2016 16th International Conference on Application of Concurrency to System Design (ACSD 2016)

Torun, Poland
19-24 June 2016
Temporal Logics

ACTL for Modal Interface Automata .................................................................1
   Ferenc Bujtor and Walter Vogler

From Petri Nets with Shared Variables to ITL ...........................................11
   Hanna Klaudel, Maciej Koutny, and Ben Moszkowski

Checking Metric Temporal Logic with TRACE ........................................19
   Martijn Hendriks, Marc Geilen, Amir R. B. Behrouzian, Twan Basten,
   Hadi Alizadeh, and Dip Goswami

Compositionality and Synthesis

The Congruences below Fair Testing with Initial Stability ........................25
   Antti Valmari

Weaving True-Concurrent Aspects Using Constraint Solvers ........................35
   Juliana K. F. Bowles, Behzad Bordbar, and Mohammed Alwanain
Verification
Controlling Actions and Time in Parametric Timed Automata .................................................................45
Étienne André, Michał Knapik, Wojciech Penczek, and Laure Petrucci

An Approach to Verification of MPI Applications Defined in a High-Level Model .......................................55
Ondřej Meca, Stanislav Böhm, Marek Běhálek, and Petr Jančary

System Design and Petri Nets
Products of Transition Systems and Additions of Petri Nets ........................................................................65
Raymond Devillers

Utilizing Petri Nets for Teaching in Practical Courses on Collaborative Software Engineering ...........................................74
Dennis Schmitz, Daniel Moldt, Lawrence Cabac, David Mosteller, and Michael Haustermann

Hardware
Power and Energy Normalized Speedup Models for Heterogeneous Many Core Computing ..................................................84
Mohammed A. N. Al-Hayanni, Ashur Rafiev, Rishad Shafik, and Fei Xia

Power-Normalized Performance Optimization of Concurrent Many-Core Applications ..................................................94
Matthew Travers, Rishad Shafik, and Fei Xia

Asynchronous Dataflow De-Elastisation for Efficient Heterogeneous Synthesis .................................................104
Mahdi Jelodari Mamaghani, Danil Sokolov, and Jim Garside

Model Checking and Evaluating QoS of Batteries in MPSoC Dataflow Applications via Hybrid Automata ................114
Waheed Ahmad, Marijn Jongerden, Mariëlle Stoelinga, and Jaco van de Pol

Author Index ............................................................................................................................................124
