**Volume 158**

11th International Conference on "Mesh methods for boundary-value problems and applications"

20–25 October 2016, Kazan, Russia

Accepted papers received: 14 November 2016
Published online: 19 December 2016

**Preface**

011001
OPEN ACCESS
11th International Conference on "Mesh methods for boundary-value problems and applications"

011002
OPEN ACCESS
Peer review statement

**Papers**

012001
OPEN ACCESS
Method of investigation of deformations of solids of incompressible materials

A I Abdrakhmanova, I R Garifullin and L U Sultanov.....1

012002
OPEN ACCESS
A variant of the method of quadratures for solving integral equations with fractional integral of Weyl in the main part

J R Agachev and A F Galimyanov.....5
012003
OPEN ACCESS
The calculation of weakly non-spherical cavitation bubble impact on a solid
A A Aganin, T S Guseva, L A Kosolapova and N A Khismatullina.....11

012004
OPEN ACCESS
Numerical simulation of liquid jet impact on a rigid wall
A A Aganin and T S Guseva.....17

012005
OPEN ACCESS
One algorithm for branch and bound method for solving concave optimization problem
A A Andrianova, A A Korepanova and I F Halilova.....23

012006
OPEN ACCESS
About decomposition approach for solving the classification problem
A A Andrianova.....30

012007
OPEN ACCESS
Dynamic generation of supercritical water fluid in a strong electrical discharge in a liquid
V Antonov, N Kalinin and A Kovalenko.....35

012008
OPEN ACCESS
Application of a second order accurate finite-difference method to problems of diffraction of elastic waves by gradient layers
A V Anufrieva, E V Rung and D N Tumakov.....40
012009
OPEN ACCESS
Capacitive coupled RF discharge: modelling at the local and not local statement of the problem
R M Askhatov, V Yu Chebakova and V S Zheltukhin.....48

012010
OPEN ACCESS
Numerical modeling of the initial fluctuation condensation stage with charge drops
T A Averina and G I Zmievska....53

012011
OPEN ACCESS
Longitudinal and transverse bending by a cylindrical shape of the sandwich plate stiffened in the end sections by rigid bodies
I B Badriev, M V Makarov and V N Paimuhin.....61

012012
OPEN ACCESS
On the Finite Element Approximations of Mixed Variational Inequalities of Filtration Theory
I B Badriev, V V Banderov, E E Lavrentyeva and O V Pankratova.....70

012013
OPEN ACCESS
Mathematical simulation of a steady process of anisotropic filtration
I B Badriev, V V Banderov, O V Pankratova and A I Shangaraeva.....76

012014
OPEN ACCESS
Numerical study of the three-degreed parametrically excited gyroscopic system
L Bakhtieva and V Bogolyubov.....84
On computational experiments in some inverse problems of heat and mass transfer

G G Bilchenko and N G Bilchenko.....119

Numerical research of parameters of interaction of the gas flow with rotary valve of the gas pipeline

A V Boldyrev, D L Karelin and V L Muljukin.....124

On the solving of one type of problems of mathematical physics

V J Chebakova, A V Gerasimov and A P Kirpichnikov.....133

Solution of the problem of interaction between capacitive coupled radio-frequency discharge and a sample

V Ju Chebakova, A F Gaisin and V S Zheltukhin.....137

Rare meshes FEM scheme for quasi-stationary electromagnetic fields determination 3D problems

D T Chekmarev, A V Kalinin, V V Sadovsky and A A Tiukhtina.....143

Simulation of a liquid drop on a vibrating hydrophobic surface

A A Chernova, S P Kopysov and L E Tonkov.....149
Discontinuous Galerkin schemes for nonstationary convection-diffusion problems

R Z Dautov and E M Fedotov

HDG schemes for stationary convection-diffusion problems

R Z Dautov and E M Fedotov

Numerical modeling of photonic crystal fibers using the finite element method

R Z Dautov and E M Karchevskii

Additive formulation elastoplasticity at finite strain

R L Davydov and L U Sultanov

Numerical investigation of large strains of hyperelastic solids

L R Fakhrutdinov and L U Sultanov

Vector random fields in mathematical modelling of electron motion

F G Gabbasov, V T Dubrovin and V J Chebakova

Solving of variational inequalities by reducing to the linear complementarity problem

Z R Gabidullina
Numerical analysis of nonlinear straining of non-shallow spherical shell subjected to thermal and force loadings
M S Ganeeva, V E Moiseeva and Z V Skvortsova.....193

The algorithm for investigation a structure of composite materials
I R Garifullin and L U Sultanov.....197

Evaluation of the stress-strain state of a one-dimensional heterogeneous porous structure
O Gerasimov, F Shigapova, Yu Konoplev and O Sachenkov.....201

The evolution of the bone in the half-plane under the influence of external pressure
O Gerasimov, F Shigapova, Yu Konoplev and O Sachenkov.....206

Mathematical modelling of the mass transfer process between two coaxial cylinders in the problem of thermal creep
O V Germider and V N Popov.....213

Numerical study of nanoparticle formation in a free turbulent jet
A K Gilfanov, W Koch, S K Zaripov and O D Rybdylova.....220
The finite element method scheme for a solution of an evolution variational inequality with a nonlocal space operator

O V Glazyrina and M F Pavlova.....226

The finite element method explicit scheme for a solution of one problem of surface and ground water combined movement

L L Glazyrina and M F Pavlova.....233

On norms of operators generated by shift transformations arising in signal and image processing on meshes supplied with semigroup structures

R N Gumerov.....240

Numerical simulation of dynamics of a gas bubble in liquid near a rigid wall during its growth and collapse

M A Ilgamov, L A Kosolapova and V G Malakhov.....245

Correctness investigation of a boundary value problem for a parabolic equation with nonlocal space operator with respect to the solution gradient

A S Ivanova and M F Pavlova.....252

Physical processes and modeling of plasma deposition and hardening of coatings-switched electrical parameters

A M Kadyrmetov and S N Sharifullin.....257
Modified Coulomb and Lorenz gauges in the modeling of low-frequency electromagnetic processes

A V Kalinin, A A Tiukhtina and S R Lavrova.....264

Composite mesh generator for CFD problems

E I Kalinin, A B Mazo and S A Isaev.....270

Error estimations of mixed finite element methods for nonlinear problems of shallow shell theory

M Karchevsky.....276

Some results of mesh convergence estimation for the spectral element method of different orders in FIDESYS industrial package

V S Karpenko, A V Vershinin, V A Levin and K M Zingerman.....279

Development of film- and- fabric composite materials durability assessing methodology under time-dependent influences of temperature and solar radiation

R A Kayumov, I Z Muhamedova, A M Suleymanov and B F Tazyukov.....285

Nonlinear problems of stability cylindrical panels with imperfection

R A Kayumov, B F Tazyukov and I Z Muhamedova.....293
012052
OPEN ACCESS
Numerical investigation of strong compression of vapor inside spherical cavitation bubbles
T F Khalitova and D Yu Toporkov.....298

012053
OPEN ACCESS
Waterflooding simulation of reservoir containing horizontal well stimulated by multistage hydraulic fracturing
A B Mazo, M R Khamidullin and K A Potashev.....303

012054
OPEN ACCESS
Decomposition method for zonal resource allocation problems in telecommunication networks
I V Konnov and A Yu Kashuba.....309

012055
OPEN ACCESS
Scalability of parallel finite element algorithms on multi-core platforms
S P Kopysov, A K Novikov, N S Nedozhogin and V N Rychkov.....316

012056
OPEN ACCESS
Consistent robust a posteriori error majorants for approximate solutions of diffusion-reaction equations
V G Korneev.....324

012057
OPEN ACCESS
Eigenvectors method in mechanics of solids one-dimensional linear boundary problems solution
E A Korovaytseva.....329
Study of motion of optimal bodies in the soil of grid method

V L Kotov and E Yu Linnik.....334

Udzawa-type iterative method with parareal preconditioner for a parabolic optimal control problem

A Lapin and A Romanenko.....340

Non-overlapping domain decomposition method for a variational inequality with gradient constraints

A Lapin, E Laitinen and S Lapin.....346

Multilayer neural network models based on grid methods

T Lazovskaya and D Tarkhov.....352

Influence of antenna dielectric cover on the parameters of the electrode microwave discharge

Yu A Lebedev, A V Tatarinov, A Yu Titov and I L Epstein.....359

Differential neural network approach in information process for prediction of roadside air pollution by peat fire

V Lozhkin, D Tarkhov, V Timofeev, O Lozhkina and A Vasilyev.....367
Detached eddy simulations of side-loads in an overexpanded nozzle flow
E A Luchikhina and L E Tonkov.....374

Flow past a porous cylinder in a rectangular periodic cell: Brinkman and Darcy models comparison
R F Mardanov, O V Soloveva and S K Zaripov.....379

Modeling of unsteady flow of viscous fluid in the channel of complex geometry
E A Marfin and A A Abdrashitov.....384

Multigrid finite element method in stress analysis of three-dimensional elastic bodies of heterogeneous structure
A D Matveev.....389

Upscaling of absolute permeability for a super element model of petroleum reservoir
A B Mazo and K A Potashev.....397

Localization of microseismic events and determination of source parameters
E V Mokshin and D V Berezhnoi.....403
Numerical modeling of two-phase high speed jet with non-equilibrium solid phase crystallization

A M Molchanov, D S Yanyshev and L V Bykov.....407

Layer-by-layer ordering in parallel finite element composition on shared-memory multiprocessors

A K Novikov, N K Piminova, S P Kopysov and YA Sagdeeva.....415

The study of the wedge-shaped vibration-driven robot motion in a viscous fluid forced by different oscillation laws of the internal mass

A N Nuriev, O S Zakharova, O N Zaitseva and A I Yunusova.....422

Transient reaction of an elastic half-plane on a source of a concentrated boundary disturbance

A S Okonechnikov, D V Tarlakovski, A N Ul'yashina and G V Fedotenkov.....430

Discrete-layered damping model of multilayer plate with account of internal damping

V N Paimushin and R K Gazizullin.....437

Acoustic impact on the laminated plates placed between barriers

V N Paimushin, R K Gazizullin and G V Fedotenkov.....448
On solvability of a elliptic-parabolic problem of nonlinear filtration theory
M F Pavlova and E V Rung.....460

Application of spectral elements method to calculation of stress-strain state of anisotropic laminated shells
K A Petrovskiy, A V Vershinin and V A Levin.....465

Computational technology of multiscale modeling the gas flows in microchannels
V O Podryga.....473

Determination of muscle effort at the proximal femur rotation osteotomy
O Sachenkov, R Hasanov, P Andreev and Yu Konoplev.....479

Solution for the problem of the Stokes flow past a body of arbitrary shape using conformal mapping
R R Salakhov, D F Abzalilov and S K Zaripov.....485

Numerical scheme for non-linear model of supercritical fluid extraction from polydisperse ground plant material: single transport system
A Salamatin.....490
Construction and use of numerical-analytical approximating functions

M N Serazutdinov.....496

Investigation of deformation at a centrifugal compressor rotor in process of interference on shaft

M R Shamim and D V Berezhnoi.....501

Method of the speed up calculations by the local Courant number for the filtration problem

A I Shangaraeva.....506

Methods of construction and study of Frankl system self-similar solutions in the hyperbolic case

T Shemyakina and S Alekseenkko.....512

Investigation of the influence of heated catalyst feeding system on the intensity of temperature-dependent chemical reaction in the fluidized bed apparatus

O V Soloveva and S A Solovyev.....519

Approximation of operator eigenvalue problems in a Hilbert space

S I Solovyev.....525
012088
OPEN ACCESS
Modelling of large deformations of elastoplastic solids using FEM
L U Sultanov.....531

012089
OPEN ACCESS
Investigation of oscillations of the elastic bodies with joined a mass-spring-damper systems
L U Sultanov.....535

012090
OPEN ACCESS
Calculation of elastic-plastic deformations by FEM
L U Sultanov.....540

012091
OPEN ACCESS
Iterative method for the numerical solution of a system of integral equations for the heat conduction initial boundary value problem
N N Svetushkov.....545

012092
OPEN ACCESS
On the existence of solutions of one nonlinear boundary-value problem for shallow shells of Timoshenko type with simply supported edges
S N Timergaliev and L S Kharasova.....550

012093
OPEN ACCESS
Computational experiment on the numerical solution of some inverse problems of mathematical physics
V I Vasil'ev, A M Kardashevsky and PV Sivtsev.....557
012094
OPEN ACCESS
Calculation of the effective thermal properties of the composites based on the finite element solutions of the boundary value problems

I I Vdovichenko, M Ya Yakovlev, A V Vershinin and V A Levin.....564

012095
OPEN ACCESS
Numerical solution of moving boundary problem for deposition process in solid fuel gas generator

V M Volokhov, S O Dorofeenko, M S Sharov and P D Toktaliev.....571

012096
OPEN ACCESS
Computer modeling of capillary flow with superimposed pulsations

A E Yaganova and E A Marfin.....577

012097
OPEN ACCESS
One cutting plane algorithm using auxiliary functions

I Ya Zabotin and K E Kazaeva.....582

012098
OPEN ACCESS
A minimization method on the basis of embedding the feasible set and the epigraph

I Ya Zabotin, O N Shulgina and R S Yarullin.....586

012099
OPEN ACCESS
Domain splitting algorithms for the Li-ion battery simulation

O Iliev and P E Zakharov.....592
Numerical studies on the performance of an aerosol respirator with faceseal leakage
S K Zaripov, I T Mukhametzanov and S A Grinshpun.....600

Polar-symmetric problem of elastic diffusion for isotropic multi-component plane
A V Zemskov and D V Tarlakovskii.....606

Third type boundary conditions for steady state ambipolar diffusion equation
V S Zheltukhin, S I Solov'ev, P S Solov'ev, V Yu Chebakova and A M Sidorov.....614

Existence of solutions for electron balance problem in the stationary radio-frequency induction discharges
V S Zheltukhin, S I Solovyev, P S Solovyev and V Yu Chebakova.....618

An approach for verification of finite-element analysis in nonlinear elasticity under large strains
K M Zingerman, A V Vershinin and V A Levin.....624
