Liu, Jun Sun, Hao Xiao, Bimlesh Wadhwa, Jin Song Dong, and Xinyu Wang*

An Experiment on Decision Diagrams for Model Checking Probabilistic Timed Automata

*Wei Ji, Farn Wang, Peng Wu, and Yi Lv*

Data Analysis of Digital Currency Networks: Namecoin Case Study

*Tao-Hung Chang and Davor Svetinovic*

Developing Multi-view Contracts Using Event-B and Uppaal Timed Automata

*Jüri Vain, Leonidas Tsiopoulos, and Jishu Guin*

Concurrent On-the-Fly SCC Detection for Automata-Based Model Checking with Fairness Assumption

*Zhimin Wu, Yi Xu, Akin Gunay, Yang Liu, and Shengchao Qin*

Universal Analysis and Detection Framework for Location Aided Routing

*Xin Zhang, Xiaohong Li, Zhiyoug Feng, and Guangquan Xu*

Guiding the Selection of Security Patterns for Real-Time Systems

*Anas Motii, Brahim Hamid, Agnes Lanusse, and Jean-Michel Bruel*

Using Mobile Phone Based Camera to Read Information from a Li-Fi Source

*Sreesha Damodaran, Talal Shaikh, and Nicholas K Taylor*

Towards SDN Network Proofs — Taming a Complex System

*Matt Stevens, Bryan Ng, David Streader, and Ian Welch*

From Code to Design: A Reverse Engineering Approach

*Elliot Varoy, John Burrows, Jing Sun, and Sathiamoorthy Manoharan*

CostDL: A Cost Models Description Language for Performance Metrics in Database

*Abdelkader Ouared, Yassine Ouhammou, and Ladjel Bellatreche*

A Collaborative Code Review Platform for GitHub

*Akshay Kalyan, Matthew Chiam, Jing Sun, and Sathiamoorthy Manoharan*
Meduse: An Approach for Tailoring Software Development Process .......................................................197
   Sara Casare, Tewfik Ziadi, Anarosa Alves Franco Brandão, and Zahia Guessoum
Bridging Missions and Architecture in Software-Intensive Systems-of-Systems .................................201
   Eduardo Silva, Everton Cavalcante, Thais Batista, and Flavio Oquendo
Modelling Link State Routing in Event-B ..................................................................................................207
   Mojgan Kamali and Luigia Petre
Towards a User-Guided Difference-Based Detection of Atomic Changes ..............................................211
   Djamel Eddine Khelladi, Reda Bendraou, and Marie-Pierre Gervais
Extracting Permission-Based Specifications from a Sequential Java Program .......................................215
   Ayesha Sadiq, Yuan-Fang Li, Sea Ling, and Ijaz Ahmed
Towards Using Concurrent Java API Correctly ........................................................................................219
   Shuang Liu, Guangdong Bai, Jun Sun, and Jin Song Dong
Application of Organizational Process Asset Library in High Maturity Process Improvement ........................................................223
   Sidou Dong, Aihua Ren, and Xin Wang
Experimental Frailty Model towards an Adaptable Service Delivery for Aging People ........................................................227
   Joaquim Bellmunt, Mounir Mokhtari, Bessam Abdulzarak, Hamdi Aloulou, and Martin Kodyš
Automatic Construction of Callback Model for Android Application ..................................................231
   Chenkai Guo, Quanqi Ye, Naipeng Dong, Guangdong Bai, Jin Song Dong, and Jing Xu
Detecting Inconsistencies in Rule-Based Reasoning for Ambient Intelligence ............................................235
   Hamdi Aloulou, Romain Endelin, Mounir Mokhtari, Bessam Abdulrazak, Firas Kaddachi, and Joaquim Bellmunt

Author Index ............................................................................................................................................241
