International Conference on Electronic, Mechanical, Information and Management (EMIM 2016)

Advances in Computer Science Research Volume 40

Shenyang, China
1-3 April 2016

Part 1 of 3

Editors:

Wang Jing
Zhou Huiyu

Chang Guiran

ISBN: 978-1-5108-3569-6
# TABLE OF CONTENTS

## PART 1

### MANAGEMENT

- **Process Analysis of Condition Based Maintenance for Equipment** ................................................................. 1  
  Chunjian Wang, Hongjun Fan, Tiao Wang
- **Study of Selection of Timing System External Clock Synchronization Methods Based on Matrix Switch** ........... 6  
  Wei Wu, Haidong Zou, Yupeng Zhang
- **The Improvement of Quality Management Economics** .................................................................................. 10  
  Huibing Hao, Chunping Li
- **Application of Accounting in Human Resource Management** ................................................................. 13  
  Xiaoping Ruan, Shijun Liu
- **Research of Tourism and Cultural Marketing Operation Model** ................................................................. 17  
  Jinghui Qu
- **Research on the Driving Factors of Corporate and Loyalty Program Partnerships** ........................................... 22  
  Min Tian, Ting Qiu
- **Problems and Countermeasures on the Early Stage Property Management in Urban Residential District** ........ 27  
  Zhongxiang Yuan
- **Study on Present Situation of Discretion in Urban Management Comprehensive Law Enforcement** ................. 31  
  Jiang Nan
- **Problem Analysis and Countermeasures in the Development of Red Tourism** ................................................... 37  
  Yunli Shi
- **Studies on the Renewal Problems and Countermeasures of Shengli District in Yantai** .................................... 42  
  Chenghua Fu
- **The Impacts of Arctic Passages Opening on China’s International Shipping** ................................................ 46  
  Yixing Liu, Qiqi Zhao, Houming Fan, Xi Yao
- **An Analysis on the Development of Dong Nationality Settlement from Ecological Perspective** ....................... 51  
  Yanmin Liang, Zhimeng Huang
- **Study on the Influential Factors of Village Cadres’ Work Enthusiasm in Supply of Village-level Public Goods: Based on Survey Data in Fujian Province** .......................................................... 56  
  Min Tian, Weiping Liu, Xiaoyan Xing
- **Research on the Long-term Mechanism of Energy Reduction** .................................................................... 61  
  Ronglan He
- **Research on Mapping Petri-Net to UML in System Modeling** ................................................................. 66  
  Chunjian Wang, Wei Yue, Dongjia Du
- **Study on the Optimization of Selection from Primary-Standby Digital Tracking Receivers** ............................... 73  
  Haidong Zou, Jiurui Xu, Ning Dong
- **The Influence of Electronic Commerce on the Traditional Trade of Our Country** ........................................ 78  
  Kang Liu
- **Study on the Morphological Evolution and Boundary Spanning Role Generative Mechanism of Human Resource Management from the Perspective of Organization** ............................................... 82  
  Shijun Liu, Xiaoping Ruan
- **Evaluation of Straw Resources in Beijing-Tianjin-Hebei Area** .................................................................... 87  
  Jiaqi Li
- **Research on the Green Manufacturing System and Its Structure** ................................................................. 93  
  Ying Tao, Gang Zhao
- **The Effects of Conceptual Metaphor in Advertising Discourse between Chinese and Western Cultures** ........... 100  
  Dongyan Li, Qiqi Zhao
- **Investigation on Practice Teaching Mode of Business Administration** ............................................................. 104  
  Yan Jiang
- **Study on Profit of Participation Corporate in Loyalty Program Partnerships** .................................................. 108  
  Min Tian, Xinxing He
- **Study on the Construction of Urban Ecological Residential Area in Linyi City** ............................................ 113  
  Zhongxiang Yuan
- **A New Biased Estimator in Linear Regression Model** ................................................................................ 117  
  Haibing Hao, Chunping Li
- **Countermeasures Research on the Participation of Chinese Port in the "One Belt and One Road" Construction** .......... 122  
  Xi Tao, Yuan Gao, Houming Fan
- **Transition of the Administrative Mode of Electricity Account in Power Supply Enterprises** ............................ 128  
  Ying Feng
- **The Evaluation of City’s Low-carbon Development Based on the Fuzzy Analytical Hierarchy Process** ............ 132  
  Jiazhao An
- **Review of Innovation Theory Research on Low and Medium Technology Industry** ..................................... 136  
  Shouyu Chen
Supply Chain Benefits Distribution Model Based on Improved Shapley Value Method ................................................................. 299
Qingjun Li, Xiaoxia Guo

Comparative Analysis on BOT, PPP and ABS Project Financing Models .......................................................................................... 304
Lifen Wang

Orientation of Strategy of Private Universities under the Restructuring and Development of Sight — Four of the Orientation of Private Colleges .......................................................................................................................... 310
Changming Liu

Greenhouse Environment Monitoring System Design and Implementation ......................................................................................... 315
Wenqian Huang

Cultivation of College Students’ Library Consciousness As Well As Reform and Revolution of Library Administration in Colleges and Universities ........................................................................................................ 321
Chun Deng

Influencing Factors of NFDI Capital Volatility in the Process of Capital Account Liberalization ......................................................... 327
Yu Zhai

Collective Action and Equilibrium Solution on Social Network ......................................................................................................... 331
Jijin Sun, Yan Sheng

Post Impact Evaluation On Jiangsu Inland Waterway Infrastructure Projects ...................................................................................... 335
Jie Niu

Study on Listing Financing Distribution of GEM Companies and Influence Factors ................................................................. 339
Jiemin Huang

Integration of Globalization and Localization of TNCs and Corresponding Strategy of China ................................................................. 345
Liangyu Zhao

Review on Determinants of Corporate Bond Spread on the Basis of Liquidity Risk ........................................................................ 351
Chen Xue

Review on Term Structure ........................................................................................................................................................................ 355
Yan Wang

Overview and Prospect of Construction Labor Productivity ........................................................................................................... 359
Yishu Shang, Dong Zhai

Application of Extension Theory in the Assessment of Equipment Procurement Risk ................................................................... 365
Chunyan Wang

Research Status of Thermal Environment of Tents ............................................................................................................................... 372
Fei Wang

Analysis on Dynamic System of the Cultural and Creative Tourism Product Development .............................................................. 376
Haiyan Gao

Analysis on the Spreading Path on Line of Folk Culture in the Internet Era—Based on the Study of Folk Culture in Jilin Province .......................................................... 381
Chunyan Wang

Yue Wang

Analysis of the Influence Factors of Knowledge Transfer in University-Industry Collaborative Innovation ........................................ 391
Haiyan Gao

Online Review Impacts on Hotel Online Booking Decision ............................................................................................................. 396
Lifen Wang

Research of Hotspots and Emerging Trends in Chinese Logistics Research (2003-2013): A Visualization Analysis in Citation Space .................................................................................. 402
Qingjun Li, Xiaoxia Guo, Fei Wang

Research on the Management of Scientific Research Funds in Private Colleges and Universities ........................................................ 407
Jiemin Huang

Analysis on Marketing Case of Intel Electronic Products ................................................................................................................ 412
Yan Xiao

Research on the Relationship between Chinese Marine Economy Growth and Investment in Marine Technology ................................... 417
Jie Niu

Study on Properties of Corporate Marketing Network ....................................................................................................................... 422
Jiemin Huang

Haiyan Gao

Research on Health Related Physical Fitness of Chinese Li Nationality Students ........................................................................... 435
Chunyang Li, Xiaoxia Guo

A Preliminary Study on the Application of Logistics Distribution Strategy in B2C E-commerce Enterprises ........................................... 439
Chun Yang

Analysis on the Problems and Strategies of the Tourism Service Trade in Hainan ........................................................................... 444
Jie Niu

Evolutionary Game Analysis of Fog and Haze Phenomenon ............................................................................................................. 449
Lifen Wang

Study on the Innovative Methods of Construction Project Safety Management .................................................................................. 454
Yan Xiao

Review of Brands Economic Theory in China ........................................................................................................................................ 458
Yan Xiao
An Empirical Analysis on Consumption Effect of Chinese Growth Enterprise Market ............................................................... 463
Yan Li, Yuan Yuan
The Influencing Factors Analysis of China’s Equipment Manufacturing Industry in the Global Value Chain ................................................................. 467
Jemin Huang
Review on Public Crisis Management ......................................................................................................................................... 472
Jemin Huang
Basis on PMI of Corporate Bond Spreads Research .................................................................................................................. 476
Comprehensive Effectiveness Evaluation of Non-lethal Sonic Weapons ..................................................................................... 480
Xianpei Jiang, Li Pu, Sun Yue Guo, Dehua Ou Yang
The Influence of Duration Optimization on Cost ..................................................................................................................................... 487
Hao Yang, Yingni Jiang, Jingbo Liu, Zhengguo Gong
Discussion on Digital Development and Reuse of Teacher’s Professional Archives in Network Era .................................................. 492
Aitang Zuo
Research on Disaster Prevention and Mitigation of Urban Underground Space Engineering Specialty Course Teaching ......................................................................... 497
Guangbiao Shao
An Empirical Study on the Evaluation of the Performance of Private Universities .................................................................................. 502
Aihua Zhang
The Analysis of Government R&D Investment to the Innovation Intention of Chinese Enterprises with Different Nature ............................................................................................................................................. 507
Kuangjing Wang
Slow Traffic Space Planning of Modern Garden City Basing on Analyzing Spatial Characteristics of Land Use--with a Case Study of Xixian New District in Shaanxi .................................................................................................................................................. 512
Yuan Li, Yanhui Li, Kuanmin Chen
Research on Big Data Application in Precision Marketing .............................................................................................................. 517
Xiaoqiang Qin, Jinfeng Zhao
Transmission Line Collaborative Evaluation Index Inspection Benefit Set ........................................................................................................... 522
Jing Xu, Hanning Fu, Jingdong Li, Zhongfu Qin
A Study on the Characteristics of Chinese Citizens European Outbound Market and Its Targeted Expansion Strategy ............................................................................................................................................... 531
Si Li, Jianli Zhou, Zengwei Yang, Jiashun Shen, Qiuqiao Gong
Studies of Current Situation and Problems in Economic Development under the Constructive Background of ‘One Belt, One Road’ ............................................................................................................................................. 535
Chun Deng
Research into Various Aspects of Loss Brought by Urban Traffic Congestion and Countermeasures ...................................................... 540
Zixin Song, Lei Tian, Chao Zhang, Yucong Wu, Qian Luo

INFORMATION
Application of Firewall Technology and Research .......................................................................................................................... 545
Xiaoping Feng, Qi Zeng
Study on the Application of Power Marketing Inspection in Management Information System ................................................................. 548
Yichao Zheng
The Perlocutionary Act of Advertising Slogans ........................................................................................................................................ 551
Dongyan Li, Qingfeng Gao
The Research on Exploitation of Spot Statistic Data Visualization Software in Volleyball Match by Utilizing Microsoft Visual C++ 6.0 ..................................................................................................................................... 555
Xin Tan
Complex System Fault Diagnosis Method Based on CFFPN .................................................................................................................. 559
Yan Sa, Yiqiang Ling, Hui Wang
Frequency Bandwidth Management of Satellite Communication Network ...................................................................................................... 564
Zhengqun Hu
Colored Pencil Drawing Method Based on HSV Color Space ...................................................................................................................... 569
Feiyan Chen, Conghui Lu, Jiegang Liu
Design and Analysis of Network Disk System Based on Web .................................................................................................................. 578
Bin Liu, Yan Zhang, Mian Yi
Design and Implementation of Control System in a Satellite Voice Communication Terminal ..................................................................................................................................... 582
Lirong Zhang, Zhengguo Hu
Research and Design of the Web Service Application .......................................................................................................................... 587
Feng Zhou, Xiaoping Feng
Design and Analysis of Object-Oriented Embedded Device Detection Method ................................................................................................. 592
Lei Liu, Ting Cai
Protection and Development of Dong Nationality Settlement Pattern in Guangxi from the Perspective of Ecology .................................................. 596
Wenhuang Zhu
Microblogging Short Text Classification Based on Word2Vec .................................................................................................................. 601
Yonghui Zhang, Jinggang Liu
Research on the File Date Transportation Based on ZigBee Protocol .................................................................608
Jiaqiong Guo, Zhongsheng Wang

Controllability of Noncompact-semigroup Fractional Impulsive Neutral Functional Inclusions in Banach Spaces ………………………………………………………………………………………………………613
Zhixin Tai

Performance Analysis of Coding Scheme for Wireless Relaying Network ...............................................................621
Jing An

BCH Coding Watermarking Based on Discrete Wavelet Transform ......................................................................626
Jinyu Lu, Tao Qu

PART 2
Research on Electronic Educational Administration Platform.....................................................................................632
Tao Qiu, Jinyu Lu

About the Development of Higher Vocational Computer Application Technology Curriculum System …………………636
Lingyan Wang

On the "Internet Plus" Era and How to Regulate the Development of Network Language ........................................640
Wulan Wang, Hao Zhang

Two-tuples Linguistic Models and Methods for Target Threat Grading Assessment ...........................................644
Shuai Wang, Liang Ma

Practical Discussion for Enterprise Network Training in M Times .......................................................................650
Xuekun Hou, Xiangyan Wang, Jiang Luo

Design and Realization of Multi-port Register File based on Schematic Diagram .................................................654
Lihua Jiang, Cuihua Zuo

A New Query Method Based on Distance Education Database .................................................................................660
Wenxuan Gu, Cuo Yuan

Research on ESD Protection Design for Electronic Communication Products ......................................................665
Ke Yuan

Design and Implementation of Analytical CRM System Based on Improved Decision Tree ..................................669
Lan Wang, Wendi Gan

Browser Design and Analysis based on Java Language ..........................................................................................675
Mian Yi, Bin Liu, Yan Zhang

Segmentation of Ultrasonic Images Based on Modified Chan-Vese Algorithm ......................................................680
Liqun Wang, Honghui Fan

Image Resolution Enhancement Method Based on Feature Space .........................................................................685
Luo Qiu, Jingyuan Fan

Design of Smart Node and Routing Protocol Management in Wireless Sensor Networks .....................................690
Haijuan Sun

The Beijing-Tianjin-Hebei Region's Analysis of Air Quality Assessment .............................................................696
Xiaohui Sun

Formal Verification of Serial Port Module in Robot Control System ...................................................................701
Chenhai Lou, Xiaojian Li

Health Evaluation of B/S Information Management Software System .................................................................708
Xiaozhe Xie, Zhengwei Chang, Wei Jiang

Research and Practice of Inquiry Teaching of Management Information System Based on Network Learning .......713
Jiaming Zhong, Xiaoyang Qin, Jiuhu Zhang, Xiaoguang Tang

A Multi-Style License Plate Verification Method Based on Character Classification under Illumination Variances ............................................................718
Zhongyan Liang, Jie Hu, Qianjin Guo, Sanyuan Zhang

A Novel Multiclass Text Classification Algorithm Based on Multiconlitron ...........................................................724
Yaping Qin, Fengfeng Qiu, Guangkai Long, Aiha Zhang

The Key Technology of Image Transmission Based on ZigBee .............................................................................730
Jiaqiong Guo, Zhongsheng Wang

Digital Watermarking Based on the Error Correcting Coding .............................................................................735
Jinyu Lu, Tao Qiu

Research on Food Security Platform Based on the Internet of Things(IOT) and Software-as-a-Service (SaaS) ...741
Tao Qiu, Hongyu Ye

Research on the Schemes of Carrying Multi Service LTE Power Wireless Network ................................................746
Qing Liu

Design and Implementation of Bank Client Information Management System Based on Web ...............................751
Dehai Qiu, Ziyuan Yang

Research on Transport Development of Railway Container Technology ..........................................................755
Zhian Yin

Research into Corporate Shareholding Reform ......................................................................................................759
Qing Wang

Data Structure Course Teaching Reform Based on CDIO ........................................................................................763
Meiyuan Fu

Analysis on Influence of Environmental Factors to the Heat Loss of Petrochemical Heating Furnace Wall ..........767
Fenghong Pan, Jianjun Lan

Dynamic Focus Capture Method and Its Application................................................................. 947
Shoujin Wang, Yang Cao, Jingang Shi

Logarithmic Normal Population Distribution of Parameter of Joint Fiducial Region Estimation .................................................. 952
Xiaochen Li, Youying Ma, Chuanguang Huang

The Study on the Spectrum Sensing Technology in Wireless Cognitive Network .................................................. 956
Bing Hu

ELECTRONIC

A Design of Network Office System Based on ASP ................................................................. 962
Enhai Qiu, Jing Rao

Research on Creative Clothing Design Based on 3D Printing Technology .................................................. 966
Zhang Li

The Applied Research on BOT Mode about Urban Rail Transit Project .................................................. 973
Yongbo Yang, Cheng Zhang, Xiaoping Hu

Synthesis of Anion Starch Polymer Microsphere and Its Adsorption Properties for Metal Ions .................................................. 977
Yang Zhao, Yongming Zhang, Xiaoping Hu

Automotive Mechanical Braking and Stability Control Based on the Secondary Braking System .................................................. 981
Zongqi Yuan

A Method Achieving 860 Radar Angle Digital Conversion .................................................. 986
Xing Hui, Yandao Hu

Rectenna Design with Space Mapping Optimization .................................................. 991
Fang Zhang, Xin Liu

Research on a New Smart Methane & Solar Hybrid Power Generating System .................................................. 996
Yongrui Li

Research on the Image De-noising Algorithm Based on Wiener Filtering and Edge Modeling .................................................. 1000
Chuan Tian, Xin Li, Peng Wang

Study on Surface Texturization of Monocrystalline Silicon Wafers with Na₂CO₃ and NaHCO₃ Solutions .................................................. 1006
Junjun Ma, Shiqing Man

Mathematical Modeling of Solar Energy Fresh Air System .................................................. 1012
Lili Wang, Naixiu Ding, Mejia Wang

Aluminum Nitride Wide Band-gap Semiconductor and Its Basic Characteristics .................................................. 1018
Xinru Fu

Analysis on the Influence of Chinese Residents' Employment on Wages .................................................. 1022
Zhang Li

The Application of Equal Precision Frequency Measurement Technology in Motor Speed Measurement System Based on CPLD .................................................. 1027
Hai Li, Jing Li

Research on High-voltage Switchgear Multi-parameter Monitoring System .................................................. 1033
Fenghong Pan, Juanjun Lan

The Analysis of Lightning Protection Parameter for IDC Rooms .................................................. 1037
Xiangke Liu, Xianfeng Hu

Reservoir based on Intelligent Monitoring and Forecasting System .................................................. 1042
Yu Liu, Zhixue Lin, Jing Tian

Application of Gene Chip and Data Processing .................................................. 1047
Baiyi An, Wei Shen

Technical Analysis of Lightning Protection System in Urban Railway Transit .................................................. 1052
Qinglong Tang

The Improved K-nearest Neighbor Solder Joints Defect Detection .................................................. 1057
Meiju Liu, Lingyun Li, Wenbo Gao

Transfer Function Model Analysis of Two-Phase Traveling Wave Ultrasonic Motor .................................................. 1064
Dingjie Liu

Discussion on the Detection Method of Lightning Protection of Expressway Toll Station .................................................. 1071
Jingcha Sun

Design of Mine Safety Detection Alarm Based on Single-chip .................................................. 1075
Meiju Liu, Lingyun Li, Wenbo Gao

Research on the Developmental Trend of Wearable Devices from the Perspective of Human-Computer Interaction .................................................. 1080
Tsanhui Wang, Wenzun Huang

The Low-power Design of a Storage-type Downhole Pressure Gauge and Its Application .................................................. 1085
Liping Wang, Yong Peng, Heng Wu

Design and Implementation of Modern Agriculture Monitoring System .................................................. 1092
Dan Li

The Design of Cleaning Robot Based on ARM Microprocessor .................................................. 1097
Dan Li

Analysis of the Communication Demand of Smart Grid .................................................. 1101
Yongbo Yang, Cheng Zhang, Liqiang Lu, Ruihua Ren, Tao Fu, Xin Chen, Sun Jia, Bo Kong

The Analysis of Analog Circuits Fault Diagnosis Methods .................................................. 1107
Zhiqiang Zhang, Aihua Zhang
The Core Technology Research of GPS Navigation System Synchronization

The Control of Sensing Properties for Sm$_2$O$_3$-ZrO$_2$ Humidity Sensor

Research on the Interactive Intelligent Hardware System based on UI and UE Enhanced Design Pattern

Operation Mode and Switching Control Design for a Solar Energy Fresh Air System

Study on the Integration of Mathematical Modeling into Function of Complex Variable

Manhole Cover Intelligent Detection and Management System

The Development of Speed-Tension Type Three-motor Coordinate Synchronous Control Platform Based on Multi-microprocessor

The Application of Mathematical Morphology in the Disturbance Detection of Power Quality

Research on the Intelligent Information Processing Algorithm of Virtual Enterprise

Research on the Design and Implementation of Smart Home System based on ARM and ZigBee Techniques with the Analysis of Data Transmission Security Enhancement Model

Design of ECG Signal Acquisition and Processing Circuit

Smart Home System Implementation Based on ARM Microprocessor

Analysis of the Failure of Backup Automatic Switch in Substation

A New Approach to the Blind Deconvolution Problem Based on the Maximum Independence of Signals

A Kind of Scheme for Microgrid Protection

Design of a New Type of Charging Station for Solar Electric Vehicle

Improved Ant Colony Algorithm in Logistics Time Optimal Path Selection based on the Positive and Negative Feedback and Neighboring Rights

Available Transmission Capacity Considering N-1 Risks

Long Time Pulse Compression Method Based on Coherent Integration

Research on a New Automated Cash Register System

Research of Superfluorescent Fiber Source used in the Demodulation System of FBG Seismic Detector

Important Transfer Power Lines Analysis under Large Scale Direct Electricity Purchases

MECHANICAL

Design of Digital Barometer Based on Single-Chip Microcomputer Control

Small Supermarket Management System Based on VFP

Mechanism Design of Surmounting Obstacles Walking Machine

The Construction of Local Cultural Publicity Translation System

Study on Differentiated Service Scheme in Power Supply Enterprises

The Application of Applied Mathematics in Inventory Control
PART 3

Study on the Vibration Characteristics of a Complex Multiple Launch Rocket System .................................................................1262
Wenjing Tang, Xiaotian Rui, Fuyong Yang, Feifei Liu

Road, Bridge and Tunnel Engineering Construction Strengthening Technology of Grouting Method in Application ..................1268
Pengao Jin

Research on the Gauge-Invariant Energy Density of Similar Electromagnetic Properties of Gravitational Field ..........................1272
Benchao Zhu, Weizhe Jiang, Fan Zhang

Application and Analysis for Reclaimed Water System of a University in Tianjin .................................................................1277
Jingbo Liu, Yingzi Jiang, Zhengguo Gong, Hao Yang

Simulation of Constant Kinetic Energy Striking of Non-lethal Weapons’ Interior Ballistics ..................................................1281
Xiaojun Zhai, Li Pu, Xianpei Jiang, Yongjie Zhu

Xiangxiang Liu

Mobility Research of Six Pole Organizations .........................................................................................................................1293
Mengyujuan Xue, Yinwei Wang

Convenient Community Service System Based on Integrated Service Platform ........................................................................1297
Guangqiao Zhang, Guangfeng Liu, Wenlong Hu

Design and Realization of Community Service System Convenient for People ........................................................................1302
Yang He, Gongfa Li, Feng Du

Research and Implementation of Comprehensive Service System on Community Health Care ...............................................1307
Hao Zou, Guochang Jiang, Shuang Zhao, Zhujun Li, Minghao Chen, Rong Chen

Waist Structure Design and Analysis of Joint Type Robot ........................................................................................................1312
Wei Wu

Dynamical Hamilton Density of Gravitational Field ................................................................................................................1316
Benchao Zhu, Pengchao Zhang, Weizhe Jiang, Fan Zhang

Application and Analysis for Ground Water Heat Pump System of a University in Tianjin ..................................................1322
Jingbo Liu, Yingzi Jiang, Zhengguo Gong, Hao Yang

Research on Railway Transportation and Loading Reinforcement of the Special Purpose Vehicle ........................................1327
Li Pu, Xianpei Jiang, Caoshan Wang, Guangqiao Zhu

Analysis of Circuit Identification for Single Ring Space Agencies ........................................................................................1334
Fei Zhou, Guamian Lin

Construction and Prospect of Community Convenience System ..........................................................................................1338
Yajie Liao, Gongfa Li, Wenlong Hu

Research of Community Service Information System ..........................................................................................................1343
Bei Li, Gongfa Li, Heng Yang

The Design and Implementation of Community Service System Convenient for People ..........................................................1348
Shuang Zhao, Guochang Jiang, Hao Zou, Zhujun Li, Minghao Chen, Rong Chen

Feature Extraction Method for Fault Diagnosis of Rotating Machinery Based on Wavelet and LLE ......................................1353
Xiaoyang Zhang, Yuanchu Cheng, Xinfang Wang, Na Lu

Regenerative Braking Technology in Vehicle ......................................................................................................................1358
Wang Li

Effects of the Water and Sediment Discharge Regulation Project on Zooplankton in the Yellow River Estuary ..........................1362
Xiaoxia Wang, Fan Li, Yingjie Yue, Mingyi Song

Application of Grouting Reinforcement of Deep Foundation Pit Damaged by Heavy Rain ....................................................1368
Guangqiao Shao

Experimental Study on Temperature and Lateral Deformation of Rail at the Transition between Bridges and Tunnels ..................1373
Jun Luo, Zhijing Zeng, Xiaobai Meng, Shanyi Song

The Simulation of Propellant Fragmentation under Different Temperature ........................................................................1378
Chao Li, Xiaoting Rui, Yan Wang, Feifei Liu

Mechanical Property Verification of CRTS III Slab Track under Train Load ........................................................................1383
Konteng Zhu, Zhijing Zeng, Bin Wu, Wei Wei

The Real-time Computer Numerical Control Based on RCS ................................................................................................1389
Zhiman Li, Zhengyi Hu

Multifunctional Express Delivery Truck ................................................................................................................................1395
Niu Liu

Research on CAN Communication of Light Vehicle Driving Force Electronic Control System ..................................................1400
Shaoyu Li

Theoretical Investigations on Phase Stability of Tetragonal and Cubic Ga3Zr under High Pressure ........................................1404
Juan Li, Chuanyang Peng, Jiasheng Zhao, Le Chen, Xian Luo

The Design of Wheel Fanpa Machine .....................................................................................................................................1410
Jinling Zhao, Mei Tian

The Lipase-catalyzed Synthesis of Ethyl Ferulate ................................................................................................................1415
Qiannan Wang, Wei Zhang, Jiaying Xin

Braking Energy Recovery System Design .........................................................................................................................1420
Wang Li

Obtainment of the Envelope Graph of Bending Moments of the Solid Model of Slab Ballastless Track ......................................1424
Jun Luo, Zhijing Zeng, Xiaobai Meng, Shanyi Song
EDUCATION

Development and Application of English Listening and Speaking Teaching Materials ................................................................. 1446
   Xiaoyan Feng
Research on Core Knowledge Teaching in Higher Education ........................................................................................................ 1450
   Yongjian Huang
Language Anxiety in Teaching English and Its Solutions ........................................................................................................... 1453
   LinRen Luo, Shufei Xu
Study on the Development and Current Condition of English Language Arts Education in Internet Age ......................................... 1456
   Weixiang Liu, Li Li
Research on the Translation of Ancient Books .......................................................................................................................... 1459
   Siyu Zou
The Current Situation and Countermeasures of Cooperation between Private Universities and Enterprises ........................................ 1462
   Shuming Wang, Qingjun Liang, Wenzhun Huang
“Three Levels” Training Mode for Normal Students Teaching Practice Ability ........................................................................ 1468
   Jingfeng Li
Internationalizing Instructional Methodology for Postgraduates in Green Manufacturing ............................................................ 1474
   Dianlei Geng, Yan Gan
The Study of Business English Teaching Based on the Theory of Nida ................................................................................... 1479
   LiLian Chen
New Media Affecting College Students Consumption Behavior ................................................................................................ 1484
   Xinmin Liu
