2017 International Conference on Recent Advances in Signal Processing, Telecommunications & Computing (SigTelCom 2017)

Da Nang, Vietnam
9-11 January 2017
# Table of Contents

Message from the SigTelCom 2017 General Chairs ................................................................. ix

Executive Committee .............................................................................................................. xi

Technical Program Committee .............................................................................................. xiii

Additional Reviewers ............................................................................................................ xvii

Keynote Abstract ..................................................................................................................... xviii

## Signal Processing

- Beamformer and Time Split Design for Wireless Powered Multi-antenna Cooperative Systems
  
  Han Liang (Zhejiang University, P.R. China), Caijun Zhong (Zhejiang University, P.R. China), 
  Himal A Suraweera (University of Peradeniya, Sri Lanka), Gan Zheng (Loughborough University & 
  University of Luxembourg, United Kingdom), Zhaoyang Zhang (Zhejiang University, P.R. China) 
  1

- Dictionary learning based on sparse representations for resting-state functional MRI data analysis
  
  Hien M. Nguyen (Vietnamese-German University, Vietnam) .................................................. 7

- Analysis of the Least Squares Approach to Broadband Beamspace Beamforming
  
  Yuling Li (University of Leeds, United Kingdom), Desmond McLernon (The University of Leeds, 
  United Kingdom), Syed Ali Raza Zaidi (University of Leeds, United Kingdom) ................... 11

- Sparse Reconstruction of Time-Frequency Representation using the Fractional Fourier Transform
  
  Nguyen Yen (University of Leeds & Electronics and Electrical, Vietnam), Desmond McLernon (The 
  University of Leeds, United Kingdom), Mounir Ghogho (University of Leeds & International 
  University of Rabat, United Kingdom), Syed Ali Raza Zaidi (University of Leeds, United Kingdom) 
  16

- A Floating-point FFT Twiddle Factor Implementation Based on Adaptive Angle Recoding CORDIC
  
  Phuong-Thao Vo (The University of Science, Hochiminh City, Vietnam), Trong-Thuc Hoang (The 
  University of Science, Hochiminh City & The Faculty of Electronics and Telecommunications, 
  Vietnam), Pham Cong-Kha (The University of Electro-Communications (UEC), Japan), Duc- 
  Hung Le (The University of Science Ho Chi Minh City, Vietnam) ........................................... 21

## Telecommunications Systems and Networks

- Wireless Vehicular Networks in Emergencies: A Single Frequency Network Approach
  
  Andrea Tassi (University of Bristol, United Kingdom), Malcolm Egan (Université Blaise Pascal, 
  France), Robert J Piechocki (University of Bristol, United Kingdom), Andrew Nix (University of 
  Bristol, United Kingdom) ........................................................................................................ 27

- A Fast, Adaptive, and Energy-efficient Multi-path-multi-channel Data Collection Protocol for Wireless 
  Sensor Networks .....................................................................................................................
Cheng Kiat Tan (Universiti Tunku Abdul Rahman, Malaysia), Soung Yue Liew (Universiti Tunku Abdul Rahman, Malaysia), Hock Guan Goh (Universiti Tunku Abdul Rahman, Malaysia), Ivan Andonovic (University of Strathclyde, United Kingdom)

- Analysis of Millimeter Wave Cellular Networks with Simultaneous Wireless Information and Power Transfer
  Thanh Tu lam (CNRS, France), Marco Di Renzo (Paris-Saclay University / CNRS, France)

- An energy-aware multipath congestion control protocol for mobile devices
  Linh Pham (Faculty of Information Technology, Vietnam), Phuong L. Vo (HCM International University - VNU, Vietnam), Tuan-Anh Le (Thu Dau Mot University, Vietnam)

- Opportunistic Scheduling for Fixed-Gain Amplify-and-Forward-based Multiuser Multirelay SWIPT Cooperative Networks
  Nhu Tri Do (Hongik University, Korea), Daniel Benevides da Costa (Federal University of Ceara (UFC) & Area: Telecommunications, Brazil), Trung Q. Duong (Queen's University Belfast, United Kingdom), Vo Nguyen Quoc Bao (Posts and Telecommunications Institute of Technology, Vietnam), Beongku An (Hongik University, Korea)

Computing Technologies

- Optimization Vietnam Coast Station System Using Genetic Algorithm
  Nguyen Thai Duong (Vietnam Maritime University, Vietnam), Canh Son Nguyen (Vietnam Maritime University, Vietnam), Tran Xuan Viet (Vietnam Maritime University, Vietnam), Cao Duc Hanh (Vietnam Maritime University, Vietnam), Duc Trong Nguyen (Faculty of Information Technology, Maritime University, Vietnam)

- Interface Driven Service Composition: A Highlevel Colored PetriNet Based Approach
  Megha Gaur (National Institute of Technology, Durgapur, India), Amit Kr Mandal (National Institute of Technology, Durgapur (India), India), Anirban Sarkar (National Institute of Technology, Durgapur (India), India), Narayan Debnath (Winona State University, USA)

- QoS Lake: Challenges, Design and Technologies
  Faisal Ahmad (Software Developer, India), Anirban Sarkar (National Institute of Technology, Durgapur (India), India), Narayan Debnath (Winona State University, USA)

- Generalized Extra-Functional Properties composition for Component Based System
  Prasenjit Banerjee (Ravenshaw University, Odisha, India), Anirban Sarkar (National Institute of Technology, Durgapur (India), India), Narayan Debnath (Winona State University, USA)

- Jumbler: A Lock-Contention Aware Thread Scheduler for Multi-core Parallel Machines
  Uzair Bin Nisar (Capital University of Science and Technology, Pakistan), Muhammad Aleem (Capital University of Science and Technology, Pakistan), Muhammad Iqbal (Capital University of Science and Technology, Pakistan), Nguyen-Son Vo (Duy Tan University, Vietnam)

Signal Processing

- Develop an algorithm for image forensics using feature comparison and sharpness estimation
  Tu Huynh-Kha (Ho Chi Minh City University of Technology, VNUHCM & International University, VNUHCM, Vietnam), Thuong Le-Tien (Hochiminh city University of Technology, Vietnam), Synh
Ha-Viet-Uyen (International University-VNUHCM, Vietnam), Son Huynh-Thanh (Dong Thap Province, Vietnam), Khoa Huynh-Van (Ho Chi Minh City University of Technology (VNUHCM), Vietnam)

On the use of Convolutional Neural Networks for Graphical Model-based Human Pose Estimation
Huynh Vu (School of Engineering, RMIT University, Vietnam), Eva Cheng (RMIT University, Australia), Richardt Wilkinson (RMIT University, Australia), Margaret Lech (RMIT University, Australia)

Received Signal Strength Prediction using Gaussian Process
Anh Nguyen (Hanoi University of Science and Technology, Vietnam), Khanh Hung Nguyen (Hanoi University of Science and Technology, Vietnam), Nguyen Van Khang (Hanoi University of Science and Technology, Vietnam)

Distance Spectrum Calculation Method for Double Binary Turbo Codes
Jingli Deng (Beijing University of Posts and Telecommunications, P.R. China), Yuexing Peng (Beijing University of Posts & Telecoms, P.R. China), Hui Zhao (Beijing University of Posts and Telecommunications, P.R. China)

An Efficient Image Watermarking Scheme Using the Laplacian Pyramid based on Projection
Sy Nguyen (Hanoi University of Science and Technology, Vietnam), Ha H Kha (Ho Chi Minh City University of Technology, Vietnam), Hoang Minh Nguyen (Banking University of HCM City & Saigon Institute of Information Communications Technology, Vietnam)

Understanding the Impact of Planarized Proximity Graphs on Toxic Gas Boundary Area Detection
Zhihong Sun (Guangdong University of Petrochemical Technology, P.R. China), Haihui Wang (Wuhan Institute of Technology, P.R. China), Yuanfang Chen (Guangdong University of Petrochemical Technology, P.R. China), Lei Shu (Guangdong University of Petrochemical Technology, P.R. China), Mithun Mukherjee (Guangdong Provincial Key Lab of Petrochemical Equipment Fault Diagnosis, P.R. China)

Telecommunications Systems and Networks

Outage Probability of Full-Duplex Cognitive Relay Networks with Partial Relay Selection
Cheng Yin (Queen’s University Belfast & Queen’s University Belfast, United Kingdom), Xuan-Toan Doan (Queen’s University Belfast, United Kingdom), Nam-Phong Nguyen (Queen’s University Belfast, United Kingdom), Trang C. Mai (Queen’s University Belfast, United Kingdom), Long D. Nguyen (Queen’s University Belfast, United Kingdom)

Secrecy Outage Probability of Full-Duplex Networks with Cognitive Radio Environment and Partial Relay Selection
Muhamad Ayub Azaman (Queen’s University Belfast & Queen’s University Belfast, United Kingdom), Nam-Phong Nguyen (Queen’s University Belfast, United Kingdom), Dac-Binh Ha (Duy Tan University, Vietnam), Truong Vu (Duy Tan University, Vietnam)

Multi-way Massive MIMO Relay Networks with Maximum-Ratio Processing
Chung Ho (Queen’s University Belfast, United Kingdom), Hien Ngo (Linköping University, Sweden), Michail Matthaiou (Queen’s University Belfast, United Kingdom), Trung Q. Duong (Queen’s University Belfast, United Kingdom)
• Secrecy Performance Analysis of Cooperative Multiuser Single Carrier Systems
  Yijun Yang (College of Communications Engineering, P.R. China), Jinlong Wang (PLA University of Science and Technology, P.R. China), Jin Chen (PLA University of Sci. and Tech., P.R. China), Yujuan Liu (Unit 95035 of PLA, P.R. China), Yuzhen Huang (School of Information and Communication, Beijing University of Posts and Telecommunications, P.R. China) .......................................................... 129

• Secured Energy Harvesting Networks with Multiple Power-Constrained Information Sources
  Nguyễn Cẩm, Nhung (Duy Tan University, Vietnam), Doan-Thai Phuong-Cham (Duy Tan University, Vietnam), Dung Tran (Duy Tan University, Vietnam), Dac-Binh Ha (Duy Tan University, Vietnam) .......................................................... 134

Electronics & Control System

• Multi-Output Differential Power Processing System using Boost-Flyback Converter for Voltage Balancing
  Kyoungtak Kim (Soongsil University, Korea), Jounghu Park (Soongsil University, Korea) .......................................................... 139

• Fuzzy Adaptive Interactive Algorithm for Rig Balancing Optimization
  Việt-Dung Do (Ho Chi Minh City University of Transport, Vietnam & DongAn Polytechnic, Vietnam), Xuan-Kien Dang (Ho Chi Minh City University of Transport, Vietnam), An-Tinh Le (BaRia-VungTau Province Vocational College, Vietnam) .......................................................... 143

• Real-time Video Enhancement on FPGA by Context-based Fusion Technique
  Sang Nguyen (University of Information Technology, Vietnam), My Van The Nguyen (University of Information Technology, Vietnam), An Huynh (University of Information Technology & DH CNTT, Vietnam), Dao Tran (University of Information Technology, Vietnam) .......................................................... 149

• A 180-nm CMOS Bitmap-Index-Based Query Processor for Fast Data Analytics
  Xuan-Thuan Nguyen (The University of Electro-Communications, Japan), Hong-Thu Nguyen (The University of Electro-Communications, Japan), Pham Cong-Kha (The University of Electro-Communications (UEC), Japan) .......................................................... 155

• Null Convention Logic (NCL) based Asynchronous Design - Fundamentals and Recent Advances
  Linh Duc Tran (RMIT University Vietnam, Vietnam), Glenn I. Matthews (RMIT University, Australia), Paul Beckett (RMIT University, Australia), Alex Stojcevski (RMIT University Vietnam, Vietnam) .......................................................... 158

Telecommunications Systems and Networks

• Throughput Analysis of Energy Harvesting MIMO Relay Systems over Nakagami-m Fading Channels
  Ngoc Phuc Le (Duy Tan University, Vietnam), Nguyen-Son Vo (Duy Tan University, Vietnam), Tiep Minh Hoang (Queen's University Belfast, United Kingdom) .......................................................... 164

• Compact and Power-Efficient 5 GHz Full-Duplex Design Utilizing the 180°degree-Ring Hybrid Coupler
  Nathaniel Raymond (University of Akron, USA), Mike Seredich (University of Akron, USA), Tutku Karacolak (Washington State University Vancouver, USA), Nghi H Tran (University of Akron, USA), Duy H. N. Nguyen (San Diego State University, USA) .......................................................... 170

• Joint Time Switching and Rate Allocation Optimization for Energy Efficiency in Wireless Multimedia Sensor Networks
Thanh-Hieu Nguyen (Duy Tan University, Vietnam), Nguyen-Son Vo (Duy Tan University, Vietnam), Ba-Cuong Huynh (Duy Tan University, Vietnam), Hoang Minh Nguyen (Banking University of HCM City & Saigon Institute of Information Communications Technology, Vietnam), Thu De Huynh (Huazhong University of Science & Technology, Vietnam) ........................................................................................................................................ 175

● On the Efficient Use of Multi-line Rate Transponder for Shared Protection in WDM Network
  Dao Thanh Hai (Hanoi University of Industry, Vietnam), Kha Manh Hoang (Hanoi University of Industry, Vietnam) ........................................................................................................................................ 181

● An Efficient Genetic Algorithm Approach for Solving Routing and Spectrum Assignment Problem
  Dao Thanh Hai (Hanoi University of Industry, Vietnam), Kha Manh Hoang (Hanoi University of Industry, Vietnam) ........................................................................................................................................ 187

● Walsh-Hadamard Precoded Circular Filterbank Multicarrier Communications
  Quang Duong (University of Saskatchewan, Canada), Ha Nguyen (University of Saskatchewan, Canada) ........................................................................................................................................ 193

Telecommunications Systems and Networks

● The peculiar third-order differential characteristics of Midori64 block cipher(II)
  Yusuke Takahashi (Tokyo University of Science, Japan), Yasutaka Igarashi (Tokyo University of Science, Japan), Toshinobu Kaneko (Tokyo University of Science, Japan) ........................................................................................................................................ 199

● Chaos-based Spread-Spectrum Using M-ary PSK and OFDM-MIMO
  Nguyen Xuan Quyen (Hanoi University of Science and Technology, Vietnam), Lam Nguyen-Tung (Hanoi University of Science and Technology, Vietnam), Do Huy Duy (Hanoi University of Science and Technology, Vietnam), Nguyen-Son Vo (Duy Tan University, Vietnam), Nam-Phong Nguyen (Queen's University Belfast, United Kingdom) ........................................................................................................................................ 205

● Design of An Improved Multi-carrier DCSK System for Digital Communications
  Nguyen Huu Long (HUST, Vietnam), Nguyen Xuan Quyen (Hanoi University of Science and Technology, Vietnam), Van Yem Vu (Hanoi University Of Science and Technology & School of Electronics and Telecommunications, Vietnam) ........................................................................................................................................ 211

● Power Splitting for MIMO Energy Harvesting in Multi-User Networks
  Tam Ho (University of Technology, Sydney, Australia), Hoang D. Tuan (University of Technology, Sydney, Australia), Ali A Nasir (National University of Sciences and Technology (NUST), Pakistan), Trung Q. Duong (Queen's University Belfast, United Kingdom) ........................................................................................................................................ 217

● A Continuous Compressive Estimation Method with MSE-Optimal Thresholding for OFDM Channels with Off-Grid Quantization Paths
  Yuexing Peng (Beijing University of Posts & Telecoms, P.R. China), Da Fu (Beijing University of Posts and Telecommunications, P.R. China), Peng Wang (Huawei Technologies Sweden AB, Sweden), Yonghui Li (University of Sydney, Australia) ........................................................................................................................................ 223

● On the Energy Efficiency of NOMA for Wireless Backhaul in Multi-Tier Heterogeneous CRAN
  Hoo Q. Tran (Ho Chi Minh City University of Technology and Education, Vietnam), Truong Quang Phuc (HCMC University of Technology and Education, Vietnam), Ca V. Phan (Ho Chi Minh City University of Technology and Education, Vietnam), Quoc-Tuan Vien (Middlesex University, United Kingdom) ........................................................................................................................................ 229
Telecommunications Systems and Networks

- A Study on Link Quality in Single Hop Sensor Networks with Brownian Motion
  Trong-Minh Hoang (Posts and Telecommunications Institute of Technology, Vietnam) 235

- A Method to Approximate the Transmission Rate of Phase Signal with Amplitude Uncertainty
  Truc Thanh Tran (Danang Department of Information and Communication, Vietnam), Duy H. N. Nguyen (San Diego State University, USA), Sinh Nguyen (Duy Tan University, Vietnam), Van-Dung Hoang (Quang Binh University & University of Ulsan, Vietnam) 240

- Towards An IoT Network Testbed Emulated over OpenStack Cloud Infrastructure
  Quan Le-Trung (University of Information Technology - VNUHCM, Vietnam) 246
